http://novatech-instr.com/Fun/BC453_2.jpg

Exact parts depend upon your junk box. He'll have to get a dynamotor
if 28v is all he wants to supply.

Steve.

Check the voltages at the tube socket. Its possible there is a cold solder joint at the filament. Note that only part of the heat of a tube comes from the filament so beng warm but not hot may not indicate a bad tube but may

indicate the HV is not there. Make sure the "send/receive"
switch has not failed. That would cause a similar problem.
All of the handbooks have charts showing voltages at the
tube sockets. These should be checked with the tubes in
place, either at the bottom of the socket or by using a
socket extender. There may be a clue there.
    Also, don't trust the replacement resistors and
capacitors to be working. While they are in general quite
reliable you may have gotten a bad one so they should be
checked. I have a feeling this is something very simple of
the sort making you say Doh! when you find it:-)
    BTW, the NC-57 looks like a very good little receiver,
probably better than its competition the Hallicrafters S-40.

Hello all,

I am looking for a CLT-49043 chassis mount power connector
as used on the WWII era Westinghouse RBM series receivers.
It measures 1-3/8" outside diameter and has 8 short banana-style
pins. A photo of the connector at http://www.wa3key.com/miljack.jpg
I have the aluminum shell, so can get away with just the insert if
necessary. I'll also consider buying a junker unit to get a
connector. Thanks for your assistance.

All this is very interesting....   There's a bunch of things I find confusing.

1) Radiation vs conduction
On one hand it's obvious that a layer of dull, IR-black paint has a thermal insulation effect. But the same may be said of ANYTHING surrounding a tube. Even one of the "good" IERC shields must have an insulating effect of sorts. Moreover, the copper "fingers" are metal-shiny, obviously designed to sink heat by conduction, not by absorbing radiation.

2) Terminal filament temperature
The issue here isn't avoiding failures as much as increasing tube life. The heat issue in low power devices was much disregarded till close to the end of the tube era, due to engineering, commercial, and I believe psychological effects. In the end, microtubes used in the NORAD systems reached 500k h MTBF, and even before that, repeater amps in transatlantic underwater phone cables had already made major advances in reliability. There is a DoD or Collins study on the matter, claiming that IERC shields improved MTBF over unshielded tubes, if I remember correctly. As in all stable thermal systems, once equilibrium is reached the terminal temperature of cathode and filament can't be independent of what happens at the tube surface. I know how to scrounge up a Wiener bridge or a shunt and measure small deltas in heater current - but where do I look up some ideas on how current is related to temperature, whence what deltas to expect, at least in order of magnitude? Without a theory, even a rough one, as Popper pointed out, there's not much to test.... :-(

3) Cooling effect of going black-body in the IR range
Granted, if >90% of the exchange surface eg in an aircooled engine faces . . . itself (think deep cooling fins facing each other) most cooling must come from conduction to a moving ambient medium (aka air). So blackening should not make much difference there. But what about situation where there IS open space around a hot device?

Right now, I remember that I know a guy who makes heating systems, including a successful line of radiation heaters: http://www.sabiana.it/download_pubblici/catgen_en.pdf, see the 1st product, called Duck-Strip. The name's an inside joke: they were designed by a Mr. Anatrella - Italian for "cute duckling". The things run on hot water. At a Volkswagen plant those radiators heat people from a vertical distance of over 20m. From an economic standpoint I am not sure it's totally in the company interest to maximize per-surface-unit radiation, but I believe they took a look at paints. They also used to have a gas-fired radiation heater running at a much higher temperature than the water type.

I'll ask him... stay tuned. Moreover, some things I found by googling words that came up in this thread:

overclocking & paints (uh...)

What I know is that the glass will pass a proportion of the IR energy being generated by the outside surfaces of the plate. Depending on just how great a percentage, you may get more heating of the glass from the paint capturing the radiation from inside than you get cooling from the paint re-radiating it to the outside.

What I don't know is what will actually be the case.

Hi all,
I"m in need of a plate transformer for a Heath HX-11 or DX-20 CW
transmitter. It's 1200 VAC CT with 6.3 and 5.0 VAC filament taps.
Work email is david.fleming@alcoa.com
Or respond here.
Thanks!

I've got ten or so years of QST's from the 40's, 50's, and 60's
available. Readable but far from pristine - some mold and water damage
especially on the covers.

Total weight is probably 40-60 pounds so I won't ship. If you want
them, you'll have to come get them.

Free in the Washington DC suburbs to the first taker. If you take any,
you've got to take them all, no onesy-twosey. Drop me an E-mail at
"shoppa@trailing-edge.com" if interested.

N3QE, Tim.

Dave -

There was a Heath DX-20 on eBay that had a bad one
(I lost auction for it - maybe you bought it).

I do not remember that transformer being a 1200 V CT (I thought it was more around 600-800 V with a doubler circuit) ...

IF you have the original transformer -- you can send it to Heyboer in Grand Haven, MI .. just down the road from old Heathkit plant ... they do quality work -- I have used them in past.

I'm looking for an aircraft shock mount, exactly 5" wide and at least 19 1/2" deep. Something from maybe an ARN-14 might work? The width is the important dimension as I can cut the mount down in depth, if necessary. The box I have has no rear connectors, so if there are connectors on the mount, I'll just remove them. Thanks much.

Looking for a vibrator or vibrator/dynamotor power unit to supply HT of 300vdc @ 90ma from a 12vdc or preferably 6vdc input.

I want to power an AR88 from an LV dc source (6 or 12v), I have several part numbers for the original vibrator supply for this unit, they are MI-22216, R.C.A.F. Type C5, R.C.A.F. reference number 10D/6566.

Any vibrator or vibrator/dynamotor suppy meeting the above specs would be ok but an original unit is prefered.

Tks

FS Heathkit HX-10 Marauder in great condition. It has recently been checked out and repaired and aligned. It works great and looks very good too. Price is $275 plus shipping. Pick up is preferred or I can deliver to the Dallas/Ft.Worth area. Its weight is 85 pounds before packing, so shipping weight is going to be heavy. Digital pictures available upon request.
Thanks,Charlie Hugg, K5MBX

I have an IC-720, and in the SWR unit is a small, DPDT PC mount relay. Well, it's intermittent so I called Icom to order another. Guess what, they don't stock them anymore.

On the top of the relay, is the company logo, which is a Horizontal Bar over the letter F over another bar at the bottom. My obvious guess would be Fujitsu.

The number on the relay is: 221D012   Which I guess to mean

12 Volts and I know it's DPDT

The Icom parts list show it as type : BR221D012

Anyone know how I could locate a replacement? It appears to be a standard PC Mount DPDT, but the switching mechanism seen through the clear cover is like none I have seen, and I'm kinda reluctant to open it up, as I may make it worse.

THe relay is part of the antenna ATTENUATOR circuit, which is kinda unusual. The unit contains a broadband RF amp consisting of 2 each 2SK125 FET's in push pull. The purpose of the relay is to bypass the RF Amp, which is supposed to be a constant gain 10 DB broadband amp - supposedly inserting 10 db of attenuation in the input.

The thing never did work correctly since I bought the thing new when they first came out. Now the antenna path is getting intermittent, so would like to replace the whole relay.

Anyone have any ideas on where to find one? I thought perhaps someone may be parting out a 720?

Thanks for any help,

Jim,, WA5DXP

With an infrared thermometer or optical pyrometer. Auto parts stores
should have a model in the $20 range.

>Is heater current temperature-dependent enough as to provide a proxy?

No, because the plate temperature is very different than the cathode
temperature, and the plate temperature is what you worry about.

The hand held infrared thermometers will end up measuring the temperature of the glass, not the elements inside.

An optical pyrometer would be the way to measure the filament's temperature (quite crudely), but they are expensive.

>> Is heater current temperature-dependent enough as to provide a proxy?
>
> No, because the plate temperature is very different than the cathode
> temperature, and the plate temperature is what you worry about.

The heater temperature should be somewhat dependent on the plate temperature, half of the plate's radiation goes into the center of the tube, which is where the heater is. The heater temperature should vary slightly with

plate temperature. A sensitive bridge might be able to measure it, but
it would be down in the noise.

The plate of a tube doesn't wear out, so it's temperature isn't
by itself important. When the tube is evacuated, the plate is
induction heated to a nice red/yellow temperature. This is done
to remove any absorbed gases and other contaminants. As long as
the plate is never heated above this temperature, it won't release
more gas.

The big reason to worry about the plate getting too hot is the
heat it radiates will heat the glass envelope, and may cause
it to crack, or melt.

But at very thin layers, it is negligible. Look at house insulation. R-30
is 1-1/2 feet thick plus. A single pane window (single strength) is more
like R-1. Glass is a great insulator (compared to, say, copper) but at 1/8
inch thickness its almost not there. Vacuum tube glass is even thinner.

But the same may be said of ANYTHING
> surrounding a tube. Even one of the "good" IERC shields must have an

You have to compare conduction, convection, and all the mechanisms.

There may be some small effects, and it might be more tied to how many
times a tube is warmed up from cold, cooled off to cold than actual
temperature (in many applications, folks would turn them on and leave
everything running [eg. computer monitors, even today]).

> 3) Cooling effect of going black-body in the IR range

That black-body radiation works in both directions, not just absorption.
And, it may also be spectrum-dependent so that would have to be measured
with instruments, not our (human) eyes.

Its good that you did some google searching, but on the whole I think you are worrying too much about cooling. And, if you do manage to cool the cathode, then emmission would surely suffer. As the ultimate wacky suggestion, you could immerse the tubes in liquid air/nitrogen and really keep them cool (cost a lot of money), but then I'll bet you couldn't "light up the tubes" (with filament voltage) at all.

Thanks for making the databooks available, but boy
Rapidshare.com is sure a pain in the a$$!

20 minutes minimum between downloads, and a 2 minute
timer to make sure you sit and stare at the screen before
entering a code you read off of the screen.

Bah!

-Chuck

Now if only someone would post the RCA Transmitting Tube Manual
I could get ride of my, very ragged copy, that is Thumbed to death.

Hello Jim
```

Is this package the same pinout spacing as a standard 14-pin DIP IC?

Those are fairly unversal parts, the pinouts should be the same between
brands.

If the relay has a clear plastic snap-on cover, a gentle cleaning with a
non-residue
contact cleaner such as DeOxid will usually bring them back to life. I just
finished
doing that treatment to every relay in my FT-726, mainboards and modules!

Otherwise, solder in replacements should be available from NTE Electronics,
Inc.
(check their online catalog for relay products), or from DigiKey or Mouser.
I think
even RadioShack carried them a few years back...

Pete k1zjh

Don't forget the CC-AWA Winter Swap Meet is this coming
Saturday Jan. 26, 2008 at Caughman Road Park in
Columbia SC.
This is the same location as in the past, folks start
setting up around 7AM and we'll be all done before
12noon.

As always admission is FREE, sellers are only $5.

For driving directions and more details visit the meet
web page at, http://cc_awa.homestead.com/Winter.html

We look forward to seeing you there.

I recently rescued a beautiful piece of RCA Test Equipment from the dumpster....literally. I suspect this gear was in a Broadcast Studio here on campus. I further suspect it was used to test distortion and noise levels in an AM Broadcast Transmitter.

Here are the details. large D'arsonval meter at top center calibrated in percent distortion and noise level. There are switch positions for Oscillator out (Two tone or four tone??), Bridging, Phase (Four of them a,b,c,d!), Calibrate and a Mode switch.
The back panel has inputs/outputs for audio, RF, Bridging and Oscillator. Metal tubes inside four transformers. 6sN7's, Gas Regulators, 6f8 etc.

Here's the clincher, outside of the Red RCA Logo there is absolutely nothing to identify the model of this chassis. Searching the web produced only iffy results.
It suggests maybe a B-9c??

Any ideas???

TIA,

Tony WA6LZH

Do you have the original one? What normally fails on those are the
HV secondaries, which arc over. Since that's the last winding put on,
it's the first one to be removed. It's not all that hard to rewind these
things yourself.

My old RCA catalogues are boxed up at the moment and I can't remember the model numbers. RCA did make a harmonic distortion analyser for use mainly in broadcast proof of performance testing. The oscillator provides a single tone and is connected to the tranmitter audio input. The input to the meter is usually from the detector output of the modulation monitor. RCA made a companion oscillator and, of course, a modulation monitor.

These date from the 1940's. At some point around the 1950's RCA began to offer General Radio station monitors and distortion measuring equipment in their catalogues.

Model "Memo 4096", which I assume is the size of the memory chip.

Could use a diagram or copy of manual for this device. It's an old '70s type of design(lots of 7400 series chips), but the paddle action is nice, and has 4 banks of 4 channels. Want to use it for contesting, but getting lots of internal garbage out of it, even more frantically when the memory backup batteries are installed.

Has anyone ever owned one of these puppies?

Dear Pete;

When I did a search on the relay I came across an article I think on the Yaesu rig you mention, and it appears that rig uses the same relay, and it appears to be a common problem with the relays in that rig. They suggested either gold plating the thing (very elaborate process) or there was an article by a foreign ham on subistutiing another OMRON relay using a 14 pin dip socket for the replacement base and soldering the OMRON in via wires, etc.

I never heard of DeOxid but will try to find it, would be nice to have in the shack. Ted in following message located one in a catalog.

Yes, the cover does come off, and I tried cleaning the contacts with paper, and it worked just fine. After I put it all back together again it got intermittent again. The mechanism is very unusual to any relay I have ever seen.

If I can get the replacment then can work on the orignal using the

```
testing mentioned in the above article.  The contact resistance should
be less than 1 Milliohm according to the article.if I remember right.

Thanks for your response.

Jim

Fluke Manuals Search is at url:
http://us.fluke.com/usen/support/manuals/default.htm

But don't see your model number there-- there is info to contact Fluke for
manuals

Good Luck

It is absolutely wonderful that this exists somewhere. However, my
download of that 13.3 MB file ended with a damaged file that Acrobat
Reader (ver 4) said it could not repair. The download took me 1 hour and
20 mins on a dialup connection. Anyone got any ideas on this? Its very
rare that I download a pdf file and get an error message on on attempts to
open the file.

I just moved the file to a different box with AR ver 5, which says it is
trying to repair the file, then bombs off with a subsequent message that
the damage could not be repaired.

Does this mean I need to try another big download?

Since I posted this the download speed from that site slowed to a crawl,

It should speed up in a day or two when everyone had downloaded
everything on the site.
I use Adobe reader V8 and had no problem reading any of the files.
Yours was probably corrupted due to the download server over loaded.
Only takes a few seconds to download on ADSL Max but it's a huge file on
dial up.

Hi Steve,

The file on the site is definitely ok, but it is possible that it cannot be opened with Acrobat ver 4.

It opens ok with xpdf under linux.

-Chuck

The "PDF Version" field of the document properties says "1.5 (Acrobat 6.x).

The first time I downloaded it - using the pdf plug-in to Netscape - the file ended up being corrupted, as did yours. I tried again doing a direct download (right click on link - choose "Save link Target As:")

and it downloaded that time OK... So you might try a direct to file
download and see if that works better.

best regards...

Typo alert! It's "DeOxit" you want to find. It's manufactured by Caig
Laboratories in San Diego: http://www.caig.com/. I have a very old can of
their "D5 Connector & Contact Treatment" that works well.
73,
Bryan WA7PRC

I went back to the website using Unix LYNX and downloaded a second copy into my unix shell account root directory. This happend at 120 KB/sec, and executed normally. Then I FTPed a copy of that file to my root directory at a second Unix ISP (that happend at about 1 megabit/sec), and downloaded, again, the file over my dialup (another 1 hr 20 mins [sorry, I'm in the country and can't get anything but dialup, might someday look into "wireless" since we have a nearby cell phone tower]), and the file still geneates errors with AR 4 and 5.

Another guy said he could open the file with xPDF on his Linux box. I have RH Linux 6.2 (probably the best distro in terms of hardware compatibility with older hardware and low hardware spec needs) in an hda partition on my same box with FAT-16/Win98SE partition, so downloaded a third copy of tt4.pdf, used mtools to copy the file from the FAT-16 to the Linux partition, and tried to open it with xPDF and it would not open (no error messages, either).

I have an XP box (that I really hate to use) and am considering tring once more (since it has whatever version of AR that needs XP) to read the file.

I can tell all you guys that not all hardware/software combinations work 100% right all the time. I've had successes with things that other people failed at and vice-versa. I've also had reproducible problems of all kinds. I have a copy of Excel2000 that will absolutely not install on one of my Win98SE boxes, but installs fine on all other of my Win98SE boxes. And, the Win98SE box that refuses to install Ex2000 will install everything else I have and run all of everything else. I have lots of these stories to tell. Even for Linux (and I've had every version of Red Hat from 4.2 up to the workstation [Taroon]).

Microwave oven fuses are on the transformer primary and are normally
intended for 250VAC maximum use.  3AG types will sustain an arc for a hell
of a long time with 1KVDC across them.  Remember, AC arcs will quench a
lot easier than DC.

Call Bussman and see what they can do for you.

oK , The fuse ive had to use in the past is 500mA @ 5 Kv , it would
be nicer to fit the original , even the microwave ones are not
cheap !

Ill try them in the moring - tnx - G ..

One excellent source is History of
Communications-Electronics in the United States Navy, by
Captain Linwood S. Howeth, USN (Retired) published by the
U.S.Government Printing Office (1963).

A HTML version of this is available at:
http://earlyradiohistory.us/1963hw.htm

But I think I was able to download a PDF version from the
web. This book is also an excellent source of history of the
formation of RCA. It also has an extensive bibliography.

Hi,

The cabinets were a semi-gloss black. Galaxy didn't do a good job priming the steel cabinet, so many have been repainted over the years.

The final amplifier in both the original Galaxy V and Galaxy V Mk2 use a pair of 6HF5 tubes.

The Galaxy V Mk3 and the HyGain GT-550 used a pair of 6LB6 tubes.

The earliest models have hinged cabinets without even a screw to hold the lid shut, and no cage over the final plate caps. Not good if your shack ever gets visited by children.

73,
Ed Knobloch

A lot of HV fuses are filled with a ceramic powder or with boric acid to
quench the arc faster when they break.  If you do that, there's no reason
to use a glass tube since there's nothing to see inside anyway.
```

The ceramic cases are also less apt to explode when the fuse blows.

You might enjoy reading Erik Larson's new book, Thunderstruck.
It's an entirely historical account of the efforts Marconi put into getting wireless to work ship-to-ship and ship-to-shore, before finally crossing the Atlantic. It's non-fiction told like a novel, with a murder mystery intertwined that would later be closed via spark wireless aboard a ship.

```
Great read if you want to get a little 'color' on the whole spark
era of 1899 - 1912 or so.

TNX, I just reserved it online with my library.

FWIW, here is the Publisher's Weekly review

Starred Review. [Signature]Reviewed by James L. SwansonIn this splendid, beautifully written followup to his blockbuster thriller, Devil in the White City, Erik Larson again unites the dual stories of two disparate men, one a genius and the other a killer. The genius is Guglielmo Marconi, inventor of wireless communication. The murderer is the notorious Englishman Dr. H.H. Crippen. Scientists had dreamed for centuries of capturing the power of lightning and sending electrical currents through the ether. Yes, the great cable strung across the floor of the Atlantic Ocean could send messages thousands of miles, but the holy grail was a device that could send wireless messages anywhere in the world. Late in the 19th century, Europe's most brilliant theoretical scientists raced to unlock the secret of wireless communication.Guglielmo Marconi, impatient, brash, relentless and in his early 20s, achieved the astonishing breakthrough in September 1895. His English detractors were incredulous. He was a foreigner and, even worse, an Italian! Marconi himself admitted that he was not a great scientist or theorist. Instead, he exemplified the Edisonian model of tedious, endless trial and error.Despite Marconi's achievements, it took a sensational murder to bring unprecedented worldwide attention to his invention. Dr. Hawley Harvey Crippen, a proper, unattractive little man with bulging, bespectacled eyes, possessed an impassioned, love-starved heart. An alchemist and peddler of preposterous patent medicines, he killed his wife, a woman Larson portrays lavishly as a gold-digging, selfish, stage-struck, flirtatious, inattentive, unfaithful clotheshorse. The hapless Crippen endured it all until he found the sympathetic Other Woman and true love. The "North London Cellar Murder" so captured the popular imagination in 1910 that people wrote plays and composed sheet music about it. It wasn't just what Crippen did, but how. How did he obtain the poison crystals, skin her and dispose of all those bones so neatly? The manhunt climaxed with a fantastic sea chase from Europe to Canada, not just by a pursuing vessel but also by invisible waves racing lightning-fast above the ocean. It seemed that all the world knew.except for the doctor and his lover, the prey of dozens of frenetic Marconi wireless transmissions. In addition to writing stylish portraits of all of his main characters, Larson populates his narrative with an irresistible supporting cast. He remains a master of the fact-filled vignette and humorous aside that propel the story forward. Thunderstruck triumphantly resurrects the spirit of another age, when one man's public genius linked the world, while another's private turmoil made him a symbol of the end of "the great hush" and the first victim of a new era when instant communication, now inescapable, conquered the world. 14-city tour. (Oct.)James L. Swanson's most recent book, Manhunt: The 12-Day Chase for Lincoln's Killer, was published by Morrow in February. Copyright) Reed Business Information, a division of Reed Elsevier Inc. SMS api [http://www.vfirst.com] jargon made simple:

Short Code - It is typically a 4 digit number which is accessible by subscribers of any mobile operator. Used where the recall value is important. Used for encouraging pull from the consumers. Is expensive than the long code.

Long code - A usual mobile number (maybe real or virtual) - works across all operators but cheaper than the Short Code. Has lower recall but potential for high usage in a closed user environment e.g. to interact with members of a loyalty card scheme.

Some examples of sms api [http://www.vfirst.com] can help you run are:

Text Voting:
Voting is an exciting way to engage your audience and let them have their say. Newspapers, magazine and television are prime examples. Indian Idols is a great success story.

Instant Win:
Through print/radio, you can invite consumers to interact with you where they are offered an opportunity of an instant win.

Timed Vouchers:
You can send reward vouchers as text messages to consumers to increase the footfall.

Feedback collection:
Using our technology, you can invite consumers to provide feedback/ opinion through a text message.

For more information about the sms api Login: http://www.vfirst.com/sms-mobile-marketing.php

Did any of the Swan transceivers come with an internal A/C power
supply? A friend of mine thinks some did, but I can't find any
evidence of it.

Dick

Yes - the Swan Cygnet 260 and Cygnet 270 both had internal
AC and DC supplies. I'm not sure about other rigs, but having
owned both these models over the years, I can say for sure the
at least do.

Thanks Dave.  I did some further checking after you gave me those two
and I found that the Cygnet 300 also had a built-in supply.  That's
all I can find.

"NOAA
Washington, D.C.

Media Contact:
Anatta, 303-497-6288

January 4, 2008

NOAA: Sunspot is Harbinger of New Solar Cycle, Increasing Risk for Electrical Systems

A new 11-year cycle of heightened solar activity, bringing with it increased risks for power grids, critical military, civilian and airline communications, GPS signals and even cell phones and ATM transactions, showed signs it was on its way late yesterday when the cycle's first sunspot appeared in the sun's Northern Hemisphere, NOAA scientists said."

And better DX as well!   :-)

Well, now the global warming folks will have to switch their
arguments back to global cooling.... The ice age is coming!

-Chuck

Correct. The sunspots alternate polarity on each 11 year half-cycle.
We just finished the warming polarity and are entering, again, the
cooling polarity.

Paul,KD7HB

Having searched the WWW without success, I ned the manual for this
Pace 2 meter radio.

I will gladly pay for a copy if you have this manual.

The Pace Communicator has little audio, so the manual is needed to repair an otherwise well made vintage radio.

If someone better at searching than I finds a manual, please do let me know.

Thanks!

Fred

Cheap Maplestory Mesos   Maple Story Mesos   Buy Mesos   Cheap Mesos   Buy Maplestory Mesos

Maple Story Mesos Promotion !
Maple Story Mesos Promotion ! Check out our great prices on Maple Story Mesos! We guarantee the we have the lowest prices on Maple Mesos on the market, contact our live support for further details.

Prices of Mesos are Slashed again! OGEWORLD has unbeatable price on Maple Story Mesos. You are buying Mesos directly from our production team, not from resellers, without hacking, and without cheating!

Delivery in minutes!
No Waiting, No Bidding. OGEWORLD,COM - Direct Sale Service offers you the best and fastest way to buy Maple Mesos. You will have the best Maple Story Mesos money can buy at the lowest prices.

Lowest price, live customers support, flexible payment methods and instant delivery are the reasons that make us different from other Maple Mesos supplier.

If:
* You don't want to talk to somebody who doesn't understand you.
* You don't want to wait for email reply.
* You don't want to make payments through only paypal.

*   You don't want to be ripped off.
We are here to help!

Due to increasing number of fraudulent orders, we will no longer accept payments made through echecks, unconfirmed addresses, or unverified accounts with paypal. However, understanding the constant needs of our customers, we are working to add direct credit card payment and money order payment methods. As a reminder, we still accept all moneybookers transactions. In addition, for those customers who can't find another method of payment except for echeck, we are willing to work with you through subjecting the transaction to OGEWORLD's Higher Security Processing. However, this may take longer than usual processing time, and would require that the echeck is cleared before any delivery can be made.

We are now creating a trust list. All customers who had bought Mesos and/or services from us without payment issues will receive priority service.

Mesos Bulk Order?
We offer discounts for larger Maple Mesos purchases, contact us at for further details. We guarantee OGEWORLD has the lowest prices on Maple Story Mesos!

Speedy Delivery!
We will deliver Maple Story Mesos to you as soon as possible.

I bought a Hammarlund HQ-110 parts chassis from ebay a while ago. I have relieved it of the parts that I need, and what is left is up for grabs. If you need any parts, send me an email at my call sign (WA1RKT) at arrl.net and if I have them they are yours for the cost of shipping. First come, first served.

Please don't email me and tell me you want the whole thing, or all of the parts. I'd like to spread the parts around a bit and benefit as many people as I can. Just tell me what specific parts you need to complete your project and I'll see what I can do.

I am pretty busy at work so it may take a bit of time for me to get back to you.

Don't forget the CC-AWA Winter Swap Meet on
Saturday Jan. 26, 2008 at Caughman Road Park in
Columbia SC.
This is the same location as in the past, folks start
setting up around 7AM and we'll be all done before
12noon.
As always admission is FREE, sellers are only $5.

For driving directions and more details visit the meet
web page at, http://cc_awa.homestead.com/Winter.html

We look forward to seeing you there.

Hi all,

I have several old Vibroplex bugs in my collection - what is the
best way to clean them without having to disassemble them?

I was wondering about a warm-water full immersion bath
with a light detergent (hand dish soap I was thinking) and letting
them soak, then wipe all areas clean in the water, and then air
dry quickly (blow dryer).

Is this wise, unwise, or simply not going to be effective?

Thanks!

Dave WB7AWK

If they are very dirty its best to disassemble them. Its not difficult but make drawings so you remember where things go. However, the technique is pretty much the same either way. Use a solution of dishwashing detergent for overall cleaning using a toothbrush to scrub off the dirt. Use toothpaste for the chrome parts, again using a toothbrush. Be very careful of oxide removers like Barkeepers Friend because they can remove some of the chrome. The same for chrome or metal polish. I've found that war time keys especially have very poor plating, probably because both chrome and nickel were restricted materials.

Clean the contacts with plain bond paper followed by a drop of contact cleaner. Contact cleaner also works as a mild lubricant for the trunions of the lever.

Once cleaned the key should be dried out in a oven with just the pilot going. The problem with cleaning when assembled is that water can get down into the screws and can cause corrosion.

Adjustment of bugs is fairly simple and of course shold be done to the taste of the operator. The military had a starting set-up which I find about right. For the older "standard" key set the stop for the dot side at about 0.015" and the dot contact gap at 0.010. For "Lightening Bug" types set the dot gap for 0.010 rather than 0.015 because the distances to the fulcrum are different. These settings will result in about the same movemet of the dot lever. The dash distance is about the same on both types of keys. Other adjustments are fairly obvious and spring tension is to taste. Usually, I set both springs at about half way to begin.

Minimum dot speed is dependant on the strength of the main spring, that is the flat spring that attaches the pendulum to the lever. This is fixed on most bugs. The stronger the spring the faster the minimum dot speed.

If you have a Lionel J-36 that still has the label on it be very careful not to get it wet. The labels on these keys are made of cellulose acetate to save metal and are typically shrunk and very fragile. They have broken off long ago on most of these keys.

Hello,

Triad Transformer has generously posted their archive of transformer catalogs online spanning 60 years.

I was playing with the print feature, they will print to PDF or a 8.5x11 page OK for me.

http://www.triadtransformers.com/

Note,

if anyone has a Triad catalog or historical Triad publication not seen on the site, it would be highly appreciated, to borrow the item, and scan non-destructively, and return, all at no cost to the contributor.

Please send me an e-mail in this case and I'll connect you with the appropriate Triad person. (avoiding giving his e-mail here!!)

Thanks,

Patrick Jankowiak

This is a different presentation from the Hammond .pdf transformer
catalogue on which you can browse page by page for specifications - or
is it just my finger trouble on the Triad website?! I could not find
the listed pages to get specs or even types. Is this fully
downloadable as a .pdf?
Cheers,
Roger

A friend of mine (W0ILJ) , lost everything he owned , except the clothes on his back and his car , in July 2007 , due to a flood and chemical spill DR # 1711 , in Coffeyville , KS. No insurance , since he was in a 500 year flood plain.

He is wanting to replace a few key items and the top of his list is a set of R-14 phones.

Please state condition , price and method of payment .

THANKS ,
73 ,
Charlie (W5COV)

When you say R-14 phones, do you mean an HS-23 or HS-33 headset? The R-14's (and ANB's)are just the elements for these typical headsets. The R-14 was also used in cloth flight caps, etc. I may be able to assist.

Kudos for finding that! I would like to point out that "printing" to PDF
works only if one has a driver for that. I use PDF995 (www.pdf995.com)
which is "sponsor-ware" unless you pay a modest fee. There are others as
well (CutePDF, etc).

OpenOffice.org

Open Office has supported exporting to .pdf for years and is free
open-source software.

Cheers,

There are several freeware programs which create PDFs.
The one I use is called PDF Creator and installs as a
printer. Anything you can print can be made into a PDF. Its
a small program and seems to work very well.

Is there such a thing as a air/marine band vhf handheld, that also does 2 meter? Looking for something waterproof.

Ideas?
Thanks,
Bill

A commercial VHF HT should be able to cover
the marine and 2 meter part OK, but air band
stuff is AM so that would be a problem.
I don't know of anything that does both
AM & FM in a transceiver.

I have an Amplifier - Penetrater HB 200 - which is labeled "Amateur Bi-Linear". It has a switch for on/off (power) - and without looking at it - the other I believe either for the receive pre-amp OR AM/SSB operation. There is no "band select" switch on it.

I can't find a lick of info on this amp - have googled a couple times. Any hits I got were non-informative - unless I missed one.

So - my question is - "was" this made for 10 meters - which I'm assuming it would be being a "single band", OR for 11 meters?

At any rate - I acquired it some time ago - the "Finals" were removed. I'm not sure if they were smoked "or" someone was wanting to put bigger ones in it to beef it up.

The "Transformer" in this thing is hefty and probably constitutes about 3/4 of the weight of the Amp. Aside from the Tranny - there is a PC board, the cabinet, connectors - thats about it. I had always thought of trying to get the Tranny info - and "maybe" - seeing if there was a possibility for a "multi-band" amp.

I would like to sell this thing for parts - whole or parted out. If anyone has any info on it - so maybe the Transformer can be used otherwise - or is interested in buying this, let me know.

Even if it were for "10 meters" - "I" have no use for it. Even as a Ham, I've never used an Amp. Never needed to.

There was a combined AM/FM modification for the Gonset Communicator. And
the Gonset used to be type-accepted for aircraft band although under the
new spacing it may not be. It's _kind_ of handheld. Not even a little bit
waterproof.

I brought home a Swan SW-120 tranceiver from the estate of an old friend. The radio has significance to me because of who owned it, as well as it being the first of the Swan tranceivers. I would like to refurbish it.

The radio appears to have been left uncovered on a shelf in the garage for many years, and is very dirty on the inside. I have cleaned a lot of newer, solid-state equipment by simply giving them a good scrubbing with dish washing detergent and warm water followed by a thorough rinsing with a hose. I then let the chassis sit out in the sun until it is very dry. I don't think that would be such a good idea with an older tube-type radio. Things like meters, relays, transformers and switches could be damaged by submersing them in soapy water.

What is the recommended cleaning procedure for older equipment? Is there a ham radio website that discusses refurbishing?

Dick

> have been pretty much the reality. Motorola and a few others make
dual-mode portable transceivers such as seen in Med-Evac helicopters,
etc. The price, even used, can run about $2k. The pure MIL stuff is
nice but without a depot support facility, I'd be very wary. Gonsets
haven't been type accepted for about 25 years owing to overall specs;
frequency stability, receiver bandwidth, ad infinitum. Icom and Yaesu,
of course, make aviation and amateur hand-helds. You might consider
making a dual pack with one from each band and integrate the mic, etc.
The MIL had (has?) an item similar to that. Makes dual mode ops a snap.
  That's what I did for CAP and it's always done the job. The only
issue would be waterproof. You'd have to work on that one, if you
really need it to be submersible. If not, a rain-proof pack would do
it. Mine are installed in a small, ballistic nylon pack that keeps the
rain out. Just a thought for you, though. de K3HVG

Well, I tend to agree with you - there - but just figured if I could get any info on it - the transformer - at the least could be put to better use.

I am wanting to clear out a bunch of stuff from my shop and basement. I won't let it go - to be put on 11m. IF that was the case, could have done that long ago. I've only had the thing taking up space for about 10 years or so.

I'm certainly not going to waste any more time asking about it - looking at it - storing it. It will be miscellaneous parts by days end. I'll use the cabinet for maybe a home brew power supply or something. That and the Tranny is about the only two good things worth keeping of it all - parting it out.

Thanks!

Most of those amps utilized TV sweep tubes -- would guess by the 200 (200
watts).

Sweep tubes are rather expensive to obtain nowadays, so your junk scheme looks pretty practical.

I "was" thinking - someone could use the tranny and cabinet - if into building "amps". But - then again - and rereading what I wrote earlier - a 200 Watt multi-band amp would be close to useless unless using it on a QRP rig - defeating the purpose, or low power mobile. Most H.F. rigs do that bare........ And I've damned near talked the world over with far less than 200. I "doubt" the tranny would be good for much more than that. Oh well........ One less door stop to deal with.

Actually PJ, this used Transistors! It was all solid state.

Thanks to all for these great suggestions, and technical insight. I think
the two-pack is the way to go.

Bill L.

This amplifier is for 11 meters.  And also 11/3 meters and 11/5 meters
too of course.

Look for "Alabama Pillbox" and see if that's what you've got.

Is it intended for AC use or for 12V use?  If it's for 12V use, the
transformer and inverter circuit may be useful for something.  If it's
for AC power, the transformer is probably the only part worth salvaging.

I worked for Hewlett-Packard many years ago. We

routinely washed equipment by spraying it out using a paint
sprayer and a solution of plain dishwashing detergent along
with a couple of brushes. After washing the equipment was
rinsed off with a hose and then blown out with air. After
that it was baked in an electric oven running at about 130F
for a few days. Of course all meters etc were removed.
Sealed transformers and chokes should also be removed
because they can have small leaks which allow some moisture
to enter which will not bake out. Any moisture trapped
inside can cause arcing and the loss of the coil.

There might be problems with parts like IF cans with
paper coil formers and possibly with ferrite slugs.

Scott,

It is for 120VAC. That is pretty much what I had said - the transformer and
cabinet. The Cabinet would make for a nice homebrew power supply or
something. Maybe - depending on the transformer - can use it for the same
project!

This transformer is pretty hefty. It is about 2/3 the weight of the Amp.

Has a BFO, and headphone feed, the tuner is like a Turret tuner from an old TV. (bigger but same principle)   VERY well built, they spared no expense, these are used to read field streght readings for transmitters. So it's a piece of test gear, but seems to work well as a communications receiver. New they were $6,490 thdy were built between 1966 and 1973.. This one seems to work, but is sold as is.

The NM-25T Radio Interference and Field Intensity Analyzer is ideal for surveys to determine the source and analyze the characteristics of radiated and conducted radio interference. It is simple to operate, stable, easily read, and may be used for 40 continuous hours without recharging the integral battery pack. " Frequency Range: 150kHz to 32MHz (8 bands) " Sensitivity: <.2 �V across 50-ohms " Input VSWR: <1.25 " Shielding Effectiveness: >100 dB " Audio output: 25 mW into 600-ohms " Power consumption: 5 W   25 lbs

Last calibrated by Canadian Gov't in 1987. Only thing I've done, is have the rechargeable batteries replaced.

Reason for selling....just way too many radios, and moved to a small condo, unhappy better half.

$1,000 or offers?

73's

Ray

Rare "Eureka" Radar Transponder
AN/PPN-1A
Paratrooper Version with Self-Destruct
(explosive charge was removed before release!)

Includes:

- RT-44/PPN-1A Receiver/Transmitter
- PP-11A/PPN-1 Vibrator Power Supply
- Rubber-Padded, water-resistant jump case with snaphook
- Complete Copy of TM-11-1140 Technical Manual on CDROM

by submersing them in soapy water.

>
> What is the recommended cleaning procedure for older equipment? Is
> there a ham radio website that discusses refurbishing?

I used to 'wash' radios in a large downstairs kitchen sink (where my Mom would make pickles!) when I was a teen - large sink filled with warm lightly-soapy water - and let the entire radio soak (transformers and all) for an hour or more, gently sponging the goo off bit by bit. All the smoker's goo and age dust came off just fine in that time.

But the important part was letting it DRY. A LONG TIME. I would let the rig dry for about 3 weeks before trying to power it up! (This was in summer - maybe in winter I would wait longer).

Worked great on a Swan Cygnet 260 and a Hallicrafters S-85 receiver, both of which I used for several years after. No problems at all after full immersion in water. But patience is the key!!

The key was letting it THOROUGHLY DRY, including the inside of all transformers (power and IF).

Dave

"Print to PDF" from a point-and-drool browser for each page isn't
really necessary - all the pages are just JPG's, just download all the
JPG's (e.g. wget) and then assemble into a PDF (e.g. any of the
freeware tools that convert JPG's into PDF pages from a command line)
if that's what you want.

Al,
Dee (W4PNT) does a rather incredible job with Rangers and Valiants.
Some (me, included) think they're too good. I have one of his Valiant
re-paints and the silk screening for the front panel is 101% original,
no lie! The problem (sic) is that his process uses a clear coat final
that makes the cabinetry too glossy. Perfect, but glossy rather than
the slightly dull EFJ original. Having said that, and even in
consideration of the cost(s), its a good idea if your rig is messed up,
paint wise. Info is as follows:

 > > Dee Almquist W4PNT Shack: (540) 249-3161 Fax: (540) 249-5064 voice mail: (800)755-2365

If its paint, only, that you need, I'd recommend a professional
automotive paint supplier/batcher. In MD, we have McHenry Automotive.
They use a color densitometer and do a very nice job, although sometimes
I have to have them re-batch with a small correction for dullness. I
use them for my various O.D. MIL paints, too. I'm sure you must have
one of these operations in your area. Just check with a high quality
body shop and ask where they buy their paint.

Regards   Jeep/K3HVG

Hi, I know this is a bit of a long shot, but I have a wonderful No19 set in
GWO. Full complement of valves (tubes) and maybe an 807 spare (no
promisses - if there is interest I will search me junk box). The set is
equipped with an external 230vAC PSU. Original phones and mic.

I want an AR88 in GWO (transformers not leaking oil and dial not binding).

Any ideas?

FS Heathkit HX-10 Marauder in great condition. It has recently been checked out and repaired and aligned. It works great and looks very good too. Price is $325 plus shipping. Pick up is preferred or I can deliver to the Dallas/Ft.Worth area. Its weight is 85 pounds before packing, so shipping weight is going to be heavy. Digital pictures available upon request.
Thanks,Charlie Hugg, K5MBX

I had a "good" hunch that this crap was a 11m Amp - but I suppose I was allowing the label of "Amateur" throw me off. As someone pointed out - the fact "no" info existed - should have made that clear. What seemed strange to me, was I've been able to find info (operating and/or schematics) on just about every other amp out there - be it 10m, 11m or multi-band. This one - nada. Anyway - the finals were removed before I got it. As I stated - not sure if they were smoked or someone was desiring to put in heftier ones. At any rate - I've junked it - will keep the useable parts (cabinet/tranny/etc). I'll find some use for them.

Thanks to all who replied.

Nobody in their right mind would. But somebody might gut the electronics
and build a nice audio amplifier or something into that case with that
power transformer.

Yeah, I'd like to incorporate those two items - Scott. Too good to just throw away! I'm going to skim through my box full of "Schematics"/"Projects" that I've saved over the years from various magazines - to see if I can find something I can use "especially" the Transformer for - and make good use of - not just to be built and thrown aside.
I LOVE homebrewing - but don't like to build things just to do it. I try to build "useable" items - to help in the shop. Have built a few things which ended up saving me tons of time. THAT is worth it - alone.

```

Hello to the group. I just picked up a Heathkit AT-1 transmitter at a local hamfest ($10). I want to restore this jewel. It has been

partially disassembled and some of the components are in a bag. It
looks like the main power transformer is missing and the meter is
missing. The front panel looks to be in pretty good condx but has some
extra holes . I have down loaded the schematic from BAMA.
Does anyone have a power transformer and/or meter? Maybe you know a
source for these parts. Any info on this will be most appreciated.
Randy, W5KCM

Years ago, when I was doing bench work on marine radios in a shop that did some cb work as well car stereos, Some one brought in a six meter amp that had a tapped coil in it. There was a big label inside saying that if the tap was removed from the coil that it would radiate around 26 MHz which would be out side of amateur frequencies.

If you can't find them, International Crystal in Oklahoma can probably
make them. They have the specs for most ham crystals.

--They conclude that what has been done once can be done always, and that, since the desire of glory imparts some power to those whom it possesses, others can do likewise. There are feverish movements which health cannot imitate.

Epictetus concludes that, since there are consistent Christians, every man can easily be so.

351. Those great spiritual efforts, which the soul sometimes assays, are things on which it does not lay hold. It only leaps to them, not as upon a throne, for ever, but merely for an instant.

352. The strength of a man's virtue must not be measured by his efforts, but by his ordinary life.

353. I do not admire the excess of a virtue as of valour, except I see at the same time the excess of the opposite virtue, as in Epaminondas, who had the greatest valour and the greatest kindness. For otherwise it is not to rise, it is to fall. We do not display greatness by going to one extreme, but in touching both at once, and filling all the intervening space. But perhaps this is only a sudden movement of the soul from one to the other extreme, and in fact it is ever at one point only, as in the case of a firebrand. Be it so, but at least this indicates agility if not expanse of soul.

354. Man's nature is not always to advance; it has its advances and retreats.

Fever has its cold and hot fits; and the cold proves as well as the hot the greatness of the fire of fever.

The discoveries of men from age to age turn out the same. The kindness and the malice of the world in general are the same. Plerumque gratae principibus vices.[47]

355. Continuous eloquence wearies.

Princes and kings sometimes play. They are not always on their thrones. They weary there. Grandeur must be abandoned to be appreciated. Continuity in everything is unpleasant. Cold is agreeable, that we may get warm.

I never "seen" any personally - but Lafayette Radio Electronics - I
"believe" made amps for 10m and 6m. I wonder if theirs had any "handy"
labeling and tapping - going on?

      The site indicates they make replacement crystals for
Drake and Collins as well as several other brands. I wonder
if you have any idea of how expensive these are in small
quantity. I suppose I should contact them but don't have an
immediate application. If the crystals are not too expensive
it is a valuable resource.

And they were on the CB page, and including the disclaimer "illegal for
class D Citizen Band use".  I don't think they even bothered with
six metres, just from the bottom of the CB band to the top of the 10 metre
band.  Needed only a couple of watts to drive them, and put out no more
than a 100watts (if that), making their purpose very apparent.

It was that sort of thing that led to the US amplifier rules, though
my remembrance is that the Big Catalog places may have made those
amplifiers disappear from the pages before, perhaps feeling a sense
of responsibility.  Or maybe it's just the Big Catalog places like
Lafayette and Olson and such were out of business or fading by
the time the rules were brought in.

I just got my B&K 747 tube tester back from professional calibration and service at CTech Electronics, and I'm now very careful in how I use it, so as not to damage anything like I aparently did before.

My question is this: I now hit the 'shorts' button first thing after the filament is lit. If it lights, I pull the tube and do NOT hit the 'test' button.

But is there ever a circumstance where a 'good' tube will cause the shorts light to light? I ask because I had some 6146s a while ago that would light the 'shorts' light up, but tested far into the 'good' range scale.

Any input would be helpful,

Thanks

Dave WB7AWK

On my tube tester there are some settings on some tubes that'll cause a
short indication, but they're listed in the manual (and presumably you
don't do an emission test across those terminals).

> I just got my B&K 747 tube tester back from professional calibration and service at CTech Electronics, and I'm now very careful in how I use it, so as not to damage anything like I aparently did before.

It is very hard to damage a tube tester... but an interelectrode short can do the trick. Usually the meters have a diode in parallel with their movement to limit current to a safe value.

> My question is this: I now hit the 'shorts' button first thing after the filament is lit. If it lights, I pull the tube and do NOT hit the 'test' button.

That is always a good idea.

> But is there ever a circumstance where a 'good' tube will cause the shorts light to light? I ask because I had some 6146s a while ago that would light the 'shorts' light up, but tested far into the 'good' range scale.

Yes, many tubes have intentional shorts that can show up on some of the test positions. They should be mentioned on the tube chart. If you check your tube tester manual, it may have a table that shows what the different positions on the shorts switch test for.

For instance, on Hickok, position 1 is heater-cathode shorts...

Hi Chuck - I am sure that's what I did. I fried 2 zener diodes in the meter
circuit, and also took out the bias pot (wirewound) in the process, plus of
course blew the internal fuse (soldered in place)
.
I still don't know exactly what I did, but CTech did a great job
repairing and recalibrating it to factory specs so I'm now very careful
to not do stupid stuff again!

Dave

One of the calibration steps in the manual is to set the "shorts" sensitivity, using a 1 megohm resistor. Power tubes are allowed a little more leakage than receiving tubes, so could exceed the "shorts" threshold and still be good.

ICM crystals for most gear are between $10 and $25 depending on the
holders.  More money if you want higher precision, wider pulls, etc.

MUCH nicer than buying hamfest crystals and grinding them to frequency
with Ajax cleanser.

    I vaguely remember using valve grinding compound for
that. The sort of crystals used in Drake or Collins
receivers are the sort with plated silver electrodes (I am
sure you know this) and can't really be reground. It worked
fine on the ancient clamp mounted types. I am trying to
remember what we used to etch the surface of inactive
crystals. Something nasty I think.

Surplus to the operation...

A Viking II in moderately good condition. Looks like it will be ok.
Would look quite respectable with some Fantastic, and then a little of the right cleaner/wax (I've done this before to a few Viking IIs).
The former owner said he had it on the air a year ago (yeah right).
But maybe.

Excellent documentation!
All original manuals! (probably worth $$ on ePay).

Has quite a few mods, look like they were well done in years past.
PTT installed nicely.
Regulated screen voltage it looks like added nicely under the chassis.
All tubes present and accounted for - none look toasty.

Nothing obviously fried or toasted.
Still has blue colored Selenium Bias rectifiers - authentic period component!!
Wink

Some rear apron mods - 3 wire line cord added, one SO-239 needs replacement,
Cinch Jones 4 pin jack added also (purpose not yet determined).

Front panel is pretty ok, some scratches top front center, not bad.

The perf metal rear and sides are peeling paint, no rust. Needs repaint.
Looks like it is from being stored in the heat & cold.
Inner chassis is clean.
Iron is not rusty.

Untested as of this posting.

Price: $180.00 USD, prefer local pickup - but can and will ship.
Shipping is extra - and I will charge something for the packing that will
not result in it being destroyed in transit. :_)
Also have Heath HG-10 VFO in similar condition, but not too bad actually.
Untested with the Viking II add $30.00. Otherwise make an offer.

Open to trades for non-junk.
Will consider "fixer uppers" that I really like.
Would probably swap even for an old but working TS-120s/130s or similar.

Can post or email jpegs. Will likely post some this weekend.

PREFER LOCAL PICK-UP OR DELIVERY!!
I am near Albany NY.
Can accomodate some sort of reasonable driving distance also, but gas is getting dear these days.

I can take Paypal + 3%...

(I may be unable to respond to emails until the weekend... sorrry if that happens)

Hi Randy:

The power transformers are pretty easy to acquire. Just look for one that is the approximate size. Often you will find nice substitutes in old tube test equipment that no one wants. I just took apart an old HP square wave generator and it yielded a perfect replacement for a rig. It would have worked nicely in the AT-1, also.

Meters are critical for the right look. You can make new scales using a number of free software programs.

Nice rig. Beware, though, the power output is only about 8 watts, so do not expect 35 watts input and 25 watts output.

73, Colin K7FM

Quite nice condx, not run 2 years, serial 27,200+, can provide pix of the
unit,  no p.s. so can not test it (apparently sold with the 4B line).
Nothing burnt and previous owner was using it prior to his demise. Paid
$200. & will sell at same plus shipping from WNY with Owner Manual copy, no
mic or power cable as is normally p/o p.s.

Not run 2-3 years, was working at the time I obtained from estate. Also have
two original manuals and an OEM HV replacement board I recently purchased.
Have pix available. $600. plus ship from WNY. Has two front panel defects =
scratches and top needs touch up for the fussy. Health not good so I call it
pre-estate sale / clean-out.

Dull, black, heat resistant paints
have been used to help cool engines for ages.

It would be cool (literally) if one could
spray and heat-cure unshielded tubes

and improve their heat-shedding

Is there any indication that such paints,
or some vacuum-tube specific types,
would help keeping tubes cool
by improving heat radiation?

I'd love some factual info, if it exists, or educated guesses,
rather than uninformed blind guesses,
as I am awfully good at doing uninformed blind guesses already!   :-)

:-)  What keeps me is the fact that I have no idea how I could measure
the core temperature in a tube!

Is heater current temperature-dependent enough as to provide a proxy?

Hints anyone??

This test was done using a Raytek laser digital thermometer.
Temperatures
were taken from a 6BZ6 1st RF amp tube on a John R. Leary SP-600JX no
suffix
number, serial number 1262. Ambient room temperature was 75=B0F. I'm not
```

a scientist nor should this be misconstrued as a scientific test. I have always been curious as to whether the IERC tube shields "actually" prolong tube life. As noted there were several different tube shields used in this "test." Also note there are several different types of inserts inside these tube shields.

The bare tube bulb temperature was "shot" immediately after removing the tube shield.

The "Real McCoy" IERC Tube Shields have a finger grip type of insert that acts as a heat sink and the test results show that the temperature difference between the shield and the tube itself is little. That should tell us that that type of shield is the "Standard." For your information, I don't use tube shields and my tubes seem to last a long time.

Take this information as it's meant to be, strictly informational.

1.. Shiny metal Eby tube shield no insert. 94=B0, bare tube 124=B0F.

2.. Shiny metal Eby tube shield with seven-sided black aluminum insert. 96=B0F, bare tube 127=B0F.

3.. Dull metal Elco tube shield no insert.108=B0F, bare tube 135=B0F.

4.. Black heat resistant painted Eby tube shield no insert. 104=B0F, 126=B0F bare tube.

5.. Black anodized Eby tube shield with "waveform, nine ridges" aluminum black heat shield insert. 107=B0F, bare tube 127=B0F.

6.. Collins black anodized tube shield with "waveform, nine ridges" aluminum black heat shield. 100=B0F, bare tube 122=B0F.

7.. W.P.M. tube shield with five-sided aluminum insert. 106=B0F, bare

tube
118=B0F.

8.. IERC tube shield with "finger grip" type beryllium insert. "The Standard." 102=B0F, bare tube 104=B0F. (has to be the insert)

9.. Bare tube, no shield. 6BZ6 114=B0F.
YMMV

Yes, it is rather temperature dependent.

What I might do, is put two identical tubes with their filaments in series into a bridge configuration with two identical resistors, and measure the voltage between the junction of the two filaments, and at the junction of the two resistors. Then paint the one tube, and leave the other unpainted. If the paint causes any change in the tube's internal heat, it should cause the bridge to move one way or the other. Tungsten's resistance rises as its temperature rises, and lowers as its temperature lowers.

```

~  FIL-B                  R
~   |                     |
~   +---------+-----------+
~             |
~            -+-
~            ///
```

The inside of the tube is a hard vacuum, so the only way heat will pass the void is by conduction (through mica, and leads...), and direct radiation. Direct radiation is where the lion's share of the heat goes. Since the filament is surrounded by the plate, it should see as much radiant energy as the tube radiates out through the glass.

Hi Colin,

Very good info. I will look for the tube type test equip for the
xformer, great idea. Possibly, I will find another AT-1 at one of the
hamfests in the future for the meter, and I also need knobs..

Thanks, Randy, W5KCM

Of course, there were tube shields that seemed intended to act
as heat sinks.  I can't remember if I merely thought that, or
if I knew that somehow.  But they real contact with the tube
glass and certainly seemed as if they could draw heat from them,
the same way heatsinks dissipate heat from semiconductors.

This test was done using a Raytek laser digital thermometer. Temperatures were taken from a 6BZ6 1st RF amp tube on a John R. Leary SP-600JX no suffix number, serial number 1262. Ambient room temperature was 75�F. I'm not a scientist nor should this be misconstrued as a scientific test. I have always been curious as to whether the IERC tube shields "actually" prolong tube life. As noted there were several different tube shields used in this "test." Also note there are several different types of inserts inside these tube shields.

The bare tube bulb temperature was "shot" immediately after removing the tube shield.

The "Real McCoy" IERC Tube Shields have a finger grip type of insert that acts as a heat sink and the test results show that the temperature difference between the shield and the tube itself is little. That should tell us that that type of shield is the "Standard." For your information, I don't use tube shields and my tubes seem to last a long time.

Take this information as it's meant to be, strictly informational.

1.. Shiny metal Eby tube shield no insert. 94�, bare tube 124�F.

2.. Shiny metal Eby tube shield with seven-sided black aluminum insert. 96�F, bare tube 127�F.

3.. Dull metal Elco tube shield no insert.108�F, bare tube 135�F.

4.. Black heat resistant painted Eby tube shield no insert. 104�F, 126�F bare tube.

5.. Black anodized Eby tube shield with "waveform, nine ridges" aluminum black heat shield insert. 107�F, bare tube 127�F.

6.. Collins black anodized tube shield with "waveform, nine ridges" aluminum black heat shield. 100�F, bare tube 122�F.

7.. W.P.M. tube shield with five-sided aluminum insert. 106�F, bare tube 118�F.

8.. IERC tube shield with "finger grip" type beryllium insert. "The Standard." 102�F, bare tube 104�F. (has to be the insert)

9.. Bare tube, no shield. 6BZ6 114�F.
YMMV

This is extremely interesting data. I imagine that envelope temperatures have been researched in the past but can't remember ever seeing anything published.

I think it might be possible to measure the envelope temperature using some sort of sensor, such as a small thermocouple, fastened to the envelope. Direct comparisons of envelope temperature could then be made with bare bulb and various sorts of shields or paint. Paint might help radiate heat more efficiently but it might also act as an insulator but measuring that should be simple because a plain thermometer could be used to make comparison measurements.

Because tube heaters are pretty far removed from the envelope and are at a much higher temperature and because there are other sources of heat even in receiving tubes (plate dissipation for instance) I doubt if the effect of a heat sink on the envelope would affect heater current enough to make a reliable measure of envelope temperature.

One might think that the metal shields would "catch" the radiated heat after it has left the tube. I feel that the black paint would act as a heat insulator, preventing efficient transfer of the filament heat to the outside. Unless you can put a thermocouple in the tube, it will be hard to know how hot it gets Inside. (Yes, it can be done, despite the "how to build a triode" nonsense. Tubes were fabricated and evacuated with mercury pumps by amateurs in the 19 'teens and 20's).

And will it make any difference? Most equipment was designed to operate over a rather wide range of ambient temperature. Heat dispersion might be important with power tubes (rectifiers, audio/rf amplifiers), but most of that is due to the power inefficiencies of operating the tube,(see the red or white-hot plates!), not from mere filament heat. In that case fans or liquid cooling would be a better alternative. Try painting a 3-500 tube black and fire it up!

There is a "Wireless Set No. 19" group in Yahoo. These are still valued
artifacts, and there's a "chirp net" on 80/40 meters in the U.S.
You may want to contact "Henry Meiseles" <meils@get2net.dk> in
Copenhagen. He has several No. 19 sets, and may have contacts.

I'm not sure that a layer of black paint (as in exploiting what physicists call "black body radiation" [or rate of heat transfer is proportional to wavelenght raised to a power greater than one, and I don't remember the power]) of is going to help you very much. Yes, mirrors, white surface, black surface reflect, respectively, high, medium, or low amounts of impinging radiation but at some point down the time scale, it will all come to equilibrium anyway.

Several additional thoughts:

1. The layer of paint probably won't act as much of an insulator (silicon grease, an insulator at high thicknesses, is used in thin layers between computer CPUs and heatsinks and nobody gets worries about this).

2. A question about heat dissipation would have to involve knowing that most heat is dissipated (from the plate) as infra red (unless the tube plate is warm enough to start glowing red). Black paint would have to be examined in terms of its spectral absorbtion as a function of visible-IR wavelengths and compared with how well glass (which, IIRC, passes IR but not UV) passes a given quantity of heat at the same operating temperature. The passband and transmission spectrum may also be dependent on any doping (dyes with bandpass absorptions, etc) but I certainly recall no writings about this in terms of tube cooling.

3. Some tube sheilds were shiny, some were blackened. Good question as to whether the difference helped or hurt temperature, but some tube sheilds were advertised as helping with heat transfer (had some kind of slots). However, all of the metal enveloped tubes had a dull black surface and there may have been a minor component of contribution to surface cooling through black body radiation, or it was simply the cheapest surface to make.

4. Personally, an opaque tube envelope means I can't tell by looking at the tube if the filaments are lighting up when I turn on the power.

Its not clear to me that you need to worry much about running tubes at a lower bulb temperature since glass (and even the metal covered glass tubes) won't melt until you get a way much quite a bit hotter than they usually run. If you are worried about heat causing a variety of accellerations of temperature-based aging processes in other components (transformers, capacitors, etc), then put a small fan somewhere to draw out the heat or blow in cooler air. If you are thinking about pushing tubes beyond spec limits, then I'd suggest just not doing that (or, to

get more power, or whatever, put more tubes in parallel or
use bigger tubes, but that did not seem to be part of yor goal).

It is not done to cool the engine, it is done to make the
engine look cool.

> the outside.

Empirical evidence that most everyone has witnessed, shows
that black objects absorb light from the sun, and get hot.

So, that is exactly what you should expect to happen with
painting a tube's envelope black. The paint will absorb
the radiant heat from the plate, and conduct it to the
glass envelope. The glass envelope will then get much
hotter than it would have if the radiant heat had been
allowed to escape through the glass and radiate out into
space.

The black EMC tube shields cool the tube envelope by conducting
the glass's heat to the metal shield. This is done not to
make an unshielded tube cooler, but rather to make a tube that
must be shielded less hot than it would be in a conventional
shield that lacks the heat conducting structure.

  Unless you can put a thermocouple in the tube, it will be
> hard to know how hot it gets Inside.

It is a hard vacuum, vacuum doesn't get hot or cold. You could
measure the temperature of some of the tube's elements, but why
would you care if they get hot? As long as they don't get hotter
then the yellow heat they were heated to when they were evacuated,
there is nothing to be concerned about.

  (Yes, it can be done, despite the
> "how to build a triode" nonsense. Tubes were fabricated and evacuated
> with mercury pumps by amateurs in the 19 'teens and 20's).

True, but I would bet that you can't do it! Building a triode
requires a wide variety of knowledge and capabilities. The French
guy that did it in one of the videos built every piece of equipment
that he used in making the triodes, and successfully built a nice
little hard sealed glass triode too. It was impressive, whether or
not it impressed you.

> painting a 3-500 tube black and fire it up!

It would melt the pyrex glass envelope, particularly around the already
highly stressed filament pins.

I have exchanged a few emails with the guy selling a BC-312 which is clearly modified on Ebay. While I believe his asking price of $225 will keep a serious collector away, he will be trouble to deal with for the unwary. Watch out for this guy:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=330203945037

I doubt anyone here would bid, since known working ones go for about $150+/-.

Steve.

I am puzzled by your warning. The pictures are clear and sharp. The modifications are shown clearly in the extra pictures.

They guy says: "Give a tune-up and some TLC, and it should be ready to go."
... *SHOULD* is not is!

He says it belonged to his father, and was known to work 40 years ago.

He doesn't say it was unmodified. He doesn't say it works. Actually, he says: "...I've plugged it in and turned it on with nothing happening."

I don't see anything dishonest about the listing. If it is priced too high for you, don't bid.

-Chuck

It isn't "complete" and it's been modified. Unless the mods are documented,
I wouldn't go over $100.

I bought my MINT BC-312N in 52. It didn't stay complete/mint for long, and
it was an excellent receiver for the day. It got me through my Novice year
and I collected QSL cards from all over the world on 80 and 40 meters with
my 6L6 xmtr (WN7SAT).

I have a couple of T-368 transmitter accessories I am going to sell off.
The MD-239 modulator that mounts on the top left side of the T-368, $150.00.
I also have the matching dual diversity teletype converter, the CV-116, for
$150.00. If interested, let me know. ....Mike.

This actually makes a great speaker for amateur radio even though it
probably wasn't designed as such:

A few nights ago I got my J-38 out to help with Straight Key Night.
(Had a blast!).

The J-38 isn't particularly new to me... I got it from my Elmer before
I was licensed, probably when I was 9 years old.

But... as I look at it, I see it has a screw eye and two posts in the
back, and realize that I never knew what they were for. The two posts
in the back might be some kind of shield tie-down (or maybe something
I have no conception of related to land-line telegraph wiring), but
what the heck is the screw eye there for?

Tim.

Suing Radio-Marty for misrepresentation would be like suing the
retarted kid at the playground because he mumbles incoherent stuff
about you. Nothing against retarted kids, sorry to compare them with
Marty! But a not particularly useful experience for a well-respected
professional to to one-up a retarded kid.

Tim.

>always described as unreliable.

Okay, the transmitter here is a broadband noise source, going into some tuned circuits that produce a peak roughly in the 200 to 500 Khz range. For a kilowatt input power, there would be a couple watts out on channel, and the channel was pretty wide.

Combine that with a receiver that was usually a coherer, which used electrostatic attraction between particles to detect an RF source, which took substantial power at the antenna to detect any signal.

On top of that, we're working at really long wavelengths where skip propagation is poor, onboard ships where the antenna size is limited by the small size of the vessel.

>It got me to wondering about WWI. Can anyone recommend a book
>or a web site?

I believe there is a book by the US Army Center for Military History that should be available from the GPO, on communication in WWI. It talks very little about radio, because radio wasn't really very useful although there were attempts to transmit field orders and to communicate with aircraft-borne observers.

Although by the time WWI came along, the technology had advanced considerably since that of 1904, there were still no power tubes and still no use of short waves yet, although improved detectors helped a lot.

The first serious use of radio in combat wasn't until the Italo-Ethiopian war of 1936, where Mussolini equipped units with field radios and operators. Selassie's troops would open up a hole in the line, take in a bunch of Italian troops and cut them off with a pincer movement as worked so well for Marechal Foch in WWI. Unfortunately, troops that were cut off physically still maintained communication by radio and the effect was not so effective.

Actually, it happens every day. On the private and the corporate level. Someone trading on another's reputation, is serious enough in itself. Misrepresenting products in another's name can have long term consequences to the business and personal reputation of the person who's reputation his being traded upon.

Litigation, as distasteful as it may seem, is the only way to minimize that kind of damage.

Often, however, the process never makes it to a courtroom. Once an action is filed, settlements often happen quickly.

Why do you see it that way instead of seeing RadioMart as a calculating predator? Do you have any personal or business relationship to him?

I have canceled bids in the past by "gottahaveit(whatever)" on items I
had for sale, after I figured out it was him. Selling a radio to him
would be about as bright as selling a gun to the retarded kid at the
playground.

It just isn't worth it. If he were a professional predator, I might
devote some effort other than just canceling his bids. But that's not
what I see him as. Do you think I'm giving him too much credit, or too

little? Probably too much if I bother to type about him here!

OMFG. I just looked under "radio-mart" on Ebay and this guy is not the
small-timer he was a couple years back. He's got 88 auctions going on

just for radios! I believe I will have to re-align my opinions in the
near future... not sure where they'll fall but it's clear that he is
not the retarded kid on the playground he used to be. He's more like
the retarded kingpin of the fucking mafia!

Tim.

The J-38 was mostly used for mass code classes. Each position had a key and phones. The screw eye is for the strain relief on the tip end of the earphone cord. Each position was connected to a central oscillator and tape sending machine. For recieving practice the circuit closer was closed allowing the code from the sending machine to come through, for sending practice it was opened and a steady tone was sent down the line.

These are very good keys. I also have one I bought new
surplus in its original box about a thousand years ago,
probably cost about a dollar at the time.

There's no moderator; this isn't a moderated newsgroup.

If you used a real newsreader and a real news service instead of
googlegroups, you'd be able to filter the posts if your news provider
wasn't already doing it.

Fortunately, there is no moderator.

We were all waiting for you to wake up, run it to the ground, flip it and see what side is up, fix the bad stuff, unclog the mess, be the Big Boss, stop the bullshit, etc.

Good luck.

Seems to be hard to do with Mozilla/Firefox/Seamonkey. Because he is rotating the spaces, and punctuation, you can't filter on the subject or sender field. Mozilla/Firefox/Seamonkey only allow filtering on the subject, and sender fields.

The paranoid moron, of course, knows this. He wants to be sure our filters don't deny him his audience.

So, I have been forwarding everything he posts to abuse at his newsgroup sender. He should be needing some new isp accounts shortly.

Its not just the radio groups, he posts to virtually all english language groups other than the porn binaries.

The poster is known. Google MI5 Persecution and you will get some groups on this loon. He is in England. He does the "Letter to the Editor" thing over there. He apparently is a certified nut case (don't remember the pschyc terminology but he has more than one.)

If he keeps it up he will prove the adage that sometimes paranoid people have real enemies. At least he doesn't discriminate...he annoys everyone.

Having worked in the Intel game for 35 years I can say he should be flattered if MI5 really did care about him. We were quite used to nut cases. We ignored all of them.

Jon,

Sorry, this is Usenet.  There is no moderator, just 70,000 news servers
around the world, each with their own admin staff.

You have the misfortune of being on Google, which is one of the more
incompetently-run of those 70,000 news servers, and which does not seem
to have anybody dealing with the spam problems.  Consequently, you are
seeing huge amounts of trash that people who are on compently-run news
servers do not see.

Get off of google and onto a legitimate news service not run by drooling
morons and you will not only not see all of this trash, but you also will
have a user interface that is much easier to use and not clumsy as hell.

You shouldn't have to be doing it, your ISP should be running cleanfeed
and have a news admin on staff who deals with this stuff.  Call up Erols
and ask if Afterburner or Ereshkigal are still working there.

>So, I have been forwarding everything he posts to abuse at his
>newsgroup sender.  He should be needing some new isp accounts
>shortly.

He cycles through them on a regular basis.  He loses accounts, then
just gets new ones.  The solution is to have your news admin deal with
it on the server.  If your news admin is running "cleanfeed" it should
deal with it automatically because it has a feature to pattern match
repeated posts to multiple groups.

I have a brother that is mentally handicapped and the best way to deal with people that offend them is to not let it offend you. Most people don't mean to offend and I don't think Tim was trying to be mean, although the analogy was tasteless. Our love for the handicapped people in our lives shouldn't make us hyper sensitive trying to protect them and the real aholes that say stuff to be mean are lonely pathetic souls with bigger issues than any handicapped person we'll ever know.

All that is left of Erols is really only the name. They were bought up
by RCN, and then StarPower (Pepco and RCN), and then spun off to become

RCN once again.

Erekose is probably still there. I have used his services on a number of occasions.

However, I have seen no sign that RCN filters anything out of their news feeds.

I could easily do the same thing by running my news through my spambayes proxy. But I don't really care enough to bother.

It would be so terribly useful if Mozilla/Firefox/Seamonkey would provide the same message filter capabilities for news that it does for email.

I have asked them about it but they just get all testy and tell me to do it myself.

-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=
-= MI5: methods and tactics. -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=

They deliberately set out to harass in a. way that would resemble the
```

symptoms of schizophrenia,. so that any report of the harassment would be taken as indicating mental illness and "treated" accordingly.. They never show their own. faces; they only work through proxies, in the media, among the public, and by manipulating people in the. workplace. Since they do not declare their identity. there is no evidence to initiate legal action against the security services or anyone else. The only. people you can prosecute are the proxies and. they will deny knowledge of any conspiracy.

By repeatedly humiliating and abusing the victim,. they induced mental illness. This is the worst form of human rights. violation: making any statement of the harassment appear to be symptomatic. of the illness which they cause through the harassment.. That this can happen, and people collude by silence, is absolutely. horrifying.

From the. beginning in June 1990 they set a pattern of harassment which they have followed. without change for the last six years. They paint me as a "threat" to which people must. "react" (shades of Nazi persecution methods), while simultaneously portraying. their hate campaign on which they have spent over a million pounds of taxpayers� money as. a "joke".

The MI5 that breaks the law with the silent complicity of the police is. the same agency. that is now seeking a role in the fight against crime. Perhaps the real joke is the proposed involvement in the. implementation of justice of an organisation which commits criminal acts with secrecy. and disinterest for the legal. process.

-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=
-=. why the security services? -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=

You may ask, why do I. think the "they" referred to are the security services? Is there any evidence that there is a single source, as. opposed to a loosely based. "whispering campaign" amongst many people? Even if there is a. single source, is there any evidence that "they" are professional "buggers" as opposed to amateurs, or perhaps people working. for a privately funded. organization?

a). As to the question of a single source versus something more fragmented; it is quite obvious that there. is a single source from the way the campaign has been carried out.. Since things have been repeated verbatim which were said. in my home, there must be one group which does the watching and listening. Since on several occasions (mainly during travel). people have been planted in close proximity and. rehearsed in what they were to say, it follows that someone. must have done the planning for that, and again a single. source is indicated.

b) So why couldn't it. be amateurs? Why couldn't it be a private organisation, for example a private detective. agency paid to manage the campaign and undertake the technical aspects? Some detective agencies. are unscrupulous as has been proved on the occasions. in the past when they've been exposed or caught; they. too can have access to the bugging technology deployed; and there are reported cases. of MI5 paying private eyes to do their dirty work (against peace campaigners and. similar enemies of the state) on the understanding that if they were caught then they could. deny all knowledge. Why couldn't. that be the case?

The main factor pointing to direct. security service involvement (as opposed to amateurs or. MI5 proxies) is the breadth of their access to the media in particular, and the fact that the television companies are so involved. in the campaign. The BBC would not directly. invade someone's home themselves, since it would not be within. their remit to allocate personnel or financial resources to do so. An organisation. of their stature would not take part in a campaign set up. by private sources. The only people they would take material from would be the security services,. presumably on the assumption that if. the cat ever flew out of the bag yowling it would be MI5 who would take. the consequences.

State sponsorship for these acts of psychological. terrorism is also indicated by duration; support for over six. years for a team of three or four people would be beyond the means and will of. most private sources. The viciousness of the slanders and personal. denigration also points to MI5; they traditionally "protect" the British state from politicians of. the wrong hue by character assassination, and in. this case are using their tried and tested methods to murder. with words an enemy they have invented for. themselves.

And there are precedents. Diana and Hewitt were. alleged to have been filmed "at it" by an Army intelligence team which had. operated in Northern Ireland, these allegations were made by someone called Jones who. had been on the. team. His statements were denied by the defence establishment who tried to. character-assassinate by describing him as the "Jones twins". Funny how if you tell. the truth, then you must be ill, isn't it? Thought only communists. behaved like that?

Hewitt later said that he'd been spoken to by someone in the army. who revealed the existence of videotapes of him and Diana, and that the. tapes would. be published if any attempt was made by them to resume their association.

-=-=-=-=-=-=-=-=-=-=-=-=-
-= harassment at. work -=
-=-=-=-=-=-=-=-=-=-=-=-=-

Once I stopped watching television and. listening to the radio at the end of 1990, "they" had to find. other ways of committing abuses. So they took what must be for them a tried and tested route; they get. at you by subversion of those around you.. Since they wouldn't be able to do that with my family or friends, that meant getting at people. in the workplace to be their mouthpieces. and do their dirty work for them.

They supplied my employers in Oxford with details. from what was going on in my private life, and what I and other people had said at my. home and accommodation in. Oxford. So people at work repeated verbatim words which had been said in. my home, and repeated what I'd been doing recently. Often the most trivial things, the ones. from your domestic life, are the ones which hurt most. One manager in particular at Oxford continuously abused. me for ten months with verbal sexual. abuse, swearing, and threats to terminate my employment. After ten months. I was forced to seek psychiatric help and start taking medication, and was away from work for two. months. I spoke later with a solicitor about what had happened at that company;. he advised it was only possible to take action if you. had left the company as a result of harassment, and such an. action would have to be started very soon after leaving.

Over a year later the same manager picked on another. new worker, with even more serious results; that employee tried to commit suicide. with an overdose as a result of. the ill-treatment, and was forced to leave his job. But he didn't take action. against the company, either. Abuse at work is comparable to. that elsewhere in that tangible evidence is difficult to produce, and the abusers will. always have their denials ready when challenged. And even if. a court accepts what you say happened, it still remains to prove that abuse causes the type of breakdown I. had at the end of 1992. In a recent case before a British court, a former. member of the Army brought a case against others who had. maltreated him ten years previously.. Although the court accepted that abuse had occurred, it did not agree that depressive illness necessarily followed, and denied justice. to the. plaintiff.

Brian, your ability to bite your tongue speaks to your unusual self-discipline, but I didn't read Tom's mild comment as anything more than a polite reminder that there are other and better ways to make a point. He didn't wail about how offended he was, or lash out at Tim or call him names. My wife worked with retarded kids for many years--it galls us when we hear kids call each other "retard" or say "that was retarded." Our own son did it when he got to middle-school age. An occasional calm heads-up like Tom's is fine in my book.

It's crazy not to, because there is convenient automated software that
does the job for you, and integrates well into the two most popular news

server packages, INN and CNEWS.

And because Usenet propagates from site to site, if your server runs cleanfeed, the benefit is seen by all of the sites downstream of it. This means the guys they feed are happier too.

Doesn't it allow simple regexp searches in headers? rn did that twenty-five years ago. Just kill anything with more than three commas in the Newsgroups: line.

Ray,

Regarding the NM-25T: I'm pretty familiar with this unit. I have three of them, a complete set of antennas and a manual. The three pin power connector on the front are: two for 120 VAC and one for chassis ground. With the unit sitting in the upright position - meter facing towards you, the bottom pin is the ground or green wire and the other two are 120 VAC. The resistance across the two pins for 120 VAC should be around 175 Ohms or so with the power switch on or in the charge position. The resistance to ground should be in the megs. Be sure and check it with an Ohmmeter since it's possible the plug has gotten rotated. I picked up a matching connector at APEX Electronics in Sun Valley California just above Los Angeles. They're a common connector originally made by Cannon.

Batteries. The unit takes 12 C-size Ni Cad batteries. They are inside a gasketed box in the uper left side of the receiver - inside of course. Removing the battery compartment is easy. There is a two pin plug on a short grey cable. You need to push in on a wrap around type spring that secures the connector. Generally, the place to push is on the side of the plug facing the front panel. Simply push in on the spring with a small screwdriver and the plug should easily pull out from the battery box. Then remove the two long screws with the round heads. They go all the way through the battery box and into the bracket. Once you have the battery compartment free there are four or six flat head screws you need to remove. Once they are removed you will need to gently pry the lid off. I had my battery pack rebuilt at Batteries Plus at the cost of about $90.00. With a good set of batteries but low, the battery meter in the upper left should read about 12-14 Volts when charging begins. When charging is complete it should read about 16 Volts or so. This is an expanded meter scale. The receiver actually operates on 12 Volts from an internnal regulator. It takes about 8 hours or longer to fully charge a set of good batteries. The current drain from the receiver is pretty low so a good set of freshly charged batteries should run the receiver about 40 hours continuous.

The switches in the receiver may also need to be cleaned. I use a Caig supper-dupper gold contact spray. The tuner assembly, accesible by removing 80 bazillion screws, is similar to a standard coil tuner type assembly. If you need to clean the contacts I would suggest a piece of t-shirt with the Supper-Dupper spray on the cloth and wipe the contacts on the turret assembly - not the spring contacts. Do not use anything abrasive like a pencil eraser as this will take the plating off.

You will find that this is an excellent piece of test equipment as well as a great receiver. The meter is calibrated in Volts as well as dB relative to 1 uV so a meter reading of -20 would be 0.1 uV and +20 would be 10 uV. You get the idea. The input impedance is 50 Ohms and to make actual field intensity meter reading you need a calibrated antenna with a known antenna factor. For relative readings you don't need anything fance but you should have a matching unit to match whatever pickup device you are using to the 50 Ohm input. Without that it will gve some strange readings as far as amplitude tracking over any appreciable range goes. When you put it in the CAL postion youshould hear, after a few seconds, a tone that sounds like about a

600 Hz squarewave. This is normal and the gain is typically set to read about 30-35, but you need to determine that with a calibrated source. I primarily use mine as a bridge detector when making antenna measurmeents.

I hope this gives you a starting point. If you have any further questions please feel free to contact me.

Burt, K6OQK

Brian, your ability to bite your tongue speaks to your unusual self-discipline, but I didn't read Tom's mild comment as anything more than a polite reminder that there are other and better ways to make a point. He didn't wail about how offended he was, or lash out at Tim or call him names. My wife worked with retarded kids for many years--it galls us when we hear kids call each other "retard" or say "that was retarded." Our own son did it when he got to middle-school age. An occasional calm heads-up like Tom's is fine in my book.

I agree 100% and I'm not trying to scold anyone. All I'm saying is, It can really give you a workout dealing with peoples statements and behavior on the subject. I can't count the trouble, arguments and scraps I got into as a young man trying to protect my brother and one day he said " Brother don't let it bother you soo much, it doesn't bother me. I've leaned to accept myself and others who are differant and they haven't. We need to set the example for them." My brother is border line autistic and he's like a kid in some ways and a genius in other ways. I've learned a lot from him.

Anyone know/remember the original "paint" color of the cabinet, etc. Also what tubes? A customer of mine wants to know. Honestly, "I" can't recall ever having seen or worked on one.

I tried to google but came up empty with hits to help me out - unless over looked them.

As I understand things, it is a "common carrier" sort of thing. If you make
no effort to filter or censor a feed, then you are not responsible for its
content. If RCN were to make an effort to filter out junk like the MI5 stuff,
and other nasties, and they missed some, then they would be open to being sued
for what they missed. It is like the protection the telephone company has
against being sued because of folks that use the telephone to perform illegal
activities.

No, Mozilla/Thunderbird/Seamonkey doesn't understand regular expressions. They
have never taken the email and newsreader portions very seriously. The best they
can do is to select on a word, or a part of a word... pretty dumb, actually.

Bussman type HVA is a larger diameter, but the right length and available
in half-amp size with plenty of high voltage interrupting ability.
http://host1.publiquik.com/bussmann_web/family.cgi?familyUid=137
They are fairly common in broadcast transmitters.

Give the Bussman rep a call; he may be able to locate something of a
smaller diameter.  You want to talk to the electrical power guys, and
not the electronics guys.

That's stupid.  Dump RCN and get an account with a competently run news
server.  Anybody who would hide behind that sort of reasoning has no business
connecting their machine to Usenet.

ISPs have NO common carrier protection of any sort... and if a good faith
effort at maintaining their feed isn't sufficient, that is no excuse not
to make such an effort...

I am not aware of RCN having made any statements on the subject. I am simply
telling you my understanding of the legal issue.

> ISPs have NO common carrier protection of any sort...

Oh but they do! Otherwise they would be liable for all of the nasty
stuff goes over their feed. Things such as illegal downloads of copyrighted
material, software piracy, kiddie porn...

  and if a good faith
> effort at maintaining their feed isn't sufficient, that is no excuse not

Personally, I would prefer that they didn't attempt to be a censor of what
comes over my feed. There tastes might differ from my own. I would prefer
to control the filters.

If the FCC has not given it the status of a common carrier, and it is
not regulated by a public utility commission, it is not a common carrier
under US law.  European law may be different.

The degree to which an ISP is legally liable for the traffic they transmit
is still under discussion.  Look at the Communications Decency Act, for
example, which makes the ISP liable for a lot of things which they legally
could not be if they had been declared common carriers.

>Personally, I would prefer that they didn't attempt to be a censor of what

But they have to be.  Even setting retention and expiration times and
deciding which of the millions of newsgroups to carry and whether to
accept different kinds of control messages is in some way attempting to
"censor what comes over your feed."  Your news admin has limited resources;
he can apply them toward getting more binaries groups, or he can apply them
toward extending retention times of existing groups.  He can set things up
so that higher traffic groups expire faster.  It is what news admins do.

Yeah, and you have a long way to go.  So according to you, it's just
fine to label people and call them names.  Just tell them to not let
it bother them.

As for your "brother", he speaks with more wisdom and logic than
you'll ever know.

Ok thanks for the link , thats very close , this is from a  skanti
400 w ssb tx , but as its no longer in production, the makers are not
'helping'   looks like the easey way may be to  use a 500mA microwave
oven fuse ... but i dont think that will be a 'quick blow' type of
fuse , the pa uses  qty  2  4cx250-b in parallel and a big  400hz
invertor psu running from 24 v dc @ 45 amps for the whole set ...

Thank's

Graham ..

Just another thought.
First, why not to specify in the listing that the pictures are not of
the actual listed item?
Further but less important, I see it is unlikely that an elderly ham,
who has enough practice to sell on ebay, is able to copy and past, and
probably would try to sell other stuff too, might not have a digital
camera.

I'm surprised that it is that "wide." The selectivity curves are very
impressive;
and RCA put a lot of effort into the IF transformer design. I suspect
aligning
the IF and filter will be a bear to do.

This receiver is from an RCA Global Communications facility, it still has
the
RCA sticker and inventory number on the front panel. There's also a
custom calibrated BFO plate that wasn't on the orignal RX either.

Pete

Cutting and pasting is trivial on most modern operating systems. So much so that kids in 1st grade do it, and think it is ok to copy anything that way.

I still see auctions that have no pictures whatsoever. I agree that the seller should have identified where the pictures came from, but I have

bought things on ebay that had "found" pictures without identification,
and was not unpleased with the result.

Not everything that seems suspicious is the result of treachery.

-Chuck

I've owned a couple 88s in my time and yes it's no 390 but still a nice rig if working well. They have decent audio and with a good antenna they are capable of broadcast DX work to a point. Their no utility DX machine, but no radio from that era really is.

To align the IF correctly - one needs a sweep generator. And yes - not aligned correctly - they would imitate the nearest "barn door" for bandwidth.

Best regards...

I have an opportunity to pick up a Swan 120 in good condition from an

estate. I know this was the first model produced by Swan. Any idea
of the approximate value of a 120? I haven't seen anything on Ebay to
give me any idea.

Dick

Yes a sweep gen and oscilloscope are nice in this regard but the job can be
done correctly using a accurate sig gen or at least close enough for this
type of rig.

I believe that the IF on the AR-88 is peaked and not staggered, which
means you can indeed get away with just a signal generator and a scope.

Again, the IF on the AR-88 may be pretty tight for something with only
LCR networks, but it's not anywhere near as tight as crystal or mechanical
filters will allow. This is either a substantial advantage or disadvantage
depending on your application.

Yes, someone with a mile of patience might get all sections tuned right with a stable gen - I'm just not that patient, and "close enough" probably depends on how good of performance someone is willing to settle for.

They are indeed (or are supposed to be) stagger tuned - with two

transformers over-coupled and two under-coupled --- that's why the RCA
manual has such a lengthy procedure - using a sweep gen.

best regards...

I suppose but I've done well using just Sig Gen. I guess being bald and not having any hair to pull out helps. I guess if a AR-88 was the only radio I owned and my shack wasn't plum full of vintage and modern gear I'd probably fire up the sweep and scope to align one. But I've gotten pretty good results with the old HP 8640. It's spot on and I keep it in good shape. But yes your right, a sweep and scope to peek the IF on freq is optimum.

PS, I still use a matchbook cover to set the points on my model T. :)

That's right! Those have three IF stages! You win Randy. Yes you would be
better served using a sweep. I'm gonna go mope in the corner now. : (

There is a nice looking Hammarlund HQ-215 (Solid State version of Collins
S-Line receivers) now on E-Bay.

Listed by an acquaintance of mine.

I just rechecked the instruction book for the AR-88, the IF is indeed peaked, not stagger tuned. What may confuse the issue is that two of the transformers have variable coupling and two also are double stages, that is, there are four coils and what amounts to a filter in the transformer. The stages should be peaked when at the minimum bandwidth setting without the crystal filter. In that setting the transformers are all slightly undercoupled so should have single peaks. The complex transformers result in better skirt selectivity than simple transformers would give with the same number of IF stages. The selectivity will not be as good as the 6 or pole mechanical or crystal lattice filters found in many newer receivers but should still be very good in comparison to most receivers. This IF is unique in having both double IF transformers _and_ variable coupling. A similar transformer, but without the variable bandwidth, is found in the National HRO-60 (and I think also the HRO-50).

While "visual" tuning using a sweep oscillator and scope will probably result in more accurate tuning, or at least easier tuning, conventional methods should work fine with some care. A similar condition is met in other receivers with variable bandwidth IFs such as the Super Pro series, the SP-600 and some others. The coupling method used by RCA and Hammarlund results in a symmetrical pass band at all settings, some others, notebly the system in the Hallicrafters SX-28, do not.

Note that there is no external phasing control for the crystal filter on the AR-88, it has an internal trimmer. Some other versions of the receiver (like the CR-88) do have an external phasing control with some re-arrangements of the controls on the front panel.

RCA used hundreds of these receivers in triple diversity combinations at RCA Communications facilities and singly at Radiomarine shore stations. They are not a match for the better, later designed, double or triple conversion receivers such as the Collins 51J or R-390 series, for one thing no single conversion receiver can match the very high image rejection of the double conversion types at frequencies above about 10mhz.

The 6SG7 tubes used in the AR-88 RF and IF stages are about equivalent to the 6BA6 with somewhat higher capacitance due to the octal base.

A great many of these receivers, particularly the ones used in diversity set-ups were not equipped with signal strength meters but they can be added (if you can find them) to any of them.

There are operating and maintenance handbooks at several sources on the web.

MI5 Persecution: Molestation. during Travel

MI5s persecution of me. varies in intensity. Since 1990 it has been steady for perhaps 80% of the time; there was a notable quiet period in. 1993, and another quiet period in Jan-Feb 1995,. as well as a hiatus in the first two months of 1999. It puzzles me. that they cease and restart, seemingly without any logic or reason. But one aspect. of MI5s activities against me which is relatively predictable is this weeks articles topic,. which is Molestation during Travel. Almost every time. I cross the Atlantic, go to the Continent or even try to enjoy a holiday. in this country, you can bet that MI5 will be there doing their utmost. to wreck it all.

This aspect of the harassment is particularly relevant as I will. be travelling to Europe again in a months time, with. naturally the Minidisc recorder in tow; so it will be. interesting to see if I can record the abuse which will almost certainly take place, either. on the Tube going to the airport,. at the airport, on the flight, in the terminal building - MI5 have previously instituted instances of abuse at each of these. locations, so well see. how much taxpayers money they waste this time, and whether it will prove possible to. capture their abuse on minidisc.

Read about the MI5 Persecution. on the Web

June. 1992 in Polands mountain resort of Zakopane

The persecution started in June 1990, and for the first two. years I stayed in the UK apart. from a couple of brief day trips to Calais. By the summer of 1992 Id had enough of. being cooped up in England with abusive fellow employees egged on by an abusive secret police service, and decided. to spend 10 days in southern Poland, on what was intended to be a. holiday at the mountain resort town of. Zakopane.

Unfortunately the psychopaths. of the Security Service were not willing to allow me to enjoy a holiday. in peace and quiet. The journey to Zakopane was by coach from the meeting point at. Londons Victoria coach station (National Express) followed by ferry followed by another coach. across Europe.. As we left Victoria a youth and his girlfriend started a loud tirade of abuse directed at "this bloke", where the. "bloke" was never named, but it was. very clear that the "bloke" was myself. The youth said "they". had "found somebody from his school, and he was always really stressed at school, a real psycho".. Again, the label "they" was not elaborated on, but it was clear. that "they" = the persecutors from MI5. The boy also said,. "he was in a bed and breakfast for only one night and they got him".. By a not unexpected coincidence I had been in a B&B in Oxford a week previously, which had been booked from. work; other things lead me. to the conclusion that the company's offices were bugged for most of the 2. 1/2 years that I was there, so "they" would have known a room in the B&B had been booked. After a few. minutes of this I went back to where they were sitting and asked. where they were travelling. The boy named a village in France, and. the girl's giggling suddenly ceased; presumably it permeated to her brain cell what the. purpose of the boy's abuse was.

It is now very clear to me that MI5 were trying to. have me incarcerated, assaulted or killed on. this trip across Europe. The degree of verbal violence inescapably leads to this conclusion. When we arrived at. our destination, it became clear that many people,. both in our tour group and its guide, and among the ordinary residents of. the town, knew there was a movement under way to. "get" me. MI5 employed many people and significant resources for an action which they knew would only. take a maximum of ten days. A commercial operation would never have felt. able to waste such resources on such an. unproductive and temporary action; only a state-sponsored, taxpayer-funded entity like the. Security Service would be able to. be so wasteful.

To. give some examples of what happened in those ten days; I was walking in some woods outside the town, when a Polish. woman, looking at me, said the English "shit" in a strongly Polish-accented voice. For the. first three years 1990-92 MI5 had been trying. to force this word on me. Another example; I was walking near my "hotel" when a. mother said laughing to her child, "a wiesz ze to prawdziwy wariat". which means "you know hes a real madman". And the "TV reacting". happened there too; on Polish TV, a bemused looking journalist said to another, "to jest sprawa. Anglikow", which means "its the concern of the English", in. other words, none of our business, despite what. the English are trying to force down our throats.

Just before we left for home, I went. with some others from our group to a nearby. bar. There a man shouted at me the same sexual obscenity which MI5 have constantly thrown at me these last three. years. I think MI5 try to justify their various terms of. abuse by repeating them at me until I say them, either while conscious or while talking in my. sleep; and then they seize on. my saying those words to "prove" that the obscenities are "my fault", et cetera. This rather stupid reasoning. of theirs can actually be seen as indicative of the psychopathic condition attributed to them in. a previous article; blaming the victim for the crime you. inflict on him is how psychopaths. think.

Nor did the persecutors let up during. the return trip. Returning on the ferry over the channel, a rather insalubrious-looking guy talked to. his mates about "and you know this bloke, hes really mad you. know, hes really mad". On the National Express return coach to London,. a group of five or six young people started shouting at me. I slumped. in my seat and tried to avoid presenting a target, so they got ever. more strident - "whats the matter with you, cant you. hear us?" One of the other people who had been on the trip to Poland asked them why they were shouting at. me, and they said, "hes been to Cambridge", to which the. co-holidayer asked them, "have you been to Cambridge?" presumably thinking they were. aggrieved fellow students, but they answered "no".. Even after I left the coach at Elephant and Castle abuse continued; in the tube station,. two kids started throwing abuse at me;. one of them said to the other, "and you know he works?" to which the other answered. "yes".

Immediate. Aftermath of November 1992

As you will know from previous. articles, my manager at OCG - ARIS/Oxford, Mr Mitchell, induced a mental breakdown in me in the months. leading up to Nov/92. The diagnosis was. regarded by the persecutors as a victory for them, because few if. any people give credence to allegations of harassment when they are made by somebody suffering from schizophrenia. There. is also a bias against the mentally ill, an "institutionalised bigotry". in society comparable to the institutionalised. racism against blacks.

However, MI5 did not let. up on persecuting me following Nov/92. In December 1992 I flew by charter jet. to Alicante in Spain for two weeks recuperation. MI5 planted one of their people on the flight, a. youth who tried to start some noises that "hes a nutter". One of the. other passengers replied, "oh hes a nutter is he? oh well!". and the youth shut up and said nothing for the rest of the flight. I think it would be. fair to say that the youth. on the flight was embarrassed by what he had been asked to do in making the flight "uncomfortable" for me; he. sounded defensive rather than. aggressive.

My first trip to. Canada in June 1993

Ive already covered this in a previous article so Ill. just give a brief summary here. On 10 June 1993 I flew. British Airways from Heathrow to Torontos Pearson Airport. On de-planing. from the aircraft, one of a group of four fellow. passengers looked at me and said, laughing, "if he tries to run. away well find him". It was quite obvious that these four men were the ones who had been harassing me since. 1990.

I did nothing to apprehend them or bring this incident to the. attention of the airport authorities, mostly. because this was my very first visit to Canada, and the last thing I wanted was to get into a. dispute before I had even finished. disembarking. In retrospect, I can see this was a terrible mistake; I should have made every effort to. detain and identify these people.

Subsequently I have made numerous attempts to obtain the. names of these people from. British Airways passenger lists, by talking to BA, through a lawyer in Ontario, through a solicitor in England, through the. UK police, and. also through private detectives in the UK. But all my efforts have come to nothing. BA. have told me they keep passenger lists for a period of seven years, so they will. still have the list for this 1993 flight. I did not see or hear anything during. the rest of my visit to Ontario in 1993 which would have lead me to believe. that I was being watched or followed.

Journey across Canada in. summer 1994

As I think Ive already said in previous articles I. emigrated to Canada in late May 1994. For six weeks between late May 1994 and early July 1994. I travelled across Canada from coast. to coast, starting in Toronto, visiting various cities and ending up in British Columbia. I saw. this both as something of a holiday, and the chance to get to know a little. better my adopted. country.

As you can guess, MI5. followed me everywhere I went during these six weeks. In Toronto, where I started this trip in late May,. I was spoken about by one. youth to another with the words "hes an idiot", to which the other replied, laughing sympathetically, "good luck to. him".

A couple of days later I went. to Montreal and stayed at the YMCA downtown. As you can guess (this. is all so predictable, isnt it?) MI5 followed. me there and bugged my room at the YMCA. Not only that, but they managed to set-up an instance of. "newscaster reaction" from a local television station;. while I was watching a Vermont TV news programme on the set in my. room, the woman reporter said, "well theyre just tired and they want to go home", which sounds like a pretty unprofessional. thing to say until you realise she was trying to say of me that. I was the one that was supposed to be tired, and they. (ie MI5) wanted me to go home to the UK.

On the bus journey across the North American continent, it. was quite clear that MI5 were following me every step on the way. For the first. part of the journey they actually put someone. on the bus with me, a youth who said at. me "that guys paranoid" and tried to incite other passengers to attack me. I stopped for a couple of days in Winnipeg in central. Canada, and on leaving the town heard on the radio a female presenter. ranting about "insanity! insanity!".. It is very tiring travelling such a long distance by. bus; I took the journey in two steps, each of about 36 hours; and it is especially. tiring when you know MI5 are watching you and harassing you every step of. the way.

When I finally got to Vancouver, MI5. instituted the usual harassment, in very. short order. I was surprised how quickly they were able to induce hatred towards me in elements of the general. populace; the Security Service must have employed a number of. agents and serious resources in a very. short period of time; and for no real gain, because I havent been back to BC for almost five years, so all. their "work" appears to be for nothing. In downtown Vancouver. a street person said in front of me, "theyre all. talking about him". For a few days I was staying at Pauls Guest House (345 W.14th Ave); on the day I left, the owner. Paul shouted at no-one in particular, "hes going to Victoria" -. which was quite accurate, I was. indeed going to the provincial capital Victoria on Vancouver Island. But I had not. told anyone at the guest house where I was going; I had only mentioned to. my parents back in England on the phone that I was going away from. Vancouver for a few days. Which leads me to suppose that MI5s bugging. of the phone in my parents house yielded the "intelligence" that I. intended to visit Victoria, and they had passed the information on. to Paul.

When I got to Victoria. it was again obvious that the persecutors were "doing their. stuff" there as well. On the street I was identified as being English, although I. had not said anything so my accent hadnt given me away; and returning by ferry to the mainland, I. was abused by a Canadian woman who said, "hes a nutter! you can run but you. cant hide". During my years in Canada I have never heard the word "nutter". on any other occasion; I do not think it is part of Canadians vocabulary;. so the

Canadian woman on the. ferry, who was obviously talking about me, must have been. supplied with this word by the English persecutors. And once I got back to Vancouver, staying at the Austin Hotel on Granville. St, I listened to a conversation. in the apartment block directly opposite, and a man saying, "hes paranoid, so thats as bad as it can be,. so why are they doing this. to him?".

Holiday. in the States, August 1995

By. 1995 I was living in Canada, and in August I went down the eastern seaboard to Florida and as far as Key West by car. As. you can guess (this is all so boring and predictable, isnt it?) MI5 followed me. every step of the way. I can. see in retrospect that this must have been quite easy for them as they had my car bugged,. both on the inside to listen to anything that was said and what radio station I was listening. to, as well as what must have been a tracker device installed to track it. across long distances.

The first city I visited was Philadelphia. In the old. Congress Hall where the first US. Congress assembled, the woman guide started referring to my situation, saying that "all these. people in Europe were watching it", and they were "a. little paranoid" at this 18th-century experiment in democracy. Also I. had recently written a newsgroup post where Id described a (female) poster as "wet-nosed" (implying "canine"), and. a young girl in Philadelphia. remarked, "so he thinks were dogs?" There were two or three more incidents during this holiday. in the eastern States, including a radio station down near Miami, showing "they" had tracked me. all the way there, and were bugging the inside of. my car; but I didnt record the details and. Ive forgotten some of it now. Also down in Miami Beach a French tourist in a lift. expressed support for me with the words, "cest incroyable" ie. its incredible, meaning that. MI5s well-known actions against me were. beyond belief.

To go back a. bit, in about May/June 1995 Id visited New York, again by car, and was insulted several times by people using. the same words that had been used against me in England. In Central Park, and. elderly Englishman (not a. real gentleman - but then the Engish view of themselves as "gentlemen" etc is. quite laughable) looked at me and said "idiot". And while I was eating in a streetside restaurant a. New York youth started laughing and said something like, "I. cant believe it, hes actually here" - I think that was because I had. had an expressed wish to visit New York for some years before this, although after this visit. I wont be going there again for a. very long time.

Visit to. Poland December 1995/January 1996

In December 1995 I flew (BA. again, unfortunately - every time Ive flown BA one of these incidents has happened,. presumably MI5 is happier setting up harassment on British-domiciled carrier) from. Montreal to Berlin and travelled on to Poland to visit family. MI5 naturally harassed. me in Poland during my brief stay. They followed. me around and got Polish people to take. part in the harassment. In one case two Polish youths talked in front. of me saying in English (with marked Polish accents), "fucked up men, fuck you". There were also. other incidents which I dont remember too clearly since it. was some time ago.

The return flight connected through Heathrow,. and in the transit lounge MI5 again set-up harassment against. me. In Poland they were talking their abuse in English, and in London they set Polish people after me. to speak in Polish; they heard me on the phone to. my father, and said "a wiesz ze to Polski wariat", in. an almost sympathetic, inclusive fashion (translation.. "you know hes a Polish nutter"). Once on the flight to Montreal I. was again set upon by two English youths, one of whom spoke and the other listened. The aggressive "fat bastard" youth. said, "if he wants to be a wanker" (its my fault theyre harassing. me, you see), self-justification. that "hes a nutter" (so we have to keep on abusing him, because hes ill), as well as talking about the town in Poland where I. had been staying. He also said, "he doesnt. know who we are", but as already remarked in a previous article, that was at. best a half-denial of my guess expressed. in internet newsgroups that the people after me were MI5 - if anything its. a half-confirmation rather than a half-denial.

These incidents are still going on. You. can hear digitised audio files of abuse on a BA flight to Berlin in 1998 on the Web at. address

On this flight they were again attacking my mental health;. "paranoid, hes paranoid" and "nutter" are discernable. The last "during. travel" contact was. at Ottawa Airport on 21 July 1998, when "Alan Holdsworth" the psychopath MI5 agent, dressed. as a vagrant, was pacing aggressively in the departure area. In three weeks I will again be. travelling to Europe; we will see what fresh acts of molestation MI5 perpetrate during this. trip.

MI5 are Afraid to Admit They're. Behind the Persecution

MI5 have issued a formal. denial of any involvement in my life to the Security Service Tribunal, as. you might expect them to; but, more importantly, the persecutors have never denied that. theyre from the Security Service, despite several years of. accusations from my corner on usenet and in faxed articles. I am not surprised that the. Security Service Tribunal found "no determination in your. favour". I am however a little surprised that the persecutors. have refused to confirm my identification of them; by doing so, they implicitly admit that my. guess was right.

"No determination in your favour" says the Security. Service Tribunal

In 1997, I made a complaint to the. Security Service Tribunal, giving only the bare outlines of my. case. I do not think it would have made very much difference if Id made a much more detailed. complaint, since the Tribunal has no ability to perform investigatory functions. It can only ask. MI5 if they have an. interest in a subject, to which MI5 are of course free to be "economical with the truth". A couple of. months after my complaint the Tribunal replied. that;

The Security Service. Tribunal have now investigated your complaint and have asked. me to inform you that no determination in your favour has been made on your. complaint.

Needless to say this reply didnt surprise me in the slightest. It. is a well established fact that the. secret service are a den of liars and the Tribunal a toothless watchdog,. so to see them conforming to these stereotypes might be disappointing but. unsurprising.

It is noteworthy that the Tribunal. never gives the plaintiff information on whether the "no determination in your favour" is because MI5. claims to have. no interest in him, or whether they claim their interest is "justified". In the. 1997 report of the Security Service Commissioner he writes that "The ambiguity of the. terms in which the notification of the Tribunals decision is. expressed is intentional", since a less ambiguous answer would indicate to the plaintiff whether he were indeed. under MI5 surveillance. But I note that the ambiguity also allows. MI5 to get away with lying to the question of. their interest in me; they can claim to the Tribunal that they. have no interest, but at a future date, when it becomes clear that they did. indeed place me under surveillance and harassment, they can claim their interest was "justified" - and the. Tribunal will presumably not. admit that in their previous reply MI5 claimed to have no interest.

"He. doesnt know who we are"

In early January 1996 I flew on a British Airways jet from. London to Montreal; also present on the. plane, about three or four rows behind me, were two. young men, one of them fat and voluble, the other silent. It was quite clear that these. two had been planted on the aircraft to "wind me up". The fat youth described the town in. Poland where I had spent Christmas, and made some unpleasant personal slurs against. me. Most interestingly, he. said the words, "he doesnt know who we are".

Now I find. this particular form of words very interesting, because while it is not a clear. admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been. wrong, the fat youth would surely have said so more. clearly. What he was trying to do was to half-deny something he knew to be true,. and he was limited to making statements which he knew to be not false; so he made a. lukewarm denial which on the face of. it means nothing, but in fact acts as a confirmation of my. guess of who "they" are.

On one of the other occasions when. I saw the persecutors in person, on the BA flight to Toronto in June 1993, one of the group of four men said,. "if he. tries to run away well find him". But the other three stayed totally quiet and avoided eye contact. They. did so to avoid being apprehended and identified. - since if they were identified, their employers would have been revealed, and it would become known that. it was the secret services who. were behind the persecution.

Why are. MI5 So Afraid to admit their involvement?

If you think about it, what has. been going on in Britain for the last nine years is. simply beyond belief. The British declare themselves to be "decent" by definition, so when they engage in indecent activities such. as the persecution of a mentally ill person, their decency "because. were British" is still in. the forefront of their minds, and a process of mental doublethink kicks in, where their antisocial and indecent. activities are blamed on the victim "because its his. fault were persecuting him", and their self-regard. and self-image of decency remains untarnished. As remarked in another. article some time ago, this process is basically the same as a large number of Germans employed fifty years ago against. Slavic "untermenschen" and the Jewish. "threat" - the Germans declared, "Germans are known to be decent. and the minorities are at fault for what we do to them". - so they were able to retain the view of themselves as being "decent".

Now suppose this entire episode had happened in some other country.. The British have a poor view of. the French, so lets say it had all happened in

France. Suppose there was a Frenchman, of non-French extraction, who. was targeted. by the French internal security apparatus, for the dubious amusement of. French television newscasters, and tortured for 9 years with various sexual and other verbal abuse and taunts of. "suicide". Suppose this all. came out into the open. Naturally, the French authorities would try hard to place the blame on their victim - and. in their own country, through the same state-controlled media which the authorities. employ as instruments of torture, their view. might prevail - but what on earth would people overseas make of their actions? Where would. their "decency" be then?

This is why MI5 are so afraid to admit theyre behind. the persecution. Because if they did admit responsibility, then they would. be admitting that there was an action against me - and if the truth. came out, then the walls would come tumbling. down. And if the persecutors were to admit they were from MI5, then you. can be sure I would report the fact; and the persecutors. support would fall away, among the mass media as well as among the general. public. When I started identifying MI5 as the persecutors in 1995 and 1996 there was. a sharp reduction in media harassment, since. people read my internet newsgroup posts and knew I was telling the truth. The persecutors cannot deny my. claim that theyre MI5, because then I would report their denial and they would be seen as. liars - but they cannot admit it either, as that would. puncture their campaign against me. So. they are forced to maintain a ridiculous silence on the issue of their identity, in the face of vociferous accusations. on internet newsgroups and. faxed articles.

Have MI5 lied to. the Home Secretary?

In order for the Security Services to bug my home, they. would either have needed a warrant from the Home Secretary, or. they might have instituted the bugging without a warrant. Personally I think it. is more likely that they didnt apply for a warrant - I cannot see any Home Secretary. giving MI5 authority to bug a residence to. allow television newscasters to satisfy their rather voyeuristic. needs vis-a-vis one of their audience. But. it is possible that the Security Service presented a warrant in some. form before a home secretary at some point in the last nine years, for telephone tapping or surveillance. of my residence, or interception of postal. service.

So the. possibility presents itself that a Home Secretary might have signed a warrant presented to him based. on MI5 lies. Just as MI5 lie to the Security Service Tribunal, so they might have. lied to a Home Secretray himself.. MI5 and MI6 are naturally secretive services former home secretary. Roy Jenkins said, they have a "secretive atmosphere ... secretive. vis-a-vis the government as well as [enemies]". Jenkins also said he "did not form a very. high regard for how they discharged their. duties".

It. was only a few years ago that MI5 was brought into any sot the extraordinary thing is that British media. organisations like the state- and taxpayer-funded BBC take such an active. part in the MI5-inspired campaign of harassment. We. have after all heard of MI5 trying to bribe broadcast journalists; but surely there. must be a substantial number who are not bought or blackmailed by. the Security Services, and who take part in the "abuse. by newscasters" of their own volition? The BBC is supposed to be independent of. the government of the day as well as the Establishment in general. While perhaps. it is childish to think that the BBC is anything other. than effectively state-controlled, the degree of collusion between. the BBC and the British Secret Police MI5 is something you would not find in many. countries. Individual tele-journalists in other countries would have enough self-esteem not to allow themselves. to be controlled by. their secret police - seemingly, BBC broadcasters like Martyn. Lewis and Nicholas Witchell have such a low opinion of their employing organisation. that they see no wrong in dragging the BBCs no-longer-good. name through yet more mud, at the mere request (whether supported by financial or other inducements) of the British secret. Police, MI5.

And when challenged, these broadcasters. LIE about their involvement, with just as little shame as MI5 themselves. The BBCs Information. dept have said. that;

"I can assure you that the BBC would never engage in any. form of surveillance activity such. as you describe"

which is an out-and-out. lie. Buerk and Lewis have themselves lied to their colleagues in the BBCs Information. department over the "newscaster watching", but unsurprisingly they refuse to put these. denials in writing. Doubtless if the "newscaster watching" ever comes to. light, Buerk and Lewis will then continue to lie by lying about. these denials. So much for the "impartial" BBC,. a nest of liars bought and paid for by the Security. Services!

It is obvious. that the persecution is at the instigation of MI5 themselves - they have read. my post, and only they have the surveillance technology and media/political access. Yet they have lied outright to. the Security Service Tribunal. Similarly, BBC newscasters Michael. Buerk and Martyn Lewis. have lied to members of their own organisation. The continuing harassment indicates. they are all petrified of this business coming out into. the open. I will continue to do everything possible to ensure that their wrongdoing is. exposed.

MI5 Persecution Update: Friday 11 June,. 1999

Harassment in a pub in Clapham, Tuesday. lunchtime

Once a month, or once every other month, I meet. a Polish friends of mine who lives. in Clapham North, and sometimes we go to a particular pub near where he lives. The last time was some two months ago; I. did not have my minidisc-walkman with me, and consequently was seriously. harassed by people MI5. had instructed to harass me, in the pub.

This Tuesday, 8 June 1999, we again went to. the same pub for a pre-meal drink. This time I. did have my minidisc-walkman with me. As you can guess, we were. followed into the pub by a couple of young people (Im getting older and older - isnt it funny how the MI5 agents all look young. these days?). They started. talking about my situation, in particular some travel I had booked the previous day. Unfortunately, they were talking. fairly quietly, and my minidisc didnt pick up. their speech.

MI5s schizophrenic reasoning is. that simultaneously I am very important and worthy of their acts. of persecution, and I am also totally unimportant and their. abuse of me "doesnt matter". Perhaps they should test their agents and managers for obsessive personalities or. psychotic features in the same way as employees are drug-tested. MI5 might lose their. "worst cases" employees if some psychological testing were. applied to their recruitment. procedure.

Toothless Watchdogs. What. a Surprise.

Recently I. have been engaging in communications with two watchdogs, the Security Service Tribunal which. deals with complaints against the security service (and always. clears MI5 of any wrongdoing), and the Data Protection Registrar, which is mandated to investigate misuse. of personal data held on. computer.

In a letter to. Nick Brooks, Security Service Tribunal secretary, dated 20 April, I asked him if the Tribunal, as an allegedly. independent body, had the means to investigate. complaints against MI5 other than asking MI5 to themselves investigate complaints. To my disappointment, his reply. two weeks later answered the question. only indirectly, in the negative. Whatever. the reader might think of the merits of the case I have been putting before you in faxed articles. this last year and half, you will surely recognise that it is a significant. anomaly for the Tribunal to have. no independent means of investigating complaints, particularly given the view. expressed even by previous home secretaries that the security services. are untrustworthy.

MI5 Persecution: No Justice for the Victims of. MI5

In. a previous article I detailed the similarities between the current MI5 Persecution in England, and other historical. instances of similar persecution, notably that by the Nazi Germans. in the thirties and forties. The Germans persecuted first the mentally ill,. the epileptics and those suffering from schizophrenia, then moved on to racial. groups; in todays Britain the persecution is again. directed at those with mental illness,. which the British in their cowardice find easier than taking on racial groups as the Germans did. But just as in Thirties Germany. there was. no recourse against a malign and omnipotent state, so the MI5 Secret Police in the. modern British Fascist State allow no justice for their victims.

No Recourse. Against the Security Services Illegal Harassment

It has become apparent to me over the last nine years just. how loaded the dice are in todays Britain, a fundamentally fascist. country which masquerades as a democracy. Britain is a democracy in. name only; the Establishment, the defence and. MI5 secret police are always there, regardless of which party has been voted into. power most recently - and from. "New Labours" conduct in office one finds it difficult to tell them apart from Old Tories, in their. crackdowns on the sick and vulnerable in society.

In thirties Germany the victims of the Nazi regime had no. legal recourse against their State oppressors; and in todays Fascist. British state, the victims of the Establishment and its MI5. Secret Police similarly have no recourse against. the illegal state-funded and organised oppression. There is supposed to be a mechanism for dealing with MI5 crimes, in the. shape of the Security Service Tribunal and Commissioner;. yet these have never found favour of a plaintiff.. One might as well ask the Nazi SS to investigate crimes against. epileptics or Jews as ask the Security Service Tribunal to investigate MI5 crimes against British. citizens; it is quite obvious what the answer is going to be, regardless of what you say to them, and. what evidence you provide. The Tribunal and Commissioner are a. mere formality, a whitewashing body to give the Secret. Services a veneer beneath which they hide their. shabby criminality.

"Institutional Racism" and Bigotry in the. Metropolitan Police

The recent. inquiry into the racist murder of Stephen Lawrence found clear evidence of systematic and deliberate racism. in the Metropolitan Police, which cannot have surprised anyone. Commissioner Sir Paul Condon. accepted a somewhat lukewarm definition. of institutional racism as being "unconscious". In truth, and this truth must surely. be obvious to anyone who has any familiarity or encountered the great British police,. the Met has not just "unconscious" racism, but very clearly. "conscious" and deliberate racism, of the. kind that would have done Thirties Germans proud. And it is a bastion of such open racism - when many. other parts of society are learning to live in a multicultural environment, the. Met is still. living in the past in its attitude to the minorities.

But in addition to. the systematic racism confirmed by the Lawrence inquiry, there is also something. much more relevant to this case, which is systematic police. bigotry against the physically and mentally disabled, which I personally have experienced in my dealings with. the police over the years. You cannot. expect equal treatment if you are mentally disabled. I tried to make a complaint to the. police in 1995 about the harassment I had been subjected to. for several years. As soon as they found out I had mental. illness, they refused to even talk to me. I tried again in March 1999; the police made various. threats to me, while ranting about "your paranoid rubbish" in reference to the complaints. expressed to them.

The police refusal to do the. job they are employed and paid to do is extremely serious,. particularly as this case is highly important, indeed key to the whole issue of British self-perception. at the end of the 20th century. and the beginning of the 21st century. Britain has lost much in the last fifty years. - it has lost an empire, it has lost its self-respect and its identity as a people. If the. MI5 persecution finally makes it into the light and the Security Services are seen. for the rather cheap bullies their behaviour. indicates, it will have a massive and harmful effect on British. self-perception in the new century.

Security Service Tribunal -. Blatant Whitewashing

A few weeks ago I spoke on the phone to Nick Brooks, the Secretary of. the Security Service Tribunal, which is supposed to deal with cases. of MI5 transgression. I asked him if the Tribunal had ever found. in favour of a plaintiff and against. the Security Service. He answered that as far as he knew, it. had not.

I also asked Mr Brooks if the Tribunal had. any means of investigating allegations of. criminal activity by MI5, other than asking MI5 themselves if they had engaged in. such activity. His rather circuitous written reply states that the 1989. Security Service Act provides that "it shall be the duty of every member of the Service to disclose or give to the. Tribunal such documents or information as they may require for the. purpose of enabling them to carry out their functions under this Act". Which. is a very round-about way of saying - "No" - the Tribunal. has no way of investigating. MI5 crimes - None At All.

Setting up the. S.S. Tribunal, and creating a Security Service Commissioner, was really an act of falsehood by. the government. It is generally recognised that MI5 are out. of reach of the normal criminal justice system - the police, as we have seen, have no intesot. answer to the government; in a previous article I quoted Roy Jenkins. speaking of "a secretive atmosphere.... secretive. vis-a-vis the government as well as [enemies]", and a "lack of. frankness" from MI5.

If the government wanted to, it could reform. the secret services and ensure they acted in conformance with the laws which have. been enacted for them in the. last ten years. But apparently the present government does not see any need to ensure security service compliance. with the law. As noted above, the regulatory machinery for MI5 is deliberately weak;. the Tribunal has no independent means of investigation,. and it is simply a waste of time complaining to the Tribunal. or Commissioner.

Every so often, fresh revelations come to light of secret. service transgressions. We have heard from Shayler that MI5 bugged Jack Straw. and Peter Mandelson;. we have heard from Peter Wright that MI5 plotted to see Wilson ejected from. office; yet so closed is the system of government that the law is never enforced against MI5 when. they "bug and burgle" everyone from. politicians to ordinary citizens.

No Justice from the Legal System,. either

Britain has a civil and criminal justice. system which effectively limits many complaints from being heard. For a civil complaint to be. brought before a court, you need a solicitor willing to act on. your behalf. Supposedly it is possible. to represent yourself as a Litigant-in-Pthe basis of being "frivolous and vexatious". or "disclosing no cause for action in law". This is exactly what happened to me in. 1997 when I twice tried to. take the BBC to court for spying on me in my living room at home; my. case was twice struck out, and on the second occasion an order was made against me that I. could not bring further civil litigation against. the BBC without leave of the court.

As. the reader can guess it is quite impossible for a person with schizophrenia, who. complains about the secret services and media interfering in his life, to find a solicitor willing to represent. him in legal action against the persecutors. I have quite a lot of evidence. of the continuing persecution which I. have posted on the website, even if the evidence is quite tentative and perhaps. open to varying interpretations. But I have tried. several firms of solicitors; some of them. have acted unprofessionally and abused me; all of them have refused to represent. me. My psychiatrist gave me the name of the firm of Bindman and Partners in central London, and I have approached them. twice. On each occasion. they refused to accept my instructions. Plainly the problem with Bindmans, which they have admitted, is their. bigotry against mentally disabled. people; yet this is not just something that is wrong with Bindmans, it is something that is wrong with the legal system. as a whole, since the legal system necessitates. finding a solicitor willing to represent you in order to bring a case. to court, but it does not have a mechanism for providing a lawyer. in the case where no solicitor is willing to take on your case. So the British. legal system is such as to prevent cases such as mine. from ever receiving an airing in a court.

So much for the civil courts. But the. criminal justice system is no better. Two years ago the Protection from Harassment Act. came into force. But again, while. the Act is all very well on paper, in practice it is unenforceable in my case, since it would require Police action. to see the law. implemented, and if the police cannot even be trusted to conduct a murder investigation competently (in the Lawrence. case), then what chance is there. of their investigating complaints against the Security Service? Of course, it. would be possible for me to personally issue proceedings through a private prosecution either against MI5. themselves, or against one or more of their. media tools; but here we see the same problems as with the civil courts, because first. of all I would have to find a lawyer. willing to act on my behalf. Litigants-in-person do exist in the criminal courts,. but the Attorney General can bring such a prosecution to an end by taking. it over and entering a plea of "nolle prossequi"; and I suspect that if I were. to bring a private prosecution against either MI5 or one of their media tools, then this is exactly what. would happen.

So much for British justice. But if anything the wrongs that have. been perpetrated on me by the. British justice system are quite mild to what others have suffered. Others. have been wrongly convicted based on police evasions and lies, and spent many years in jail based on. false charges. I should count myself lucky that despite the best. efforts of the MI5 secret police,. I have not acquired any criminal charges or convictions; which shows that for all their resources and influence,. and the clear imperfections in the British legal system, there are still limits. on how much subversion MI5 can. achieve.

The latest in a long line of. injustices

A comment I heard during the. recent scandal of the police mishandling of the Lawrence murder. investigation is that "its not as if the police themselves murdered him". This is not a particularly wise statement. to make about the case, since it could be argued. that the four alleged murderers were aided in their crime by the expectation that the. police would deliberately botch. the investigation - which of course is exactly what. the police did.

But in my case, this would be a completely inaccurate thing to say. - since the MI5. secret-police have expressly been trying to nine years now to see an end put to my life, either by having me. incarcerated and my liberty ended, or by forcing self-termination on me. It is exactly as if. the secret police "themselves murdered [me]", since. that is what their aim is in their. campaign against me.

The public has heard of instances of police mishandling. of cases, of police manufacturing evidence,. lying in court, extracting false confessions. to clear up crimes, et cetera. Various instances of extra-legal activity by the secret services. have also come to light in the last few years. The unhappy. truth is that what MI5 have been doing to me for the last nine years is really nothing out of the ordinary. for them. To me. it seems unbelievable that this sort of systematic campaign of harassment, which thousands and thousands of. people in this country and abroad are well aware of, could exist for such a long period of. time with the media maintaining "omerta".. But my case is not the first such instance of. persecution by the "British secret police", and judging by the lack of any. real controls on MI5, I very much doubt it will be the last.

MI5 Have Systematically Destroyed My. Life

This is getting depressing. From the feedback. Ive received, the recipients of these faxes are tired of hearing my complaints, and in truth I am. tired of sending them.. The reason I havent yet ceased sending faxes is because I cannot think of any other effective means of replying. to MI5s actions against me, and. I feel I have to do something to try to defend myself. Three/four years ago I got the MI5 harassment out of my. system by posting about it on Internet. newsgroups, and for a few months this tactic was quite effective - I received. (and indeed still do today) support from newsgroup regulars, and felt I could. make my voice heard and break the MI5 monopoly on access to the British media. But that. was years ago, and today nobody gives a tinkers cuss about my internet posts - so. I have sought to escalate matters. by communicating directly with the politicians who allegedly say how. this country is supposed to be run.

Of course, its quite expensive to. keep up a campaign of fax messages for many weeks. Each set of faxes takes approx 50 hours to send over. the weekend, and. costs perhaps 35. My phone bill for the last quarter was 350. These figures. are naturally insignificant compared to what MI5 have been. spending against me over a similar period. It also takes a lot of time and energy to create a new. article every week, and try and find new and fresh aspects and viewpoints on MI5s persecution of me.. I am beginning to run out of both new topics. and energy to write these articles.

So I have a suggestion to put before the MI5 persecutors who. have been wrecking my life since 1990. In. a few days time I will be going on holiday to Poland and Germany, for a couple. of weeks. Previously, almost every time I have travelled by plane, or gone anywhere on holiday,. the MI5 "wreckers" have been most assiduous in destroying. these trips. My suggestion is; if MI5 leave me. alone on this next trip, I will cease transmitting these articles. If, however, there. are any clear instances of harassment (and I. am very capable of recognising MI5 harassment when I see it), then I will make public these instances and publish any recordings. I may. make of them, and, unwillingly and unhappily, continue the articles.

Read about the MI5 Persecution on. the Web

Keith. Hill MP (Labour - Streatham), my elected representative, as ever refuses to. help.

MI5 Refuse to Allow me to have. a Normal Life

Its. kind of difficult to contemplate having a normal existence when you know your entire house is. bugged from top to bottom, for audio and, very unpleasantly, video; when your. employment is systematically destroyed, over and over again; when every time you. leave the country your travel is disrupted by MI5 plants on the plane yelling. abuse at you..... you get the idea. I would like to have some semblance of. a normal life, like my Polish and English friends do. But MI5 have made this impossible, and they. have leached massive resources from. the taxpayer to institute a life not worthy of the. name on me.

A few years ago MI5 were very. open about their aims in persecuting me. They were shouting "suicide" at me, both in Canada where I lived. at the time, and during my occasional visits to London.. You cant get much clearer than that. There have been instances as recently as. a few weeks ago of this intention being voiced by. their side; on 15 April 1999, a woman at the next ticket counter at the Royal. Festival Hall said;

"it would kill it, you know, it would. just be overkill... they can't stop can. they"

meaning that "they" were trying to "kill it" i.e. me and. they "cant stop". The audio file. is at;

I wonder. why they "cant stop". Nobody (who doesnt know already) believes my claims - so what difference. would it make, if they were to "stop" persecuting me? Perhaps what. this persons remarks indicates, is the depth. of the obsession MI5 have with this case. They have chosen at random a. person from the general population, and done their worst to ruin my life. What is wrong with these. people, that they persecute a national of the country whose citizens they are supposed. to protect?

No Chance of a. Harassment-Free Job

Since the harassment started in 1990 I have had three jobs, the. first near Guildford, the. second in Oxford, and the third overseas in Canada. All three jobs have been systematically destroyed by MI5. It is so. ironic that MI5 employs a team. of agents, each well compensated for their efforts, to persecute just one person paid a mere fraction of what they. get for their "work". In fact, it is a. joke that MI5 is allocated resources for this sort of effort.. If this area of government were run along commercial lines then MI5 would be very rapidly closed down, they produce nothing of. any value, instead spending. their time obsessed with the bugging and surveillance of their former employees like. Shayler, dangerous subversives like Straw and Mandelson, and. "threats to national security" like yours truly.

Applying for my first. post university job

When I was applying for my first post-university job. in the closing months of 1990, I found at two. or three job interviews that MI5 had got there ahead of me.. Interviewers knew what words to repeat from what had been said at my home recently; MI5 had supplied them with words to hurt me,. and the "British secret police" were trying to wreck. my job search and discourage me from joining. the world of work. This and the continuing harassment in the media and by the public meant that the. search for a job took very much longer than it would ordinarily be. expected to take for a person with my. qualifications.

With my first job near Guildford came the knowledge that. MI5 were doing everything possible to make. me lose the job. Despite their efforts I managed to stay in. work for ten unhappy months, during which they made very clear to me that. they were bugging my workplace, my accomodation in Woking, my car,. my home..... and they also made clear that they had "got to" my employer. in Guildford.

Employment with. Oxford

I was able to find a new job, with. Oxford Computer Training Services (now ARIS/Oxford), quite. quickly. But it became very clear, very quickly, that MI5. were treating this job the same as the first; they tried to get the other employees and in particular the managers to attack. me. It was plainly MI5s intention that I be sacked fro this job. But I. was not sacked; instead, after almost a year. of abuse from OCTS managers, I was forced to seek medical help, and had. to take two months off for medical leave. OCTS MD Hugh Simpson-Wells was motivated in keeping me on by. the fear that if he sacked me, then I would take him to court. for the treatment OCTS managers had. meted out to me during 1992.

Emigration. to Canada

When I emigrated to Canada in. 1994, I did think that perhaps MI5 would leave. me alone, given that I had made the effort to leave the UK and try to find. a new life overseas. I could not see any reason why they would continue to harass. me over in Canada. But clearly the MI5 agents had their salaries to think about, since continue to harass me they. most certainly did,. at my home in Ottawa, and by getting fellow employees to speak against me, as had happened with previous jobs. in the UK.

MI5 are denying me. a future in work

Former Chief Constable of. Devon and Cornwall John Alderson had this to say regarding. MI5's activities;

"MI5 is not under the same restraints as the. police. They infiltrate organisations, people's jobs. and lives. They operate almost like a cancer."

Currently I am on disability, and I can. see that MI5 are denying me a future in work. It would. be an insult to logic for me to return to work and find a job, in the knowledge that an entire. team of MI5 agents, paid in total many times what I would be earning, would have. the objective of seeing me "done down". in the employment, and ejected from the place of work. This situation is completely. wrong and nonsensical - I would very much like to. have a job, but MI5 are preventing me from even thinking about returning to work. The culture of secrecy in MI5/MI6 means. there is no objective oversight of their expenditure,. when external oversight and greater transparency might lead. to wasteful and illogical operations such as that against. me being shelved.

Watched and Harassed at my. Home and Accommodation

As you will. know if you have been reading these articles, MI5 have watched and harassed me at my home, and at every. accommodation Ive had since 1990. Theyve. also watched me at neighbours houses in London, and at short-term accommodation such. as hotels and bed-and-breakfasts. They have used the "words" gained from these watching activities. against me, by passing these words on to other people such as. OCTS managers for them to make clear. that I am being watched where I live.

Harassed. at rented rooms in Oxford in 1992

This was at its worst in 1992 in Oxford, where. during the week I lived at rented accommodation in Oxford, and. at weekends returned to my parents home in London. I was being severely harassed by managers at my. place of work, OCTS; and it was clear from the things they said that. they were being supplied by MI5 with details of. my home life, that they were being supplied with words. to repeat at me.

In 1992 I moved house in Oxford many times, living. at a total of five rented accommodations in. ten months. In January I started off living in a rented room at Headington. near the ring road / A40 intersection; then when it became clear that. house was being bugged, moved to a rented room in Botley, some miles away. It was at the. house in Botley that I had an "interactive watching". experience with Martyn Lewis while he was reading the news;. I threw a term of abuse at him; he first flinched, then gave a gsult of what I had just said, he was no. longer "on my side".

So I moved house again. This time to a place in Cowley, near the. Rover car works, where I. stayed for a few weeks. Because of continuing harassment at work, I soon moved from this accommodation, to yet another rented room. on Iffley. Road. By this time I was very ill and being abused continuously at work. Again,. MI5 followed me to the rented room on Iffley Road, and created. new instances of "newscaster watching". There was a television in the room which I. watched, and as you can guess the newscasters got at me when. I was watching the television. Also once I was assaulted, if thats the word for what happened, on. leaving the house; a youth grabbed me by the coat lapels,. roughed me up a bit with various terms of abuse. I did not report this assault to the police, because what. was happening to me at work was very much worse, and nobody seemed to think that. that was worthy of being reported to the police. Later that day at. work, Alex G, a fellow employee, said "I. heard he was assaulted".... I had not told anyone at work about the incident that morning..... so once. again it was made very clear that. MI5 were watching my rented accommodation and giving information about what was. going on there to managers at work.

So I moved house yet. again in late autumn 1992, this time to a rented room in. a large house on Woodstock Road. I stayed there for several weeks as the situation at work deteriorated. due to OCTS managers abuse, until I was forced to take sick leave from. work for two months and attend hospital as an outpatient; at which point I gave notice on the. room, and returned to London.

MI5 continued to harass me after the diagnosis of serious. illness was made. As reported previously, they harassed me on a. flight to Spain in December 1992; and in. 1993, when I returned to live and work in Oxford, they again bugged my rooms, as well. as my workplace, although the intensity of the harassment was very much less. than in 1992.

Watched, followed and. harassed in Canada

It dismayed me to find that MI5 would. not leave me alone after I had settled in Canada. In January 1995 I. rented an apartment at the Bayshore complex in Ottawas west end.. For some weeks there was no sign of the "buggers". But then it started. all over again. They first bugged my car, which had a car alarm installed. - the alarm went off two or three times in a single evening, and the following day gave a signal that the. car had been broken into. Then they bugged my apartment, and. in particular they installed bugs on the phone. line in my apartment.

In September 1995 I moved to. a new apartment in Ottawas Bytown Market area,. the restaurant and entertainment heart of Canadas capital. This proved a serious mistake. In the west end I had been fairly distant. from the centre of town where. MI5 concentrated their efforts at turning people against me.. In the Market area it was much easier for the persecutors to motivate people to harass me, and over the next. couple of years there were frequent instances of. harassment by the general public.

From 1995 I had. some Polish friends in Ottawa, and as the reader can guess, MI5 have spent much effort. trying to break up this friendship. They supplied various things about. my home life to these friends, for example where I was living in the Market, directly over the road. were the studios of a music radio station, which you had. to "look up" to see; and MI5 told these friends. that I was "looking up" to see the radio station; so the friends then replayed. these words back to me, that I was "looking up". MI5 have also made various. sexual slanders against me, and these friends also unwittingly replayed some of the words they had been. imprinted with by the MI5. persecutors.

MI5 Will Never Allow Me to have a Normal. Life

I have heard many excuses as to why MI5 continuously prevent me. from having. a normal life. We are told that MI5 are defending the country against a. tere to zero.

When I have travelled abroad, they always. put their people on the flights, on. the journeys I undertake, to continue the harassment, so that I am put off further overseas travel, and. chained to my home in London. Yet even this is. illogical, because when I lived in Canada, they would still put people on flights back to the UK..... and what possible reason would they have. for doing that? Perhaps the truest words to describe the MI5 persecution. is that reason has nothing to do with their activities - sane people do. not behave in the way the MI5 British Secret Police have been doing.

Summer 1999 - more MI5. harassment?

In only a few days time I will be going to Europe again. This time I. have deliberately chosen to travel by a non-UK airline; so we will see. if they put their. paid agents on this foreign carrier, we will see if they try to harass. me on this non-British flight.

If they do harass me on this trip. to Europe, or if they resume the harassment in London after I. return home, then I will continue to report their activities. in these faxes. As I said at the beginning of this article, I would very much like to not have to. send these articles any more, but that is not my decision to. make - it is entirely up to MI5 to cease their pointless persecution of me,. once and for all.

MI5. Persecution Update: Friday 9 July, 1999

Harassment in. Poland, July 1999

And still it continues.... in my last fax I. said that provided MI5 made no attempts at harassment. during my two-week holiday this summer, or after I returned to England, then. I would discontinue these faxes. Unfortunately

MI5 have. continued to harass me, both during the holiday and after my return to London. I really. dont want to continue these articles, since they take up so much time and effort, not. to mention expense; but the Security Service wont. even let me have a holiday in peace and quiet, so I have to make further efforts to. bring their activities out into the open.

In early July I visited my aunt and her. family in Poland. On Saturday 3 July 1999, I went. to a family barbecue at an allotment outside the city. One of my aunts family has previously shown himself. to be in the "enemy" camp, by saying the Polish. equivalent of "something wrong with him",. and various other unprovoked insults. It is disappointing that one of my family could forsake the usual ties of blood. and take part in the actions against me, but thats the way it is. This guy. turned up at the barbecue, and started making. insults against me. In particular, he started to say something about the video camera which I had brought along. on the trip, and the relevance of the. video-camera to my fight against the persecution. It seemed pretty obvious. to me that my enemies had told him to turn up to this occasion, and most likely schooled. him in precisely what words to say; since hes an. unintelligent person and would not be able to think for himself what. insults to make against me.

Harassment in London, week ending. Friday 9 July 1999

Got back to London. Wednesay afternoon. Two incidents on the Underground returning from the. airport. Unfortunately I wasnt recording because I wasnt expecting trouble, so these. slipped through the net. One of these was. verbal sexual abuse, of the type Ive heard many, many times before these last three-and-a-half. years.

Yesterday,. Thursday 8/July/1999, I switched on Heart FM which had never "got at" me before.... and the presenter started making jokes about. "mad, crazy" etc. Again, wasnt recording this because Id never had any. trouble from this radio. station and wasnt expecting any.

Also yesterday, on a bus. (155?) from Balham to Clapham, a couple of girls started harassing me with taunts of. "crazy". By now I was expecting trouble and recorded an audio file. of this instance of abuse, at web URL;

The cynical reader might think my. demeanour or behaviour had given rise to the taunts of. "crazy" recorded above. But I assure you my behaviour on the bus would not have made anyone think I was ill; and. the taunts the previous day were the same sexual words as previously;. so I'm quite sure that these incidents are either deliberately. staged, or indicative of an overall high level of awareness among the London public,. particularly in the part of London. where I live.

Keith Hill MP (Labour -. Streatham), my elected representative, as ever refuses to. help.

MI5 Persecution: Harassment. through the Radio

One of the aspects of the MI5 persecution. has been harassment through the broadcast and print media; and one of the aspects of. harassment through the broadcast. media is being "got at" by radio presenters. This being "got at" from the radio. takes various forms, the most obvious form being through overt or hidden words. and insults. But there are other, subtler forms. In Canada a couple of years ago, I used to. listen to the local radio stations every morning. driving to work, and listened to the music only, switching between. radio station presets rapidly as soon as a presenters voice came on, so that. I would not be subjected to any verbal harassment. by the D.J.s. But they found a way around this; they kept on playing the same song, every bl**dy. morning at the same time, which had the words "all coming back to me";. the perceptive reader will remember that. the words "coming back" have special meaning (see the Private Eye cover at web URL;. for the
hidden. meaning).

And thats not the only time theyve. allowed the songs themselves to be used as abuse against me;. many years ago Radio-1 in the UK did exactly the same,. and the DJ even made it explicitly clear by saying, "dont you sometimes feel as if the songs. were made just for you".

"We should be done for attempted. manslaughter" says Chris Tarrant

Capital Radio. DJs have been "in on it" from the start. One of the first things I heard in the summer of 1990 was from a Capital DJ who said,. "If he listens to Capital then he can't be. all bad" (supportive, you see. We're not. bastards). Much of what came over the radio in 1990 is now so far away the precise details have been. obliterated by time. No diary was kept of the details, and although archives if. they exist may give pointers, the ambiguity of what. broadcasters said would leave that open to re-interpretation.

In spring 1994, Chris. Tarrant on his Capital morning show made an aside to someone else in the studio, about a person. he didn't identify. He said, "You know this bloke? He says we're. trying to kill him. We should be done for attempted. manslaughter".

That mirrored something I had said a day. or two before. What Tarrant said was understood. by the staff member in the studio he was saying it to; they said, "Oh. no, don't say that" to Tarrant. If any archives exist of the morning show (probably unlikely). then it could be found there; what he said was so out of context that he. would be very hard put to find an explanation. A couple of. days later, someone at the site where I was working repeated the remark although in a different way;. they said there had been people in a computer room when automatic fire extinguishers. went off. and those people were "thinking of suing for attempted manslaughter".

Pirate Radio "gets at". me

In another incident in 1990/91, Id been listening to a pirate. radio station in South London for half an hour,. when there was an audible phone call in the background, then total silence for a few moments,. followed by shrieks of laughter.. "So what are we supposed to say now? Deadly torture? Hes going to talk to us. now, isnt he?" which meant that they could hear what I would say in my room. Note the word "deadly". - they give away. their purpose.

It constantly surprised me that MI5 are so easily. able to subvert broadcasters,. and, in this case of the pirate station, to do so, so quickly. I. think the answer to this question is that they must have very wide contacts in. the broadcast media; presumably some or in fact many of those contacts are literally "bought". In the same. way as they tried to buy Jon Snow of Channel Four news, they must. have bought many broadcasters and. use them both directly to make insults against me, and promulgate their points. of view; but also, they must use these "bought" broadcasters to influence other television and radio presenters,. who might not even be aware that it was. on MI5s behalf that they were being influenced to "get at". me.

BBC-Radio-1 D.J.s celebrate. my job termination in November 1991

This is another one. from the "early years". At the beginning of November 1991 my employment. in Woking, Surrey was terminated. Chris Tarrant of Capital-FM had already made nasty remarks about both my work. for the company, and the managers of the company. themselves - "so theyre not really a serious company,. well theyd have to be to employ you wouldnt they".

So when I was terminated, as you can expect,. BBC Radio 1 D.J.s celebrated. On the Saturday afternoon. (either 9/Nov/1991 or 16/Nov/1991 - I cannot remember precisely) I briefly listened to Radio-1. and heard the disc jockeys. loudly proclaiming "youre useless, you should be sacked". On the same day, I went down to the Kwik-Fit in Tooting to get my cars. tyres replaced, and in the office ran into a couple of their staff, one of. them with an Australian accent, who said "what do you. think about it then? Its getting killed on the. radio."

Plainly, if a. random car-repair shop in Tooting knew about the persecution, then many thousands of other people across the capital. and all. over the country must have known. And the phrase "getting killed" shows. very clear awareness of what the MI5 Persecutors intentions towards me were in 1991, and judging by the. continuing harassment, still remain. today.

Recent Feedback from. Virgin-Radio

As readers. will know, from mid-March 1999 for some four months, every weekend, I have bombarded Westminster. MPs with faxes about the terrible, all-encompassing MI5 Persecution. (Jesting aside, it. really is terrible and all-encompassing, in the UK anyway.) In. June 1999, after I'd been at it some. three months, I started getting "covert" feedback from Virgin Radio.

The first feedback I. got was from Danny Baker, on Sunday 13th June. That weekend I was sending. an article which contained biting criticism of the police inaction in this case. Danny Baker. on his Virgin radio show started an. angry rant that "he knows it's rubbish", ie. he was rubbishing what I'd said in that weekend's faxed article.. Unfortunately I wasn't recording this. programme.

The next possible Virgin-Radio feedback was a week later on. 19th June 1999. This is contained in the audio file. above, in which Johnny Boy on his "Wheels. of Steel" programme says;

"and if you would like to put a triple play. together, ahhh.... because quite frankly Hipster. and me are running out of ideas...."

He goes on to counter Hipster's "how dare you" with a protestation. that he is "only joking".. You can listen to this incident on my website at URL;

What I reckon is that my article faxed to MPs that weekend. was forwarded by one of. the recipients to Virgin Radio. My article had included the words;

"I am beginning to run out of both. new topics and energy to write these articles."

So what I reckon is that Johnny Boy read the article.... and rephrased. the above line "run out of ... new topics". to "running out of ideas". I recognise that this is a pretty. tenuous inference to make.... but do listen to the audio file, from the "ahhh....". pause in JB's speech you can guess he is about to say something. "risky" and at someone's expense. Anyway, I listen to. the Wheels of Steel regularly and will continue to do so, recording it as I always. do - so any future funny remarks will get immortalised on my website! (There. was a previous incident from August 1998 which is preserved at web. URL;

but I am sufficiently uncertain about it that I. have not included it in this. article.)

First Ever Radio Reference - Alan Freeman of. BBC-Radio-1

The first. time I was ever referred to on the radio was sometime in May or June of 1990, by Alan Freeman. of BBC-Radio-1. Note that this isnt an "interactive listening" episode,. its different, this was Freeman reading out a letter from one of. my "real life" enemies.

Id acrimoniously broken. up with some former friends in January of 1990, and I think they were still trying to cause me trouble in June of. that year. Freeman on his rock show read. out a letter from an "Andrew Turner";. one of my acquaintances from January 1990 had been called Andy Turner, so I think its. the same guy. Freeman quoted Turner as saying various things about me, in particular Freeman said "thats a. hell of a letter you wrote there Andy", "with a schizophrenic you're. never alone", and something about the "one who wore out. his welcome with random precision". (from the words of the Pink Floyd song).

When I was looking for primary causes of the MI5. persecution, this letter which Freeman had read out on his programme struck me as. being potentially one of the sources of the persecution. I know. Turner and various others in that group were very bitter at what they saw. as their failure and my undeserved. success, and they were quite determined to upset the applecart. Of course several other primary causes are possible;. I do not know why MI5 chose me as opposed to. someone else, and MI5 are hardly likely to tell. me.

"Absolute Obscene" David. Hepworth of GLR

This one Ive assigned a 100% rating on the website. There. are actually two separate. incidents, which are linked through the D.J.s choice of words. The first incident can. be heard in computer audio at web URL;

On 21/Feb/1997, I was listening to BBC GLR, by. stealth. Back in 1990 I used to have Capital blaring out of the. speakers all over the garden ("if he listens. to Capital then he can't be all bad", thanks ever so much). But now. I listen on my walkman on headphones with the volume turned right down.. It could not possibly be overheard by any listening device, no matter how sensitive, because sound does not carry from. the phones.

Yet somehow they are still able to tell which station. I am listening to on the walkman. And last night, I bravely tuned to. GLR 94.9FM at around 8.45pm. Everything. went well for the first half hour or so. Around 9.10pm, Hepworth said the following after the song. "Come Around" by the Muttonbirds.

"coming up after this, we got the rock-and-roll. A-level, we have, I assume, Brian do we have an embarrassment. of prizes in there, we do, don't we, absolute obscene amounts of. prizes, there will no doubt be a riot at the back door,. and that's, er, A-level coming up after this"

The key phrases in what he said are,. "EMBARRASSMENT of prizes", and what he. himself emphasized verbally, "ABSOLUTE OBSCENE amount of prizes". It is my belief (based on content and tone of voice) that when. he spoke these phrases he knew I was listening, and that the phrases refer. directly to my situation. The. "EMBARRASSMENT" is the embarrassment he and other media people would. feel at having their wrongdoing exposed; the "ABSOLUTE OBSCENE" (which. he verbally emphasized) described the disgusting sexual abuse which the harassers have been throwing. at me.

There. was a second incident, on 9/May/1997, which may be found on the web (with. computer audio) at URL;

This incident again contains the words "absolute embarrassment of. prizes", with the same emphasis as the first instance, and. laughter following the phrase. So theyre aware of the. complaint I made on Usenet after the first incident; and they are so arrogant that they do exactly. the same again. They are so arrogant, they know they are being. recorded and that what they say will be published on. the web, but they dont care. What corrupt media, and what a corrupt country to have such corruption in. its media.

Three Years of. "MI5 Persecution" Faxes

Ten Thousand Faxes, and. Still No Breakthrough

In the last three years I have sent at least 5,301. faxes directly from my computer,. and 4,478 faxes through Demons extremely useful TPC.INT service, to politicians and the media,. in the subject of the "MI5 Persecution". This has obviously cost me quite a lot of. money, not to mention time and effort. The aim of all this communication. has been to try to. put discussion of the "MI5 persecution" into the public arena; unfortunately, this aim has. not been achieved, yet.

This fax. will be my last transmission for the time being, since the summer recess is almost. upon us. Depending on what the persecutors do between now and the. autumn, I may or may not resume faxing later this year. In the article dated 18/6/99 I said Id stop the articles. if MI5 left me alone; but they seem to have no fear of. these articles, since they kept pursuing me in Poland and after my return to the UK. Again, if. they leave me alone this. summer then I wont have to resume the articles in the autumn; but I think its fairly obvious that MI5. have nothing better to do with their time than to go after me, and its. almost pointless to make this offer when I. know they wont cease harassing me.

TPC.INT 1996, 1997,. 1998.....

Three years ago I was living in Canada, and the only economic way. of sending faxes to the UK was through the international email-to-fax. gateway TPC.INT. This highly useful. and totally free service converts emails (which may have Postscript-formatted attachments) into faxes which. it delivers to any. number within the UK. Using the telephone book, I constructed a computer database of M.P.s fax numbers, and used. this database to. deliver copies of the "FAQ - frequently asked questions" article which Id written. some time earlier.

This service is still operational,. but given that I have resided in London for the last year, I. do not need to use Demons service when I can send articles directly from my own computer using its fax/modem, which. is what I have been doing since 1998. However, instead. of just sending the FAQ article,. Ive been composing articles on various aspects of MI5s treatment of me. Since their. activities have been going on for nine years now, and there have been. various aspects to their actions; they have harassed me at work,. at home, through the media, etc; I have so far not run out of things to say, particularly since their harassment of me is. still ongoing, and I have been. able to record the actual words used by their paid agents on my minidisc-walkman. Since mid-March 1999 I have been. sending these articles pretty much. every weekend.

Anyway, as mentioned above, I intend this to be. the final transmission before the summer recess, and it. would be nice not to have to continue these. articles in the autumn. But thats something that depends on them, not me, and their attitude is unfortunately. clear.

Why am I sending these. articles?

Because I. want the harassment to stop. The cynical reader might think from these articles that I "thrive on adversity". and would be lost without the harassment to. complain about; but that is not the case. In a perfect world I. would like to return to work, in a job unsullied by MI5s attempts to ruin it; I would like to live in a house which wasnt bugged, with. my words being repeated. at me wherever I go; I would like a normal life. I do not particularly thrive. on adversity; I am beaten down by adversity; the purpose of these faxes is. to try to bring the whole matter out into the public arena, where the rights and wrongs would be visible. to all, and once that were to happen, the adversity might cease. I have. had something approaching a normal life. a couple of times in the last nine years, but always, in the end, MI5 turn up and ruin it. I just want these. people out of my. life, permanently, and the only way of doing that is to kick this business into the. public arena, and shame MI5 so that they are incapable of doing me further. damage.

Having said that, unfortunately it seems. fairly obvious by now that these faxed articles are not going to. achieve that aim. Some of the recipients know. what I am saying is true; but they choose to stay quiet - wisely, because if they were. to admit the truth of these articles, then they would bring the wrath of MI5. down on their heads. Presumably most recipients do not know these articles are true; their reaction to me is the. same as my reaction to the other apparently deluded people who have sent. me email after. reading my webpage to tell me it happened to them too; the reaction being, "leave me alone, I dont want to know".. Its sad that many M.P.s have given me this reaction, because my case genuinely. is different; I genuinely. am telling the truth, and the harassment genuinely is happening to me, and some. recipients of this fax know this to be true.

"Write. to your own M.P."

My local M.P. is. Mr Keith Hill, Labour-Streatham. He refuses to have anything to do with me.. He refuses to represent me, he refuses to talk to me, he has told me not to communicate with him. He has done. absolutely nothing to help me, and he has. told me he will do absolutely nothing to help. me.

Other M.P.s, recipients of these. faxes, have for quite some time been telling me, "write to your own M.P.".. On 23 March 1998, Paul Burstow M.P. wrote to me; "Whilst I take the issues. that you raise seriously, there is a strict Parliamentary convention. that one Member of Parliament does not take up anothers casework. Can I suggest. that you write to your own M.P. at the House of Commons?" Hopefully the above paragraph. will make clear that I have written to my own. M.P. and he has proved unhelpful.

Other M.P.s have told me the same. thing. On 21 May 1998, John McFall M.P. told me,. "... there is a parliamentary convention that M.P.s do not take up cases of. people not in their constituency..... therefore can I suggest that. you write to your local M.P. who will be better able to assist you." And on 8 June 1998, Michael Foster M.P. wrote to me. that "M.P.s are inundated with unsolicited. faxes .... M.P.s have a considerable amount of constituent work to deal with, thus. other M.P.s constituents cease to be of concern in so. far as they should have a voice and representation".

Simon Hughes M.P.. wrote to me on 5 November 1998, "There is a strict parliamentary convention which. states that I am not able to represent individuals who are not constituents of mine. My. advice is that you find out who your own Member. of Parliament is rather than circulating your story to all M.P.s.". To my suggestion that Keith Hill. M.P. was doing nothing. to help me, George Foulkes M.P. sent the following faxed response; "If Keith Hill your own M.P. cannot. help no-one else in the House of Commons can." But it is. clearly not a case of "cannot" help, but "will not" help. I have detailed in letters to Mr Hill specific ways. in which he could. help me, first of all by finding a lawyer to represent me. It is Mr Hills job as a. Member of Parliament to represent his constituents; if. he chooses not to do so, then it reflects badly on him.

Kate Hoey Sympathises, but says,. "Write to your own M.P."

Here. is part of a letter Ms Hoey sent to me on 15 June 1999.

I appreciate that you have concerns about the persecution and. harassment that you feel you are experiencing but. I note that your MP is in fact Keith Hill. There is a. very strict Parliamentary code which means that M.P.s can only take action on matters that relate to. their own constituents. I am aware that you are not happy with the fact. that you do not feel Mr Hill will. assist you but I am afraid that I cannot take any action on your. behalf.

Ms Hoey plainly belongs in the camp. of people who do not know about the reality. of the "MI5 Persecution". She doubts its existence; "the harassment you feel you are experiencing". She urges me. to see Mr Hills assistance, as have other M.P.s detailed. above.

Really, the fact that I am unable. to obtain assistance from any other M.P., if my own. alleged "representative" Mr Hill chooses not to represent me, is a very basic weakness in the Parliamentary. system. Beinggmainly events at. my former employers in Oxford during 1992, when I was harassed constantly by manager Steve Mitchell for most of 1992, and was. forced to begin attending hospital as. an outpatient as a result. This harassment was obviously. of Mitchells own volition, since I observed him harass similarly another new worker two years later;. but it was also at MI5s instigation, since they. kept providing him with words from my home life which he then proceeded to. abuse me with. Yet this is not the only employment that MI5 have destroyed; the MI5 persecution has lasted from the. end of my student days until the present time, during. which I have had three jobs, all of which have been in various ways destroyed. by MI5s deliberate actions.

In March 1999 I decided to try to force the issue once. and for all. Ever weekend for the last four months, apart from. two weeks when I was on holiday, I have sent original articles by fax directly from. my computer to Westminster politicians. Here is a. summary of the articles of the last four. months;

How. to Identify the Persecutors

Their use of Schizophrenia to. discredit my claims
Comparing. the MI5 Persecution with German "Final Solution"
MI5 are Plainly Trying. to Kill Me
MI5 Waste Taxpayer Millions on. Pointless Hate-Campaign
Four Years. of "MI5 Persecution" Posts on Internet Newsgroups
MI5 Agents are. Clinical Psychopaths
BBC Newscasters Lior the. Victims of MI5
MI5 Have. Systematically Destroyed My Life
Harassment through. the Radio

To my deep. worry these fourteen faxed articles have still not achieved the objective of kicking the matter out into the public arena and forcing. an admission. either from the persecutors, or from those "in the know", which includes some. M.P.s.

I dont really know what else to do to try to bring the. "MI5 persecution". out into the open. I would have expected that these weekly faxed articles would have had some effect, but the. only result has been M.P.s telling me to contact my own representative Mr Hill. who refuses to talk to me. I understand the convention. that M.P.s deal with their own constituents and not those of other M.P.s, but. there seems to be a gap in the process since. it allows your own M.P. to refuse to deal with you, and then you. are totally denied any representation at all.

Conclusion

The only conclusion. I can inform the readership of these articles of, is that there is. no conclusion to this matter, yet! Three years of intermittent. articles, and four months of faxes every weekend, have been absorbed by some of. the most powerful people in the country, to no effect.

Whether these articles continue in the Autumn is entirely up to. the "opposition". I offered them a. cessation of complaints if they would leave me alone on holiday in. June/July, and they went right ahead and harassed me anyway, on holiday and after I returned to London. If. MI5 cease their activities now, then I. wont have to continue these faxes in the autumn; but I suspect. they wont cease, which means youre in for more articles later this year. "There. will be no conclusion."

MI5 Want Me to. Send You these Faxes

MI5 seem to Want to Spin this Business out for. as Long as Possible

The MI5 persecution. has now been going on, starting from June 1990, for well over nine years. If I knew how to put an end to. it then I would do so. Of course MI5 have indicated. how they wish to finish the matter, by finishing. me off; they indicated this very clearly years ago when they were shouting "suicide". at me.

But a deeper truth is that the MI5 agents carrying out the. persecution rely on it for their. income and their livelihood. They have absolutely no interest in anything other than spinning. out the whole business, because that is how. they will maximise their earnings from their employer for the "work" they do against. me.

A vital part of the fantasy structure. MI5 have created about me is that I am somehow a worthwhile target. If you bother to read these faxes, if. you browse my website,. or perhaps read my posts on the uk.misc newsgroup, you will have by now twigged that. I am a totally insignificant person who in a proper dictatorship like East Germany would not. merit five minutes of Stasi time. But Britain is improper in the methods of. its corruption, and the Security Service seeks to present me as being. a an evil fascist, an evil communist, an evil. something-else, and even a "national institution".

It. occurs to me that to some extent I am playing into their hands, into their scheme of things, by writing these articles and sending. these faxes. By doing these things, I elevate. my profile, and fuel MI5s paranoid obsession with me. But. to stop sending faxes would be to give up the only hope I have of seeing their campaign "outed" and justice. done. Certainly there is no point going to the police. again; and as remarked in a previous article, the Security Service Tribunal. routinely whitewashes every complaint. that is placed before it.

So although MI5 seems to want me to continue. sending these faxes, doing this is the only real chance of getting this business. out into the open. And so Ill continue trying. to kick down their house of cards. At least my. situation is less serious than that of some other victims of the secret. services; unlike Shayler I am not broke and exiled; unlike Fayed I have. not lost a son to the posited activities of the secret services. All I have lost is some of my health, some of my life, and some of. my possible career.

MI5s Abuse of me is without Cause or. Reason

It constantly puzzles. me that MI5 refuse to leave me alone, wherever I go and whatever I do, or rather, whatever I dont do,. since Im not a very socially or otherwise. active person. When I am in England, they chase me all over the place, and once theyve found me, they pay. people to shout rude words at me. When I am in Europe, they again chase me. all over the place, and as usual. pay people to shout obscenities at me. When I am in Canada or visiting the States, they faithfully chase. me all over the place, and when they find me, pay people to shout obscenities at. me.

It is hard to avoid the. conclusion that these MI5 operatives who chase me are total. lunatics. You will remember from a previous articles the assessment. "MI5 Agents are Clinical Psychopaths". They have tried to blame me for what they do and what. they say; yet their lies have been wafer-thin, and are clearly seen. to be oiled by the money which they acquire from. the Government, and ultimately from the taxpayer.

They have tried various lies to put the blame on me; "we have to abuse. him because hes a nutter", as if. there werent many tens of thousands of other people with schizophrenia in the. United Kingdom. Their choice of abuse words is telling;. subconsciously perhaps they realise that it is they who are the "nutters", and they try to. project their own illness onto their target.

MI5 Operatives have Nothing Else. to Do With Their Time

Ive seen the same "Alan. Holdsworth" person three or four times over a period of several years. I saw him at. the Civic Hospital in Ottawa in the Emergency Ward, where. he falsely declared his name to be "Tad"; at Ottawa airport in summer 1998; and on board another flight in. 1995.

So what we see from the above paragraph. is, the same people are delegated to watch me for many years. Without me, they wouldnt have a job.. They literally have nothing. else to do with their time, except indulge their voyeurism against me. With this observation, we come. to the core of MI5s campaign against me; these people are not fit for any. job other than the exercise of voyeurism against me, and if sanity. were to land on MI5 then they would be out of. a job. If sanity were truly to land then these people and their employers would be prosecuted for offences. under the Protection from Harassment legislation, which they. are clearly breaking.

It is. one of the ironies of their campaign that MI5 have been trying to make me an object of ridicule for. completely trivial things I have done, while MI5 themselves. have simply not mentioned how ridiculous is their own behaviour and that. of broadcast media journalists, in spying on me while they. read the news for example. If the whole truth of this business is ever exposed, and despite all my efforts. it still seems there is a block on its exposure. in Britain, then the rights and wrongs will be clear to all, and no amount of MI5 lies will be able to. change that. MI5 presumably do realise. just how damaging such a revelation would be both to themselves, and to broadcast media such as. the BBC and ITN, because there has not been even the slightest chink in the armour, despite four. and a half years of my complaints on internet. newsgroups and by fax to politicians and the. media.

MI5s Final Kick. in the Teeth to the British State

For someone like myself born in the late sixties it seems peculiar. to think that Great Britain once used to. have a say in the destiny of foreign peoples in far-off sections of the globe. Modern Britons tacitly. accept the lowering of. their country to a third-rate power reliant on the United States for what little say it has in. the world. A third-rate power, now "reverse-colonised" by third world peoples. it once ruled and riven with internal problems so severe the government hardly dares acknowledge. them.

To this third-rate power the MI5 secret police. are delivering the final kick in the teeth through a campaign of persecution which is guaranteed. to hold the state up to ridicule throughout the world. when it is finally exposed. As a "thought. experiment" suppose the French or the Spanish security service had done to one. of their own born citizens what MI5 has done in this country.. Suppose say the Spanish had planted hidden cameras in. his home, for the perverted pleasure of their state television newscasters, just as hidden cameras have been placed in my. home for the perverted pleasure of Martyn Lewis, Nicholas Witchell. et al. Suppose the Spanish service had for nine years been trying to force suicide on. their target; at times,. so blatantly that they shouted the word "suicide".

Now suppose. they were caught.

Of course, as long as MI5. arent caught, theyre laughing. The psychopathic security. service agents gets their kicks from shouting abuse at me; the newscasters, Lewis, Witchell etc get their jollies,. "it was so funny", we were watching this bloke and he couldnt do anything about. it.

But. once theyre caught, the sky falls in. Of course, the "patriotic" MI5-funded media in. Britain will try to put the best spin on the. MI5/media activities; it was the targets fault, of course. But most of the world bears no allegiance to Britain. If this business. is ever exposed then a weakened Britain will become the. laughing-stock of the world. And I promise you, the security services persecution of me will be exposed.. MI5 has. delivered a final kick in the teeth to the British state, and I will do everything I can to. ensure the world hears about what they have done.

Metropolitan Police Refuse to Investigate the. MI5 persecution

I have on a couple of occasions tried to motivate the police. to investigate MI5s actions against me. On each occasion. they have refused to do so. In 1995 I went. to my local police station and spoke to an officer there; he refused to accept my complaint, and. seemed interested only in seeing me leave the. station as quickly as possible.

Earlier this year I. had some communications with Det.Sgt.Richards of Charing Cross police. Again I asked. him to deal with MI5s actions against me.. Unfortunately DS Richards conformed to the negative stereotype of the bigoted, ignorant "copper"; he said, "I have read. your various bits on the internet.. I'm afraid there is no substance or credence to it. It's an absolute load of rubbish. I don't investigate rubbish. I can't. be more blunt. or to the point than that."

You have to wonder at the state of law enforcement in Britain. If. the victim of a murder is black, as happened in. the Lawrence case, the police deliberately. botch the investigation. If the victim of a crime is mentally ill, and the perpetrators. are the secret services, as in my case, then the police refuse to even begin to investigate the. crimes committed. Politically Britain is a. third-rate country, but from the point of view of obtaining justice, Britain ranks down. there with third-world countries. You almost. feel that MI5 and their media buddies would not even have any shame if. their activities against me were exposed; after all, why should they? they have the money, they have the. control, OK so perhaps theyve broken a. few dozen laws, but doesnt the fact that the police are too corrupt to investigate these crimes, doesnt. that prove that in fact no crimes. have been committed?

I should say again what I have. said earlier in this article. My losses over the last nine years have not been. as great as those of other victims of British Secret Police malefaction.. Fayed lost his son to their murderous activities; in my. occasional communications with former MI5/MI6 employees I have been. informed that a "permanent solution" is not uncommon for. opponents of the British secret police. I have lost health and financially, but. am obviously well enough to keep fighting my case. Others have lost much more than I. If the. joke which is British "law enforcement" refuses to enforce laws. against the security services then that is something that is recognised in other countries and Britains. stock correspondingly falls. Not. that it has very far to fall; the days when England had any say in. the world are long gone.

MI5 Want. These Faxes to Continue

Before the holiday, I. said that if MI5s harassment of me stopped, then I would cease my complaints. They have known very well. that if they continued to harass me. then I would resume the fax campaign in the autumn. Yet they. have not stopped persecuting me. Recently a woman outside my domicile screamed her head off. with abuse in the direction of my window; and on. Saturday 2 October, when I was shopping at a nearby supermarket, a man shouted the particularly vile sexual. swear word which I have heard many times. before over the last few years.

MI5s. attitude shows complete arrogance. Yet it also shows that they want the faxes to continue and deliberately try to provoke. me into sending further faxes. The reasons for this are given. in the first paragraphs of this article; the MI5 operatives who persecute me have. nothing else to do with their time; to make their campaign, against an apparently. unreacting target, have some value, they have to force me to. react in some way against their actions; and by reacting in this way,. by bringing their campaign to the. attention of British politicians, I play into their hands, by giving their campaign the attention and. importance which they feel it deserves.

In the short. term, by sending these faxes, perhaps I am doing something they want me to do, but in the longer term it is undoubtedly. more in my interest than theirs for their. activities to be exposed. If their operatives truly do wish. to see these faxes continued then they are committing a serious mistake, because it. significantly increases the risk if M.P.s (some of. whom already know about MI5s activities against me) are advised of my. side of the story.

I will continue to monitor and record the. secret services activities against me over the next. few weeks. If they diminish and cease, as I hope they will, then I may be able to call a halt to these faxes; but that. it something which is entirely up to them; recently their. continued harassment makes clear that they do wish. the faxes to continue, and in all sincerity I do think they will continue their activities and make. it impossible for me to cease these faxes. It. may trouble you to receive these articles, but it troubles me much. more to be on the receiving end of a national. persecution campaign; and while Britain does not have free speech provisions. as does Canada in the Charter of Rights and Freedoms, and the US in the first amendment to the constitution, in practice I. do not think anyone is going. to try to have me locked up for speaking the truth. I still cherish the hope that the veracity I. express will be shown for what it is, and that the truth will prevail. and make me free.

Removing the Mask of. Anonymity from the MI5 Operatives

Undoubtedly one factor. encouraging the MI5 agents actions against me has been the fact. that they can shelter behind a mask of anonymity while they carry out their abuse. This is both a sign of their. realisation that their actions are criminal; for. crimes are harder to pin down and make a coherent complaint about when their. perpetrators are unknown; and it is a sign of their cowardice, since they lack. the backbone to say things to my face themselves; instead they almost always rely on third. parties to carry out. the actual acts of abuse.

On a few occasions I have seen. the perpetrators, but on each occasion they have managed to preserve their anonymity. They travelled. on the same British Airways flight as me in 1994;. but BA have ever since refused to give up the passenger list for the. flight, and the police and lawyers have proved useless in obtaining their identities from the list. Also one. of them followed. me into A&E department of Ottawas Civic Hospital a couple of years. ago, and gave his name as (if I heard correctly) "Alan Holdsworth"; but the doctor. refused to give out his identity when I later tried. to speak to him.

If only we knew the identities of the individual operatives,. then it would be possible to. find out the identity of their employing organisation. But I think we know. the latter already, since I have been accusing them on internet newsgroups for four and a half years now,. and they have never denied my. guess. Indeed, when I was travelling in January 1996 back to Ottawa, two youths on the. (British Airways again, unfortunately) flight made a lot of noise at me, one of them saying to. the other that I "didnt know who we are". That is a wafer-thin denial;. I had been saying for a year that they were MI5, so a stronger denial would be. necessary if my guess were truly mistaken. I think the lukewarm denial was worse. than no denial at all, since it confirmed my guess. that the employing agency was indeed. MI5.

Conclusion

It has been suggested to me. that by sending these faxes I could be making trouble for myself; but I dont think so. My psychiatrist knows what. I am doing; indeed I have given him a couple of these articles for. him to cast an. eye over.

I dont want to have to send faxes for the next year, or. the year after that. But that is entirely. up to MI5. If they continue to persecute me then I am forced. into defending myself. The ball is in their court, and it is entirely up to them what they do. If as I suspect it is. their intention that these faxes continue, if that is what they insist will happen. then so be. it.

MI5. Persecution Update: Friday 31 March, 2000

22,544 Faxes Delivered in Three Years,. and Still No Breakthrough

In the last three years I have sent at. least 22,544 faxes to recipients in the UK, of which at least 13,974 have gone to. Westminster. Last weekend alone I sent 832 completed faxes to politicians, the. media and various others, on the subject of MI5s mistreatment of me these last ten. years.

I believe some of the recipients know of. MI5s actions against me in the last decade; yet they maintain strict "omerta" in. fear of the security services persecution actions being. made public.

MI5 Insist that these Faxes must. Continue

Between September 1999 and mid-January 2000,. the persecutors, whoever they might be, mostly left me alone.. I counted only three incidents in almost five months - which is a lower rate than. at any time since June 1990, when this business. started.

By leaving me alone for. several months, the "oppressors" were making an implicit assurance that. they would continue to leave me alone in the future. On 11 January I posted to an internet newsgroup accepting. what I saw as their assurance of no further. harassment, stating that I would cease sending these faxes - which is the only. thing I do in my defence - if they continued to leave me alone. And for two weeks I. did indeed refrain from distributing. these articles.

But. MI5 acted in bad faith. From the last week of January until the beginning of March, they resumed their hate campaign against me. with a vengeance. They. even put people in my road three times in February, one instance of which I recorded.. They resumed their normal behaviour of bugging my phone and house, listening to where. I would go, and then placing people in that location to "aggravate and annoy". me.

What MI5 did in February is plainly a contravention of. the Protection from Harassment Act 1997, since it has caused me "alarm and. distress" as specified in the Act. But it is a. waste of time going to the police with a complaint, since the police have done, and will. do, absolutely nothing. I complained to. the Metropolitan Police in 1995, and they refused to take my complaint. When I. complained again in 1999, the detective sergeant laughed at my complaint, with the words, "It's an absolute load of rubbish.. I don't. investigate rubbish. I can't be more blunt or to the point than that." It is useful to. remember that the Met also treated Stephen Lawrences parents with similar discourtesy; police prejudices. are similar in my case, so I can take some comfort. from that case and hope that one day I will get a. fair hearing.

MI5 acted in bad faith, but they. also acted with arrogance. They do not care if I send 800 faxes every weekend, since they know. I cannot prove my claims, and the recent Shayler case shows how. weak external oversight is of the. secret services. But they acted with more than arrogance - the MI5 agents actually want my faxes to continue,. they insist that these faxes continue, since my communications give them an. excuse to continue their activities, and continue in the paid employ of the. secret service. Despite their. use of diverse proxies over the last ten years, it is the same MI5 officers behind the campaign. all the time - I have seen one of them on three occasions in. Canada over a period of years, and it is a safe belief that. that same person continues to be paid for his "work" in harassing me in London now. The average cost of an MI5 employee is some 75,000. per annum, so one may infer that their officers are. amply compensated; their insistence that "hostilities" are maintained is understandable. when placed in this. light.

MI5 Persecution Update: Friday 7 April,. 2000

22,544 + 837. = 23,381

Last weekend I delivered. another 837 faxes to politicians and the media on the. subject of the security service conspiracy which has destroyed my life. This brings the total in the last three years. to at least 23,381. These totals do not include partially. delivered faxes.

Some of the recipients of. these faxes must know that what I say is true;. and I hope to motivate those people to acknowledge the reality of the harassment which has followed me. for ten years. It takes much time to transmit these articles, but as OCG MD. Simpson-Wells said to me in 1992, you have to be a. good communicator if you are to succeeed.

Harassment in February. 2000

Following a quiet period of almost five months,. the persecution resumed with a vengeance in. late January/February 2000. At this time I was at home in Clapham,. London and was a relatively easy target for the persecutors.. They have my house bugged, for audio and I believe video in some rooms as well; so they can find out easily where I will be. going on a particular day, and. place people in that location to mouth words of abuse at me. (I know. the last sentence sounds like classic paranoia, but it happens to be true, and. some of the people reading this know it to be true.)

On Friday 11 February 2000 I went shopping in Croydon, to buy. a watch at H. Samuels jewellers in the Whitgift Centre.. While I was there two youths came into the shop, one of them quietly. uttered an obscenity at me, and they immediately walked out. They. showed no interest in the shop.

That Sunday I met with a friend in Clapham, who. started needling me about "do you know anything about the CIA and FBI?". Rather. unsubtle, and worrying considering Ive known this guy for 20 years. From the words. and demeanour of this "friend" and others in February, I saw that. the persecutors have. again been trying to separate from me what remains of my social. life.

Incidents in my Road in. February

MI5 very rarely place people. in my home road to harass me, but such was their persecutory fervour. in February that they did so on three separate occasions. On the first such occasion, I. was met my two youths who, grinning, said a deeply offensive sexual obscenity at me - at which. I coughed at them, so they. called me a "wanker". This incident is safely recorded on minidisc-walkman, but. because of the offensive nature of their abuse the recording will not. be made public.

Another incident very early. in the morning of Sunday 20/Feb/2000 occurred outside my home, following an evening in. Croydon with some schoolfriends. Again there were two youths. - for some reason the persecutors always travel in twos or threes,. very rarely is there just one of them - perhaps they need a group to bolster. their courage, perhaps just one of. them wouldnt have the guts to say something unpleasant. One of the youths. said quietly, and bitterly, "shitty, very shitty".

Anyway, in March there were no further incidents near. my house in in my road, and our neighbours are very well disposed towards. us, so let us hope that. the current quiet continues.

I know this is an almost impossible request, but I'm trying to restore an old HamMate 4350 that was left to me by a very good friend who is now a silent key. Of course, Bird did not have the repalcement meters, but I obtained a surplus meter with same specs, and would like to try to put the proper scale on the meter. Right now I have it marked in ink on front glass, but if I could find a decent image of the meter face it just may be possible to reconstruct a scale for the meter (I know, it's a long shot). I can't find the old meter, otherwise I could switch the scales or try to make a copy. I put the ink markings on the glass using old meter as approximation, and now I can't find the old meter in all this junkpile.

Anyone have any suggestions on where I might find such an animal?

Thanks,

Jim, WA5DXP

This guy leaves me too uncomfortable to bid. He doesn't say how much is his "handling charges," nor a thing about the cost of his professional boxing company, nor by how much his shipping charges will be over the quote given in the lookup link.

Has anyone had experience with him?

Tnx

Don

However the claims go much farther than this example.  IF the photo is
listed as showing  the actual item for sale but has been "borrowed"
and shows the interior of an  entirely different piece of equipment
wouldn't that be "suspicions confirmed?"

-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
-=. the BBC, television and radio -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-

The first incident in June 1990 was when a BBC. newsreader made what seemed to be a reaction to something which had happened in my. home, and out of context of what they were reading. My first reaction was disbelief;. nothing of the sort had ever happened before, the. idea that such a thing could occur had not crossed my mind, yet there was no doubt of. what had just taken. place. My disbelief eroded as this recurred time after time. Besides the news,. offenders included shows such as Crimewatch (!), Newsnight, and "entertainment" shows. There seems to be very little. moral understanding among the people who make. these programmes; they just assume they will never be caught, so they carry on. without a thought for the illegality or amorality of. what they do. The only time I ever heard a word raised in doubt was by Paxman being interviewed by someone else (I think. by Clive Anderson) back in 1990; referring to the "watching" he said. it troubled him, and when. asked by the host what you could do about it, replied "Well, you could just switch it off" (meaning. the surveillance monitor in the studio). He clearly. didn't let his doubts stand in the way of continued surreptitious spying. from his own or other people's shows, though.

Now you're convinced this is. a troll, aren't you? This story has been the subject of. much debate on the uk.* Usenet newsgroups for over a year, and some readers believe. it to be an invention (it has even been suggested that a. group of psychology students are responsible!), others think it symptomatic. of a derangement of the author, and a few give it credence. Quite a few people do know part. or all of the story already, so this text will fill in the gaps in their knowledge. For. the rest, what may persuade you of the third possibility is that some. of the incidents detailed are checkable against any archives of radio and TV programmes that exist;. that the incidents involve named people (even if those hiding in. the shadows have not made. their identity or affiliations evident), and those people may be persuaded to come. out with the truth; and that the campaign of harassment is continuing today. both in the UK and on the American continent, in a none-too-secret fashion; by its nature the significant. risk of exposure increases. with time.

On several occasions people said to my face that harassment from. the TV was happening. On the first day I worked. in Oxford, I spent the evening in the local pub with the company's technical. director Ian, and Phil, another employee. Ian made a few references to me and said. to Phil, as if in an aside, "Is he the bloke who's been on TV?" to which Phil. replied, "Yes, I think. so".

I made a number of efforts to find the bugs, without success;. last year we employed professional counter-surveillance. people to scan for bugs (see later) again without result. In autumn 1990 I disposed of my. TV and watched virtually no television for the next three years.. But harassment from TV stations has. gone on for over six years and continues to this day. This is something that many people obviously know is happening; yet the. TV staff have the morality of paedophiles, that because they're getting away with. it they feel. no wrong.

Other people who were involved in the abuse in 1990. were DJs on BBC radio stations, notably disc jockeys from Radio 1 and other stations. (see the following section). Again, since they don't have. sense in the first place they can't be expect to have the moral sense not to be part. of criminal harassment.

-=-
-= MI5:. bugging and counter-surveillance -=
-=-

PO: >Did you ever. look for the bugs in your house ? If not, why not ? I mean if
PO: >I thought that was happening to. me, I'd search the place from top to bottom,
PO: >I mean I live there I would know if. anything was out of place. If I was
PO: >really suspicious, I would call in. one of those bug detection teams which
PO: >have those machines that pick up the transmitted. radio waves. This
PO:. >reminds me of BUGS, that new programme on BBC1 on

That's exactly what we did. We went to a competent,. professional detective agency in. London, paid them over 400 quid to debug our house. They used scanner devices which go to. over 1 GHz and would pick up any nearby transmitter in that range, they. also checked the phones and found nothing... but. if the tap was at the exchange, then they wouldn't find anything,. would they?

CS: >Doesn't this suggest to you that there are, in fact,. no bugs to be found?

You can assume that they've done this. sort of thing to other people in more "serious" cases, where they would know. the targets would suspect the presence of electronic surveillance.. So they will have developed techniques and devices which are not. readily detectable either by visual inspection or by. electronic means. What those techniques might be, I couldn't guess.

In this case, the existence of bugging devices was. clear from the beginning, and they. "rubbed it in" with what was said by the boy on the coach. It was almost. as if they wanted counter-surveillance people to be called in, who they knew would fail to detect. the bugging devices, causing loss of credibility to. the other things I would have to say relating to the harassment.

I did all the things someone in my situation would do to try to. find the bugs. In addition to calling in professional help using. electronic counter-surveillance, I made a close. visual inspection of electrical equipment, plus any points where audio or video. surveillance devices might have been concealed. Of course, I found. nothing. Normal surveillance "mini-cameras" are quite. noticeable and require visible supporting circuitry. It seems to me the best place to put a. small video surveillance device would be additional to a piece of electronic. equipment such as a TV or video. It would be necessary to physically break in to a property. to fit such a. device.

-=-
-= Capital Radio. - Chris Tarrant -=
-=-

Capital Radio DJs have been "in on it". from the start. One of the first things I heard. in the summer of 1990 was from a Capital DJ who said, "If he listens to Capital then he can't be all bad" (supportive, you see.. We're not bastards). Much of. what came over the radio in 1990 is now so far away the precise details have been obliterated. by time. No diary was kept of the details, and although archives if they exist. may give pointers, the ambiguity of what broadcasters said would leave that. open to re-interpretation.

In. spring 1994, Chris Tarrant on his Capital morning show made an aside to someone else in the studio, about a person he didn't identify. He. said, "You know this bloke? He. says we're trying to kill him. We should be done for attempted. manslaughter".

That. mirrored something I had said a day or two before. What Tarrant said was understood by the. staff member in the studio he was saying it to; they said,. "Oh no, don't say that" to Tarrant. If any archives exist of the morning show. (probably unlikely) then it could be found there; what he said was so out of context. that he would be very hard put to find an explanation. A couple of days later, someone at the. site where I was working repeated the remark. although in a different way; they said there had been people in a computer room when automatic. fire extinguishers went off and those people were. "thinking of suing for attempted manslaughter".

Finally, this. isn't confined to the established radio stations. In 1990 after I had listened to a. pirate radio station in South London for about half an hour, there was an. audible phone call in the background, followed by total silence for a few moments, then shrieks of laughter.. "So what are we supposed to say. now? Deadly torture? He's going to talk to us now, isn't he?", which meant that they could. hear what I would say in my room.

PO: >would take loads of planning, tens of thousands of. pounds and lots of
PO: >people involved in the planning,. execution and maintenance of it. You
PO: >must have a very high. opinion of yourself to think you are worth it.

PM: >But why? And why you?. Do you realize how much it would cost to keep
PM: >one person under continuous surveillance. for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team. and a
PM: >supervisor. OK., Supervisor's salary, say,. #30,000 a year. Two men,
PM: >#20,000. a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out. at more like
PM: >#30,000 to. the employer.)
PM:. >
PM: >So, we're talking #30,000. x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then. you've got the hardware involved. And
PM: >any transcription that needs doing.. You don't think the 'Big Boss'
PM: >would. listen to hours and hours of tapes, do you.
PM:. >
PM: >So, all in all, you couldn't actually do the job for much less. than
PM: >a quarter million a year. Over five years.. What are you doing that makes
PM: >it worth the while of the state to spend over. one and a quarter million
PM:. >on you?

Those are pretty much the sort of calculations that went. through my head once I stopped to consider what it must be. costing them to run this operation. The partial answer is, there. have been periods when the intensity has been greater, and times. when little has happened. In fact, for much of 1993 and the first half of 1994,. very little happened. Although I don't think that was for. reasons of money - if they can tap into the taxpayer they're not going to be. short of resources, are they?

The more complete answer is in the enormity of. what they're doing. Relative to the. cost to British pride of seeing their country humiliated for the persecution of. their own citizens, isn't is worth the cost of four or five people to try to bring things to. a close in the manner they would wish? To the government a million or. two is quite honestly nothing - if they can convince themselves. of the necessity of what they're doing, resources will not be the. limiting factor.

-=-=-=-=-=-=-=-=-=-=-=-=-=-
-= how and why did it. start? -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-

The harassment didn't start by itself, so someone must have been there. at the outset to give it a firm push and set the "animals" after me.. It looks as if I was set up in June 1990, and. the timing indicates someone from university. was responsible.

>One thing which has been. missing from this discussion is this simple
>prognosis: that maybe. he is right and that, despite his admitted
>mental condition, there really is a campaign against. him organised by
>now-influential ex-students of. his university.

In May or June. 1990, Alan Freeman on Radio 1 read out a letter from someone who had known me for. a few years, who wrote of the one who "wore out his welcome with random precision" (from the Pink Floyd song). Freeman. went on to say to the writer. "that's a hell of a letter you wrote there". The indication is strongly that. people I had parted from soon before nursed a grudge against me and were. trying to cause trouble for me.

The suggestion. is that Freeman might have shown the letter to other people, and things could. have snowballed from there. Right from the start the real source (security services presumed) didn't announce themselves as. the origin,. but let the "talkers", the radio DJs, believe that they were the originators. Think about it; if you. announce, "we're MI5 and we have a campaign against this bloke" then people might not go along with it; but. if you say, "everyone else is getting at this bloke because he 'deserves'. it" then people will. join in with fewer qualms.

>Why. would "they" wish to assassinate your character?

It's the classic. case of hitting a cripple to prove you're stronger. Why would the security services expend hundreds of thousands of. pounds and more than six years of manpower to try to kill a British citizen? Because. they are motivated by people who knew me at university and. feel personal animosity; because they knew. me to be emotionally weak, and it is in the nature of bullies to prey on those known to be weak; and because they. can rely on the complicity of the establishment,. which the security services manipulate and derive funding from. This is. England's biggest humiliation today, and the British security services are intent on. preventing their humiliation becoming reality by continuing their campaign of. attempted murder to suppress the truth from. becoming public.

-=-=-=-=-=-=-=-=-=-=-=-=-
-= who knows about. it? =-
-=-=-=-=-=-=-=-=-=-=-=-=-

Many people. know, both in the establishment and media, and among the general public. Despite. an absence of its target from the UK for more than two years, the echoes of paranoia can still be. heard loud and clear from across the water.. When it started in 1990, the only people who knew were those in BBC television who were spying on my home, and. a few radio broadcasters. There were a few cases of public harassment,. but very little compared to the situation that. developed a couple of years later.

The list today includes BBC TV staff (newsreaders such as. Martyn Lewis, Michael Buerk,. Nicholas Witchell), people from radio stations such as Chris Tarrant of Capital and Radio 1 DJs, people. in the print media, but also many people in the general public. All united in a. conspiracy which breaks the laws. which the UK does have regarding harassment, and all completely uncaring for any semblance of. decency or elementary respect for individual. rights.

The British police (obviously) do know the nature of the harassment. and in all probability the identity of. those behind it. Some time ago I made a complaint to my. local police station in London, without positive result. The UK police are failing in their duty. to see the law enforced in not checking. the abuse.

The. article of which part is reproduced below was penned by Bernard Levin for the Features section. of the Times on 21 September 1991. To my mind, it described the situation at the time and in particular a recent. meeting with a friend, during which I. for the first time admitted to someone other than my GP that I had. been subjected to a conspiracy of harassment over the previous year. and a half.

>There is a madman running loose about. London, called David Campbell; I have
>no reason to believe. that he is violent, but he should certainly be
>approached with caution. You may. know him by the curious glitter in his
>eyes and a persistent trembling of his hands; if. that does not suffice, you

>will find him attempting to thrust no. fewer than 48 books into your arms,
>all hardbacks, with a promise that, if you should return to the. same
>meeting-place next year, he will. heave another 80 at you.
>
>If, by. now, the police have arrived and are keeping a close watch on him,
>you may feel sufficiently emboldened to examine the books. The. jackets are
>a model of. uncluttered typography, elegantly and simply laid out; there is
>an unobtrusive colophon of a rising sun, probably not picked. at random.
>Gaining confidence - the lunatic is. smiling by now, and the policemen, who
>know. about such things, have significantly removed their helmets - you
>could do worse than take the jacket off the first book in the pile.. The
>only word possible to describe the binding is sumptuous;. real cloth in a
>glorious shade of dark green, with the. title and author in black and gold
>on. the spine.
>
>Look at it. more closely; your eyes do not deceive you - it truly does have
>real top-bands and tail-bands, in yellow, and, for good measure, a. silk
>marker ribbon in a lighter green. The paper is cream-wove and. acid-free,
>and the book. is sewn, not glued.
>
>Throughout the encounter, I should have mentioned, our loony has. been
>chattering away, although what he is trying to say. is almost impossible to
>understand; after a time, however, he becomes sufficiently. coherent to make
>clear that he is trying to sell. the books to you. Well, now, such quality
>in bookmaking today can only be for collectors'. limited editions at a
>fearsome price -. #30, #40, #50?
>
>No, no, he. says, the glitter more powerful than ever and the trembling of
>his hands rapidly spreading throughout his entire. body; no, no - the books
>are priced variously at. #7, #8 or #9, with the top price #12.
>
>At this, the policemen understandably. put their helmets back on; one of
>them draws his truncheon and the. other can be heard summoning
>reinforcements on his walkie-talkie. The madman bursts into tears,. and
>swears it is all. true.
>
>And. it is.
>
>David Campbell has acquired the entire rights to. the whole of the
>Everyman's Library, which died a. lingering and shameful death a decade or
>so ago, and he proposes to. start it all over again - 48 volumes this
>September. and 80 more next year, in editions I have described, at the
>prices specified. He proposes. to launch his amazing venture simultaneously
>in Britain and the United States, with the. massive firepower of Random
>Century at his back in this country, and the dashing cavalry of. Knopf
>across the water, and no one who loves literature. and courage will forbear
>to. cheer.

At the time this article. was written I had believed for some time that columnists. in the Times and other journalists had been making references to my situation. Nothing unusual about this you may. think, plenty of people have the same sort of ideas. and obviously the papers aren't writing about them, so why should my beliefs not be. as false as those of others?

What makes this article so extraordinary is that three or. four days immediately. preceding its publication, I had a meeting with a friend, during. the course of which we discussed the media persecution, and in particular that by Times columnists. It seemed to me, reading the. article by Levin in Saturday�s paper, that he was. describing in some detail his "artist�s impression". of that meeting. Most telling are the final sentences, when. he writes, "The madman bursts into tears, and swears it is all true. And it is." Although I did not. "burst into tears" (he seems to be using a bit of poetic. licence and exaggerating) I did try hard to convince my friend that it was. all true; and I am able to concur with Mr Levin, because, of. course, it is.

At the beginning of the piece Levin reveals a fear of. being attacked by the "irrational" subject of his story, saying "I have no reason to believe. that he is. violent, but he should certainly be approached with caution". This goes back. to the xenophobic propaganda of "defence" against a "threat" which was. seen at the very beginning of the harassment. The impression of a "madman running loose" who needs. to be controlled through an agency which assigns. to itself the mantle of the "police" is also one which had been expressed. elsewhere.

In. the final paragraph of this extract, his reference to Everyman�s Library as having "died a lingering and shameful. death a decade or so ago" shows clearly what sort of conclusion they wish to their. campaign. They want a permanent solution, and as they are prevented from achieving that. solution directly,. they waste significant resources on methods which have been repeatedly shown to be. ineffective for such a purpose.

-=-
-= why won't the British police do their job and put a stop to it?. -=
-=-

The British police obviously do know what is taking. place. Besides my interpretations of what individual officers have said which. forces that conclusion,. it would be inconceivable for them to be unaware of something on. this scale.

If they know, then they will know that. the abusers have broken laws in the UK and abroad. Recently the UK introduced. laws against electronic spying which carry. a penalty of several years jail if caught. If the police know illegal harassment is. taking place, and do nothing about it, then they are failing in their. responsibilities.

Last Easter (1995) I went into the local police station. in London and spoke to an officer about. the harassment against me. But I couldn't provide tangible evidence; what people said, in many cases years. ago, is beyond proof, and without something to support my statements I cannot expect. a police officer to. take the complaint seriously.

The current situation with regard to the. police is not one which allows a breakthrough in dealing with the. problem. On the one hand, most individual officers at a local police station may not know about the ongoing. assaults, so a complaint at that level will. not yield results. Yet the police as an organisation do know of the harassment,. and they must be aware that a complaint has been made at a police station. So it is clearly their. duty to take preventative action against. the continuing molestation, but because the criminals are operating on behalf of a state agency, the. police are not carrying out. their duty.

-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
-= abuse in set-up situations and in. public -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
```

Strangers in the street have recognized me on sight many times, and. shown awareness of the current thread of abuse. To give. you one example, in 1992 I was seriously ill, and a manager at work somewhat. humorously said that "it wasn't fair" that people were bullying me.. A few days later, I attended for the first time a clinic in London as an outpatient, and. on my way out was. accosted by someone who asked if "they had paid my fare", with emphasis on the. word "fare". He repeated the word several times in this different context; that they should have paid my "fare", each. time emphasizing the word.

For two and a half years from the time their harassment started. until November 1992 I refused to. see a psychiatrist, because I reasoned that I was not ill of. my own action or fault, but through the stress caused by harassment, and that. a lessening of the illness would have to be consequent to a removal of its immediate cause, in. other words a cessation of harassment. I also reasoned that since they were taunting me with. jokes about mental. illness, if I were to seek treatment then the abusers would think that they had "won" and. been proved "right". Remember, the constant theme of any persecution is, "we must destroy. you because you're X", whether X is a racial or other. attribute. In this case the X was "we persecute you because you. have brain disease". The similarity of this logic to Nazi attitudes. to the mentally ill is striking.

The same manager who'd said "it wasn't fair" asked me in winter. 1992 why I didn't. seek help from a psychiatrist; was it, he asked, because "they would think they. had won" if I sought treatment? That was something I'd never said at work... again, taken separately it proves nothing,. but many such things over a period of months proves conclusively. that people in the company knew what was going. on, and in quite a lot of detail.

Usually harassment in public lacks. the level of finesse of "paying your fare". Most people's imagination does not go. beyond moronic parroting of the current term of denigration. That is not surprising given. the average level of the abusers; if they do not have. the intelligence to distinguish wrong from right then neither will they have. the capacity for anything other than mindless repetition of a monosyllabic. term calculated to fit into their. minds.

The. first incidents of verbal assault in public were in again in the summer of 1990, although they increased in frequency and venom with. time. In July 1990 the first public incident occurred on a tube train on. the Northern line. Two men and their girlfriends recognised me;. the women sprang to my defence, saying "He looks perfectly. normal, he doesn't look ill". Their boyfriends of. course knew better, and followed the party line; one of them made reference to an "operation",. apparently to work at the tube station but implicitly. to a visit that I had made to hospital a couple of weeks previously.

In. August 1990 going home from college, soon after getting on a tube train at Gloucester Road I was followed by a. group of four youths, who started a chant of abuse.. That they were targeting me was confirmed by other people in the carriage, one of whom asked the other "who are they going. on at, is it the bloke. who just got on?" to which the second replied "yes, I think so". I. was tempted to reply, but as in every other instance the abusers are enabled in their cowardice by physically. outnumbering the abused; any confrontation would result in my being. beaten up, followed by a complaint to the police that "he. attacked us", and of course he's ill, so he must have been imagining that we were. getting at him. Shitty, aren't they?

But the shittiness of the four youths on. the tube train is as nothing compared to the episode. on the National Express coach to Dover in the summer of 1992. While. going on holiday to the Continent I was verbally set upon by a couple travelling sitting a few rows behind. The boy. did the talking, his female companion contributing only a continuous empty. giggling noise. He spoke loudly to ensure other people. on the coach heard, always about "they" and "this bloke" but never naming either. the abusers or the person he was talking about. He said "they" had "found. somebody from his school, and he was always really stressed. at school". They must have dug deep to find enemies there; perhaps someone who dropped out. of school, someone who didn't do too well later, who was jealous and. keen to get their own back? The boy also. said "he was in a bed and breakfast for only one night and they got him". By a not unexpected coincidence I had been. in a B&B in Oxford a. week previously, which had been booked from work; other things lead me to the. conclusion that the company's offices were bugged for most of the 2 1/2 years. that I was there, so "they" would have known a room in the B&B had been booked.. (But I'll bet "they" didn't tell the company's managers their offices were bugged, did. they?).

After a few. minutes of this I went back to where they were sitting and asked where they were travelling. The boy named a village. in France, and the girl's giggling suddenly ceased; presumably it permeated to. her brain cell what the purpose of the boy's abuse. was.

This. and other set-up situations are obviously calculated to provoke a direct confrontation. which would bring in the police, with the abusers claiming that they were the ones attacked. Again in 1992, outside. the house where I was living in Oxford I was physically attacked by someone. - not punched, just grabbed. by the coat, with some verbals thrown in for good measure. That. was something the people at work shouldn't have known about... but soon after a couple of people were. talking right in front of me about, "I heard he was attacked". The. UK police have a responsibility for preventing assault occurring, but. they do not seem to take any interest in meeting that responsibility. I suppose. their attitude is that harassment does not come within their remit unless it involves physical assault,. and they will only become involved once that happens.. That is of course quite the wrong attitude for. them to take, but as I now understand, the police investigate only the crime they wish to investigate; if they. do not take your complaints seriously. then there is nothing you can do to make them take. action.

I'm looking for some reading material about radio from the earliest
days up to the end of WWI and how it was used during the war.

I've just reading a history of the Russian-Japanese war (1904). It was
entirely a naval war, Russia sent it's entire fleet from the Baltic
Sea to the Pacific Russian coast. Radio played a roll but the book
didn't give me an idea of range or any of the equipment. Radio was
always described as unreliable.

It got me to wondering about WWI. Can anyone recommend a book
or a web site?

-=
-= purpose in publicizing it; censorship in. uk.* newsgroups -=
-=

The postings to uk.misc newsgroup generated a very defensive reaction. from Usenet readers in the UK. So much so, that. they tried strenuously to suppress what was being said, both by breaking the rules. of netiquette in their responses on. the forum, and directly by action to revoke the account from which. the postings were issued.

Yet the postings were within. the normal boundaries of behaviour for uk.misc, and other less partisan. spectators did not see justice in the censorship which was. effected, as the following excerpt shows;

:Karen Lofstrom. (lofstrom@lava.net) wrote
:>It does seem that the. frequency and the size of his posts are
:>approaching net. abuse. However, IMHO, they aren't quite there yet. If
:>his postmaster were to act in this instance, it. would raise troubling
:>censorship. issues.

The inescapable conclusion of the censorship. effected on the uk.* newsgroups is that the British are intent on. their wrongdoing remaining concealed, and therefore seek to subvert and suppress freedom. of speech, not only in their. own country where the media shows xenophobic bias and bile against all perceived enemies within. and without, but also in other countries which have their own statutes to guarantee the basic human. right of. free speech.

It is absolutely necessary to bring their hate. campaign out into the open where it can be placed under. scrutiny and the harassers seen for what they are. That is the only way of. making it impossible for the security services to carry it out. There is a wider dimension,. though. Xenophobia as demonstrated by. British people and institutions over the last few years belongs to the same stable as racial hatred. In one case, two youths. on a Tube train made that racism explicit by referring to their. victim as a "soft. toy, not up to British Standards". Doubtless others victimize partly on the basis of race (isn�t it odd that they chose to torment someone. who is not ethnically English?) while expressing their. abuse in terms of another. genetic attribute, namely mental illness. All xenophobia on a genetic basis is wrong, but while racial insults are illegal, abusing. the mentally. ill is neither against the law nor subject to similar condemnation when. it is exposed.

My impression is that it wasn't very developed. The Titanic went
down in 1912, and only that brought rules requiring radio be part of
ships. Armstrong patented the regenerative receiver in 1914. I remember
seeing a photo of a WWI surplus receiver, and it was a "crystal radio".

So the technology was barely there, and I'm not sure how much ramping
up there was when the war came along. Plus, the decision makers had
to be convinced that radio was valuable, and there may not have
been a chance. Certainly airplanes had limited use in WWI, and only
between the wars was a fair strategy developed.

There are lots of books about radio or technology in WWII, but I can't
think of anything that deals with the first war.

You might get a feel for the era by getting the first volume of QST
on CDROM. I have no idea if there'd be anything about military radio
at that point, but it would at least give an indication of the general
level of radio technology at the time.

Michael

-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
-= my. response to the harassment -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-

My first. reaction in 1990/91 was to assume that if I broke contact then they would. not be able to follow and would lose interest. So I did the things. that have been suggested by other people; I sold my television, stopped listening. to the radio and tried to withdraw away from the sources of abuse as much as possible. I reasoned. that they must have more important things to deal with and that normal people would. simply leave me alone if it. were made difficult for them to continue their harassment.

I reckoned. without the sheer vindictiveness of the abusers. They did not let up but instead "got to" people around me,. mainly people at work, to do their dirty work for them. I went to see my. GP, who refused to believe what he was being told, and refused to direct me on. to anyone who could be of practical assistance.. It was not until three years had passed that the GP admitted the. matter was outside his competence and suggested going to the police.

In the summer of 1994 we. called in counter-surveillance experts from a private detective agency to sweep our house and telephone. for bugging devices. They conducted a thorough search and found nothing; but as. noted above, since the existence of surveillance was. being forced in my face by the harassers, you would. expect them to have taken the possibility of a counter-surveillance sweep into. account when planning the type of devices to be. employed.

In Easter 1995 I made a complaint to my. local Police station in London, but the police have not expressed any intention to do. anything about the continuing harassment ("we're not saying it's happening. and we're not saying it isn't happening" were the. words used). I think the officer I spoke to at. Easter wasn't aware of it happening, although other members of the police. force obviously do know.

From April 1995 until the present time the matter has been discussed. in a lot of detail on the Usenet. (Internet) "uk.misc" newsgroup. That discussion has given birth to the article. which you are now reading. My hopes in posting to Usenet were that wider. publicizing would discourage the security services from continuing their harassment, and "draw. people out" into concurring with the truth of what. was being said. Neither of those have followed, but the discussion has served a purpose in. allowing this structured report to be. created.

-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=
-= MI5: methods. and tactics -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=

They deliberately set out to harass. in a way that would resemble the symptoms. of schizophrenia, so that any report of the harassment would be taken as indicating mental. illness and "treated" accordingly. They never show. their own faces; they only work through proxies, in the media, among the public,. and by manipulating people in the workplace. Since they do not declare their identity there is. no evidence to initiate legal action against the security services or anyone. else. The only people you can prosecute are the proxies and they will deny. knowledge of any conspiracy.

By repeatedly humiliating and. abusing the victim, they induced mental illness. This is the. worst form of human rights violation: making any statement of the harassment appear to. be symptomatic of the illness which they cause through the. harassment. That this can happen, and people collude by silence,. is absolutely horrifying.

From the beginning in June 1990 they set a pattern of. harassment which they have followed without change for the. last six years. They paint me as a "threat". to which people must "react" (shades of Nazi persecution methods), while simultaneously portraying. their hate campaign on which they have spent. over a million pounds of taxpayers� money as a "joke".

The MI5 that breaks the law. with the silent complicity of the police is the same agency that is now seeking a role. in the fight against crime. Perhaps the real joke is the proposed. involvement in the implementation of justice of an organisation which commits. criminal acts with secrecy and disinterest for. the legal process.

MI5 Have Systematically Destroyed My Life

This is getting depressing. From the feedback Ive received, the recipients of these faxes are tired of hearing my complaints, and in truth I am tired of sending them. The reason I havent yet ceased sending faxes is because I cannot think of any other effective means of replying to MI5s actions against me, and I feel I have to do something to try to defend myself. Three/four years ago I got the MI5 harassment out of my system by posting about it on Internet newsgroups, and for a few months this tactic was quite effective - I received (and indeed still do today) support from newsgroup regulars, and felt I could make my voice heard and break the MI5 monopoly on access to the British media. But that was years ago, and today nobody gives a tinkers cuss about my internet posts - so I have sought to escalate matters by communicating directly with the politicians who allegedly say how this country is supposed to be run.

Of course, its quite expensive to keep up a campaign of fax messages for many weeks. Each set of faxes takes approx 50 hours to send over the weekend, and costs perhaps 35. My phone bill for the last quarter was 350. These figures are naturally insignificant compared to what MI5 have been spending against me over a similar period. It also takes a lot of time and energy to create a new article every week, and try and find new and fresh aspects and viewpoints on MI5s persecution of me. I am beginning to run out of both new topics and energy to write these articles.

So I have a suggestion to put before the MI5 persecutors who have been wrecking my life since 1990. In a few days time I will be going on holiday to Poland and Germany, for a couple of weeks. Previously, almost every time I have travelled by plane, or gone anywhere on holiday, the MI5 "wreckers" have been most assiduous in destroying these trips. My suggestion is; if MI5 leave me alone on this next trip, I will cease transmitting these articles. If, however, there are any clear instances of harassment (and I am very capable of recognising MI5 harassment when I see it), then I will make public these instances and publish any recordings I may make of them, and, unwillingly and unhappily, continue the articles.

Read about the MI5 Persecution on the Web

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Refuse to Allow me to have a Normal Life

Its kind of difficult to contemplate having a normal existence when you know your entire house is bugged from top to bottom, for audio and, very unpleasantly, video; when your employment is systematically destroyed, over and over again; when every time you leave the country your travel is disrupted by MI5 plants on the plane yelling abuse at you..... you get the idea. I would like to have some semblance of a normal life, like my Polish and English friends do. But MI5 have made this impossible, and they have leached massive resources from the taxpayer to institute a life not worthy of the name on me.

A few years ago MI5 were very open about their aims in persecuting me. They were shouting "suicide" at me, both in Canada where I lived at the time, and during my occasional visits to London. You cant get much clearer than that. There have been instances as recently as a few weeks ago of this intention being voiced by their side; on 15 April 1999, a woman at the next ticket counter at the Royal Festival Hall said;

"it would kill it, you know, it would just be overkill... they can't stop can they"

meaning that "they" were trying to "kill it" i.e. me and they "cant stop". The audio file is at;

I wonder why they "cant stop". Nobody (who doesnt know already) believes my claims - so what difference would it make, if they were to "stop" persecuting me? Perhaps what this persons remarks indicates, is the depth of the obsession MI5 have with this case. They have chosen at random a person from the general population, and done their worst to ruin my life. What is wrong with these people, that they persecute a national of the country whose citizens they are supposed to protect?

No Chance of a Harassment-Free Job

Since the harassment started in 1990 I have had three jobs, the first near Guildford, the second in Oxford, and the third overseas in Canada. All three jobs have been systematically destroyed by MI5. It is so ironic that MI5 employs a team of agents, each well compensated for their efforts, to persecute just one person paid a mere fraction of what they get for their "work". In fact, it is a joke that MI5 is allocated resources for this sort of effort. If this area of government were run along commercial lines then MI5 would be very rapidly closed down, they produce nothing of any value, instead spending their time obsessed with the bugging and surveillance of their former employees like Shayler, dangerous subversives like Straw and Mandelson, and "threats to national security" like yours truly.

Applying for my first post university job

When I was applying for my first post-university job in the closing months of 1990, I found at two or three job interviews that MI5 had got there ahead of me. Interviewers knew what words to repeat from what had been said at my home recently; MI5 had supplied them with words to hurt me, and the "British secret police" were trying to wreck my job search and discourage me from joining the world of work. This and the continuing harassment in the media and by the public meant that the search for a job took very much longer than it would ordinarily be expected to take for a person with my qualifications.

With my first job near Guildford came the knowledge that MI5 were doing everything possible to make me lose the job. Despite their efforts I managed to stay in work for ten unhappy months, during which they made very clear to me that they were bugging my workplace, my accomodation in Woking, my car, my home..... and they also made clear that they had "got to" my employer in Guildford.

Employment with Oxford

I was able to find a new job, with Oxford Computer Training Services (now ARIS/Oxford), quite quickly. But it became very clear, very quickly, that MI5 were treating this job the same as the first; they tried to get the other employees and in particular the managers to attack me. It was plainly MI5s intention that I be sacked fro this job. But I was not sacked; instead, after almost a year of abuse from OCTS managers, I was forced to seek medical help, and had to take two months off for medical leave. OCTS MD Hugh Simpson-Wells was motivated in keeping me on by the fear that if he sacked me, then I would take him to court for the treatment OCTS managers had meted out to me during 1992.

Emigration to Canada

When I emigrated to Canada in 1994, I did think that perhaps MI5 would leave me alone, given that I had made the effort to leave the UK and try to find a new life overseas. I could not see any reason why they would continue to harass me over in Canada. But clearly the MI5 agents had their salaries to think about, since continue to harass me they most certainly did, at my home in Ottawa, and by getting fellow employees to speak against me, as had happened with previous jobs in the UK.

MI5 are denying me a future in work

Former Chief Constable of Devon and Cornwall John Alderson had this to say regarding MI5's activities;

"MI5 is not under the same restraints as the police. They infiltrate organisations, people's jobs and lives. They operate almost like a cancer."

Currently I am on disability, and I can see that MI5 are denying me a future in work. It would be an insult to logic for me to return to work and find a job, in the knowledge that an entire team of MI5 agents, paid in total many times what I would be earning, would have the objective of seeing me "done down" in the employment, and ejected from the place of work. This situation is completely wrong and nonsensical - I would very much like to have a job, but MI5 are preventing me from even thinking about returning to work. The culture of secrecy in MI5/MI6 means there is no objective oversight of their expenditure, when external oversight and greater transparency might lead to wasteful and illogical operations such as that against me being shelved.

Watched and Harassed at my Home and Accommodation

As you will know if you have been reading these articles, MI5 have watched and harassed me at my home, and at every accommodation Ive had since 1990. Theyve also watched me at neighbours houses in London, and at short-term accommodation such as hotels and bed-and-breakfasts. They have used the "words" gained from these watching activities against me, by passing these words on to other people such as OCTS managers for them to make clear that I am being watched where I live.

Harassed at rented rooms in Oxford in 1992

This was at its worst in 1992 in Oxford, where during the week I lived at rented accommodation in Oxford, and at weekends returned to my parents home in London. I was being severely harassed by managers at my place of work, OCTS; and it was clear from the things they said that they were being supplied by MI5 with details of my home life, that they were being supplied with words to repeat at me.

In 1992 I moved house in Oxford many times, living at a total of five rented accommodations in ten months. In January I started off living in a rented room at Headington near the ring road / A40 intersection; then when it became clear that house was being bugged, moved to a rented room in Botley, some miles away. It was at the house in Botley that I had an "interactive watching" experience with Martyn Lewis while he was reading the news; I threw a term of abuse at him; he first flinched, then gave a gsult of what I had just said, he was no longer "on my side".

So I moved house again. This time to a place in Cowley, near the Rover car works, where I stayed for a few weeks. Because of continuing harassment at work, I soon moved from this accommodation, to yet another rented room on Iffley Road. By this time I was very ill and being abused continuously at work. Again, MI5 followed me to the rented room on Iffley Road, and created new instances of "newscaster watching". There was a television in the room which I watched, and as you can guess the newscasters got at me when I was watching the television. Also once I was assaulted, if thats the word for what happened, on leaving the house; a youth grabbed me by the coat lapels, roughed me up a bit with various terms of abuse. I did not report this assault to the police, because what was happening to me at work was very much worse, and nobody seemed to think that that was worthy of being reported to the police. Later that day at work, Alex G, a fellow employee, said "I heard he was assaulted".... I had not told anyone at work about the incident that morning..... so once again it was made very clear that MI5 were watching my rented accommodation and giving information about what was going on there to managers at work.

So I moved house yet again in late autumn 1992, this time to a rented room in a large house on Woodstock Road. I stayed there for several weeks as the situation at work deteriorated due to OCTS managers abuse, until I was forced to take sick leave from work for two months and attend hospital as an outpatient; at which point I gave notice on the room, and returned to London.

MI5 continued to harass me after the diagnosis of serious illness was made. As reported previously, they harassed me on a flight to Spain in December 1992; and in 1993, when I returned to live and work in Oxford, they again bugged my rooms, as well as my workplace, although the intensity of the harassment was very much less than in 1992.

Watched, followed and harassed in Canada

It dismayed me to find that MI5 would not leave me alone after I had settled in Canada. In January 1995 I rented an apartment at the Bayshore complex in Ottawas west end. For some weeks there was no sign of the "buggers". But then it started all over again. They first bugged my car, which had a car alarm installed - the alarm went off two or three times in a single evening, and the following day gave a signal that the car had been broken into. Then they bugged my apartment, and in particular they installed bugs on the phone line in my apartment.

In September 1995 I moved to a new apartment in Ottawas Bytown Market area, the restaurant and entertainment heart of Canadas capital. This proved a serious mistake. In the west end I had been fairly distant from the centre of town where MI5 concentrated their efforts at turning people against me. In the Market area it was much easier for the persecutors to motivate people to harass me, and over the next couple of years there were frequent instances of harassment by the general public.

From 1995 I had some Polish friends in Ottawa, and as the reader can guess, MI5 have spent much effort trying to break up this friendship. They supplied various things about my home life to these friends, for example where I was living in the Market, directly over the road were the studios of a music radio station, which you had to "look up" to see; and MI5 told these friends that I was "looking up" to see the radio station; so the friends then replayed these words back to me, that I was "looking up". MI5 have also made various sexual slanders against me, and these friends also unwittingly replayed some of the words they had been imprinted with by the MI5 persecutors.

MI5 Will Never Allow Me to have a Normal Life

I have heard many excuses as to why MI5 continuously prevent me from having a normal life. We are told that MI5 are defending the country against a tere to zero.

When I have travelled abroad, they always put their people on the flights, on the journeys I undertake, to continue the harassment, so that I am put off further overseas travel, and chained to my home in London. Yet even this is illogical, because when I lived in Canada, they would still put people on flights back to the UK.... and what possible reason would they have for doing that? Perhaps the truest words to describe the MI5 persecution is that reason has nothing to do with their activities - sane people do not behave in the way the MI5 British Secret Police have been doing.

Summer 1999 - more MI5 harassment?

In only a few days time I will be going to Europe again. This time I have deliberately chosen to travel by a non-UK airline; so we will see if they put their paid agents on this foreign carrier, we will see if they try to harass me on this non-British flight.

If they do harass me on this trip to Europe, or if they resume the harassment in London after I return home, then I will continue to report their activities in these faxes. As I said at the beginning of this article, I would very much like to not have to send these articles any more, but that is not my decision to make - it is entirely up to MI5 to cease their pointless persecution of me, once and for all.

I hate those private auctions. I am not sure he would use gottahaveit to run
up the bid, but I suspect he has other shills doing it.

A few years ago I auctioned two Hallicrafters that gottahaveit won, and they
showed up two weeks later on Radimart. Of course he described them as mint
etcetera,blah blah which I would not do as they were not.

A few months later I sold a Yaesu shortwave to another party on Ebay, and
within a month, that radio,same serial number, was with RadioMart. Strange
indeed.

```

All,

Just started playing around with a new eBay acquisition, a Panasonic R317, 3-band, AM/SW1/SW2. Coverage on SW is from 3.2-22 MhZ, it has 11 transistors (heh heh heh), even has "super sensitive" embossed on the leather carrying case. Telescoping antenna for SW (tip missing, but that's OK), probably has a ferrite rod inside for AM, haven't opened it up just yet. No external leads for a wire antenna, this is strictly a protable, I guess. Has a little thumbwheel for "fine tuning" that actually does work, such as it were. It has a battery/power/signal meter, a pilot light over the slide-rule dial, no light over the meter, but it may just be burnt out.

So it arrives DOA, I put batteries in it, (there's no direct AC jack) and let it sit for a few days to get acclimated with its new home and neighbors (an RF2200 and a GE Super Radio 1),

Tried it again last night and the on/off switch is "soft", It works, Started to play with it and WOW!!!! This is really sensitive!!! AM picks up very distant stations. The SW bands cook too!! If this thing has a few more bells and whistles like better bandspread and RF gain control, it would be strong competition for the RF2200, it is that sensitive!

Has anyone on the group had any experience ith one of these?
rgds,
Mark S.

Does anybody have any idea? I own two of these receivers New Old
Stock, never used. These days they are good for almost nothing.
The R-278B/GR is a heavy tube type receiver that was used in military
air traffic control towers. Beside its today's uselessness, in my
opinion it equals R-390A in quality and workmanship.
73,
Antonio I8IOV

A lot of surplus was like that.  Really well built, and must have
cost the governments an awful lot in the first place.  But so much
of it was so specialized that the well built construction meant
nothing.

The main issue with Martyn (and yes, I've purchased from him in the past) is that he flagrantly mis-(over)-represents his items. As has been mentioned in this thread, if you read his feedbacks, he's simply a blatant liar.

Otoh, as far as this particular 390 goes, the seller blew it. No closeup pics, no mention that it's a Collins-built. Then Martyn lies about Rick Mish "checked out" as being a full Reman, which, iirc, is around $1,250 or so.

Personally, I love sellers who use crappy pics. I just bought an SX-62A on eBay for $153. Poor pics, "untested", "as-is". I could see just enough to be willing to take the risk. It is, without question, the most perfect, shiny, immaculate, untouched, unrestored, perfectly working 62A I've ever seen. It even smells new.

Very desirable, hard to find, especially in good working condition.

A sweet one, $500+, easy.

It's beautiful, BUT it doesn't cover anything much useful, and it's
AM only.

If you threw an FM detector on the end and tweaked it a little, you
might be able to use it on 220 and 440.  Or you could put it behind a
downconverter.

Saying a radio is "untested", having a crappy camera - but "trying" to give
some image of the item - beats hands down - "lying", severely "over-rating"
a radio or other item, shill bidding or listing it for much higher prices -
any day. I would rather chance an "untested" radio than be told it works and
it be a piece of shit. THAT would piss me off. With untested - you "know"
you're taking a chance and its the chance you take.

I just sold an item which the "Camera" didn't show as well as I'd like it to
have - but the thing "is" almost immaculate - considering its age. For
example, regardless what I did, one line of "factory" label - looks like a
"scratch" in the picture. I can only hope even as well as it was packed - it
gets there as it looks. I've not had any issues with packing or shipping
yet - but there's always a first time. I hope I didn't jinx myself! :(
That would suck.

When I sell stuff - I will rate it - but also include the message - your
rating may differ from mine. A 10 to me, might be an 8 to you. 0 being
garbage - 10 like brand new. I sold an item once and rated it low - the
seller rated it much higher. And, I had an occasion to slightly over-rate
one. So - it is a matter of taste I suppose. Hell, I sold an item once for
parts value - to me it was plain junk. The buyer couldn't thank me enough!

For the record - I just unloaded a pile of stuff from a customer. "I" had no time to test each and every item. I listed them as per what I was told with the additional Caveat Emptor statement and anything I seen on a quick look over. And yes, I stated - they were NOT tested. To my knowledge - some having been received - worked fine! I've not heard back from all. But - they gave me positive feedback - so I guess it was ok.

Personally, if anyone looking at my items has ANY hesitation at all - I'd much rather they DIDN'T buy the item. I don't need the aggrivation - nor do they - from a deal gone bad for whatever reason.

E-Baying can be fun and yes - profitable. WE got to keep in mind - there are a lot of "scammers", and people who want to be ass holes - who use it. So far - aside from one ass hole who refused to pay - I've had NO problems with E-Bay. I've enjoyed each and every contact/sale I've made.

What "does" piss me off - the ass hole who refused to pay - is no longer a registered user. ANYONE with ratings from people like that, should be able to have "those" removed. The dude had other issues prior to his account being dropped/removed.

I have found lots of stuff on E-Bay I had been looking for but not to be found locally. I got it all at a decent price and in decent shape too. So - buying or selling, my E-Bay experience as been good to me - thus far.

Yes, there are lots of folks who disavow E-Bay and that is their right and opinion. Personally, I don't feel a decent system - with maybe "some" quirks - should be held accountable for some ass holes who exploit the system. You have them out there - if they can get ahead - they'll do it - however they have to do it. Be it E-Bay, the Welfare system, whatever. A Con - is a con - is a con.

A local junk dealer in Baltimore had 3 more or less complete GRC-27's
for $100 each. I think someone bought them for export, but for what
purpose? The problem with that equipment is that it does not have the
requisite number of UHF channels that would support current military
use, even in the 3rd world. And... they are heavy... aren't they.

I recently acquired a Lysco 600 transmitter and companion antenna tuner, potentially for my collection. I've gotten the rig re-capped, etc. and currently have it on the air. Are these items particularly rare? Just curious.
Tnx de K3HVG

A nice addition to go with the Drake TR-4 Transceiver. Has Speaker, Wattmeter built into one case.
I don't see many of these listed on the swap shops...Will be a nice addition

to your Drake Collection

Tnx for looking....Norm VE3CZI

SolderSmoke!
A SHOW FOR ELECTRONICS HOMEBREWERS!

http://www.soldersmoke.com

Listen at: http://www.soldersmoke.com

SolderSmoke #72

December 19, 2007
M0HBR's Bollywood debut.
Alien hams.
Blackboxophobia.
Solar power (in Rome and on Mars).
TechShop.
South Pole IT.
Mixer madness.
The Radio Club of America.
200 Meters Index.
Peter Dahl.

MAILBAG: Al on audio quality,
WB2REW on Yogi Berra,
W9ILF's tube type mp3 amp,
G8SEQ's bad case of "The Knack",
N8XMS's "Curiosity Curse."

Tired of listening to the Alicia Keys or the BBC on your I-Pod?
Wouldn't you like to be able to carry with
you the kinds of ham radio conversations that you
listen to while in your radio shack? Tune in to SolderSmoke!

RSS FEED: You can subscribe to the program, have
them downloaded to your MP-3 player, and listen to
them at your convenience. To subscribe, just cut and
paste this URL into your I-poder (or similar)
software.
http://www.soldersmoke.com/soldersmoke.rss

If you don't have an MP3 player you can just go to the
site below and listen to the latest program (and
earlier editions) using the audio software on your
computer.

http://www.soldersmoke.com

All the programs are available here.

I hope you enjoy the program. Please send us
feedback.

Hello,

I ask this on behalf of a forum mate.

He has a Amber 3501 and is in need of "operating manual, schematics,
service, any of. Google doesn't help, only a spec sheet found."

Thanks muchly for any help you can offer :-)

Cheers,
--
Gregg

They are heavy. I don't think it would be all that hard to convert them
to the new channel spacing (using a half-channel switch and reducing the
bandwidth), but I don't think anybody would want to, seeing how cheap
the modern UHF stuff is. And the military guys everywhere are trying to
get away from AM even for local ops stuff.

Well made points. The only add'l comment I'll make is that aviation comms, those which will, at one point or another, be used in the global ATC system will remain for the foreseeable future on VHF/UHF AM, albeit considerable data is now passed via other modes/frequencies. The airborne fleets are simply too big to convert, en mass, not to mention the conversion of all ground-based assets. This subject has been discussed at ICAO for a long time now and few appear interested in the capital investment. I have a collection of some minutes and proceedings from old RTCA meeting and symposiums in the 50's that present the idea. Nothing is forever, though.......... Finally, UHF has (like VHF did a some time ago) gone from 100kHz spacing to the now standard 25kHz spacing, or quadruple the number of available channels. Some have discussed 12.5kHz spacing at meetings. The 12.5 spacing can present some real difficulties with legacy equipment, though.

Anyone know a source of the 9 pin plugs Yaesu used for the the cable
connecting the ext. vfo to the TS820?

Thanks

Ralph

Thanks to all.
It would make no sense using them in a ham radio station these days.
They are heavy, space wasting, power consuming and noisy (they have a
fan and electro-mechanical channel selection) and do not offer any
advantage as compared to modern UHF stuff.
Their destiny probably is dismantling, but so far I'm refrained from
doing this in front of such a sample of vintage radio and mechanical
technology. Mechanically they are pieces of art: all of the many
rotating mechanisms bear precision roller bearings (gears, shafts and
so). Indeed I dismantled completely a third one some 25 years ago, and
thas has been better than a workshop on mechanics and radio design. I
think I will save at last one as a future "historical" reference.
Best 73,
Antonio I8IOV

I just picked up what appears to be a Trio (Kenwood?) model SM-1
tube-type HF preselector. I can dope it out for the connections to fil
and B+ but can anyone provide type of tubes used? They are both 7-pin

miniature and the fils are pins 3 and 4. Could be 6BA6 or 6BZ6, maybe?
  Its a 2-stage device and may be a converter instead of a preselector?
  Two sets(decks) of coils and compression trimmers. The vintage is said to be in the 50's but can't confirm. The size is about like a Heath VF-1 VFO and typical of early Trio/Kenwood gear. Logo says Trio but unlike any Trio logo I've seen on their early ham gear. There is a picture and reference to it being a preselector on a JA's website but no joy on anything else. Any info would be appreciated. de K3HVG

I have a Trio preselector identified in my inventory as an SM-1 but the booklet for it seems to have disappeared from my files. These were offered in kit form or "factory wired"... mine is factory wired and in near mint condition. My rf amplifier tubes are both 6BA6. It says "Signamax" on the tuning dial.   VE7AFN.

Kenwood Parts East was carrying this part E05-0901-05
http://www.kenwoodparts.com/
You can also check the other 2 Kenwood parts distributors (West, etc.)

IF they are out of stock -- follow these reliable sources:

1. Leeds Radio, Brooklyn, NY
http://www.leedsradio.com/parts-sockets.html

Their 9 pin minature PLUG should work.

```
  7 pin minature plug - fits sockets for 1L6, 6AU6 etc
       good for making tube adapters and test jigs (rfe)$1.50 (out of stock)
  7 pin minature plug -fits sockets for 1L6, 6AU6 etc
       good for making tube adapters and test jigs with
       screw on back shell - NOS                        $5.00
  7 pin minature cable mount socket - fits plug above
       good for making tube adapters and test jigs with
       screw on back shell - NOS                        $4.50
  9 pin shielded plug - made by Vector (rfe)            $5.00
  9 pin shielded plug - made by Vector - w/o cable hole
          great for making plug-in modules for RIAA etc$ 11.00

  9 pin minature plug fits sockets for ECC-83, 12AX7
       good for making tube adapters and test jigs (rfe) $4.50

9 pin minature plug - Amphenol - silver plated contacts
      with rubber boot                                 $10.00
```

2. Chester Electronic Supply Company - Kenwosha, Wi and Largo, FL

7709 Sheridan Road
Kenosha, WI 53143,
262-658-4616

311 Missouri Ave N
Largo, FL
(727) 585-4736

Purchased 9 pin minature plug (NOS from 1960s) from them earlier this year
(I did not check their stock -- when I was in store 6 weeks ago)

Just to follow up...

I ordered some proper silver mica caps for the IFTs and that seems to have made the difference. I had been tinkering around using ceramic discs that I had on hand, replete with their long leads.

FWIW, I wouldn't have thought that the cap quality would have made so much difference, nor that my one-inch leads would have terribly upset anything but apparently so. Although the IFs tuned correctly with the ceramics it did feel 'broad' and AM signals seemed broad on the dial as well.

After installing the first set of micas it was noticeably sharper tuning and while repeaking after installing the second pair the rig popped right into oscillation as it should.

So my mystery is resolved and maybe this experience will assist others. For reference purposes...and this may apply to other Hallicrafters 1650 kc IF transformers as well, the mica caps I used are 330pf and the coil range is in the neighborhood of 20-30uH, mine were found ~27uH and the best measurement I could get off of one of the bad original micas was 325pf.

73,
Bill W X 4 A

That is exactly it! It would be nice to have a schematic but that confirmation is 100% useful. As I said, the thing works. There's no SM-1 nomenclature on mine, just that funny-looking, I assume early type, Trio logo and the word Signamax on the dial, as you mentioned. If you ever find the booklet and can copy the diagram and/or the actual B+ requirement, I'd much appreciate it.

Wait, wait, stop here.

You've missed the whole point of ham radio. Ham radio is supposed to be fun. It's an avocation.

If you want reliability and convenience, go out and buy an Icom. If you want something fun, the R-278B is more likely to fill the bill.

>Their destiny probably is dismantling, but so far I'm refrained from
>doing this in front of such a sample of vintage radio and mechanical
>technology. Mechanically they are pieces of art: all of the many
>rotating mechanisms bear precision roller bearings (gears, shafts and
>so). Indeed I dismantled completely a third one some 25 years ago, and
>thas has been better than a workshop on mechanics and radio design. I
>think I will save at last one as a future "historical" reference.

Again, if you put a downconverter in front, and an FM detector in back, it could be useful for lots of things. You can modify a cable TV block converter to do the job, or make your own with a nuvistor mixer and

a VHF oscillator. It's supposed to be fun.

That is exactly it! It would be nice to have a schematic but that
confirmation is 100% useful. As I said, the thing works. There's no
SM-1 nomenclature on mine, just that funny-looking, I assume early type,
Trio logo and the word Signamax on the dial, as you mentioned. If you
ever find the booklet and can copy the diagram and/or the actual B+
requirement, I'd much appreciate it.

Regards for the Holidays   de Jeep/K3HVG

The "factory" versions had some parts fastened to the chassis by rivets while the home-built ones used machine screws. Also, the rectifier tube was, I believe, a 6X4 , which many users replaced with solid-state diodes.   VE7AFN.

Hmmmm.. a wrench has been inserted into the gears! My unit is not self-powered. It has a power pigtail coming out the rear apron and is riveted. All else falls into place, though, including the picture posted on a JA's website. Perhaps there was an SM-2 or something? Too bad there's no nomenclature on these things. de K3HVG

I sent off a note to the mail server that the jerk calling himself MI5Victim@mi5.gov.uk used for numerous postings. Here is the reply:

----- Original Message -----
From: Newsdemon Abuse
To: removed
Sent: Friday, December 21, 2007 1:14 PM
Subject: Newsdemon Abuse Department Response Re: Fw: MI5-Persecution: MI5 Have Systematically Destroyed My Life (31033)

We have received a large number of complaints regarding one of our former customers flooding various newsgroups with "MI5 Persecution" posts. We have removed this customer from our active database and he will no longer be allowed to use our servers.

We appreciate your role in helping us to locate this user.

All very interesting, but they've been sending that same response for months; all the while the posts continue.

This may be because the sender cross-posted his messages to many news groups and replys show up in all of them. It takes a long time for the reverberations to stop. Also, the original sender made the rounds of many ISP's.

You know, Scott, I've not agreed with much that's come out of your mouth....

But this? SpotF*ckingOn.

If it ain't fun? Why the hell are you doing it? And experimentation with low budget hardware has produced some amazing innovations and enhancements in performance while broadening understanding in general.

Absolutely. He should go for it. With gusto.

   Nope what?  I also complained while there were many new
posts from the original poster and got this reply. All of
the posts I've seen in the last several weeks were people
responding to the original posts or to replys or replys to
replys, etc. The guy probably posted to hundreds of groups.
When something is cross-posted the replys go to all the
groups unless the header is edited. Sometimes its hard to
tell if you are replying to an original or not. Also, keep
in mind that some news servers keep messages for a
relatively long time. Are you sure that the stuff you are
seeing is recent?

Google doesn't always work well for this. Some time ago
I was looking for a manual I couldn't find anywhere and
someone here suggested I try the Test-Equipment mailing
list, someone there directed me to a vendor who had the
manual and was able to find another rare manual also throug
a tip from someone on the list. Give it a try.

Oh, ->those reverberations; I thought you meant the cross-posts themselves. Sorry for being a smartass.

Still, this is one of the easiest annoyances to get rid of with newsreader filtering, since the From: line never changes, and the Subject: always has the same keyword. If you filter on the Subject:, you'll never even see the follow-ups.

Until someone posts a new thread, with a sufficiently different format
(like this one) to get through my filters.

Oh well, _these_ reverberations shouldn't take too long.

So, do you work directly for MI5, are you a contractor, or just an
unwitting stooge?

Really? My filters are catching this thread just fine; I had to turn
them off temporarily to see your post.

> Oh well, _these_ reverberations shouldn't take too long.

You missed your chance to stop it.

Up to his old games - here's the most recent 'won' auction:

http://tinyurl.com/2w2ns6

The 'lucky' bidder wanked it up to $2000. Of course, we all know that Radio Mart uses alternate IDs to shill bid his own stuff into the stratosphere, and occasionally ends up the high bidder himself. Whereupon he has to reslist cuz the 'buyer' failed to pay (he sure gets a LOT of 'non paying bidders' doesn't he!!)

Sure enough in this case, cuz he's just relisted it:

http://tinyurl.com/32d4lz

Of course, he always says 'non paying bidder' - naturally.

But hey Martyn - we all know you like to occasionally win the shill auctions yourself! Have fun paying those Final Sale fees to Ebay on your shills - or do you report yourself as the non-paying bidder perhaps?

Did you know that shill bidding, even on Ebay, is illegal in all 50 states? Just curious...

Here is proof positive this guy is a crook. If you click on the first link, and scroll down the pictures, check out the serial number. Then click on the second link, and again scroll down to the serial number, they are the same.

He bid on his own stuff, and won it, so had to relist it again! Geeze, what a guy. I wouldn't buy gold bricks cheap from him!

Of course it has the same serial#'s. It's the same receiver...says so in the description. That's the point. He bid on it himself, and nobody outbid him, so he's stuck with it and had to relist.

However, this part of the description is probably a tipoff that all's not well:
"In addition to the above Rick has just fitted a new Motorola IF Strip which is a further improvement over the original, the receiver has all of the covers, unmarked, a complete set of new hand picked tubes and new black IERC tube shields, No EXPENSE SPARED!!

This is the RARE, ORIGINAL COLLINS version of this classic receiver."

How do those two paragraphs, cut & pasted from the description, parse?

Then there's this line: "One marked inprovement he made was to replace the 8Kc filter for a much nicer Curry 6kc filter."

Okay, it's probably a nice receiver, but "original"? Hardly...even by his own schizoid admission.

jak

Yeah really.... sheesh. Its getting boring reading about him all the time.
Surely - if he's ripped that many people off - he'd be booted, in jail or
someone would choose to use some street justice.

Has anyone contacted Rick Mish to get the real story?

According to the description in the orginal auction where the crook Martyn
bought it under the "gottahaveit" ID, the seller only said Rick "checked it
out, or went over it" That's a bit different than a refurbursing I've seen
Rick do. In fact the closeups of the receiver show that Rick probably
didn't do his normal excellent job and all he did was check it out.

It's the outrageous BS that Martyn the crook attaches to his auctions that
is amazing...and suckers fall for it all the time. The guy is an out right
liar and a fraud. His description of this receiver is so wrong in a number
of areas!

Ebay doesn't care since they still collect fees from him AND Ebay is
passive participant in his fraud since it has been documented and reported
numerous times.

Your original point is well made. Rick Mish should be contacted to verify if Martyn's claims are true.

If Martyn is trading off Rick's reputation and the work is NOT as described, Mish can legally have Martyn's ass for fraud, misrepresentation of Mish's work, harm to his reputation, and profiteering on Rick's name without permission.

Then have Rick contact eBay about trading on his reputation without permission.

THAT will get the job done.

I was going to look up modulation transformers and googled on Peter Dahl, and there was a link to a ARRL URL where they said he's got Parkinsons and the company is going to close doors Dec 31, 2007.

So, now what are we going to do for weirdo stuff like plate modulation transformers?

I don't know RadioMart and I have no idea if he is is a crook or not, but either way, I don't think that "reporting" him will make any difference. In my opinion, eBay couldn't care less.

Not long ago I bid on an assortment of "vintage" crystals. I paid instantly via Paypal, and the crystals showed up pretty quickly. The problem was that more than 20% either showed obvious signs of water damage (long-term immersion and rust) or the housings were just plain *empty* (yeah- some clown had removed the quartz!)

I attempted to contact the seller...not that I expected anything... but just to let him know that this wasn't quite right. He refused to answer my email so I left negative feedback---nothing personal or nasty, mind you. I simply stated the facts.

Guess what? He slams *me* with negative feedback. Why? No reason. On what grounds? No grounds. He was simply miffed and that's it. By the way- he never did respond to my email.

I contacted eBay and told them I take the feedback system seriously, that my feedback was 100% prior to this event, and that if I was to receive negative feedback, I would think the seller would be obligated to show where I had failed to meet my obligations. I challenged them to cite justification.

eBay basically told me that the feedback system is based on "opinion" and that they will not "censor" that guy's "opinion." So, in other words, we don't care-- get lost.

I would argue that if anyone is being "censored," it is people who have been cheated. The next time I'm shafted by a seller, I will have to weigh the cost of my transaction versus the cost of unfair and unwarranted retaliation should I leave negative feedback. Ten or 20

bucks worth of useless junk wasn't worth having my perfect recorded
stained.

I've had a lot of fun on eBay over the years, but frankly, this has
disgusted me to the point that my future participation on that site is
doubtful.

Pete

Jesus! The whole broadcast industry relies on him, not just the amateur
community.

>So, now what are we going to do for weirdo stuff like plate modulation
>transformers?

Getting weirdo stuff rebuilt isn't all that difficult, if it's large
enough. There are a couple good transformer rebuild shops in my state
which mostly do pole pigs but can be encouraged to work on big chokes,
power and modulation transformers if the money is right.

But getting brand new stuff.... there's nobody like Dahl. And getting
rebuilds for small transformers.... again, the guys are unique.

Maybe Martin (MFJ) will buy the "Ham" side of the company, if there is one.

TenTec has wound some of their own xfmrs and also bought from a company
in Canada.

Just a bit more: if anyone wants to check it out, the story is here:

www.arrl.org/?artid=7889

Or, if you put "peter dahl" into the google search box, the link comes up pretty high on the first page of search results.

I've sent an email to Hammond (they make a lot of transformers of the old style [eg for tube radio projects, including pretty hefty plate transformers eg. 500 watts plus, and sold through Radio-Daze, and some at Fair Radio Sales]) about whether they might do "one-of" orders but I'm sure they won't want to do lots of one without big buck costs and I'm not the DOD, DOE.

I'm probably going to make a telephone call to Dahl tommorrow and see if they answer the phone and what they say. No news on their websites, so someone is asleep at the switch.

I did a google on "electric transformers" and got a lot of hits and its going to take a while to search them. The vast majority of todays transformer markets are all solid state low voltage stuff. tsk, tsk. Even Newark and Mouser (for two [who else out there? Allied? Pioneer? couple others? DigiKey?]) don't carry any transformers, much, for tube gear voltages, let alone modulation transformers. And, here I was, thinking about a homebrew pair of 811-As in parallel, class-C, modulated by a pair of 811-As in push pull class B. Well...that idea just went poof.

So, somebody moved my cheese.

Whatever happened to surplus savvy?  In our area, not major metropolitan
by any means, there are DoD sales, surplus outlets, many hamfests, etc.
with no shortage of heavy iron.

>>>
>>>
>>> Getting weirdo stuff rebuilt isn't all that difficult, if it's large
>>> enough.  There are a couple good transformer rebuild shops in my

I also recommend rewinding houses; even here there was (haven't checked
recently) a good transformer rewinding house that did small stuff
for very little money. Feel free to do it yourself as well; everyone
should try at least once.

Regards

Michael

Hopefully someone will be able to buy them out, and continue the
service.  If it's fun and/or makes money it'll happen, unless Mr. Dahl is
too eccentric to let go of his business.

Wow! This is indeed sad news for hams & others but, mostly for Mr. Dahl and his family.

Well, I called their non-800 number this morning (my nickle) and got a
generic recorded message on an answering machine (but it invited me to
call PD at home or his cell phone and gave the numbers, but I am not ready
to make a casual call under the circumstances).

I'm thinking about going back to the website and get some email addresses
and try them next.

Unfortunately this is true of Ebay. Sellers can screw buyers all the time with little action from Ebay. I leave these bum sellers negatives all the time. Of course they always leave me a negative, but I fail to see the negative when they were quickly paid. Ebay is just bunch of computer software, and no one there wants to take personal intervention of any kind. I even had this guy leave a negative by mistake. He and I both notified Ebay. They would not change it. The feedback system is just another example of less than scrupulous behavior. They allow those stinking private auctions too. Where is the transparency in that ? Now they have started hiding all bidders identities. I have not been to many live auctions where I did not know who was bidding against me.

PayPal protection is a joke. I have never had it re-imburse me over any crooked deal.

Ebay and the information world is not what it was 10 years ago.

Happy New Year
Dave

Interesting how his mind works. He knows how much a real bidder was willing to pay so he set the Buy-It-Now at exactly that amount.

He won't even give the guy a 10% discount for getting jacked around.

It's also funny how he pretends to be Rick Mish's acquaintance and tries to "pump" up Rick, calling him "the Man" and mentioning his family.

Think about this - Why did you, as a buyer, leave feedback at all?
You SHOULD have been given positive feedback as soon as you paid for the
item.
When you didn't get your deserved positive feedback, you left yourself open
for receiving
retalitory feedback when you gave him what he deserved.

The feedback system is a farce. Yes, I agree, as a participant on ebay you
want a close to
100% positive feedback rating. Once you get 10-20 positive feedbacks at
100% stop leaving
positive feedbacks for the scumbag sellers who wait "till we are sure your
shipment arrived in
good condition and you have left us positive feedback then we will return
the favor."
Is a 150 rating really any better than a 20 rating?

Another thing we buyers should do is have buying and a selling accounts.
Several of them.
When we get screwed and want to leave negative feedback (other than the warm
feeling it gives
us, what is the reason?) we know we will get retaliated against, so we just
take it and then disable that
low rated account ! Your selling account will carry a relatively high
rating if you are honest and that
is the only one that matters.

Ok? Problem solved. If you ever buy from Radio Mart do it with a brand new
zero-rated account
and don't worry about it. When he gives you a negative back, just throw
that account away and
open a new one for buying. We are all as smart as he is, we just have to
use our brains.

Rick K2XT

Not so simple!

After reading your posts I'm just wondering whether using a zero-rated
account would always be the right strategy for buying, regardless of
the reliability and reputation of sellers. Otherwise, when to use a
zero-rated account for buying? How might a buyer identify the
fraudulent seller beyond the few known cases? I have my own black-list
which includes three sellers and now I'm going to add radio-mart, but
the ebay world is much more wide.
What to do in the cases when zero-rated bidders are invited not to
bid?

I've heard that ebay checks names and addresses in front of new
subscriptions, and if they match no longer active accounts, new
subscriptions are blocked. Is it true? Is there any limit to the
number of accounts for any given name and address? What about paypal
accounts? How many times should I transmit to ebay my credit card
info, and how many times would I prefer it is present in the ebay
dadabase?

(As a honest seller, I would prefer not to have bids from zero-rated
accounts, as they could appear as shill bids. Further, for the honest
seller the zero-rated bidder is always a risk. Hence, on the other
side of the wall, so far I thought it would be better for me
presenting myself as a non zero-rated bidder, but maybe this makes no
sense, ebay is now sick.)

What's the problem with a zero rated bidder? When the auction is over either he pays or he doesn't. I don't give a tinkers damn who buys what I'm selling as long as they pay. If I'm not happy with the price I should have set a higher reserve. My fault.

I decided to contact Rick Mish and he confirmed what we all expected.

The crook Martyn, AKA Radiomart, is lying about this latest offering. Rick did NOT do the remanufacturing as stated by the liar Radiomart! In fact, Rick told me that he has had two other cases of lying by this useless piece of shit "Radiomart" that resulted in legal action against him. Rick is very disappointed that this jerk is using his reputation in Radiomart auctions.

I notified Ebay about the fraudulent descriptions and have yet to hear back. Ebay usually doesn't care.

Amazing....and yet the stupid flock to his auctions...

They are pretty good receivers given the era they were designed in. If you are not far from LA and don't want it I will give it a good home. :-)

In my opinion - they are a quite worth-while receiver - not quite in the R-39Xx class - but not all that far from it. Definitely in the upper end of the scale for that era and technology - being built more like a military radio (using ceramic wafer switches, and sealed transformers, etc.) Like some of the National and other "upper end" commercial units - the AR-88 was used by the military quite a bit - some receiving formal ID plates, etc. some of the later ones receiving Signal Corps designation R-320 (though these were actually labeled by RCA as SC-88 receivers).

The FAA used them for many, many years - there was even a "triple receiver" diversity rack having three stacked with supporting equipment...

best regards...

>
>Amazing....and yet the stupid flock to his auctions...

What would happen if a new ebay'er who just signed up, and didnt have time yet to establish his paypal account, etc. was to bid on fraudulent auctions with 3 minutes to go? And he bid $2000 on each of them? He would "win" all the auctions.
Then he would disappear.........

What if 5 of his friends who post on usenet, did the same thing next Sunday night?

An administrative headache for the fraudulent seller, huh?
Energy better spent than just posting stuff, maybe?

i.e. if there's a crook out there in the world, and he does business
with ebay who may just possibly not have a single person working in
the customer service department, and doesn't own a telephone, maybe
there ought to be a counter-revolution? Might be very entertaining.

An old saying comes to mind: "Two wrongs doesn't make a right."...
Whatever that means.

Report him to ebay. I have done it and it sometimes works.

The numbers are disheartening. Rick provides a difficult service at what strikes me as a competitive rate.

$1,000 - "The entire receiver is dismantled, washed, re-tubed, re-painted, re-silkscreen lettering, re paint and stripe knobs, check all components"

Radiomart scams an eBay listing and almost flips the R/390A for more than Rick charges to do the work.

It's almost representative of our times. People who do real work get paid pennies. The hypesters and scammers get the bucks.

> I notified Ebay about the fraudulent descriptions and have yet to hear back.
> Ebay usually doesn't care.

It's not that, they don't have the resources to police the auctions.

```

Angry Hallicrafters mob takes on eBay. The following is from an eBay listing.

<http://cgi.ebay.com/HALLICRAFTERS-SX-28A-PM-23-IS-IT-MISREPRESENTED_W0QQitemZ170181847596QQihZ007QQcategoryZ4673QQssPageNameZWDVWQQrdZ1QQcmdZViewItem>

This is a heads-up warning to please be careful when considering any high priced Hallicrafters SX-28A at auction in the Ham Receivers category. It was brought to my attention that there is a second Hallicrafters SX-28A currently listed that is using copied pictures of my SX-28A from a previous auction that ran here and concluded just last week. Please carefully compare the inside view in auction #130186049284 with the pictures of my receiver from auction #170179225705. Notice how the yokes on the tuning shaft couplers are in exactly the same positions, spots are in the same places and dial lamp light is reflecting off the backside of the dial in the same place. The seller's intent to deceive is more evident by his strategic cropping of my original picture which is an attempt to hide the more obvious identifying features appearing in the background. The seller is plagiarizing pictures copied over the Internet and posting them as his own. Using pictures of my receiver in his auction is serious misrepresentation.

BREAKING NEWS: We just learned the seller admitted all pictures connected to the SX-28A auction #130186049284 featured at the top have been copied and pasted from various sources on the Internet. The auction requires immediate payment via PayPal and is running as a private auction which means a bidder's ID will be hidden from all other viewers. A hidden ID prevents other members from contacting the bidder before he has had a chance to pay. The auction has been reported to SafeHarbor for investigation into pirated pictures which is prohibited and we also asked to check for a possible hi-jacked ID running a fraudulent annonymous auction. We will keep you posted by updating the information as it becomes available.

I Received This Alert From My Buyer and Decided It Was Important and Should Be Reported:

Rusty:
You might find it interesting to know that one of your pictures from your, now our, SX-28 listing, is presently being used by another person on a present eBay listing. Namely, this picture:

is being used by : devin3247 (144)

for item: 130186049284

Not only is this person stealing your picture, but, the picture is SUPPOSED to be an interior shot of HIS radio for potential buyers; instead, it is an interior shot of YOUR radio which you have already sold to me and for which I have already sent the payment.

Although this doesn't harm either of us directly, it still "ain't right".

Thought you'd like to know.

DP

I was also contacted by a good friend who asked the subject seller for more detail about the condition of his SX-28A and this is the reply he received which he then forwarded to me:

Hi, the cabinet top was discolored for some reason so it has been painted.
I'm not so sure about the capacitors, I'm pretty sure that some have been replace, but most I think most of them are original. I'm not able to lift or turn the radio over anymore. My son should be over this weekend and I'll have him take a look.

Thanks!

I noticed he did not allow this answer to post to the description like one of the others so this indicates selective description posting and more deception.

This is the actual original picture of my receiver from auction #170179225705 which is now sold

Hello all,

I have a freshly repaired and calibrated B&K 747 and have begun finally testing and cataloging my vast tube collection.

My question: surely someone sometime has figured out how to wire a 4-pin socket to 8-pin plug for testing all the old triodes - 45, 26, 01, and all the rest.

Anyone have any info on this, maybe with a wiring diagram for the adapter and 747 settings for some of the more common types? I'm certain ANY tester could be made to do this, given it has the right voltages available.

Any help would be greatly appreciated.

Dave WB7AWK

Just wire it up. It doesn't matter what the pinout is, as long as you set the switches so that the right pins on the octal socket are connected to the right pins on the tube.

>Anyone have any info on this, maybe with a wiring diagram
>for the adapter and 747 settings for some of the more common

Well, start with say a 6SN7. The filament voltage is 6V, the transconductance should be around 3,000 on each side.

Pins 7 and 8 go do the heater, 6 to cathode 1, 5 to plate 1, 4 to grid one. Make your adaptor up to go to the heater, plate, and grid.

NOW, start with the settings used for element 1 of the 6SN7, but change the cathode switch so that the cathode connection is sharing the pin with the grid connection. Set the filament voltage appropriately. Keep the same bias voltage, which I think should be in the ballpark for those tubes.

Then get some good tubes with known transconductance, put them on the
tester, and adjust the load until the meter reads properly.

Voila! Mark down the settings. You now have a way to test 4-pin tubes.

First, it is my recollection from reading the EULA for ebay that any pictures you post on ebay become the property of ebay... something they do to avoid spurious lawsuits from those that think it might be fun to post their pictures on ebay, and then sue ebay for infringement. The pictures you post on ebay show up on thousands of affiliate websites, many of which don't even identify ebay as the source.

Am I the only one who remembers that it used to be when you clicked on the button for: Sell a similar item, they would copy the original listing, pictures and all?

If the seller is to be believed, he is older. He says he can't pick up the receiver and flip it over anymore. Not too hard to imagine, given the high number of feeble elderly men in the hobby, many of whom recognizing their impending mortality, and are trying to clear out the heavy stuff. It is also not too hard to believe that he might not have a digital camera... most of the elderly don't..., and might have thought that using pictures from another auction wouldn't cause any concern. Hams are used to sharing everything they get with other hams, pictures, manuals,... copyright is not even considered... especially when there is no intention of selling the picture, or even using it more than the once.

The only smoke here appears to be from some ancient ham's cigarette.

Just a thought,

-Chuck

It's wide as hell. Consequently the audio quality on shortwave broadcasts
is excellent. It's not a DX machine, though.

I remember seeing an RCA Globecomm facility when I was a kid which was
equipped with three AR-88 sets and two Collins R-388 sets, and all of the
operators preferred working on the R-388 positions.

Still, saying "not as good as an R-388" is decent praise.

Here's an indicator from a 2001 Collins reflector. Someone was Very
eager to snatch it up for $450. then...I think that the HQ-215 was
marketed for only a year or two in the late '60s.

http://www.listserve.com/archives/collins/2001-09/msg00020.html

The mic is any low-Z, single-button carbon mic. The T-17 or the M-15UR
will work, assuming the mic, itself, is good. The mic that comes with
the radio set looks like a 50's Motorola mobile mic, so any of those or
similar, good quality carbon mics will also work (and recommended!). The
mic plug is a standard military PL-68 with tip being PTT, ring being mic
hot, and the shell is ground.

Whoooooooooeee! I have no idea what you're smoking these days, but the manual says that the mike input impedance is 47KOhms. (High impedance dynamic or crystal mike). There is no Voltage source for the microphone which a carbon microphone would require. (That also lets out the use of a non-self powered electret mike.) The microphone plug is not a PL-68, which is 3/16 inches in diameter, but rather a three terminal 1/4 inch jack. (Stereo plug). You did get the connections right.

After you pass a certain age, you do not need to smoke anything to be misguided and confused. I bet that the 102BX numbers, without the name in this post, reminded Jeep of a rig he was familiar with much earlier in life which did indeed use a carbon mike.

The more you know, or have known, the easier it is to get confused.

In every lifetime, there is one single point in time where you are the most focused and precise. Every other point is downhill from that single point. The key is to figure out when that point is and make all the important decisions then, and to keep silent the rest of the time.

73, Colin K7FM

If were talking about the Chinese 102 radio set, it is carbon. If
another set is being referred to... I don't know what that set is?

K9YA Telegraph
Fifth Anniversary For The Good News About Amateur Radio

It's been another great year at the K9YA Telegraph. Thanks to your strong and continued support we're looking forward to celebrating our fifth anniversary in January 2008.

There's a definite buzz on the 'Net with the Telegraph earning enthusiastic comments from bloggers, reviewers and in discussion list threads. As we wrote at the completion of our first year: "Our success derives from you, our large, enthusiastic and devoted subscriber base worldwide, and to the writers whose contribution of personal stories-at once fascinating, humorous, enlightening and compelling-made the Telegraph staff's inaugural year one of consistent joy and fulfillment." That truth remains unchanged, but ever more encompassing as more of you, drawn from the international ham community, have joined the Telegraph readership and lent your experience to enlighten, evoke and entertain.

The Telegraph staff continues in its fifth year-as in our first-ebullient. Thank you for your messages of praise and encouragement, and remember: we're always on the lookout for your good story, or two.

The K9YA Telegraph is a free, monthly, general interest amateur radio publication read by hams in more than 100 countries. The Telegraph is a full-color e-Zine providing the stories and features most wanted by our subscribers because our subscribers write it. Check it out; we think you'll like it too.

http://www.k9ya.org

Subscribe FREE to the K9YA Telegraph. It's FREE! It's FUN, It's ALL ABOUT HAM RADIO!

The January 2008 issue includes:

A Scholar's View... By Philip Cala-Lazar, K9PL

The Race with Obstacles By Francisc Gr�nberg, YO4PX

Lincolnwood Pack 74's First JOTA By Joel Byron, WD9ICL

There Were Angels Dining at the Ritz By Rod Newkirk, VA3ZBB/W9BRD

Hog Morse By K9YA Telegraph Staff

Ham Quips By Dick Sylvan, W9CBT

If you're in the mood for Morse, hankering for history, gluttonous for gear, ravished for a review, needing nostalgia, or just plain famished for fun, you'll find it in the K9YA Telegraph.

To download sample issues, subscribe or write an article, visit the K9YA Telegraph Web site. http://www.k9ya.org

Probably the Swan Astro, but I don't recall what mike it used.

The 102BX is a Cubic solid-state transceiver from the late '80s.

No wonder there's confusion. It's no boatanchor, not only does
the solid state ensure that, but age wise it doesn't even come close.
At least a relatively "recent" and solid state rig like the Signal
One is close to forty years old now, which means it was current with
boatanchors that are old and do have tubes.

Would some kind kindred soul scan a Stoddart NM-50a (375-1000mhz)
schematic for me? I acquired a nm-50a for a song but I can't seem to
locate a manual in the normal places. Your help is very appreciated.

Keywords: WWV crystal spotter
Xref: g2news1.google.com rec.radio.amateur.boatanchors:13413

I know this is a rehash of old ideas, but I found myself getting tired of changing the setting on my signal generator just to spot the WWV calibration points on my boatanchors.

So I kludged up a 2.5MHz crystal oscillator with a gated pulsewidth circuit to get harmonics every 2.5MHz. All of this on a board about the size of two AA batteries.

I put the schematic here for anyone to use:

http://www.novatech-instr.com/images/wwv_spot.jpg

```
Nothing special, but I find myself using it first to see what the BC-342
is doing.

Steve.

3-conductor plugs (male) & jacks (female) are also called TRS or
"Tip-Ring-Sleeve" connectors in the pro audio business. Of course,
2-conductor versions would be TS or "Tip-Sleeve" types.

I don't fault him for 'buying low and selling high' - I really don't see anything wrong with that - some sellers don't know how to pitch an item up to make it sound as good as it really is. RadioMart has quite the skill to draw buyers for sure.
I once bought a rough pile of what looked like crap radio parts on Ebay for $4.99 and when it arrived, it turned out to be a complete unbuilt receiver kit with box from 1954 that I resold for $375.
Great way to make money if you have the knack for finding underpriced jewels in the mess that is Ebay.

But what I DO find great fault with is the private bidder ID auctions he does. I know damn well he is shill bidding all of his auctions up. I wonder how many items he has 'bought' himself by shill bidding - where he bid it up with another ID, and hoped to be outbid at the last second but ended up 'winning' his own item.

And of course Ebay looks the other way, as their fees just go higher when people practice shill bidding with hidden buyer IDs. It's criminal in all 50 states I believe, but Radio Mart does it all day every day.

Dave

Anyone have a BC-312 SO1 connector laying in their junk box? I have been watching ebay but haven't spotted one yet. The mating connector shows up fairly often.

The conversion handbook published in the late 40s said to remove it and toss it.

Email me. (gswifty@gmail.com)

Thanks.

Steve.

His point is that Radio Mart uses an alias (gottahaveit1995) to buy items,
and
then writes really puffed-up descriptions and relists them in private
auctions
under the name RadioMart. Most people (me included) believe he uses private
auctions so that he can openly 'shill bid' on his own stuff to drive the
price way
up, without anyone knowing because the bidder IDs are hidden. He's built
a reputation as something of a sleaze, as he often lists items as 'being
from his
own collection' when it's obvious from searching Ebay that he bought that
exact
same item 4 weeks earlier under the gottahaveit1995 ID.

Did that radio receive the full Rick Mish rebuild as detailed in
RadioMart's blurb or was it just "checked out" and "by the way, Rick,
you have a better filter for it?"

I don't see black tube shields in the pictures.

I see scuff marks on the digital dial, a bend in the rear sheet
metal.  That radio is hardly "Mint".

A "Restored" radio CAN NOT be mint.
The only way it's going to be mint is if it's
still in the box NEW.
After that, IT'S NOT MINT.

It "isn't" just E-Bay where you get screwed, Flea Markets and others can do it too.

I went to a flea market on one particular day - seen a guy selling a Cobra 2000. Well, I'd always thought about getting one but never got around to it (still haven't). Anyway - a guy was selling one - with the box, papers, plastic wrap, the whole works. BRAND NEW - he says - never been opened. Hmmmm. OK - well, I take a tad closer look at what do my wondering eyes see - but a little ole switch mounted on the rear of thee. I ask - ok - what is the switch for on the back, I do CB repairs and I know that isn't factory? OH - that's extra channels he says. I said you - are a fucking liar. YOU said NEW in box - never opened. AND he wanted close to "new" price. Never seen him there since.

I tried posting this from Google Groups, but it seems that I don't know how to use it.

I put up a posting asking for the front panel connector from a BC-312. I listed it as an SO1, which is just the schematic symbol. The military designation is SO-94, which mates with a PL-114.

Must be one in JB somewhere.

TIA.

The issue isn't that he buys low and sells high, it's that when you buy from this guy, you don't know what it is you're actually buying.

Everything is 'from my private collection,' 'mint'(a term not used by professional sellers with a reputation), and 'professionally restored by...'

In many cases, the item arrives dirty, with parts cobbled together from many rigs, damaged, and in two cases I've seen, 'mint' rigs that 'I've used daily' were not only non-functional, but missing critical parts to make them work.

Buying low and selling high...that's what he's there for. That's what we all do.

Misrepresenting the product...that's another story.

And I won't begin to address the extortion he's visited on someone who takes issues with a misrepresented item when it arrives.

MI5 Persecution: How Could It Be True?

If you have the patience to read these articles you will be struck by how apparently fantastic the claims being put forward are. You may ask yourself why such seemingly nonsensical assertions are made. This matter has been discussed on the Internets UK-local newsgroups for three years now, and the denizens of the uk.misc newsgroup (the so-called "miscreants") have come up with a number of theories to explain these posts; it has been variously suggested that they are a troll (an artificial creation for the amusement of its author), that they are made by MI5 themselves with the purpose of discrediting other conspiracy theories, and that the poster is mentally ill and the articles are symptomatic of the illness (the view held by most miscreants).

Are these claims the product of mental illness, or is that just a cover?

The most obvious explanation, that the claims made result from the admitted mental illness of the author, is the one which the persecutors intend be the one accepted without consideration being given to the possibility of the claims being true. The persecutors have actually been very clever about this, both in selecting as their target someone who was known from school or university as being borderline schizophrenic, and in ensuring the nature of their persecution corresponds to what often features in the delusions of a schizophrenic.

The very first incident of the persecution occurred in June 1990, when I was still a student at university in London. It consisted of a reaction (giggling) from the newsreader, Sue Carpenter of ITN, to what she saw happening in my living-room at my parents home where I was living. Before your imagination gets the better of you I should make clear that what the newsreader was reacting to was not too embarrassing in nature; my mother had brought an apple for me into the the room, and Sue Carpenter found this amusing.

I recognized that Carpenter had reacted to what she had seen in my living-room, yet this idea still seemed completely fantastic to me. My reaction was to continue watching television, particularly the news, to see if this incident would be repeated. It was, many times, both on BBC and ITV. An intelligent person would have thought to obtain a video recorder and capture some of these incidents in order to try to explain to an observer what he saw in these broadcasts. Unfortunately, I failed this test of intelligence, since I did not record these programmes. I have recently attempted to obtain from ITN tapes of their news programmes dating back to summer 1990, but, unhappily, they have advised me that they do not have complete programmes including newsreaders comments dating back to that period.

From the outset, the persecutors structured their actions to ensure that any complaint would be met with disbelief, and dismissed as delusional. This is why they chose as their target someone who was known at school and university to be borderline mentally ill; and it is why they fired the first shots of their campaign through the broadcast media. Schizophrenics commonly believe the media harass them; it would be exceptional for "full-duplex television" to exist in reality. Those with schizophrenia also commonly believe people are talking about them; again, the persecutors have shown themselves very rarely, but act through intermediaries, both in the workplace, and in public and during travel.

Mental illness is not the cause of these claims, but the simulation of its symptoms is a cover used by the persecutors to deny their victim the ability to have his compaints believed.

What evidence exists to support these claims of "interactive television/radio";?

Quite frankly, I have very little evidence to support my claims. You may examine the "Evidence" area of my website to see such evidence as I have been able to gather. None of it is remotely conclusive. The "smoking guns" all date back to 1990/91, and it is really rather late now to start trying to look for material dating back seven or eight years. In 1997 I started tape-recording every programme I watched or listened to. I also started carrying with me a high-fidelity minidisc-recorder with good quality microphone to catch incidents of public harassment, but this also has not been as successful or conclusive as I had hoped.

Perhaps the best item in the "Evidence" section is the audio file "Life is so hard" (it is labelled with Garfield the cartoon character on the site), which I have given a certainty level of 100%. This item relates to harassment at my workplace in Canada in 1996. A co-worker called Mark was coming up with phrases and expressions which were repeating things being said at my Canadian residence, consequently leading me to believe that my apartment and home phone were bugged, and that the persecutors were passing their gathered information on to Mark. On one particular evening I said in my apartment, "life is so hard, and then you die". The following day I was able to record Mark saying exactly the same phrase at work.

Unfortunately when "they" know you are recording them, they simply dont say things which would unambiguously show harassment. When Mark the co-worker knew he was being recorded, he only made his remarks out of range of the recorder, for example outside the building. When the TV newscasters or radio disc jockeys know they are being taped, they limit themselves to saying things which are ambiguous, which even in my mind may or may not be personally directed against me.

Who knows about this persecution?

Surprisingly many people know. People in the media, such as BBC and ITN newscasters including Martyn Lewis and Michael Buerk, and radio disc jockeys such as Chris Tarrant of Capital Radio, know what is going on, and take part in it. Some co-workers at my former workplaces in England and Canada have known about the harassment. Quite a few people in the general public are also included. I believe the police are aware of the persecution, but, unfortunately, have chosen not to take any action to stop it. I have complained at my local police station in London several years ago, and I have stated on the internet newsgroups that I have done so, hence the police will be well aware of my wish to see the matter resolved. I believe their inaction denotes a dereliction of duty, but without good evidence, I am powerless to compel them to take steps to prevent further harassment, or deal with what has already taken place.

What is the purpose of sending these faxes?

These faxes are being sent to three distinct groups of people, namely Members of Parliament, the media, and diplomats & legal people. As you will have observed I am making use of the email-to-fax gateway at Demon Internet to send these faxes. I am forced to use this gateway since I currently live in North America, and cannot afford the high cost of direct phone calls to the UK.

My purpose in publicising my claims is firstly to discourage the persecutors from continuing their campaign, and also to attempt to bring their campaign out into the open, and thus perhaps identify the persecutors. Neither aim has been achieved yet, but I hope that with sufficient stimulation these aims may yet be accomplished.

The problem with the second aim is that those who read this article will fall into two groups, those who dont know anything about the persecution and consequently will disbelieve my claims as delusional, and those who do know about the harassment and may have some idea of who is behind it, but realise that if the harassers are exposed and the truth brought out into the open, then powerful British institutions will substantially lose prestige, and be exposed to ridicule.

It would give me hope to believe that these faxes will create a third group of people, those who find out that I am telling the truth, and who follow their consciences in standing up and seeing justice done. Only time will tell if this hope will be realized.

Why do you think MI5 are responsible?

The question of who is ultimately responsible for this eight-year harassment is one which is very difficult to answer, as the persecutors have never clearly made their identities known to the persecutee. However, I believe I am correct in attributing the continuing victimisation to elements of the British Security Service MI5, and in this article, I will try to explain the reasons for this belief.

The British internet magazine ".net" featured my website on page 17 of their March 1998 issue (number 42). Their review kindly describes it as an "excellent site" and gives some details of what the net surfer will find there. Should you wish to reply to this article you can do so;

"When did you first suspect MI5 were responsible?"

Over Easter 1995 I went to see a local solicitor in London with a view to talking to the police about the harassment. Soon afterwards I did go to my local police station in Clapham and spoke to an officer there. The solicitor made a comment which suggested to me that the persecution I had been experiencing may have been organised by an intelligence service.

Up to this point, I did not have any clear idea as to who was behind the harassment. Only their agents were visible, in the media, on television news programmes, and on the radio; in the workplace, where things said at my home were repeated verbatim; and in some cases abuse in public and during travel, for example on the trip to Poland in June 1992 which I have already described.

Both from the fact that widely disparate individuals and organisations were employed as agents in the campaign against me, and from the fact that an entity would be required to marshal their resources in the areas of spying on my home and giving gathered information to their agents, it was clear to me that a single entity was responsible for carrying out the campaign. Yet from June 1990 until Easter 1995 I did not have a clear idea of who might be responsible. I guessed that perhaps some private individual or group of persons who saw themselves as my enemies had perhaps paid private detectives to organise the harassment. Alternatively, since the campaign had started in the media, I made a far-fetched supposition that perhaps it was an ad-hoc group of media people who had set themselves up in opposition to me. After Easter 1995 I saw that these guesses were wrong, and I made an I believe much more accurate estimate as to who my enemies really are.

"Why couldn't a private group be behind the persecution?"

There are several reasons why a private individual or group would not be behind this campaign.

Quantity of resources / Money. Here is what one Usenet (internet newsgroup) participant had to say (several years ago) on the topic of how much money it would cost just to keep the surveillance going.

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that
makes
PM: >it worth the while of the state to spend over one and a quarter
million
PM: >on you?

A private individual or group would not spend over a million pounds to verbally torture a victim without some financial motive or gain. Private industry is driven by the profit motive, and there is no financial profit to be had from carrying out a campaign in this way. If a private enterprise were behind it then they would have taken direct physical action a long time ago.

State enterprises, on the other hand, can afford to be wasteful, since they are funded by the taxpayer. They do not have to show a money profit. The employees or contractors employed by a state organisation such as MI5 are driven by their own personal profit motives, to make the most money out of their employers for the longest period of time. MI5 is funded to the tune of #150M p.a.; even a few hundred thousand a year would to them be affordable if their managers could convince themselves of the necessity of what they were doing.

Quality of resources / Technical resources - electronic and other surveillance. In summer 1994 a reputable and competent private detective agency was employed to conduct a counter-surveillance sweep of my home in London. They charged us over #400 for this, conducted a thorough search for radio transmitting devices, hard-wired "probe" microphones and also tested the telephone line. They found nothing. This was not altogether surprising, since it had been made very clear to me that there were bugs in my home; the "buggers" would not have made this clear unless they had felt their bugs were of sufficient sophistication as to be safe from detection.

But there is another lesson to be gained from the failure of the private detectives to find anything. The agency employed was one of the most reputable in London. They were employed on the principle of "setting a thief to catch a thief", for if the harassment were being carried out by private detectives, as I then believed, then surely another set of private detectives would be able to find the bugs that they had planted. That these "private eyes" were unable to find anything, and that the harassers were confident that they would not be able to find any bugs, points to the harassers being an order of sophistication above a private agency, and leads me again to believe that a state intelligence service is responsible for the surveillance and harassment.

Quality of resources / Technical resources - Interception of Postal service. In summer 1994 when I emigrated to Canada to try to escape the harassment, I wrote letters home to my family and friends in London. Quite soon after my arrival in Canada, the harassers were able to find precisely where I was staying. The only way I can see of "their" being able to find out my new address was by interception of my letters to the UK.

Later in 1994, I conducted an experiment to see if my letters home were indeed being read. In a letter home I wrote of being depressed and talked in vague terms of suicide. I deliberately chose this topic, since I believed it was the outcome my harassers were trying to achieve, and that if they read the letter, they would "echo" its contents. Sure enough, soon afterwards there were two incidents of people shouting "suicide" at me in public places in Canada.

It is inconceivable for a private agency to have the ability to intercept postal mail. The state security service on the other hand is well known to engage in these activities.

Quality of resources / Access to Media. One of the strangest aspects of this case is the access "they" have to the broadcast and print media. I still do not understand what could persuade newscasters such as Martyn Lewis and Michael Buerk, who consider themselves "gentlemen", to behave in an almost voyeuristic way by "peeking" into the living room of one of their viewers. A year ago I wrote to the BBC asking if these newscasters would confirm or deny the accusations made against them. The BBC replied that their newscasters had denied the accusations, but refused to do so in writing.

It is well known that MI5 have the ability to plant stories in certain newspapers, but convincing television newscasters to "watch" a viewer while they read the news would surely be very difficult for them to accomplish, unless they presented themselves to these journalists as being, for example, a group in the media who were seeing to it that I got my "deserved" treatment. MI5 has a history of manipulating the media, so it might not be too difficult for them to accomplish such a trick, whereas a private group would not have this ability.

"Have they ever denied that they are the Security Service?"

No. Never. This is in fact the main reason why I believe "they" are MI5 and not a privately funded group. If my guess had been wrong then I am sure that "they" would have crowed over my mistake, but they have never admitted nor denied that they are employees of MI5.

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly.

"If MI5 were behind it, why would they wish to mask their involvement?"

I have heard a number of times a belief from people in the media that it is they, the media people, who are behind the abuse. In spring 1994 Chris Tarrant the Capital Radio D.J. said sarcastically on his breakfast show, "You know this bloke? he says were trying to kill him. We should be done for attempted manslaughter". We, we, we. Tarrant thought it was a media conspiracy.

Returning to the question of "interactive watching" by television newscasters, it would again be much easier for them to take part in that sort of activity if they convinced themselves that the surveillance and abuse were organised by "their own", by media people. It must be second nature to MI5 to mask their involvement in the matters they deal with; in this case, they pretend the campaign is organised by a group in the media, and any journalists who suspect otherwise keep their silence.

Conclusion

Over the last three years I have stated with some force my belief that MI5 are responsible for my misfortunes. I have done so on Internet newsgroups, in letters and faxes to people in politics and the media in the UK, and in 1997 I made a formal complaint to MI5 regarding their activities; the Security Service Tribunal replied in June 1997 that "no determination in your favour has been made on your complaint". (I believe the statement by the Security Service Tribunal can be disregarded, as they have never, ever made a ruling in favour of a complainant.) In three years of naming MI5 as my oppressor "they" have never denied the charge. To me, their silence on this point indicates that my guess was accurate. I believe my persecutors stand identified. The question of why they should carry out this campaign is one I will try to answer in a future article.

MI5 Persecution Update: Friday 15 May, 1998

The persecution has been quite severe for the last week. It appears that my enemies are reacting to the steady stream of faxes making their way over the Atlantic to the fax machines of Westminster politicians and the media. Here is whats happened in the last few days;

The week started off with an incident in the cafeteria at a local shopping centre where I habitually drink my morning coffee. My enemies have concentrated since winter 1995/96 on throwing a particularly horrible sexual slander against me. They "put people up" to repeat this slander against me, and this is what happened again here.

On Thursday morning (yesterday), instead of going to the usual cafeteria I went to a nearby convenience store for coffee. The same horrible sexual slander was shouted at me very loudly by a member of staff as I walked into the store. This was the first time I had ever bought morning coffee in that shop. The other staff obviously knew what was going on, one of them said, "they screwed up my life".

The fax gateway I use to send these faxes to the UK has been working hard these last few days to shut down my access by barring the accounts I use to send these faxes.

I have received an anonymous threat from fax number 0171-219-6101 (the machine gave its name as "ETRA-HoC") which said, "Stop sending to this fax no 0171-219-6101 or else" (the consequences of continued transmission were unspecified). I invited the sender to apologise for his threat, but received no response.

This all adds up to quite a severe reaction to my faxes of the last few weeks. I actually find this quite heartening since it shows that my faxes are finding the mark and there may yet be a breakthrough in my efforts to expose the Security Service conpiracy of abuse against me which has now been going on for eight years.

MI5 Persecution: "Why would they be doing this to you, sir?"

This article will concentrate on the difficult question of "Why". The question which forms the title of this piece was asked of me by the police officer I spoke to in Easter 1995, when I went to make my complaint.

There are really two sides to this question. Firstly, why should MI5 be harassing anybody in this fashion? Secondly, if they choose to behave in this way, why should they have selected me in particular, and not somebody else? Alternatively, why did the persecution start, and why is it continuing?

I do not have definite answers to either side of this question, since my persecutors have usually kept themselves hidden and only acted through other parties. To know "why", one would have to know who the persecutors are, and something of their personalities, since their abuse is almost certainly symptomatic of a personality disorder of the abusers. Certain things however can be deduced about the abusers from the nature of their behaviour, and I will talk about this later in the article.

Why did it start?

It is clear that the persecution must have been initiated by someone who knew me personally, either at school, or at university, or socially, and knew that I was borderline mentally ill, since this is what makes me a target for the persecutors. Unfortunately, the originators have never been identified, and there are several possible candidates. Neither has the link from the originators of the persecution, to the persecutors themselves, ever been made clear. So who are the originators?

University Staff

The identity of the originators may lie in the timing of the persecution. It started in June 1990, while I was finishing a course at Imperial College in London, and a year after I graduated from Cambridge, where I received a degree in computer science. At Cambridge I had achieved some notoriety in the computer lab from various nefarious exploits. Roger Needham attacked me by saying that "there were great hopes for it, but it failed terribly". When I started at Imperial I found that my reputation had preceded me; Cambridge computer lab had spoken to I.C. lecturers about me. I.C. lecturer Frank McCabe summed up commenting about "setting up a straw man so you can tear him down". (Despite being "torn down" by the Cambridge computer labs lecturers, I still achieved a good first degree and a Masters degree at Imperial.)

Other students at university

So, the originators may have been university staff who knew me from my student days. But there are other possibilities. I had other enemies at university, including some fellow students. At my Cambridge college it was common knowledge that my mental health was dubious, and it was known that I talked to myself in my sleep - the floor and walls were quite permeable to noise, so other students heard. I was given the nickname "gibber" because of this habit. Sometime later, I managed to catch myself talking in my sleep when I woke up in the middle of the night.

Here is a quote from a participant in the internet newsgroup where I have been posting for the last three years;

>One thing which has been missing from this discussion is this simple
>prognosis: that maybe he is right and that, despite his admitted
>mental condition, there really is a campaign against him organised by
>now-influential ex-students of his university.

People I knew socially

I had yet other enemies in 1990 (I am a man of many enemies!). In January 1990 I broke up with some people I had been going out with socially. One of them, by the name of Andy Turner, wrote a letter to Alan Freeman, who at the time was a Radio 1 DJ. Freeman read part of the letter out on his Rock Show, about the "one who wore out his welcome with random precision", saying "thats a hell of a letter you wrote there Andy", and "with a schizophrenic youre never alone".

It is my belief that Andy Turner and his friends were trying to make trouble for me, and Turner wrote to Freeman with this in mind. Freeman may have discussed the letter with others, and things may have snowballed from there. This is, of course, pure supposition. The fact is that I do not know who the originators are, and can only guess.

Once it started, why is it continuing?

The answer to this question is obvious. It is unacceptable to the "powers that be" in the UK to have somebody running around who knows he has been targeted by the Security Service and media organizations, and who is in a position to embarrass British institutions. This has become particularly evident in the last week; as I send more faxes to UK politicians and media, so the pressure on me grows, and the volume of abuse increases.

Part of the reason the persecution continues is in the personalities of the abusers, and it is this subject to which I will turn to next, since the key to understanding the persecution lies in understanding those who carry it out, as much as we can.

The Security Service operatives, the persecutors, are they psychopaths?

Let us first examine the definition of the term "psychopath". DSM-IV defines "anti-social personality disorder" as a "pattern of disregard for and violation of the rights of others ... deceitfulness, irritability and aggressiveness ... consistent irresponsibility and lack of remorse". The Harvard Mental Health Letter of Sept 1995 describes these people as using "charm, manipulation, intimidation and violence to control others and satisfy their own needs. Lacking in conscience and in feelings for others, they cold-bloodedly take what they want and do as they please", having "no guilt or regret".

I must say, reading this description of the condition, that it fits the persecutors perfectly. The persecutors have never shown the slightest remorse or guilt. Even when I was severely ill, they continued to abuse me. They have repeatedly blamed their actions on me, which is another trait common amongst psychopaths. They have no respect for my legal or personal rights, and they use intimidation and verbal violence.

If the MI5 operatives are psychopaths then it would explain both why the persecution started, and the degree of verbal violence. Psychopaths by definition damage other people; here, the MI5 operatives find an outlet for their personality disorder, through "cripple-kicking".

Xenophobia on the basis of mental illness, and race

My enemies have made clear many times that one of the reasons they are persecuting me is because of my admitted mental illness. However, it is my belief that they are also persecuting me because I am not of ethnic English origin, and the fact that there have been several incidents of an overtly racist nature reinforces this view.

In one case, two youths on a tube train in London made openly racist references to me as a "soft toy, not up to British Standards". Another person near my home made remarks about "Polish people". In yet another incident in Croydon, a youth made comments about "foreigners".

But the main thrust of their xenophobia is because of my mental illness. I should make clear that I do not look ill; if you met me, you would not know that I had the illness. I take a relatively low dose of medication, and feel quite well. But the persecutors have repeatedly harped on about my supposed serious mental illness; they have called me a "nutter", a "schizophrenic", etc. They have also persuaded other people to use these terms of abuse. They are able to get away with this because abusing the mentally ill is still something which is mostly acceptable in Britain; the media do it, "nutter" is not taboo in the way that "nigger" is.

Conclusion

There are several groups of people who might have wished to cause me trouble, and I still do not know who originated the persecution. Nor do I know how the originators came to be in contact with the (presumed) Security Service operatives who have been carrying out the campaign. To know conclusively why it started, we would have to know who started it, and this information is not available.

However, we can infer some things about the personalities of the persecutors from their methods, and from the degree of verbal violence they employ. It is clear that a main reason for the continuing harassment is the psychopathic disorder of the MI5 agents who carry it out. That they have never been "brought to book" for their misdeeds reinforces their belief that they do no wrong; and, unhappily, until they are brought to book, their persecution campaign looks set to continue.

MI5 Persecution: .net Magazine Applauds my Website

The March 1998 issue (number 42) of .net Magazine reviews the MI5 Persecution website describing it as an "excellent site". The webpages describe in detail the nature of my persecution since 1990 by what are believed to be elements of the UK security service.

(snip image)

You are encouraged to read the web pages which include

o   a FAQ section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public
o   an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me
o   factual descriptions of the state security agencies involved
o   scanned texts of the complaints I have made to media and state security agencies involved
o   posts which have been made to netnews over the last three years on this topic

MI5 Persecution Update: Friday 13 November, 1998

If You Intend To Reply, Please Read This

If you have any questions or observations you would like to share with me, then you are very welcome to reply to my fax number 0171-681-1190. But please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. I do not know if he had anything intelligent to say in his 20-page fax because I applied judicious use of the "Delete" key on my computer. Faxes over a page or two will be deleted without being read.

MI5 Resume Hostilities in Response to these Faxes

When I wrote last weeks "MI5 Persecution Update" I remarked how quiet my life had become. No longer! MI5 have restarted hostilities with a vengeance the past week, in response I believe to the faxes I have been sending to members of the House of Commons.

On Saturday 7 November I went to Clapham Picture House cinema to see the film "Antz" (a very enjoyable film). At the cinema, I was verbally assaulted by a group of teenagers with the words "still crazy", repeated about ten times. There was a film with that name showing at the cinema, but it was clear their abuse was directed at me. I do not look ill, so why would they pick on me? answer, the incident was set-up by the persecutors. One of the teenagers also said to another, "I don't know what we're laughing at".

The following day, Sunday 8/11/98, I was on my way to play squash when I was verbally assaulted by a youth who said "it was so funny", without the slightest trace of humour. What he meant by this phrase was that was funny, and they were trying to humiliate me. I have heard this phrase "it was so funny" used at me before many, many times over the last eight and half years.

Please Encourage Keith Hill MP to Help Me

I live in a bugged house, bugged both for audio and video. My movements are monitored by MI5. The Security Service have followed me to Canada, to Poland and the Continent, to the States. I cannot work anywhere, not in England, not in Canada, because MI5 will destroy whatever employment I am able to obtain. I have asked Keith Hill MP to help me, and he has refused.

The situation is intolerable. It is Mr Hills job to help me out of this mess. So, please, as I said in the last fax a week ago: Do not waste your time returning multiple copies of my faxes to my fax mailbox, as some of you have done. Instead;

Please encourage Keith Hill M.P. to help me.

I am sorry to be using this device to encourage Mr Hill to help, but I think eight and half years are quite enough and it is time something was done to bring this matter to a close.

MI5 Persecution : BBC Newscasters Spying on my Home

This week's topic is the quite extraordinary claim that BBC newscasters such as Martyn Lewis and Michael Buerk have spied on my living room while they read the news. I currently have an advert running for the next six months in Private Eye's "Eye Say" column (at a cost of over #200) which says,"MI5 Persecution - BBC Newscasters Spying on my Home"; the story of my campaign in the Eye is on my Website at; http://www.pair.com/spook/evidence/plaint/priveye.htm

BBCs staff magazine Ariel also ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm

Beginnings

The very first incident in the "MI5/BBC Persecution" occurred in June of 1990, when a newsreader reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

Most of the "TV watching" has occurred on the news, and most of it in summer 1990, although some as late as autumn 1993. My website has a few extracts of what might be politicians "getting at" me, in particular John Major and interviewer Dimbleby sharing a joke about the "Knutsford Guardian" which is almost certainly about me.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

Examples of Media Harassment

Here are a few examples which I can still remember of media harassment;

In early 1992 I was watching the BBC news with Martyn Lewis on a small black-and-white portable television at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

Victor Lewis Smith in his TV (BBC2?) program at the end of 1993, had a taxi-driver saying, "theyre all out to get me", to which VLS replied, "but you're quite intelligent aren't you?" (what a nice chap VLS is, compliments no less!)

Paul Daniels the TV magician, sometime in 1990-92 (sorry I can't be more precise but it was so long ago), made a "crying face" and put his face in his hands, which was his way of expressing that I was frequently crying in 1990-92, and that he and other media people found my crying funny.

Kenny Everett (deceased) on some talk show, compared me to a "huge ape" who "scratches himself"; he made some other remarks about what the "ape" got up to which unfortunately I cant remember. (I remember that Everetts comments were quite sympathetic and human, but were obviously about me.)

Stephen Fry on another talkshow (Wogan I think) talking about "masturbatory fantasies", he then referred to me with the words "you prat"; I wonder if the studio audience knew what he was talking about and to whom his comments were directed?

Griff Rhys Jones on Clive James' TV show, made a "lunatic face" (wide fixed grin) to which I said to the TV that he had a "face like a horse's arse", to which Clive James said to GRJ "did you hear that?"

Crimestoppers summer 1990, remarks by a Midlands police officer on the programme, while Nick Ross was presenter (as far as I can remember). The officer talked about "in car entertainment". Nick Ross said to officer, "why don't you stop doing it?" to which he replied, "we can't while he's like this".

BBC2 Newsnight in autumn 1993 had a piece on football hooliganism. A black interviewee said apparently of the hooligans, but in fact of me; "they're just idiots, carry on with the surveillance".

There was an incident with Jonathan Ross which I remember clearly; he was on both BBC and ITV television at the same time, one (ITV I think) was recorded, the other channel was live. Ross has a speech impediment which causes him to pronounce his "r"s as "w". I sarcastically said something about "Mr Woss" to the recorded channel, then turned over to where he was live, and he repeated "Woss" with heavy emphasis and sarcasm.

On the radio, in spring 1994, Chris Tarrant made a sarcastic remark in his morning show, saying "he says were trying to kill him, we should be done for attempted manslaughter", to which another of the studio staff said, "oh no, dont say that". His comment was in reply to a comparison Id made the previous evening between my persecutors and the Polish secret police who murdered dissidents.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "interactive watching". They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

I can understand that they might think that if they were to make written denials to me, then many other people with my condition might write to them with similar questions. But Ive asked a couple of journalists if theyve been writing about me, theyve made written denials, Ive believed them, and I have not put their denials on my website because, since I believe their denials, it would not be relevant to publish them.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

One of the strangest aspects of "TV watching" is that Buerk and Lewis have convinced themselves that their "interactive spying" is reasonable behaviour. Martyn Lewis thinks of himself as a "gentleman". He expressed in 1992 that he was "on my side". If this matter ever comes out into the open, I wonder what these newscasters will have to say for themselves, and what the British public will make of their behaviour?

Media Persecution Evidence on my Website

You may directly access the Evidence section on my website at URL;

The category currently contains four video segments, a number of audio files and three published articles. The first video of ITN's John Suchet is unfortunately a mistake - after looking at it again it is obviously not about me. The two Ken Clarke excerpts may or may not be about me; it is funny that he should keep on harping about "paranoia" and "madness", but I have given these ratings of only 30% certainty, as it is more likely that they are not about me in particular, and Clarke is simply displaying the normal prejudices against the mentally ill found in much of society.

The piece I find most interesting is the Dimbleby/John Major interview from April 1997. I have assigned this a 90% rating. Dimbleby starts by emphasising a report from the "Knutsford Guardian". Major recognizes what's going on and joins in with a falsely apologetic "heaven forfend". The emphasis is on the first syllable pronounced "nuts" in "Knutsford", which is repeated three times. Of course this is hardly anywhere near convincing evidence; the really clear items were all in 1990-92, and they are basically unobtainable now.

If you're reading the website, have a look at the two files from David Hepworth's programme on GLR radio. The first one from 21/Feb/1997 has him talking about an "embarassment" of prizes and "absolute obscene", in reference I believe to the verbal sexual abuse that was being used against me at the time (and which unfortunately is still current). In the second file dated 9/May/1997 he again talks about "absolute embarrassment" of prizes, followed by laughter. To my mind he knows I am listening to his programme, and deliberately makes these remarks for my benefit, with very little attempt to disguise their purpose.

Bernard Levin - "Fanatic's Fare for the Common Man"

On 21 September 1991 this article by Bernard Levin appeared in The Times. It is reproduced in the Evidence section of the website, or may be accessed directly at URL;

To my mind, Levin's article described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

Levin writes about a "madman running loose about London" who "bursts into tears, and swears it is all true. And it is." I am pleased to agree with his assertion that "it is all true" because the truth is what I presented to my friend in September 1991 and it is what is being presented to the readership of these articles now.

Conclusion

The harassment, in particular media persecution, was at its strongest in 1990-92. Today, I am recording everything I watch, read and listen, and the media have pretty much given up. It is now incidents "in public" which make up what there is of MI5s persecution. But much of the material from 1990-92 still exists in archives, although the organisations which have those archives generally wont make the material available to the public, for copyright and other reasons.

MI5 can no longer employ the media to persecute me, partly because journalists now know who is behind the persecution, and also because I would publish any instances. My mistake during 1990-92 was to not record instances as they happened; Ive learned from that mistake, and know better now.

MI5 Persecution Update: Friday 19 March, 1999

If You Intend To Reply, Please Read This

Please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. Faxes over a page or two will be deleted without being read.

Theyve started again. Why? I have no idea.

Unhappily, the persecutors, whoever they might be, have started their activities again over the last two weeks. Usually they try to blame their activities on their victim, but this time they have stopped even pretending that the persecution is my fault. Their verbal abuse appears as gratuitous as it is vicious.

Last Sunday 14 March, I went for a meal in Londons Chinatown with some friends. As we were walking down Gerrard St, a man shouted loudly, twice, the obscenity which has been directed at me for some three years now. This followed previous incidents where the same words had been used. It is very upsetting to be verbally abused in this way and to know that the cowardly abusers are guaranteed to "get away with it" because if you report it then it will be assumed to be part of your illness.

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Persecution : How to Identify the Persecutors

Usually delusional thinking does not allow the perpetrators to be identified, or the alleged persecution to be proved. My so-called "delusions" are different, because I have several times over a period of some nine years seen the same people, in widely varying places. Most importantly, their names have been recorded, on aircraft passenger lists and hospital register; and if only the police would do their job conscientiously then the persecutors could be identified and this unhappy story brought to a final conclusion.

BA93 Heathrow->Toronto, 10 June 1993

In 1993 I flew to Toronto for a holiday. On disembarking from the aircraft, a group of four men who travelled together looked in my direction, and one of them said, laughing, "If he tries to run away well find him".

I was absolutely stunned when I heard this. I wasnt surprised that they had followed me to Canada, but it shocked me that they had been on the same flight, and that one of them had foolishly given their group away. Unfortunately I was so stunned that I made no attempt to stop them as they got off the flight and proceeded into the terminal. I did not see these people again during my visit to Toronto. I do not know whether they followed me, or whether they were only part of a larger group, some of whom may have already been on the ground and awaiting my arrival.

Over the next few years I made a number of attempts, all unsuccessful, to obtain the passenger list for this flight. British Airways keeps passenger flight coupons for each flight; so if only the police would do the job that is being asked if them, then these four persecutors could be identified, and thus their employing organisation, which is very likely to be the Security Service, determined.

These four men were, apart from the joker who looked the odd man out in the pack, very serious individuals. They appeared to be in their forties or fifties, and my impression on seeing them was that they might have been former soldiers. Their campaign against me concentrates on how "funny" their abuse is; but in this they are plainly lying, because they realise how awful will be the damage to the establishment of which they form part, if the truth about the persecution ever sees the light of day.

The riddle of "Alan Holdsworth"

During Oct/Nov 1996 I saw a doctor several times about an infection, and on 2 Nov 1996 I went to Emergency at the Ottawa Civic Hospital and saw Dr Worthington, who was then Chief of Emergency Medicine. I had to wait several hours before being seen, and several people jumped ahead of me in the queue. One of these was a grey-haired man in his forties or fifties. This may have been one of the men on the BA flight in 1993; I cannot be sure. When Dr Worthington asked his name, he loudly said, "Tad", which is the common abbreviation of my name. Dr Worthington looked puzzled, glanced at the sheet in front of him, and said, "but your name is Alan Holdsworth isnt it?". (I am pretty sure his Christian name was Alan; I cannot be sure of the surname). The man looked put out, and said quietly, "yes".

Unfortunately, I did not follow up this incident immediately. Some time later, I wrote to Dr Worthington to ask the name of this patient, but he refused to give the name out.

I saw this person again two and a half years later, at Ottawa Airport, just as I was about to leave for England. In the warm weather, he was wearing a coat and woolly cap, and pacing up and down in a menacing and aggressive manner. Presumably he thought he was pretending to be a "nutter" and in this way was getting at me; my impression is that he doesnt need to pretend, Holdsworth or whatever his name is is clearly a psychopath and in a healthy society such a person would be locked up, instead of being paid public money to exercise his psychopathic instincts. But todays Britain, a country where the MI5 secret police are given free rein and nobody dares raise a voice in protest, is not a healthy society.

"He doesnt know who we are"

For some reason, whenever I take a British Airways flight, I get hassled by the "persecutors who wont admit theyre MI5". Since this business started, I have travelled BA three times; once in June 1993 BA93 (see above), once to/from Europe during Dec 95/Jan 96, and once in June 1998 with my mother to visit her family. The last journey, I was abused by two "plants" who kept repeating, loudly, "paranoid" (I have this recorded on minidisc). Presumably British Airways gives MI5 the seating plans for their flights, which allows MI5 to position their agents of abuse three rows behind me, so I cant face them, and they are throwing abuse at the back of my head. I have travelled BA as infrequently as possible; to Canada, I usually travel Air Canada.

Anyway, lets return to the second of the three BA trips, and in particular to the flight on 2 January 1996 from Berlin Tegel, to Heathrow, and onwards to Montreal Mirabel. Id waited all night at Tegel for the flight, and was very tired on reaching Heathrow. On the plane to Montreal, two youths sat about three/four rows behind me and to the right, in the window seats. One of them, a rather fat "asshole" to use the Americanism (it fits), kept on going on about "this bloke", saying among many other things, "he doesnt know who we are".

Now that form of words is particularly interesting, because from May 1995, some 8 months previously, I had been vigorously denouncing the "MI5 Persecution" on Usenet. So if Id guessed wrong, then you might expect the harassers to crow about it; which they have not done. If I had guessed right, and the persecutors have been silent before and since this flight, then they could either admit they were MI5, which would be a very serious thing for them to own up to, or they could brazenly lie, in which case I would report their lie, and since many people must surely know who they are, they would lose all credibility. So they have remained silent; apart from this one phrase on the BA flight, where one of their agents said, "he doesnt know who we are". Note carefully that this phrase is NOT a denial, it only appears to be a denial; since it does not say that my guess was wrong; it only states the objective fact that I do not know the identity of the persecutors, without giving any information as to the validity of my guess. Which leads me to posit that my guess was correct.

MI5 Persecution Update: Friday 25 March, 1999

If You Intend To Reply, Please Read This

Please.... keep your response to one page if you can!. Faxes over a page or two will be deleted without being read.

The Usual Words

The persecutors-who-wont-admit-theyre-MI5 have been active again this week. On Saturday 20/3/99 I visited Ravenscourt Park in west London, and was verbally assaulted with the usual words, "something wrong with him". This audio file is on the web at URL;

This afternoon (Friday 26/March) I was again verbally assaulted while travelling by bus. The same sexual obscenity was thrown at me, and the incident was recorded on my minidisc-walkman. Because of the deeply offensive nature of the slander, I will not be posting this on the website.

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Persecution : Browse Website

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

This article outlines what is to be found on the webpages, which you are encouraged to browse for the complete story.

Frequently Asked Questions

Your excursion through the website starts with the "FAQ - Frequently Asked Questions" portion. MI5s campaign of harassment against me has been going on for almost 9 years, and its longevity and breadth is reflected in the FAQ. Many thousands of people in Britain and abroad, including some recipients of this fax, have known for many years of MI5s activities against me. The FAQ describes the mass "Omerta suppressing its publication"; we pretend Britain is part of the "Free World", yet the British Secret Police, which is what MI5 are, carry on for many years a campaign which politicians and the media know about, and rely on the silent complicity of so many thousands of people.

The FAQs introductory article names those who are "in the know"; media figures like Martyn Lewis, Michael Buerk, entertainment figures like Chris Tarrant, politicians and many in the general public, "all united in a conspiracy which breaks the laws which the UK does have regarding harassment, and all completely uncaring for any semblance of decency or elementary respect for individual rights.

Broadcast media play a key role in the harassment. The very first incident in June 1990 was when a television newsreader reacted to what she saw happen in my living room at home; such incidents of "interactive television" are still happening in 1999. The same goes for radio stations such as Capital FM. In spring 1994, Chris Tarrant on his Capital morning show made an aside to someone else in the studio, about a person he didn't identify. He said, "You know this bloke? He says we're trying to kill him. We should be done for attempted manslaughter". Tarrant and Capital have made strenuous efforts to avoid answering this charge.

Perhaps worst of all, MI5 have deliberately set-up many incidents in public places such as tube stations, shops, cinemas, where they have paid people to throw abuse at me. Since MI5 obtains funds to the tune of 160 million a year to fund its criminal activities, it has funds both to pay its operatives and to "buy" media figures and members of the public to take part in its campaign of persecution.

The Security Service are professional liars. They throw slanderous abuse, yet they refuse to admit out loud that they are doing so. When challenged about their activities through the Security Service Tribunal they lie and deny their activities. They induce other workers and managers at places of employment to take part in their campaign of abuse, presumably by buying them in the same way they buy media figures.

Complaints, and Press Coverage (BBC Lies, MI5 Lies)

As you might expect I have challenged both the Security Service, through the Security Service Tribunal, and offending broadcasters, to own up to what they have been doing. And as you might also expect, all of these people have lied through their teeth. Still worse, they have refused to commit unambiguous lies on paper; they have couched their lies in bureaucratic language, and allowed others to make false assurances and tell lies on their behalf. So when their lies are exposed, they will then tell further Clintonesque lies about how they werent really telling lies in the first place!

On 6/Feb/1997 the BBC told me they would "never engage in any form of surveillance activity such as you describe". The BBC told me Buerk and Lewis had refused to put their lies in writing, but had stated verbal falsehoods denying my accusations of "interactive watching" during news broadcasts. Clearly Buerk and Lewis fear being caught and exposed, so they hide behind their Viewer Correspondence department.

In March 1997 I issued a summons against the BBC to try to "smoke them out". This summons was struck out as "disclosing no reasonable cause of action", because I had acted as a Litigant-in-Person and most LiP summons are treated thus. My case was arguable in law, so the striking out was unjust.

In June 1997 the Security Service Tribunal wrote to me regarding the complaint I had brought against MI5 in February. They say, "The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint." I think you can guess the contempt which I feel for the Security Service Tribunal, who have never made a determination against MI5, and act as merely a whitewashing body for the Security Service. Unsurprisingly in May 1997 the Interception of Communications Tribunal gave the same result.

The last few items of "Press Coverage" give details of mentions of the MI5 Persecution in various magazines and newspapers such as BBCs Ariel, the Observer and .net magazine.

Evidence

Some audio and video clips of evidence have been recorded. My weakness in this area is because most of the really unambiguous evidence would have been obtainable in 1990-92, but I wasnt taping anything at the time, and its very difficult to now obtain recordings from that period.

The audio clip "Life is so Hard" relates to harassment at my workplace in Canada. In the latter half of 1996, I was sitting near to co-worker Mark Lee, who kept coming out with words and phrases which showed MI5 were supplying him with data from my home life. For example, I would say something on the telephone at home, and the following day he would repeat verbatim what I had said. When Mark Lee saw I was recording what he was saying, he started to make his remarks more ambiguous, or make the obvious ones out of earshot of the recorder.

However, during the evening of 12 November 1996, at home in my apartment (flat to you UK-ers), I said "life is so hard, and then you die". A nihilistic, negative thing to say, but quite distinctive. The following day, 13 November, Mark said loudly, "life is so hard eh, and then you die" followed by loud laughter. I captured this on my tape-walkman and the computer-audio file is posted on the website.

There are a number of other audio files in the websites "Evidence" area demonstrating the abuse to which MI5 subject me to through their paid agents.

Also in this section is a very interesting article by journalist Bernard Levin, which followed a meeting I had with a friend in 1991, and to my mind describes in some details Levins "artists impression" of the meeting. He talks about a "madman" who "bursts into tears, and swears it is all true. And it is."

Internet Newsgroup (Usenet) archive

From May 1995 until the present day, this matter has been discussed exhaustively on internet newsgroups. The most interesting articles from the first two years of posts are documented here. This area is worth reading since most of the questions which the reader would ask, have been asked at some time or another by someone on usenet. Perhaps the very first article posted sums it all up so succinctly;

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?
Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their victim.
And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment or abuse except in the case of racial abuse.
A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.
Have the British gone mad? I think we should be told.

So how much deeper will the persecutors-who-wont-admit-theyre-MI5 sink in their campaign of lies and intimidation? Each time I thought they could sink no lower, they have managed to surprise me. You thought it could never happen here? When the MI5 British Secret Police make their smears against me, it is the corruption of the Establishment, which they are part of, that is demonstrated.

Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

BBC newscaster Nicholas Witchell cant stop himself laughing

During 1990-91 there were very many instances of "interactive television" where newscasters and other TV presenters saw on a screen before them what was happening in my home, and reacted, frequently by laughing at me. During this period I unfortunately did not record these programmes. For the last year or two, I have been recording everything I watch, and there has been a drastic decrease in such incidents.

However, on occasion, television presenters do still engage in "interactive watching" and react to what they see. This has been evident with Jon Snow of Channel Four News recently - a particularly interesting case, since it has been established that he cannot be corrupted by money (it is well-documented that MI5 offered him a tax-free salary and he turned them down). I wonder what device MI5 are using to encourage him to do the "interactive watching"?

On Saturday 10 April 1999 at 7pm, Nicholas Witchell on BBC2 News reacted when he saw that I was watching the programme, and I have his reactions stored safely on videotape. I have watched this tape several times and I am entirely confident that my evaluation of his reactions is correct. For several minutes his upper lip quivered in mirth as he attempted to keep a straight face. Then finally his self-control evaporated through the excuse of a weak joke and his face collapsed into a grin.

The strange thing is that I dont know why he was laughing at me, what I had done recently to "deserve" to be laughed at. The MI5 persecutors usually manage to invent some justification as to why people should laugh at and/or abuse me ("hes an X", "it was so funny" etc), so Mr Witchell could have been laughing for any number of reasons. Perhaps he found the views I have been expressing in these articles amusing? I suppose if youre paid enough money and ordered to laugh then even the most innocuous thing becomes funny.

Jon Snow of Channel Four News cant stop himself smirking, either.

On 12 February 1999 I was watching Channel Four News presented by Jon Snow. As usual, I was recording the programme, so that if anything out of the ordinary happened, Id be able to go back and watch it again.

Now, Jon Snow, by his own claim, is uncorruptible. He says he turned down an offer of a substantial tax-free salary from MI5 - they wanted to make him their mouthpiece, and he told them where to get off.

So you will be most surprised to learn that Jon Snow "interactively watched" me that evening, and on many other evenings. Approximately fifteen minutes into the programme, he announced that the US President would be making a live appearance at about 7.30pm; I looked at the clock on the mantelpiece; and Snow saw me looking at the clock, and visibly tried to suppress a smirk.

Uncorruptible, are you, Mister Snow? If not money, then why are you watching me, Mister Snow? Are they forcing you to watch me? Cant you turn the monitor off, Mister Snow?

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

Comparing the MI5 Persecution with German "Final Solution"

It might seem offensive to compare the mass murder of millions of civilians in wartime with the peacetime persecution of merely one person. Yet the comparison has been coursing through my mind for several years now, because the brutality of German intent to "sub-humans" is very much comparable to the brutality of British intent to someone they vituperate and term "not up to British standards". The methods may differ, but the persecutors mindset is the same.

The Germans first targeted the mentally disabled, too

During WW2 millions of ethnic Russians, Poles, Jews, mentally ill, gypsies and other minorities were rounded up and murdered in purpose-built camps by the German regime, in the name of "racial superiority". Fifty years on, the British Secret Police, MI5, instituted a campaign of mass hysteria; but in their cowardice, limited their activities to one single victim.

It is instructive to note that the early German "cleansing" effort was directed primarily not at Jews, but at the mentally ill. The Nazis set up the T4 project in the thirties to "cleanse" away 70,000 mentally disabled people, including schizophrenics and epileptics. After WW2 the Jews with their media influence used the reaction from the holocaust to roll back anti-semitism in the Western countries; however, the mentally ill are today still a persecuted group in the modern Western world as they were under the Nazis (the current Jewish home secretary in the UK intends to bring in laws for incarceration without any criminal charge for some mentally ill people - he protects his own minority, but does nothing for the other minorities in todays society), and this continuing bias forms a central cause for the current acts of persecution in the UK.

Widespread knowledge of what is happening to the "un-British" minority

In both the German persecution of the thirties and early forties, and the current British persecution, many, many people are well aware of whats happening. There is widespread complicity through inaction of populace; and in a substantial proportion of the mainstread population, the persecution had/has widespread enthusiastic support; yet in both the German case in the 1940s and the British today, the existence of persecution is a mass secret which must be never admitted out loud. In the recent Lawrence case this "secret bigotry" has been termed "institutionalised racism", and that is a very good word for what the British are doing today The persecutory attitudes and omerta regarding them are so deeply ingrained in the national psyche that they define the national mood

During WW2 many Germans knew minorities were disappearing, and through inaction quietly condoned their government's mass murder of "un-German" minorities and inferior "foreigners"; and in the 1990s, similarly, many English people know what the MI5 British Secret Police have been doing, and not only condone it, but actively take part, because of xenophobia against the "un-British" unit minority that is the target of "British" actions. This attitude by the British persecutors has been made explicit through the words "he's not up to British standards"; the British seem to have found their very own "untermenschen" to victimise.

Why these obsessive "holy wars" happen

This type of aggression occurs when the majority is threatened or humiliated in some way, economically, militarily or culturally. In pre-WW2 Germany the threat was primarily economic and military, following Germany's humiliating defeat in the first world war and the reparations it was forced to pay. In modern Britain, one might guess that the majority English who are behind the persecution feel pressured by the swiftly diminishing status of Britain in the world, and the rapidly increasing coloured colonisation of their country, which in time will see the ethnic English a minority in their own land, and their more antisocial elements, unable to reply to the obvious threat, instead project their aggression onto another, weaker, unit minority

In both cases there is a whiff of "holy war" or irrational obsession with the persecution. Certainly the German behaviour fifty years ago bordered on the not-quite-sane, and the current British behaviour towards their chosen victim is strongly tinged with a leave-taking of reason. And the choices open to the victims are the same, since MI5 will never allow me to escape them, "if he tries to run away we'll find him", just like the commandant of Auschwitz telling the new arrivals, "the only escape is through the chimney".

The Victim Will Destroy Us if We Dont Destroy Him First

The persecutors propaganda is the same. Fifty years ago the Germans said, "if we don't do it to the Jews then the Jews will do it to us"; and MI5's propaganda in the early nineties concentrated on their victim as a "monster" aesome "untermenschen" minority.

"We are decent fellows" say the Brutal Persecutors

During the course of researching this article I read part of the very interesting book, "Hitler - A Study in Tyranny", by Alan Bullock. This volume contains a quote from Himmler on the "Final Solution";

"Most of you know what it means when a hundred corpses are lying side by side, or five hundred or one thousand. To have stuck it out, and at the same time .... to have remained decent fellows, that is what has made us hard. This is a page of glory in our history which has never been written and is never to be written."

In the MI5 persecution, too, there is a thread of deliberate brutality to the sick and vulnerable, while the persecutors maintain that "we are decent fellows". There is almost a conscious schizophrenia in the self-attitudes of the Security Service operatives and those in the public who they employ against me, which reflects the contradiction evident in the German attitude above. On the one hand, they stoop to the lowest and most base behaviour; yet at the same time, the MI5 operatives tell themselves that since they are civilised British people, then surely they must by definition be "decent fellows". Any indecency is made the fault of the victim; "hes making us persecute him, so we need feel no guilt".

Yet the conduct is atypical of the way these peoples see their normal modes of behaviour. Befslaughter was not typical of normal German behaviour up to that point. Similarly, the current MI5 abuse goes against the grain of British self-image as being "reserved" and "decent", since they are using terms of abuse which are common among blacks and other supposedly less-developed races, but not among the English.

Conclusion

The ultimate aim of both persecutions is the humiliation and physical extinction of the persecuted group. The Germans did this in a very direct way; the British Secret Police MI5 are acting indirectly and relying on self-extinction of their target, because in peacetime and in the current somewhat false climate of "political correctness" more direct methods are impossible. If MI5 undertook more direct action the mass "omerta" would be broken.

I have written this article with sincerity to show how a historically recent persecution in another country parallels what is being done in this country today. In both cases, the evil-doers are of their countries establishments, and rely on widespread tacit support to maintain the persecution and omerta around it. While the holocaust was undoubtedly the greater evil, it is important to be aware of the fact that had the Germans not been defeated fifty years ago, their plans would have gone through to total completion. In Britain today no force threatens the "permanent government" of which the Security Service forms a part; and it looks very unlikely that the wrongs perpetrated by the MI5 secret police will ever be revealed to public view, and the British secret state brought to justice for its evil actions.

MI5 Persecution Update: Friday 30 April, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

Somewhere between 0 and 100%

The last few days there have been no clear recordable instances of abuse. However, while travelling on the Underground, while walking around near my home and going to friends homes, I am constantly troubled by thoughts that those people over there might be about to get at me; that the couple sitting in the opposite seats laughing are in fact laughing at me; et cetera, et cetera.

A comment by a scientist to the BSE inquiry sticks in my mind. He described the possible scale of the epidemic as "between 0% and 100%". It might not be happening, it might not happen at all, to any discernable degree.... or it might be total. Without clear recording, which seems to have become impossible the last couple of weeks, there is no way of knowing whether the harassment really is continuing, whether we have entered a temporary hiatus, or whether perhaps it has perhaps stopped for now.

But for the time being I think there arent any reasons to dicontinue these faxes. I only re-started them six weeks ago in response to a resumption of MI5 harassment; and I think I will need to be more convinced of absence of persecution before I discontinue my complaints.

The Newscasters are still watching

In the last few weeks there have been at least a couple of fairly overt instances of "interactive watching" by newscasters. I reported this in a previous "MI5 Persecution Update".

These instances are really very rare compared to 1990-91, when there were many dozens of such occurrences. Undoubtedly the reduction is due to my practice of videotaping everything I see. Recently I had the opportunity of showing this years "happenings" (Jon Snow/Nicholas Witchell) to my psychiatrist, and he agreed that in both cases the newscasters were expressing merriment without visible cause, and that objectively it might be possible for my claims to be true - although of course other people reported similar thoughts to him, and this thinking is usually a symptom of illness.

Read About the MI5 Persecution on the World Wide Web

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Waste Taxpayer Millions on Pointless Hate-Campaign

Recently I was talking to an independent observer about the nature and purpose of the perceived campaign of persecution against me. The person I spoke to, a highly intelligent man, said he was struck by the utter pointlessness of the perceived campaign against me. He also said that, if my theories were in fact true, many people would have to be involved, in the surveillance itself, and in the technical side of the delivery of information from my home to TV studios for example, if the "interactive watching" were happening as described. He voiced these thoughts without any prompting from me; but both I and other observers had arrived at pretty much the same conclusions, some years ago.

I saw a team of four men at Toronto Airport in 1993

To carry out the surveillance alone, full-time, would employ four or five men, or their equivalent in terms of man-hours. Each man would "work" an eight-hour shift, so you would need at least three men doing the surveillance, plus a connecting link / manager. An indicator that this estimate is correct arrived in 1993, when I was accosted by one of a group of four men at Toronto Airport; he said, laughing, "if he tries to run away well find him". Plainly these were the men who had been involved in the intrusive surveillance of me for the preceding three years.

On other occasions, I have seen the same man on two or three occasions. On one such occasion, at Ottawas Civic Hospital in November 1996; he gave his name to the doctor as "Alan Holdsworth" or some such; my hearing is not very good sometimes and I am not sure of the surname, although I am sure "Alan" was his first name. I saw exactly the same man again in Ottawa, at the airport, in July 1998. Obviously, other people must be "working" with this person; he would not be the sole agent employed in this case.

Usenet readers views on the Cost to MI5 of Running the Campaign

Here's what a couple of other people on internet newsgroups / Usenet (uk.misc) had to say regarding the cost of running such an operation...

PO: >Have some sense, grow up and smell reality. What you are talking about
PO: >would take loads of planning, tens of thousands of pounds and lots of
PO: >people involved in the planning, execution and maintenance of it. You
PO: >must have a very high opinion of yourself to think you are worth it.

and......

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that makes
PM: >it worth the while of the state to spend over one and a quarter million
PM: >on you?

Those are pretty much the sort of calculations that went through my head once I stopped to consider what it must be costing them to run this operation. At the very least, a quarter million a year - and probably much more, given the intrusive and human-resource-intensive methods employed. Times nine years. Equals well over two million pounds - and probably much, much more.

Its wasteful for someone with my skills to be unemployed

The wastefulness of the MI5 campaign against me is not just that of futile expenditure on their side. It is also extremely wasteful for someone with my talents to be unemployed and on a disability pension. I am highly qualified in numerate disciplines, yet am unable to work, specifically because of the MI5 hate-campaign against me. It is a terrible waste of resources for a supposedly efficient economy like that of the UK to be squandering the talents of a skilled and capable worker.

I made every effort to remain in employment for as long as I could, but ultimately I was defeated by MI5s employment of massive resources specifically targeted on my workplaces with the sole aim of seeing me evicted from those workplaces. You might expect this sort of behaviour from the Stasi or some other secret police force in a communist country where labour is cheap, and the governments aim on seeing its citizens confined; but for a supposedly free and efficient economy like Britains, the wastefulness resulting both directly and indirectly from the Security Services activities is simply criminal, and should never be allowed.

The international dimension means the costs are multiplied many times overoer had any sense, then they have surely taken leave of them over the last nine years.

Four years of persecution in Canada

The persecution re-started within less than five minutes of my arrival in Canada, as documented above, and in the "frequently asked questions" article on the website. The words, "if he tries to run away well find him" spoken by one of the harassers at Toronto Airport are now imprinted on my mind.

A year later I emigrated to Canada, intending to find a job and settle there, hoping that MI5s interest in me might dim with time. I did manage to find work there, but my hopes of avoiding Security Service interest were ground into dust. As detailed above, I saw the same man in November 1996 and July 1998, both times in Ottawa. Apart from these encounters, there were numerous incidents between 1994 and 1998 of harassment, of an identical nature and in most cases using identical words to what had occurred in the UK. It became quite clear to me that the permanent surveillance and harassment operation which MI5 had subjected me to in England was being continued.

For a team of four or five men to be employed overseas must cost a lot more than if they operate in their home country. And for MI5 to continue the operation for a period of over four years, continuously, must cost many hundreds of thousands of pounds. This confirms my belief that the state is funding the campaign against mehat the Security Service receives current annual funding of #160M. Divided by 1850 staff, works out at #86,000. But the unit annual cost of each "watcher" must be much higher than this, especially given the frequently mobile and overseas nature of their actions of the last few years. A very conservative figure might be a little over #100,000 pa for each of a team of five people, or half a million pounds per year. For nine years, so far. So the most conservative estimate of the surveillance element alone is perhaps four or five million pounds since 1990.

This guesstimate is of course theoretical - I am not privy to inside details of how MI5 split their funding. But to take some other examples, the cost of a US counter-surveillance specialist per day is USD 5,000. Even if the agents permanently assigned to me are not of this calibre - even if they employ specialists when difficult work planting bugs etc is encountered - their salary and support costs must still be very high. The individual agents are doing well for themselves as they are well-paid to exercise psychopathic instincts which in any sane society would see them in prison; but the taxpayers who must fund this terribly wasteful exercise are being "done" out of hundreds of thousands of pounds each year.

It must be emphasised that the above estimates are highly conservative. Besides the surveillance operation, it must carry a high cost in man-hours to propagate covert slanders through the population; to setup and maintain the "interactive watching" links to TV and radio stations, which these organisations continue desparately to "lie and deny"; and to induce antipathy in co-workers which would not otherwise exist.

Why they are wasting Millions of Pounds on a "Nobody from South London"

As remarked in the prologue to this article, it is really most extraordinary that the Security Service spends a chunk of its budget, every year for nine years so far, on a meaningless campaign against a "nobody from South London". That they are spending such a large amount of money has been confirmed to me on several occasions, usually by oblique references to "its costing this country millions". The supposed "logic" behind the persecution is that MI5 wish to avoid their harassment of me, and the involvement of the UK media, to be made public; yet as the reader will appreciate that is a circular argument, "theyre doing it because they want to keep it secret and avoid humiliation for themselves and their country" begs the question, "why did they start doing it in the first place?", to which in truth I myself do not know the answer.

Plainly MI5 with its rich budget can afford half a million pounds a year to waste on a "nobody from South London". Some time ago I was talking to a British surveillance professional on Compuserve who told me "this work costs a lot of money and is usally because the person I am following has done something (usually criminal) to warrant all this money and time being spent." Yet in this particular case it is plainly not the "victims fault" that the harassment is taking place. The hate-campaign against me is completely the creation of the obsessive psychologies of the MI5 agents who have made themselves my persecutors; it is obviously a "personal" campaign for them, and for years they misuse taxpayer funding to feed their insane, unnatural and fixated fantasies.

Four Years of "MI5 Persecution" Posts on Internet Newsgroups

For approximately the first three years of the MI5 persecution, from June 1990 until late 1992, I kept as quiet as possible, in the hope that by not reacting, MI5s interest in me would decrease and they would simply go away of their own accord. This is the sort of behaviour some people employ against bullies; if the bullies arent getting a reaction, then they might simply go away and victimize someone else.

Unfortunately, this tactic didnt work. The quieter I became, the more shrill and hysterical the noise from the Security Service operatives. For about two years I didnt watch TV news at all. Yet this only heightened their obsessed fixation; they continued to follow me wherever I went, they continued to induce harassment at work by managers and fellow workers, and they continued to encourage me to commit suicide. They seemed to regard my refusal to react as a crime which they would have to "put right" by ever more extreme forms of abuse.

Finally, in 1995, I changed tactics radically. Since late 1994 I had had accounts with internet providers in Ontario, Canada. I discovered the cornucopia of internet newsgroups, on every topic from consumer electronics, to politics and legal topics, and I discovered online services such as Compuserve and AOL. In May 1995, I made the first posting to the conspiracy newsgroup, on the subject of "BBCs Hidden Shame".

BBC's Hidden Shame

The internet newsgroup discussion, which has now reached its fourth anniversary, started with an article in alt.conspiracy, which I reproduce here.

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their "victim".

And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment or abuse except in the case of racial abuse.

A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.

Have the British gone mad? I think we should be told

At this point, I did not name MI5 as my persecutors. I was still unsure that they were the ones responsible for the "psychological terrorism". In followup posts however I did name them; and the persecutors have never denied the claim; so I think my guess is valid. (The Security Service Tribunal in 1997 have said "no determination in your favour was made", but it is a well established fact that MI5 lies routinely to the Tribunal which has never found in favour of a plaintiff, so no conclusions can be drawn from this.)

This first post was made to alt.conspiracy, but further posts were made to the UK-local newsgroups, in particular uk.misc but also uk.legal and uk.politics (which is now called uk.politics.misc). Some time ago I tried to take the battle to the Compuserve forums, UKPOLITICS (which is now called UKCURRENT - current affairs), but my articles were censored by the forum operators. Such censorship is impossible on the internet newsgroups.

Police Refuse to Act

I have complained several times to the Metropolitan Police, who have each time refused to help.

From: Green <Green@guidion.demon.co.uk>
Newsgroups: uk.misc,uk.politics,alt.politics.british,soc.culture.british
Subject: Re: MI5 Persecution: Why Aren't the British Police Doing Their Job?
Reply-To: Green@guidion.demon.co.uk
Date: Sun Apr 7 21:13:30 1996

In article <DpIE0r.736.0.bloor@torfree.net>
bu765@torfree.net "Mike Corley" writes:

>Last Easter (1995) I went into the local police station in London and spoke to
>an officer about the harassment against me. But I couldn't provide tangible
>evidence; what people said, in many cases years ago, is beyond proof, and
>without something to support my statements I cannot expect a police officer to
>take the complaint seriously.

This in itself dos not suggest that the police have it in for you. The old bill operates on extremely tight spending limits forced on them by that pillock Michael Howard, and without evidence, they often have higher priorities than chasing something
that cannot go to court.

I doubt that the police are actually being leant on, but they probably realise that if
they looked into this, they would be leant on hard. The met always stays away from anything that looks like it has Defence, Security or secret service interest already,
because they realise that they are below these government agencies in the general pecking order.

If I walked into my local nick and complained that MI5 were snooping on me, they would
show me the door without even looking at my evidence, because that bored desk seargant

with only five years to go before he retires doesn't want to start fucking about with
somebody who has incurred the wrath of Stella Rimington. He would rather deal with the
lost dogs and driving licence producers, eat his cheese and pickle sandwiches and piss
off home at the end of his shift than have some high ranking spook having a go at his
boss and getting him a bollocking.

In short, you have earned much sympathy but little surprise. Just remember that saying
about the enemy of your enemies.

Most recently, I wrote in March 1999 to Charing Cross Police Station
CID. They did not acknowledge or reply to my letter. When I phoned them
up, the detective Id written to treated me to a sadly not unusual display
of police bigotry, with an uneducated rant about "your paranoid rubbish".

It would be nice to think that such uneducated bigotry is something other
than wholly typical of police behaviour, but unfortunately that is an
illusion that is rapidly dispelled.

Uncorruptible Jon Snow of Channel Four News

From previous articles the reader will know what I think Jon Snow has
recently been watching me while he reads Channel Four News in the
evening. Recently I digitized a few moments of one such broadcast, where
his face twists into a smile, without there being anything in the news
broadcast to cause merriment. Here is a usenet post from some time ago on
MI5s "bought and paid for" tools in the so-called "free" press.

Peter Harding (harding@ermine.ox.ac.uk) wrote:
: I was at speakers' corner on Sunday. There was one chap who was bellowing
: about something or other, I don't know what, but one thing he said to
: someone caught my ear:

: "BBC, MI5, same thing."

Can't disagree with that sentiment.

Wasn't it documented that MI5 sometimes "bought" journalists and broadcasters?
I remember reading a report by some jouralist who had been offered an extra
tax-free income by MI5 to become their covert mouthpiece, and had refused.
....
> : >mouthpiece, and had refused.
> :
> : It was Jon Snow of Channel 4.
>
> Was it reported in any of the papers?

It has been reported several times. The most recent was in Private Eye, a few months back. As I recall they also wanted information from him; journalists would be a natural choice for members of the Security Service and the Secret Intelligence Service for information sources.

> It might be interesting to see what he had to say regarding their
> attempt to recruit him.

He was most concerned that many others would have accepted such an offer. However, we can probably make an educated guess as to some of those who accepted: Nigel West (Rupert Allason, MP) and Chapman Pincher would come near to the top of the list.

Corrupt Security Service agents steal millions from taxpayers

Money is of course a factor in the grand equation which is the MI5 persecution. It costs money for the Security Service to "buy" people in the media etc. But that is only a small part of their expenditure of taxpayers resources. Most of the expenditure is directly on the salaries if the agents involved; and in this post I put forward the theory that MI5 are trying to draw out their involvement for as long as possible, very cynically, to maximise their income and line their own pockets.

At each stage they have tried to pretend that I am something out of the ordinary.
Either I was very stupid ("he's an idiot") or very clever ("he's like a genius").
Either I was a threat to Western civilization (Levin once referred to me as the next
Hitler) or I was completely defenceless ("a soft toy").

Now, it should be obvious to any person with common-sense that I am not out of the ordinary in any way. I have an IQ which is average for the Web, I am racially white
European, and there are plenty of other people with schizophrenia or epilepsy out there
who haven't been targeted for MI5 attention, so why me?

I think the answer is that the MI5 agents who harass me have cynically exploited the
situation by painting me as extraordinary in order to assure themselves of well-paid
employment funded by the ordinary British taxpayer. To put it bluntly, they are stealing millions of pounds from the taxpayer to feed their own pockets.

This assertion is supported by the observation that it's the same agents who are doing the harassment. Six months ago in a local hospital I was harassed by someone whose face I had seen (he had stared straight at me aggressively, at the time I just thought it was some nutter but it turns out he was one of "them") aboard a KLM flight a couple of years ago. It's presumably been the same people most of the time. I've seen the way contractors act when they don't want their positions terminated. Would these agents really want to lose their well-paid employment harassing me? Presumably they are promising their bosses a "breakthrough" (ie my demise) real-soon-now and have been for the last seven years, while all the while these MI5 agents skim millions off the taxpayer.

I wouldn't mind a job like that. Perhaps if I persecute myself a little bit, like standing in front of a mirror and shouting mindless obscenities, do you reckon I'd get a slice of the caky Service Tribunal. This year Nick Brooks, current Tribunal Secretary, confirmed to me that he could not think of a single case where the Tribunal had found in favour of a complainant. Here is my usenet post from two years ago.

Subject: MI5: "It wasn't us"
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net

"The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint."

Signed ER Wilson, Tribunal Secretary

Well that's a relief then. All that spamming for nothing eh. Gaw blimey, if they say they're not doing it then it can't be them, can it?

In a recent letter to Mr Brooks I expressed the opinion that the Tribunal were unable to fulfil their responsibilities in the face of MI5 falsehoods. Nevertheless, I do intend to make another complaint to the Tribunal in the near future, despite the Tribunal appearing to be a toothless watchdog.

Discrimination against a Unit Minority

MI5 have been very clear in their instructions as to what I should do. They have openly shouted at me the word "suicide", and also from the other abuse it is clear that they want my existence terminated.

This point is covered in more detail in a previous article. The following post describes the xenophobic nature of MI5s campaign against me. They have refined their bigotry down to a unit minority, yet they make use of the discrimination against the mentally ill which is a feature of current

British society.

>Indeed. If you've ever had a 'conversation' with someone suffering
>from florid schizophrenia, you'll know how difficult it can be to
>'argue' with them.

I don't have florid symptoms. But I'm in a difficult situation, because those people who don't know, aren't going to believe, and those who do, they just go along with the crowd. It's never a good idea to go against the grain, and the grain here is defined by interests in the establishment and the media. Even people who could say out loud what was happening won't, because then there's a risk that they'll be seen as traitors and ostracised.

Usually this type of 'hidden abuse' is racial and targetted at a racial minority within a country. You keep the minorities out of the good jobs, but you don't admit discrimination exists. It happens everywhere, not just in Britain. The persecution that is going on now is in reality a refined form of racism. Instead of "nigger" it's "nutter", and abusing the mentally ill is still socially acceptable today. In 50 years it might not be, but today there isn't any social or legal sanction against it.

So really they've refined racial harassment down to a minority of one. The words may be different, but the methods are the same.

MI5 Persecution: BBC Newscasters Lie & Deny They're Watching Me

Central to the persecution campaign waged against me for some nine years now by the Security Service is their use of the media, and in particular the broadcast media, to make clear to me that I am under surveillance and being watched within my own home, even by BBC newscasters while they read the news. This is really an act of arrogance; MI5 and their tools in the television and radio are so sure that they can never be caught, that they have many times made explicity clear on broadcast programmes that they are as capable of seeing me as I am of seeing the broadcast pictures. Even when they have known I am taping the programmes they still carry on this practice; for examples of TVand radio presenters caught "in action", see the Evidence area of my website.

If you wish to reply to this article......
then please include your name and fax number! I provide the means for recipients to send me their thoughts on the topics discussed, but ask that you provide me with your fax number or email address if you require a response. Also would you please send not more than one or two pages, if by fax. Thank-you!

It started with a Newscaster, and it continues with Newscasters today

The very first incident in the story started with a reaction by an ITN newscaster, Sue Carpenter, in June of 1990, almost nine years ago now. She reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

However, I have been busy recording everything Ive watched the last couple of years, and the taping has yielded some nuggets, which you will find if you point your Web browser at the "evidence" area of my website, whose URL address is given above. Strangely it is not particularly the BBC who are "after me" at the moment (with the exception of occasional fire from Nicholas Witchell), but that supposed paragon of virtue and decency Jon Snow of Channel Four TV News (he actually works for ITN), who once claimed hed turned down MI5s offer of a tax-free salary. I will cover Snows recent actions in a future article.

BBCs Hidden Shame

The first ever Usenet post (internet newsgroup article) on the subject of the MI5 bugging / BBC watching occurred, as stated in a previous article, in early May 1995. It is reproduced here;

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their "victim".

I suppose "BBCs Hidden Shame" is more of a wish than a fact. It may be hidden, but the BBC and other media and security organisations seem to have no shame whatever in their anti-social, not to say criminal, actions. Nor do the general public, who seem quite happy to parrot the vilest obscenities without much hesitation or apparently thought.

Martyn Lewis, Nicholas Witchell and the rest

Most of the harassment occurred in 1990-92, when I wasnt making any recordings, and the BBC wont release copies of current affairs programmes from that period.... so although I can remember there were many incidents in that time, even many specifics, I cant dig up the actual programmes to flesh out the bones.

This year, there has been at least one incident with Nicholas Witchell as newsreader, which I have successfully recorded and digitized, i.e. converted into a computer Quicktime movie file. This has not yet found its way onto my website (Im a busy man, dontcha know) but you can be sure I will let the readership of these articles know when that clip makes it onto the web. The Witchell clip was recorded on Saturday 10 April 1999 at 7pm, and shows Witchell trying to restrain his features from collapsing into a smirk. First his upper lip quivers for several minutes, then with the non-excuse of a non-joke his entire face twists into a grin. It looks as if he finds me so funny, that he allows himself to submerge any pretence at professionalism in a sea of MI5-inspired sarcasm and harassment.

The two BBC newscasters whose reactions to me I can remember most vividly over the years are Martyn Lewis and Nicholas Witchell. I can remember thinking years ago that Michael Buerk was also seeing me at home; and if the other two are watching then there would be no reason why he wouldnt be doing the same; but in all honesty I cannot remember a single clear instance of his reacting through facial or verbal expression to me.

I can remember several instances of Martyn Lewis reacting to what he saw of me, however. In early 1992 I was watching the BBC news with Lewis on a small black-and-white portable TV at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

And in spring 1991 I remember Martyn Lewis clearly reacting to what he saw of me at my then accommodation in Woking, Surrey, by continuing to stare at some fixed point near the camera after the news had finished - presumably this is where the monitor interactively showing pictures of my room was located.

Why would BBC and other Newscasters Watch and Harass Me, Watching Them?

This is a very difficult question, and I dont actually know the answer. It is a matter of record that the Secret Services are very much part of the Establishment. The recent exposure of the "MI6 Agent List" on the internet, and its coverage in the newspapers, reveals how much MI5 and MI6 are recruited from the ranks of the Establishment. Obviously the relationship is bi-directional; the Establishment influences MI5/MI6, but the secret services (well, perhaps not so secret now we know who works for MI6!!!) also influence the machinery of power and information dissemination i.e. media in this country. So they must have a lot of covert leverage with the BBC and ITN.

Some of this leverage is obviously through bribery. It is a matter of record that MI5 tried some years ago to "buy" Jon Snow of Channel Four TV. He turned them down - obviously they must have approached other media people as well, and from the lack of other reports of people turning them down, it may be presumed that some other journalists will have accepted the sugared carrots put before them. Ironically, Jon Snow has been taking part in the recent "watching" actions against me - but why he has allowed himself to be used by the secret services is something which I do not know.

Perhaps the Security Service uses blackmail to twist arms of journalists into co-operating with them? I have always thought there was something slightly odd about Martyn Lewiss demeanour. At the time of the Ron Davies "rough trade" scandal it was reported that MI5 had known all about Davies predilections and the sham of his pretence to be a happily married man. Perhaps MI5 have been able to dig something up from Martyn Lewiss private life to blackmail him into acting on their behalf? And if there wasnt anything before the "newscaster watching" started then there most certainly is something now.... once theyve started watching, the newscasters will surely wish their activities to remain covered-up, and co-operate with the security service.

"Newscaster Watching" Deliberately Constructed to Mimic Schizophrenia

Presumably this is the first case in history of television journalists actually taking part in acts of real-time, live spying and reacting against one of their viewers. What you have to understand, though, is that I was quite mentally healthy in June 1990, certainly relative to November 1992, when after two and a half years of harassment I was finally admitted to hospital as an out-patient. MI5 decided from the outset that they would make me mad; they constructed the media harassment to resemble what would be reported by a person with mental illness; and then they carried on years of abuse to inflict on me the condition which they wished to use as an excuse to cover up their abuses.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

When I started publicising my case on internet newsgroups in 1995, I was met with the disbelief one might expect to be accorded to a mentally ill person who talks about "newscaster watching" and media persecution. Some newsgroup participants thought I had started a "troll", an invention made to obtain a reaction; one bright spark even suggested a group of psychology students were behind the articles. But most people thought the articles were symptomatic of derangement - and that is exactly what MI5 want people to think. MI5 chose me as a target because I was mildly mentally ill at the outset in 1990, although I stress my illness then was very mild in comparison with November 1992, and because they knew that enough abuse would (a) make me much more seriously ill, and (b) once I was more ill, they would "get away" with a harassment deliberately constructed to look like the symptoms of paranoid schizophrenia.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "real-time spying" on me. They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

BBC-VLC also said that the BBC "would never engage in any form of surveillance activity" such as that described. Clearly Martyn Lewis and the rest have lied to their own organisations personnel about their criminal actions. So much for the "objective", "truthful" BBC, a nest of shabby liars.

Summons against the BBC, for Nuisance caused by Newscaster Spying

In March 1997 I issued a civil summons against the BBC, seeking injunction against further "newscaster spying", and token damages for what the BBC had done to me until that date. The purpose of the summons was to try to "smoke out" the BBC, since obviously I did not have good evidence which would be necessary for either a civil or criminal case to be made against them. My summons was worded as follows;

1. The plaintiff is and was at all material times residing at [home address]. At some time prior to or during June 1990, persons of unknown identity entered Plaintiff's premises and installed concealed television equipment in said premises.

2. A campaign of harassment was launched against the Plaintiff by the persons of unknown identity, which in part took the form of instigating harassment by BBC TV newscasters (including specifically Michael Buerk and Martyn Lewis) as they read news bulletins, by making direct and personal comments to Plaintiff.

3. The campaigns purpose was to subject Plaintiff to great mental stress and induce mental breakdown. As a result of it Plaintiff did indeed suffer from severe mental strain in 1990-97.

4. In order to avoid the mental strain being caused to him the Plaintiff has been compelled to stop watching BBC TV news. Defendant therefore committed the tort of private nuisance, since normal use of home was interfered with.

5. Plaintiff claims a permanent injunction prohibiting further nuisance, and damages for nuisance suffered limited to 5,000.

Naturally, my attempt to smoke-out the BBC and its lying newscasters failed. The BBCs litigation department sought to have my summons struck out; and they succeeded in doing so, on the grounds of my action "disclosing no reasonable cause of action". I was also prevented from issuing further civil claims against the BBC without leave of the Court. Apparently litigants-in-person frequently / usually have their claims struck out with this wording, regardless of the merit of their claims.

BBC Suppresses my Claims of "Watching by Newscasters"

BBCs staff magazine Ariel ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm
Clearly the BBC will not allow claims of its wrongdoing to be made public in the media channels it controls.

On several occasions people said to my face that harassment from the TV was happening. On the first day I worked in Oxford, I spent the evening in the local pub the Rose and Crown with the company's technical director Ian, and Phil, another employee. Ian made a few references to me and said to Phil, as if in an aside, "Is he the bloke who's been on TV?" to which Phil replied, "Yes, I think so".

The reader might think that mere "watching" by newscasters etc might be a relatively benign happening. But it is not; it is part of MI5s framework of harassment and lies. On many occasions the reactions of the BBCs newscasters to me has been in the nature of sarcasm, implicit contempt and abuse. This is visible in Witchells news programme mentioned above, where he engages in abuse by laughing at me during his newsreading. It was particularly visible in the early period of 1990-92, and as late as Autumn 1993, when during a Newsnight broadcast Jeremy Paxman interviewed a football person about soccer hooliganism, and the interviewee gave vent to an unsubtle rant about "theyre idiots, theyre just idiots, keep up the surveillance". Paxman started grinning, showing he understood and was taking part in the abuse being perpetrated on that programme.

Conclusion

The MI5 Persecution started with harassment by television newscasters, and today harassment by TV and radio presenters still forms a key part of MI5s activities against me. When this business started in June 1990 I was in relatively good health of mind. Years of persecution by the secret police and their mouthpieces in the state-run BBC and other media eroded my health until MI5 achieved their aim of seeing me rendered mentally ill in November 1992. The diagnosis which was forced on me unfortunately and ironically meant that my reports of the harassment are disregarded, because the mentally ill are second-class citizens in todays Britain.

Yet TV and radio harassment continues, albeit in a reduced form, despite my taping all the programmes I watch, resulting in my being able to obtain and demonstrate objectively on the website instances of media presenters attacking me. Unfortunately these recorded instances are quite tenuous; I might understand them, the presenters understand what it is theyre doing, but despite many thousands of people knowing the truth of the "newscaster watching", the omerta continues and they continue to refuse to admit the truth of the matter. It is a terrible indictment of British society that there is not even one decent person willing to speak out. I look forward to the day when the truth does finally emerge, and the mass corruption which has allowed the MI5 persecution to take place is finally purged and the Establishment criminals caught and appropriately punished.

MI5 Persecution: Molestation during Travel

MI5s persecution of me varies in intensity. Since 1990 it has been steady for perhaps 80% of the time; there was a notable quiet period in 1993, and another quiet period in Jan-Feb 1995, as well as a hiatus in the first two months of 1999. It puzzles me that they cease and restart, seemingly without any logic or reason. But one aspect of MI5s activities against me which is relatively predictable is this weeks articles topic, which is Molestation during Travel. Almost every time I cross the Atlantic, go to the Continent or even try to enjoy a holiday in this country, you can bet that MI5 will be there doing their utmost to wreck it all.

This aspect of the harassment is particularly relevant as I will be travelling to Europe again in a months time, with naturally the Minidisc recorder in tow; so it will be interesting to see if I can record the abuse which will almost certainly take place, either on the Tube going to the airport, at the airport, on the flight, in the terminal building - MI5 have previously instituted instances of abuse at each of these locations, so well see how much taxpayers money they waste this time, and whether it will prove possible to capture their abuse on minidisc.

Read about the MI5 Persecution on the Web

June 1992 in Polands mountain resort of Zakopane

The persecution started in June 1990, and for the first two years I stayed in the UK apart from a couple of brief day trips to Calais. By the summer of 1992 Id had enough of being cooped up in England with abusive fellow employees egged on by an abusive secret police service, and decided to spend 10 days in southern Poland, on what was intended to be a holiday at the mountain resort town of Zakopane.

Unfortunately the psychopaths of the Security Service were not willing to allow me to enjoy a holiday in peace and quiet. The journey to Zakopane was by coach from the meeting point at Londons Victoria coach station (National Express) followed by ferry followed by another coach across Europe. As we left Victoria a youth and his girlfriend started a loud tirade of abuse directed at "this bloke", where the "bloke" was never named, but it was very clear that the "bloke" was myself. The youth said "they" had "found somebody from his school, and he was always really stressed at school, a real psycho". Again, the label "they" was not elaborated on, but it was clear that "they" = the persecutors from MI5. The boy also said, "he was in a bed and breakfast for only one night and they got him". By a not unexpected coincidence I had been in a B&B in Oxford a week previously, which had been booked from work; other things lead me to the conclusion that the company's offices were bugged for most of the 2 1/2 years that I was there, so "they" would have known a room in the B&B had been booked. After a few minutes of this I went back to where they were sitting and asked where they were travelling. The boy named a village in France, and the girl's giggling suddenly ceased; presumably it permeated to her brain cell what the purpose of the boy's abuse was.

It is now very clear to me that MI5 were trying to have me incarcerated, assaulted or killed on this trip across Europe. The degree of verbal violence inescapably leads to this conclusion. When we arrived at our destination, it became clear that many people, both in our tour group and its guide, and among the ordinary residents of the town, knew there was a movement under way to "get" me. MI5 employed many people and significant resources for an action which they knew would only take a maximum of ten days. A commercial operation would never have felt able to waste such resources on such an unproductive and temporary action; only a state-sponsored, taxpayer-funded entity like the Security Service would be able to be so wasteful.

To give some examples of what happened in those ten days; I was walking in some woods outside the town, when a Polish woman, looking at me, said the English "shit" in a strongly Polish-accented voice. For the first three years 1990-92 MI5 had been trying to force this word on me. Another example; I was walking near my "hotel" when a mother said laughing to her child, "a wiesz ze to prawdziwy wariat" which means "you know hes a real madman". And the "TV reacting" happened there too; on Polish TV, a bemused looking journalist said to another, "to jest sprawa Anglikow", which means "its the concern of the English", in other words, none of our business, despite what the English are trying to force down our throats.

Just before we left for home, I went with some others from our group to a nearby bar. There a man shouted at me the same sexual obscenity which MI5 have constantly thrown at me these last three years. I think MI5 try to justify their various terms of abuse by repeating them at me until I say them, either while conscious or while talking in my sleep; and then they seize on my saying those words to "prove" that the obscenities are "my fault", et cetera. This rather stupid reasoning of theirs can actually be seen as indicative of the psychopathic condition attributed to them in a previous article; blaming the victim for the crime you inflict on him is how psychopaths think.

Nor did the persecutors let up during the return trip. Returning on the ferry over the channel, a rather insalubrious-looking guy talked to his mates about "and you know this bloke, hes really mad you know, hes really mad". On the National Express return coach to London, a group of five or six young people started shouting at me. I slumped in my seat and tried to avoid presenting a target, so they got ever more strident - "whats the matter with you, cant you hear us?" One of the other people who had been on the trip to Poland asked them why they were shouting at me, and they said, "hes been to Cambridge", to which the co-holidayer asked them, "have you been to Cambridge?" presumably thinking they were aggrieved fellow students, but they answered "no". Even after I left the coach at Elephant and Castle abuse continued; in the tube station, two kids started throwing abuse at me; one of them said to the other, "and you know he works?" to which the other answered "yes".

Immediate Aftermath of November 1992

As you will know from previous articles, my manager at OCG - ARIS/Oxford, Mr Mitchell, induced a mental breakdown in me in the months leading up to Nov/92. The diagnosis was regarded by the persecutors as a victory for them, because few if any people give credence to allegations of harassment when they are made by somebody suffering from schizophrenia. There is also a bias against the mentally ill, an "institutionalised bigotry" in society comparable to the institutionalised racism against blacks.

However, MI5 did not let up on persecuting me following Nov/92. In December 1992 I flew by charter jet to Alicante in Spain for two weeks recuperation. MI5 planted one of their people on the flight, a youth who tried to start some noises that "hes a nutter". One of the other passengers replied, "oh hes a nutter is he? oh well!" and the youth shut up and said nothing for the rest of the flight. I think it would be fair to say that the youth on the flight was embarrassed by what he had been asked to do in making the flight "uncomfortable" for me; he sounded defensive rather than aggressive.

My first trip to Canada in June 1993

Ive already covered this in a previous article so Ill just give a brief summary here. On 10 June 1993 I flew British Airways from Heathrow to Torontos Pearson Airport. On de-planing from the aircraft, one of a group of four fellow passengers looked at me and said, laughing, "if he tries to run away well find him". It was quite obvious that these four men were the ones who had been harassing me since 1990.

I did nothing to apprehend them or bring this incident to the attention of the airport authorities, mostly because this was my very first visit to Canada, and the last thing I wanted was to get into a dispute before I had even finished disembarking. In retrospect, I can see this was a terrible mistake; I should have made every effort to detain and identify these people.

Subsequently I have made numerous attempts to obtain the names of these people from British Airways passenger lists, by talking to BA, through a lawyer in Ontario, through a solicitor in England, through the UK police, and also through private detectives in the UK. But all my efforts have come to nothing. BA have told me they keep passenger lists for a period of seven years, so they will still have the list for this 1993 flight. I did not see or hear anything during the rest of my visit to Ontario in 1993 which would have lead me to believe that I was being watched or followed.

Journey across Canada in summer 1994

As I think Ive already said in previous articles I emigrated to Canada in late May 1994. For six weeks between late May 1994 and early July 1994 I travelled across Canada from coast to coast, starting in Toronto, visiting various cities and ending up in British Columbia. I saw this both as something of a holiday, and the chance to get to know a little better my adopted country.

As you can guess, MI5 followed me everywhere I went during these six weeks. In Toronto, where I started this trip in late May, I was spoken about by one youth to another with the words "hes an idiot", to which the other replied, laughing sympathetically, "good luck to him".

A couple of days later I went to Montreal and stayed at the YMCA downtown. As you can guess (this is all so predictable, isnt it?) MI5 followed me there and bugged my room at the YMCA. Not only that, but they managed to set-up an instance of "newscaster reaction" from a local television station; while I was watching a Vermont TV news programme on the set in my room, the woman reporter said, "well theyre just tired and they want to go home", which sounds like a pretty unprofessional thing to say until you realise she was trying to say of me that I was the one that was supposed to be tired, and they (ie MI5) wanted me to go home to the UK.

On the bus journey across the North American continent, it was quite clear that MI5 were following me every step on the way. For the first part of the journey they actually put someone on the bus with me, a youth who said at me "that guys paranoid" and tried to incite other passengers to attack me. I stopped for a couple of days in Winnipeg in central Canada, and on leaving the town heard on the radio a female presenter ranting about "insanity! insanity!". It is very tiring travelling such a long distance by bus; I took the journey in two steps, each of about 36 hours; and it is especially tiring when you know MI5 are watching you and harassing you every step of the way.

When I finally got to Vancouver, MI5 instituted the usual harassment, in very short order. I was surprised how quickly they were able to induce hatred towards me in elements of the general populace; the Security Service must have employed a number of agents and serious resources in a very short period of time; and for no real gain, because I havent been back to BC for almost five years, so all their "work" appears to be for nothing. In downtown Vancouver a street person said in front of me, "theyre all talking about him". For a few days I was staying at Pauls Guest House (345 W.14th Ave); on the day I left, the owner Paul shouted at no-one in particular, "hes going to Victoria" - which was quite accurate, I was indeed going to the provincial capital Victoria on Vancouver Island. But I had not told anyone at the guest house where I was going; I had only mentioned to my parents back in England on the phone that I was going away from Vancouver for a few days. Which leads me to suppose that MI5s bugging of the phone in my parents house yielded the "intelligence" that I intended to visit Victoria, and they had passed the information on to Paul.

When I got to Victoria it was again obvious that the persecutors were "doing their stuff" there as well. On the street I was identified as being English, although I had not said anything so my accent hadnt given me away; and returning by ferry to the mainland, I was abused by a Canadian woman who said, "hes a nutter! you can run but you cant hide". During my years in Canada I have never heard the word "nutter" on any other occasion; I do not think it is part of Canadians vocabulary; so the Canadian woman on the ferry, who was obviously talking about me, must have been supplied with this word by the English persecutors. And once I got back to Vancouver, staying at the Austin Hotel on Granville St, I listened to a conversation in the apartment block directly opposite, and a man saying, "hes paranoid, so thats as bad as it can be, so why are they doing this to him?".

Holiday in the States, August 1995

By 1995 I was living in Canada, and in August I went down the eastern seaboard to Florida and as far as Key West by car. As you can guess (this is all so boring and predictable, isnt it?) MI5 followed me every step of the way. I can see in retrospect that this must have been quite easy for them as they had my car bugged, both on the inside to listen to anything that was said and what radio station I was listening to, as well as what must have been a tracker device installed to track it across long distances.

The first city I visited was Philadelphia. In the old Congress Hall where the first US Congress assembled, the woman guide started referring to my situation, saying that "all these people in Europe were watching it", and they were "a little paranoid" at this 18th-century experiment in democracy. Also I had recently written a newsgroup post where Id described a (female) poster as "wet-nosed" (implying "canine"), and a young girl in Philadelphia remarked, "so he thinks were dogs?" There were two or three more incidents during this holiday in the eastern States, including a radio station down near Miami, showing "they" had tracked me all the way there, and were bugging the inside of my car; but I didnt record the details and Ive forgotten some of it now. Also down in Miami Beach a French tourist in a lift expressed support for me with the words, "cest incroyable" ie. its incredible, meaning that MI5s well-known actions against me were beyond belief.

To go back a bit, in about May/June 1995 Id visited New York, again by car, and was insulted several times by people using the same words that had been used against me in England. In Central Park, and elderly Englishman (not a real gentleman - but then the Engish view of themselves as "gentlemen" etc is quite laughable) looked at me and said "idiot". And while I was eating in a streetside restaurant a New York youth started laughing and said something like, "I cant believe it, hes actually here" - I think that was because I had had an expressed wish to visit New York for some years before this, although after this visit I wont be going there again for a very long time.

Visit to Poland December 1995/January 1996

In December 1995 I flew (BA again, unfortunately - every time Ive flown BA one of these incidents has happened, presumably MI5 is happier setting up harassment on British-domiciled carrier) from Montreal to Berlin and travelled on to Poland to visit family. MI5 naturally harassed me in Poland during my brief stay. They followed me around and got Polish people to take part in the harassment. In one case two Polish youths talked in front of me saying in English (with marked Polish accents), "fucked up men, fuck you". There were also other incidents which I dont remember too clearly since it was some time ago.

The return flight connected through Heathrow, and in the transit lounge MI5 again set-up harassment against me. In Poland they were talking their abuse in English, and in London they set Polish people after me to speak in Polish; they heard me on the phone to my father, and said "a wiesz ze to Polski wariat", in an almost sympathetic, inclusive fashion (translation. "you know hes a Polish nutter"). Once on the flight to Montreal I was again set upon by two English youths, one of whom spoke and the other listened. The aggressive "fat bastard" youth said, "if he wants to be a wanker" (its my fault theyre harassing me, you see), self-justification that "hes a nutter" (so we have to keep on abusing him, because hes ill), as well as talking about the town in Poland where I had been staying. He also said, "he doesnt know who we are", but as already remarked in a previous article, that was at best a half-denial of my guess expressed in internet newsgroups that the people after me were MI5 - if anything its a half-confirmation rather than a half-denial.

These incidents are still going on. You can hear digitised audio files of abuse on a BA flight to Berlin in 1998 on the Web at address

On this flight they were again attacking my mental health; "paranoid, hes paranoid" and "nutter" are discernable. The last "during travel" contact was at Ottawa Airport on 21 July 1998, when "Alan Holdsworth" the psychopath MI5 agent, dressed as a vagrant, was pacing aggressively in the departure area. In three weeks I will again be travelling to Europe; we will see what fresh acts of molestation MI5 perpetrate during this trip.

MI5 are Afraid to Admit They're Behind the Persecution

MI5 have issued a formal denial of any involvement in my life to the Security Service Tribunal, as you might expect them to; but, more importantly, the persecutors have never denied that theyre from the Security Service, despite several years of accusations from my corner on usenet and in faxed articles. I am not surprised that the Security Service Tribunal found "no determination in your favour". I am however a little surprised that the persecutors have refused to confirm my identification of them; by doing so, they implicitly admit that my guess was right.

"No determination in your favour" says the Security Service Tribunal

In 1997, I made a complaint to the Security Service Tribunal, giving only the bare outlines of my case. I do not think it would have made very much difference if Id made a much more detailed complaint, since the Tribunal has no ability to perform investigatory functions. It can only ask MI5 if they have an interest in a subject, to which MI5 are of course free to be "economical with the truth". A couple of months after my complaint the Tribunal replied that;

The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint.

Needless to say this reply didnt surprise me in the slightest. It is a well established fact that the secret service are a den of liars and the Tribunal a toothless watchdog, so to see them conforming to these stereotypes might be disappointing but unsurprising.

It is noteworthy that the Tribunal never gives the plaintiff information on whether the "no determination in your favour" is because MI5 claims to have no interest in him, or whether they claim their interest is "justified". In the 1997 report of the Security Service Commissioner he writes that "The ambiguity of the terms in which the notification of the Tribunals decision is expressed is intentional", since a less ambiguous answer would indicate to the plaintiff whether he were indeed under MI5 surveillance. But I note that the ambiguity also allows MI5 to get away with lying to the question of their interest in me; they can claim to the Tribunal that they have no interest, but at a future date, when it becomes clear that they did indeed place me under surveillance and harassment, they can claim their interest was "justified" - and the Tribunal will presumably not admit that in their previous reply MI5 claimed to have no interest.

"He doesnt know who we are"

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly. What he was trying to do was to half-deny something he knew to be true, and he was limited to making statements which he knew to be not false; so he made a lukewarm denial which on the face of it means nothing, but in fact acts as a confirmation of my guess of who "they" are.

On one of the other occasions when I saw the persecutors in person, on the BA flight to Toronto in June 1993, one of the group of four men said, "if he tries to run away well find him". But the other three stayed totally quiet and avoided eye contact. They did so to avoid being apprehended and identified - since if they were identified, their employers would have been revealed, and it would become known that it was the secret services who were behind the persecution.

Why are MI5 So Afraid to admit their involvement?

If you think about it, what has been going on in Britain for the last nine years is simply beyond belief. The British declare themselves to be "decent" by definition, so when they engage in indecent activities such as the persecution of a mentally ill person, their decency "because were British" is still in the forefront of their minds, and a process of mental doublethink kicks in, where their antisocial and indecent activities are blamed on the victim "because its his fault were persecuting him", and their self-regard and self-image of decency remains untarnished. As remarked in another article some time ago, this process is basically the same as a large number of Germans employed fifty years ago against Slavic "untermenschen" and the Jewish "threat" - the Germans declared, "Germans are known to be decent and the minorities are at fault for what we do to them" - so they were able to retain the view of themselves as being "decent".

Now suppose this entire episode had happened in some other country. The British have a poor view of the French, so lets say it had all happened in

France. Suppose there was a Frenchman, of non-French extraction, who was targeted by the French internal security apparatus, for the dubious amusement of French television newscasters, and tortured for 9 years with various sexual and other verbal abuse and taunts of "suicide". Suppose this all came out into the open. Naturally, the French authorities would try hard to place the blame on their victim - and in their own country, through the same state-controlled media which the authorities employ as instruments of torture, their view might prevail - but what on earth would people overseas make of their actions? Where would their "decency" be then?

This is why MI5 are so afraid to admit theyre behind the persecution. Because if they did admit responsibility, then they would be admitting that there was an action against me - and if the truth came out, then the walls would come tumbling down. And if the persecutors were to admit they were from MI5, then you can be sure I would report the fact; and the persecutors support would fall away, among the mass media as well as among the general public. When I started identifying MI5 as the persecutors in 1995 and 1996 there was a sharp reduction in media harassment, since people read my internet newsgroup posts and knew I was telling the truth. The persecutors cannot deny my claim that theyre MI5, because then I would report their denial and they would be seen as liars - but they cannot admit it either, as that would puncture their campaign against me. So they are forced to maintain a ridiculous silence on the issue of their identity, in the face of vociferous accusations on internet newsgroups and faxed articles.

Have MI5 lied to the Home Secretary?

In order for the Security Services to bug my home, they would either have needed a warrant from the Home Secretary, or they might have instituted the bugging without a warrant. Personally I think it is more likely that they didnt apply for a warrant - I cannot see any Home Secretary giving MI5 authority to bug a residence to allow television newscasters to satisfy their rather voyeuristic needs vis-a-vis one of their audience. But it is possible that the Security Service presented a warrant in some form before a home secretary at some point in the last nine years, for telephone tapping or surveillance of my residence, or interception of postal service.

So the possibility presents itself that a Home Secretary might have signed a warrant presented to him based on MI5 lies. Just as MI5 lie to the Security Service Tribunal, so they might have lied to a Home Secretray himself. MI5 and MI6 are naturally secretive services former home secretary Roy Jenkins said, they have a "secretive atmosphere ... secretive vis-a-vis the government as well as [enemies]". Jenkins also said he "did not form a very high regard for how they discharged their duties".

It was only a few years ago that MI5 was brought into any sot the extraordinary thing is that British media organisations like the state- and taxpayer-funded BBC take such an active part in the MI5-inspired campaign of harassment. We have after all heard of MI5 trying to bribe broadcast journalists; but surely there must be a substantial number who are not bought or blackmailed by the Security Services, and who take part in the "abuse by newscasters" of their own volition? The BBC is supposed to be independent of the government of the day as well as the Establishment in general. While perhaps it is childish to think that the BBC is anything other than effectively state-controlled, the degree of collusion between the BBC and the British Secret Police MI5 is something you would not find in many countries. Individual tele-journalists in other countries would have enough self-esteem not to allow themselves to be controlled by their secret police - seemingly, BBC broadcasters like Martyn Lewis and Nicholas Witchell have such a low opinion of their employing organisation that they see no wrong in dragging the BBCs no-longer-good name through yet more mud, at the mere request (whether supported by financial or other inducements) of the British secret Police, MI5.

And when challenged, these broadcasters LIE about their involvement, with just as little shame as MI5 themselves. The BBCs Information dept have said that;

"I can assure you that the BBC would never engage in any form of surveillance activity such as you describe"

which is an out-and-out lie. Buerk and Lewis have themselves lied to their colleagues in the BBCs Information department over the "newscaster watching", but unsurprisingly they refuse to put these denials in writing. Doubtless if the "newscaster watching" ever comes to light, Buerk and Lewis will then continue to lie by lying about these denials. So much for the "impartial" BBC, a nest of liars bought and paid for by the Security Services!

It is obvious that the persecution is at the instigation of MI5 themselves - they have read my post, and only they have the surveillance technology and media/political access. Yet they have lied outright to the Security Service Tribunal. Similarly, BBC newscasters Michael Buerk and Martyn Lewis have lied to members of their own organisation. The continuing harassment indicates they are all petrified of this business coming out into the open. I will continue to do everything possible to ensure that their wrongdoing is exposed.

MI5 Persecution Update: Friday 11 June, 1999

Harassment in a pub in Clapham, Tuesday lunchtime

Once a month, or once every other month, I meet a Polish friends of mine who lives in Clapham North, and sometimes we go to a particular pub near where he lives. The last time was some two months ago; I did not have my minidisc-walkman with me, and consequently was seriously harassed by people MI5 had instructed to harass me, in the pub.

This Tuesday, 8 June 1999, we again went to the same pub for a pre-meal drink. This time I did have my minidisc-walkman with me. As you can guess, we were followed into the pub by a couple of young people (Im getting older and older - isnt it funny how the MI5 agents all look young these days?). They started talking about my situation, in particular some travel I had booked the previous day. Unfortunately, they were talking fairly quietly, and my minidisc didnt pick up their speech.

MI5s schizophrenic reasoning is that simultaneously I am very important and worthy of their acts of persecution, and I am also totally unimportant and their abuse of me "doesnt matter". Perhaps they should test their agents and managers for obsessive personalities or psychotic features in the same way as employees are drug-tested. MI5 might lose their "worst cases" employees if some psychological testing were applied to their recruitment procedure.

Toothless Watchdogs. What a Surprise.

Recently I have been engaging in communications with two watchdogs, the Security Service Tribunal which deals with complaints against the security service (and always clears MI5 of any wrongdoing), and the Data Protection Registrar, which is mandated to investigate misuse of personal data held on computer.

In a letter to Nick Brooks, Security Service Tribunal secretary, dated 20 April, I asked him if the Tribunal, as an allegedly independent body, had the means to investigate complaints against MI5 other than asking MI5 to themselves investigate complaints. To my disappointment, his reply two weeks later answered the question only indirectly, in the negative. Whatever the reader might think of the merits of the case I have been putting before you in faxed articles this last year and half, you will surely recognise that it is a significant anomaly for the Tribunal to have no independent means of investigating complaints, particularly given the view expressed even by previous home secretaries that the security services are untrustworthy.

MI5 Persecution: No Justice for the Victims of MI5

In a previous article I detailed the similarities between the current MI5 Persecution in England, and other historical instances of similar persecution, notably that by the Nazi Germans in the thirties and forties. The Germans persecuted first the mentally ill, the epileptics and those suffering from schizophrenia, then moved on to racial groups; in todays Britain the persecution is again directed at those with mental illness, which the British in their cowardice find easier than taking on racial groups as the Germans did. But just as in Thirties Germany there was no recourse against a malign and omnipotent state, so the MI5 Secret Police in the modern British Fascist State allow no justice for their victims.

No Recourse Against the Security Services Illegal Harassment

It has become apparent to me over the last nine years just how loaded the dice are in todays Britain, a fundamentally fascist country which masquerades as a democracy. Britain is a democracy in name only; the Establishment, the defence and MI5 secret police are always there, regardless of which party has been voted into power most recently - and from "New Labours" conduct in office one finds it difficult to tell them apart from Old Tories, in their crackdowns on the sick and vulnerable in society.

In thirties Germany the victims of the Nazi regime had no legal recourse against their State oppressors; and in todays Fascist British state, the victims of the Establishment and its MI5 Secret Police similarly have no recourse against the illegal state-funded and organised oppression. There is supposed to be a mechanism for dealing with MI5 crimes, in the shape of the Security Service Tribunal and Commissioner; yet these have never found favour of a plaintiff. One might as well ask the Nazi SS to investigate crimes against epileptics or Jews as ask the Security Service Tribunal to investigate MI5 crimes against British citizens; it is quite obvious what the answer is going to be, regardless of what you say to them, and what evidence you provide. The Tribunal and Commissioner are a mere formality, a whitewashing body to give the Secret Services a veneer beneath which they hide their shabby criminality.

"Institutional Racism" and Bigotry in the Metropolitan Police

The recent inquiry into the racist murder of Stephen Lawrence found clear evidence of systematic and deliberate racism in the Metropolitan Police, which cannot have surprised anyone. Commissioner Sir Paul Condon accepted a somewhat lukewarm definition of institutional racism as being "unconscious". In truth, and this truth must surely be obvious to anyone who has any familiarity or encountered the great British police, the Met has not just "unconscious" racism, but very clearly "conscious" and deliberate racism, of the kind that would have done Thirties Germans proud. And it is a bastion of such open racism - when many other parts of society are learning to live in a multicultural environment, the Met is still living in the past in its attitude to the minorities.

But in addition to the systematic racism confirmed by the Lawrence inquiry, there is also something much more relevant to this case, which is systematic police bigotry against the physically and mentally disabled, which I personally have experienced in my dealings with the police over the years. You cannot expect equal treatment if you are mentally disabled. I tried to make a complaint to the police in 1995 about the harassment I had been subjected to for several years. As soon as they found out I had mental illness, they refused to even talk to me. I tried again in March 1999; the police made various threats to me, while ranting about "your paranoid rubbish" in reference to the complaints expressed to them.

The police refusal to do the job they are employed and paid to do is extremely serious, particularly as this case is highly important, indeed key to the whole issue of British self-perception at the end of the 20th century and the beginning of the 21st century. Britain has lost much in the last fifty years - it has lost an empire, it has lost its self-respect and its identity as a people. If the MI5 persecution finally makes it into the light and the Security Services are seen for the rather cheap bullies their behaviour indicates, it will have a massive and harmful effect on British self-perception in the new century.

Security Service Tribunal - Blatant Whitewashing

A few weeks ago I spoke on the phone to Nick Brooks, the Secretary of the Security Service Tribunal, which is supposed to deal with cases of MI5 transgression. I asked him if the Tribunal had ever found in favour of a plaintiff and against the Security Service. He answered that as far as he knew, it had not.

I also asked Mr Brooks if the Tribunal had any means of investigating allegations of criminal activity by MI5, other than asking MI5 themselves if they had engaged in such activity. His rather circuitous written reply states that the 1989 Security Service Act provides that "it shall be the duty of every member of the Service to disclose or give to the Tribunal such documents or information as they may require for the purpose of enabling them to carry out their functions under this Act". Which is a very round-about way of saying - "No" - the Tribunal has no way of investigating MI5 crimes - None At All.

Setting up the S.S. Tribunal, and creating a Security Service Commissioner, was really an act of falsehood by the government. It is generally recognised that MI5 are out of reach of the normal criminal justice system - the police, as we have seen, have no intesot answer to the government; in a previous article I quoted Roy Jenkins speaking of "a secretive atmosphere.... secretive vis-a-vis the government as well as [enemies]", and a "lack of frankness" from MI5.

If the government wanted to, it could reform the secret services and ensure they acted in conformance with the laws which have been enacted for them in the last ten years. But apparently the present government does not see any need to ensure security service compliance with the law. As noted above, the regulatory machinery for MI5 is deliberately weak; the Tribunal has no independent means of investigation, and it is simply a waste of time complaining to the Tribunal or Commissioner.

Every so often, fresh revelations come to light of secret service transgressions. We have heard from Shayler that MI5 bugged Jack Straw and Peter Mandelson; we have heard from Peter Wright that MI5 plotted to see Wilson ejected from office; yet so closed is the system of government that the law is never enforced against MI5 when they "bug and burgle" everyone from politicians to ordinary citizens.

No Justice from the Legal System, either

Britain has a civil and criminal justice system which effectively limits many complaints from being heard. For a civil complaint to be brought before a court, you need a solicitor willing to act on your behalf. Supposedly it is possible to represent yourself as a Litigant-in-Pthe basis of being "frivolous and vexatious" or "disclosing no cause for action in law". This is exactly what happened to me in 1997 when I twice tried to take the BBC to court for spying on me in my living room at home; my case was twice struck out, and on the second occasion an order was made against me that I could not bring further civil litigation against the BBC without leave of the court.

As the reader can guess it is quite impossible for a person with schizophrenia, who complains about the secret services and media interfering in his life, to find a solicitor willing to represent him in legal action against the persecutors. I have quite a lot of evidence of the continuing persecution which I have posted on the website, even if the evidence is quite tentative and perhaps open to varying interpretations. But I have tried several firms of solicitors; some of them have acted unprofessionally and abused me; all of them have refused to represent me. My psychiatrist gave me the name of the firm of Bindman and Partners in central London, and I have approached them twice. On each occasion they refused to accept my instructions. Plainly the problem with Bindmans, which they have admitted, is their bigotry against mentally disabled people; yet this is not just something that is wrong with Bindmans, it is something that is wrong with the legal system as a whole, since the legal system necessitates finding a solicitor willing to represent you in order to bring a case to court, but it does not have a mechanism for providing a lawyer in the case where no solicitor is willing to take on your case. So the British legal system is such as to prevent cases such as mine from ever receiving an airing in a court.

So much for the civil courts. But the criminal justice system is no better. Two years ago the Protection from Harassment Act came into force. But again, while the Act is all very well on paper, in practice it is unenforceable in my case, since it would require Police action to see the law implemented, and if the police cannot even be trusted to conduct a murder investigation competently (in the Lawrence case), then what chance is there of their investigating complaints against the Security Service? Of course, it would be possible for me to personally issue proceedings through a private prosecution either against MI5 themselves, or against one or more of their media tools; but here we see the same problems as with the civil courts, because first of all I would have to find a lawyer willing to act on my behalf. Litigants-in-person do exist in the criminal courts, but the Attorney General can bring such a prosecution to an end by taking it over and entering a plea of "nolle prossequi"; and I suspect that if I were to bring a private prosecution against either MI5 or one of their media tools, then this is exactly what would happen.

So much for British justice. But if anything the wrongs that have been perpetrated on me by the British justice system are quite mild to what others have suffered. Others have been wrongly convicted based on police evasions and lies, and spent many years in jail based on false charges. I should count myself lucky that despite the best efforts of the MI5 secret police, I have not acquired any criminal charges or convictions; which shows that for all their resources and influence, and the clear imperfections in the British legal system, there are still limits on how much subversion MI5 can achieve.

The latest in a long line of injustices

A comment I heard during the recent scandal of the police mishandling of the Lawrence murder investigation is that "its not as if the police themselves murdered him". This is not a particularly wise statement to make about the case, since it could be argued that the four alleged murderers were aided in their crime by the expectation that the police would deliberately botch the investigation - which of course is exactly what the police did.

But in my case, this would be a completely inaccurate thing to say - since the MI5 secret-police have expressly been trying to nine years now to see an end put to my life, either by having me incarcerated and my liberty ended, or by forcing self-termination on me. It is exactly as if the secret police "themselves murdered [me]", since that is what their aim is in their campaign against me.

The public has heard of instances of police mishandling of cases, of police manufacturing evidence, lying in court, extracting false confessions to clear up crimes, et cetera. Various instances of extra-legal activity by the secret services have also come to light in the last few years. The unhappy truth is that what MI5 have been doing to me for the last nine years is really nothing out of the ordinary for them. To me it seems unbelievable that this sort of systematic campaign of harassment, which thousands and thousands of people in this country and abroad are well aware of, could exist for such a long period of time with the media maintaining "omerta". But my case is not the first such instance of persecution by the "British secret police", and judging by the lack of any real controls on MI5, I very much doubt it will be the last.

Chuck Harris wrote:

> I'd sure like to see some references on that one!

Yeah, me to. Where my mother lives (condominiums) they absolutely prohibit visible antennas of any sort - it's in their association bylaws. If they put up a dish - they have to camouflage it. The City is just as tough on other similar stuff...

Here's mom's neighborhood...

http://www.comcents.com/momshood.jpg

See any antennas? There is one - VERY tall as a matter of fact - see it?

http://www.comcents.com/momshood2.jpg

In case you think I'm making this up - here is a close-up noting two of the lower antennas (there are several more up in the "fronds")...

http://www.comcents.com/tower.jpg

So like Chuck said - I'd like to see some references on that.

best regards...

The local NPR station (KUOW) ran a story this morning about how ham radio
operators provided the only means of communication in the hardest-hit areas
of western Washington.

Landline phones were dead, cell phones were dead, and even the police &
emergency network was dead except for something like handheld two-way
radios. Hams relayed messages up and down the coast about places to shelter,
availability of supplies, medical emergencies, and so on.

They interviewed a law enforcement guy who happens to be a ham.

In this age of the Internet, ham radio might seem like a quaint throwback to old times, practiced by a shrinking crew of oddballs.

It's reassuring to know that ham radio is alive and well, and still performing its public service function as a last-resort network in emergencies.

Regards,

Phil Nelson

There is an old church near a hill, and I was watching them making an addition.
Its
a very old church. They had a kind of bell tower, but now the bell tower is much
higher.
Its loaded with cell antennas inside.

This rule says basically that you can have an antenna in an area that
is available for your exclusive use.  That would include your living
room, and the confines of a private balcony.

"A: No. The rule does not prohibit restrictions on antennas installed
     beyond the balcony or patio of a condominium or apartment unit if
     such installation is in, on, or over a common area. An antenna that
     extends out beyond the balcony or patio is usually considered to be
```

in a common area that is not within the scope of the rule. Therefore,
the rule does not apply to a condominium or rental apartment unit
unless the antenna is installed wholly within the exclusive use area,
such as the balcony or patio"

However, not all town houses have such areas. I lived in one that
specifically stated that anything from the drywall out belonged to the
association. I would not have been allowed to stake an antenna in
the dirt in front of my house, or projecting out from a window.

-Chuck

I need a power cord wired up for a radio that is on the way to me.

I understand that it has a six pin Molex plug.

Would someone kindly email me what each pin has going to it?

Thanks!

Fred

I found an old thread regarding the input impedance for the LS-3 military speaker. I didn't see any article with the correct answer.

According to TM 11-487, "Electrical Communications Systems Equipment," 2 October 1944, paragraph 317, page 49, it is 8000 ohms, with internal 6" permnanent magnet speaker, intended to be used with a BC-312 on a CD-267 cord.

Steve.

Better tell her association that lawyers will be knocking on their door sooner or later with their hands out. I don't know about rooftop conventional OTA antennas, but associations are absolutely prohibited by federal law from including prohibitions on DBS dishes in their CCRs or discouraging their use in any way. Requirements to camoflage are NOT permitted either. The FCC has made it very clear that they want competition to cable and have jurisdiction in this matter to achieve it, so the edicts of cities and "townships" do not apply. If an association takes it to court they will LOSE.

I have a acquaintance who made a good chunk of change during the dot-com days. He bought a home in a tony planned community in 2001, and put up a DirecTV dish. Almost immediately one of the neighborhood Nazis tried to get him to take it down under threat of suit, he said "go ahead and try"......and they did, and wound up with several thousands of dollars of egg on their faces, which their insurance company did not pay for because they had already warned about it in one of their newsletters to the association some time earlier.

Some time later, I ran into his lawyer (I had met him earlier because I had helped install the dish that started this mess) and the subject of the DirecTV dish suit came up. He told me that he deals with disputes between homeowners and HOAs all the time about all sorts of issues embedded in CCRs-sometimes he wins and sometimes he loses, but he has NEVER lost a case involving a homeowner's DBS dish, and he has dealt with a couple hundred cases.

Unfortunately, none of this applies to ham radio antennas. HOAs are free to deal with them as they wish, and a lot of them wish to ban them outright.

Maybe when a major disaster strikes and phone lines and cell towers are knocked out for miles around and the residents have no way of telling Mom and Dad in another state that they are safe because there are no ham radio installations in their perfect, manicured community, they will relent, but I am not holding my breath even then. Control is hard for some people to give up, even when doing so makes sense.

-Scott

At the risk of being chastised, I would like to mention the 3-6 MHz ARC-5 if transformers. They are 1415 kHz, and can be moved up by pruning some turns.

I am not advocating tearing apart a good ARC-5, but there are derelict ARC-5s around, including the transformers. The 6-9 MHz ARC-5 uses a 2600 kHz if, which can be padded down to 1.6 MHz.

Thanks, Colin...

Yes, that would be an option. Heck, I would take just about anything
and rework it at this point. I hope someone would step forward and
and make me a deal on something from their junk box...

Take care...
Jim

Scott, that works only if the area the dish is attached to belongs to the home owner, or is made exclusively available to the home owner.

Condo owners are in a completely different situation.

You can set a dish on your porch, or patio, if the porch or patio is exclusively yours to use. You can set it in a window, as long as it does not extend past the window into the air outside of the window.

If you drill holes in the common roof of a town house, or the outside walls, or drive a spike into the common lawn of the town house, you will lose. You will also get to pay for the damage you did to the roof, or wall, or lawn, if any.

Someone recently posted the FCC regs relative to TV, Radio and Ham antennas, and that fact was made quit clear in their Q&A section.

Rewinding a 455KHz IF using the litz wire it was originally wound with
is easy to do.  Just unwrap turns until it your GDO says it resonates
at 1.6MHz.  The core won't care.

Thanks for chiming in, Scott -

It seems we have this discussion every year or so, and the same sad
group of naysayers chimes in with "Can't be so. My mother-in-law's
great-grand-uncle lives in a condo in East Buttend and they won't let
him do it." I think that the HOAs write this stuff into their CCRs
because they assume that the homeowners either won't know the truth, or
won't hire a lawyer to fight for them. It's a power thing.

Bill

Actually - at ground level - they're pretty well camouflaged - they're not tall - about the same as a two story house. There are tall trees and such blocking the view from most directions- except through the tall fence where that property faces the street - but that's quite limited and on a busy main thoroughfare.

That picture was zoomed in pretty far - "that stuff" is a lot further away than you might suspect - and that makes it hard to judge how close things are together, how much something "really" sticks out, etc.

Here is where that shot was taken from - not zoomed in:

http://www.comcents.com/momshood3.jpg

You cans still see the tanks - but you gotta look. Besides we'd rather

put up with that than the brown air of downtown (and this was a *very*
clean-air day after some heavy rains!):

http://www.comcents.com/notmomshood.jpg

Shot from the same place- just turned towards downtown.

best regards...

No - it's a financial thing, a practical "relationship" thing, - and (at least what I'm familiar with) a California thing.

First - it costs a lot of money to hire a lawyer to fight such - right or wrong - it costs a lot.

It makes for bad relationships with the neighbors. They may be wrong - but you still have to live with them.

And in California, at least - you can't believe some of the rulings that come down from some of those courts. I just spent many years and nearly six figures fighting some crap that wouldn't have flown 1 day in most courts - and lost - so I know what I'm talking about when it comes to (at least some) California courts.

best regards...

Same fools that complain about electrical rates; and then want
nuclear plants shut down and fight new transmission facilities.
And no ugly wind plants either, besides being ugly they kill birds!
Hydro is not good for fish.

Same fools that complain about gas and heating prices, and
then fight new refineries or exploration in this country.

Blleeeeeehh!!!!

Reminds me of when I was on the city council in our
little town and Nextel came to us wanting to put up a
cell tower.
I had several calls from women who were crying about
having to move because they couldn't stand the thought
that they would be able to see a cell tower from their
new home.
One "lady" was addressing the council during the public
hearing about the tower and while she was talking her
cell phone rang...
I couldn't help but laugh out loud.

Ron

In the case of dishes, it's a hidden agenda thing. They try to argue that they are trying to ban them because they are unsightly, and that's horses**t. If you scratch the surface, the real reason (usually) is that the HOA has cut a deal with a cable company for monopoly access to subscribers in exchange for wiring the community. Naturally, they can't use that reason in court;the judge would not be very sympathetic, so they claim that the ban is because dishes are unattractive. In all the years I've been alive, I've never heard one comment from an actual person about the incredible fuglyness of DBS dishes. The HOAs enforcing these CCRs would have you believe that such people exist in droves.

>
> First - it costs a lot of money to hire a lawyer to fight such - right
> or wrong - it costs a lot.

Yeah and the real bitch here is that you pay even if you win, and you are compelled to pay your legal adversary to fight you in the form of HOA yearly dues.
>
> It makes for bad relationships with the neighbors. They may be wrong -
> but you still have to live with them.

IMHO any neighbor that would get their panties in a bunch over a dish installed in my own yard already would have a bad relationship with me.

Hello Scott (and Ralph)

A soundscriber just sold on ebay (sunday 9th decemeber) for 103.28, a
little more than I wanted to pay. I had a nicer and newer version
back in the mid seventies that I regretfully lost in a move. It
wasn't a bad machine. I'm looking for a simple lathe if anyone knows
of one.

eddie ciletti

Pins 1 & 4 = 14 volts input

Pins 2, 3 & 5 = ground

Pin 6 = 14 volts out (fused at 2 amps)

Hope the above helps!

Sadly, prices on anything you'd even want to look at have gone sky high.
Collectors bid the things up to crazy prices, even junk home machines with
under-platter feedscrews.

You can buy the things in pieces... most of the old broadcast turntables
had cutting lathe options available for them. So you buy an old RCA

```
table, then you buy the RCA leadscrew assembly, then you buy a Presto
cutting head (and I would not recommend anything worse than a Presto cutter,
which is pretty bad to begin with).  Add to this any power amp with a
homebrew reverse-RIAA filter and you're in the lo-fi cutting business.

Problem is that the audiophile market knows about those old broadcast
turntables and they will pay way more for them than they are worth,
considering they all have way too much vertical rumble for stereo anyway.

You can try asking on rec.antiques.radio+phono which is where the
collector guys hang out.

I met some new adults at WB8ZTV's memorial service on Saturday. No age verification was required and it was also 100% free.

Hi Gang:

In 1996 I produced some half-decent copies of the 1970 Navy NAVSHIPS manual for the R-390A.

The originals are pretty well much unobtanium. It is my understanding that the NAVY required the old issues to be turned in and they are destroyed. I got my hands on an original and made the copies from it.

I recently found two of the copies I made back in 1996 and since I now have an original I am offering them up to members of this august group. The cost will be $35.00 plus postage. If I get a number of orders I will consider doing another print run.   This is very time-consuming as you can imagine but am willing to do it because the NAVY manual is BY FAR the best technical reference available for the R-390A. It is NOT a rehash of the Army/Air Force manual set.

If interested please reply by e-mail.

73,

Michael, W1RC

I have a Drake TR-4 transceiver in original condition that is surplus to my needs. It could use a cleaning but is 100% original. I cannot test it because I don't have the AC-4 power supply.

I am asking $200.00 plus packing/shipping for it.

If interested please reply by e-mail.

Thanks,

73,

Michael

I have a Yaesu FT-101E transceiver in original condition that is
surplus to my needs.  It could use a cleaning but is 100% original.
There are some issues with the AM transmit function but I don't
believe it is very serious.

I am asking $150.00 for it plus packing and shipping costs.  It weighs
about 35 pounds.

If interested please reply by e-mail.

Thanks,

73,

Michael

Yes, maximum selectivity is when the plungers are fully withdrawn. Bandwidth is on the order of 100Hz.

An original is a nice thing to have, but a copy always loses something in the translation. For those that need a truly better than original manual, look into:

"The 21st Century R-390A/URR Technical Reference"

It is based on the May 1985 Navy manual, and has many enhancements.

It is a completely new creation, not a copy, or a scan. It is available in pdf format, and has many new color pictures. It is truly a work of art.

And it can be found free by simply googling the above title.

The manual you reference prints out extremely well. The only exception
would be the schematics. They've been reduced (sectionally) to fit
(nicely) on to single pages. But, nothing like the real McCoy when they
can be found. If the listed reprints have regular, fold out schematics,
that would be a good deal, too.

How silly of them, they didn't include the title of the manual
in their website!

This google search works:

R-390A New Y2K Manual

Doug,

Thank you for your help with a power cord.

The radio arrived today without a microphone.

Since I know nothing about the radio, what microphone do you recommend
for this radio?

Thank you again for your help!

```

Hi Dale:

According to http://www.aade.com/hampedia/prices2.htm

the price ranges from $600 to $900. That seems high to me, but I have wanted one from time to time and recall that the eBay prices always ended up higher than I wanted to pay.

Condition and what filters are included will affect price.

73, Colin K7FM

Pardon the butt-in, but how many 7360's might you need? Seems I have at
least two or three sleeves of them. Are they truly rare or expensive?
One of my old rigs used them but, as far as I recall, I have nothing
that currently uses them... at this time.

I don't know how "rare" they are in the scheme of things, but this
has been discussed here in the past.

The 7360 was really useful for some things, and since it was a specialty
tube, not so useful as a general purpose tube.  Certainly not when
you were paying a premium for the specialty tube.

I gather it was relatively expensive at the time, and wasn't found in
general consumer electronic equipment.  I know there were articles at
the time pointing out that there were cheaper tubes that did the
same thing, used in tv sets (for demodulating the color information).
Once something sees common use in a piece of consumer electronics, the
price is bound to drop.

It's over forty years since the tube was in its prime.  So the only
use for the tubes at this point is to keep old equipment going.  Surely
there's been attrition, as people toss out things they'll never use and
even die and the relatives toss it out.

I don't know where that leaves things.  Because there may be enough
tubes hoarded from back then to keep all the equipment that is still used
that uses them going, since the amount of equipment that used them in
the first place was a nice finite number, and most of that has gone
out of use (and likely a good percentage of it has been tossed).

> Four Years of "MI5 Persecution" Posts on Internet Newsgroups
>
> For approximately the first three years of the MI5 persecution, from June 1990 until late 1992, I kept as quiet as possible, in the hope that by not reacting, MI5s interest in me would decrease and they would simply go away of their own accord. This is the sort of behaviour some people employ against bullies; if the bullies arent getting a reaction, then they might simply go away and victimize someone else.
>
> Unfortunately, this tactic didnt work. The quieter I became, the more shrill and hysterical the noise from the Security Service operatives. For about two years I didnt watch TV news at all. Yet this only heightened their obsessed fixation; they continued to follow me wherever I went, they continued to induce harassment at work by managers and fellow workers, and they continued to encourage me to commit suicide. They seemed to regard my refusal to react as a crime which they would have to "put right" by ever more extreme forms of abuse.

I've acquired a HQ-140 with a bad filter. Does anyone
have a junker 140/150 with a good filter they would be
willing to sell?

Thanks, Roger N1RJ

The IF frequency for the HQ-140 is 455 kHz
http://www.dxing.com/rx/hq140.htm

IF you still have the original, ICM has been known to replace the bad
crystals in these old untis to make good.

International Radio (INRAD) does sell 455 kHz crystals
http://www.inrad.net/product.php?productid=47&cat=112&page=1

http://www.inrad.net/home.php?cat=112

My bitchy comment about this is based on the first two sentences of the description......

> "Here is a Johnson Viking II transmitter in very good cosmetic condition.
> I do not have the manual and it has been untested."

It is NOT in "very good cosmetic condition." At best it is fair condition.

Not having the manual is no excuse for not testing it; all the knobs are very clearly marked as to their function. Anyone who has learned (as contrasted to memorizing) anything in preparation for a ham license should have been able to load it up on a D.L., light bulb, or antenna, safely.

Be very cautious about bidding much on listings like this.

It's a slab of rock :) Unless abused, the quartz might respond to a good cleaning using pure alcohol. Most of those early pressure mounted crystals lost activity due to contamination, etc.

Pete

Right on. I had a bad filter and took it apart and found someone had oiled it. Cleaned the oil out and worked like new.

Everyone seems to be making the assumption that the crystal is
bad. I've tried several crystals (both old and new types) and
the circuit still doesn't align properly using sweep generator.
I'm hoping someone has a complete filter unit from a parts radio
that I can swap out with the present one. In the meantime, I'll
continue troubleshooting. The darn circuit isn't THAT complicated!

Not only that, but he has the nerve to offer the manual separately in
another posting. The condition as displayed as very poor cosmetic
condition, with rust and a great many scratches clearly showing. So far,
he's demonstrated that he misrepresents the condition of the equipment AND
about having the manual. I wouldn't trust this seller in any way.

Is there an actual "complete filter unit"?

I know we're assuming a phasing type crystal filter (ie a center tapped
```

coil feeding a crystal on one side and a variable capacitor on the other), and given that simplicity, there can't be much to go wrong beyond the crystal.

Is the IF transformer that feeds it good? As in "is the tuning capacitor that is likely inside still good"?

Assuming there's a bandwidth control, which should be a series of load resistors to broaden the filter bandwidth, are the switch contacts clean? Are the resistors still the correct value?

Use a manual signal generator, and just feed it into a crystal. There should be a defionite peak, though it will be very sharp. Figure out a means of feeding the crystal the same way in circuit, avoiding the IF transformer that feeds it for the moment. Connect the signal generator to one side of the crystal, and then have the other side of the crystal connected to the circuit as usual. Make sure there's a similar peak on or about the same frequency. Take the crystal out, and find where the IF transformer that feeds it peaks, if it can't be tuned to the needed frequency then likely something's wrong with the transformer (a bad internal tuning capacitor, an open winding or maybe a some shorted turns).

There's usually/often an rf choke at the output of the crystal. Make sure it shows continuity. If it's open, then there's likely only incidental load on the crystal, and the response will be very sharp.

If all that rust is what you call very good condition, I would hate to
think what not so good condition might be.

Turning the phasing control should cause the rejection notch to move through one side of the passband, disappear leaving a symmetrical passband when the crystal capacitance is neutralized, and move to the opposite side of the passband. Mine only has the rejection notch on one side of the passband. The new crystal in the HC-6 holder probably has a different capacitance than the old crystal so I may have to introduce some capacitance to balance the circuit. I installed a phasing capacitor from a HQ-145 which has more capacitance (the 145 uses an HC-6 crystal) but the result is the same.

===
Are you aligning the IF at 455 kcs or at the actual crystal
frequency? Everything should be tuned-up at the crystal frequency,
not the nominal IF frequency. --Ed

A good point. Hammarlund used a patented crystal filter that allows changing bandwidth and notch frequency without changing the center frequency. The whole IF should be set up at the exact crystal frequency. The input tuning for the crystal should be peaked at this frequency as well as all other IF stages. The other inductor is a load inductor which should be set up for maximum bandwidth with the crystal bandwidth switch at maximum. Before tuning the IF Check the butterfly capacitor for the phasing so that its exactly centered when the knob is centered.

There are sometimes other capacitors in the circuit to balance out stray capacity. In the SP-200 series Super-Pro there is a variable compression trimmer in the IF can for this. Its not documented. The HQ 140 may have somthing similar. If its changed value it could throw off the notch adjustment.

I have the patent somewhere but can't find it and a Google search couldn't either. I am pretty sure Collins used the same circuit in their receivers.

My bitchy comment is that its so sad to see guys fight tooth over nail and pay inflated prices in auction environments (where shill bidding is easy to organize), and then you end up with a PoC when its all over. Some of the prices I've seen stuff end up at is outrageous.

Go to hamfests, many and big ones, and look at the stuff, feel the switches, take screwdriver and if they guy won't let you look under the chassis then walk away.

I grabbed an old ARRL Handbook and it covers alignment of a crystal filter i.f. system. As one step, it mentions moving the unmodulated signal back and forth through the if passband until a peak is noted. Once the peak frequency is determined, the if transformers should be peaked at this frequency.

If you are getting a notch, that would indicate the crystal is good and the circuit is also probably good, and you just have to teach it who is boss.

This only works properly if the mid-position exactly
balances the crystal capacitance. As you mentioned,
the higher end radios used a separate capacitor to
establish the correct value.

According to my Eimac product manuals, this socket does NOT have bypass
capacitors.  It states.. "for applications where integral screen bypass
capacitors are either not required or desired....".  Hope that fills the
bill.  de K3HVG

I looked at the alignment procedure in the handbook available on the BAMA site. If you are following this I will suggest a slightly different procedure. First, use an RF input, injecting the IF at the mixer stage works if the IF is completely out of alignment but can result in some change in comparison to feeding an RF signal in. If the IF is approximately aligned use an RF signal. Set the receiver tuning with the crystal on to get the IF exactly on the crystal frequency. Make sure the butterfly cap is exactly centered when the phasing control is at the arrow. This may be changed later but should be set at the center when starting. Tune the IF transformers for maximum output here. If you have a sweep generator use it as described because I think at least one of the transformers may be slightly overcoupled.

The instructions are to adjust the crystal load inductor for maximum but that is only approximate. it should be set with the crystal switch at maximum bandwidth for maximum bandwidth. Using a swept source will make this much easier than whith a fixed source. This inductor has an effect on the symmetry. When set correctly the notch symmetry should be close.

Its also possible that one or both of the 100pf caps in the crystal transformer case (C-17 and C-18) may have drifted off value. these form two arms of a bridge with the crystal and part of the butterfly cap forming the other two arms. If one of these if off value the butterfly cap will be off center to compensate.

It is, of course, possible that the crystal itself is bad but I suspect it is something else.

I sit as chair on our Township Board of Historical and Architectural

Review. We make deliberate and specific exceptions for Ham antenna vs. satellite dishes and similar. So, your hopes are not altogether in vain. All we ask is that the antenna be installed with as little impact on the significant structure as possible. Not "NO" impact, not "Invisible", just minimum practical impact. In my years on the board, it has come up twice - in both cases, the exception was granted and then further granted by Zoning and Planning (height and setback restrictions). The two are still up today.

Indeed tis true but isn't it ironic that nearly everyone had antennas on the
roof top for TV and FM back 30+ years ago! No one complained.

And today in Silicon Valley ($800,000+ homes), many homes still have
antennas up on the roof even though they are on cable or dish TV. No one
complains, and few HOA's.

Lamont Lamenting

You're right - NO ONE complained of antennas before - why now?

I am on council here - and an issue came up regarding Antennas and towers.
Being a "ham" myself - was able to thwart any issues there. When "Zoning"
came in - I questioned "their" rules on Towers and Antennas. Theirs are
limited to "Commercial" towers - with regard to fencing, posting of signage,
etc.

Some people in some areas are just too damned particular.

Lou

HI -
I have, unsuccessfully, been looking for a J.W. Miller
IF transformer #612-W4 (1.6MHz) for replicating
a tube receiver.

Does anyone have a junk box IF 'can' which would be
the approx size of the original Miller Xfmr? It looks
like I am going to spin my own version, but I would like
to replicate the same size and shape of the original.
I believe the approx size is 1" square at the base and
about 3" high. At the bottom, the can is completely open
with two, 6-32 threaded mounting studs. The top of can
is closed a couple of alignment holes. I am basing these
measurements on my fading memory, as I owned one of these
transformers back in the '70s.

If anyone has something that they would like to sell or trade, I would
appreciate talking to you.

Thanks
Jim
WB5KYE

Did you try Bourns? They have most of the old Miller stock and they
have some remarkably weird parts. They may at least have something
adaptable. I know they have some cans that size still.

By Federal law, TV and radio receiving antennas, dishes, and so forth, for household (non-commercial) use, are exempt from local restrictions (including any and all HOA covenants). I don't know if this exemption extends to ham radio antennas or not, but I would think that a pretty good case could be made.

I'd sure like to see some references on that one!

I have lived in several communities that specifically forbade outside antennas of any kind.... including TV.

For instance whenever I have lived in a townhouse, I owned the inside of the house up to the common walls, but the community owned everything outside of the house. It would be hard to imagine how I would be allowed, by Federal exemption, to deface someone else's property so that I may put up an antenna.

And it's getting more restrictive every day. Even so called older neighborhoods are getting restrictions put in by the local city councils in an effort to "make them look nicer".

These are the same fools that want streaming video on their cell phones, but insist on no cell towers in their neighborhood.

On antenna towers for amateur radio use. I have no issues with a tower as long as it meets certain engineering standards.

What I have problems with is Joe "I know code so I'm a civil engineer too" Ham throwing together some 30 year old piece of crap he bought at an estate sale and then having it fall over

onto my property. And then when the city tells him he needs a
permit, screaming about emergency communications as a
justification.

What got folks all riled up out my way, is a dentist/ham put
up four, 400 foot, towers on some property owned by one of his
kids. Legally he was in the clear, but he pissed off all of
his neighbors, ... rich horsey country neighbors... and they
steamrolled a bunch of restrictive ordinances through the
county code to make sure something like that could not happen
again.

So thanks to his having the nicest contest station in the county,
nobody else can put up towers more than 20 feet higher than their
houses.

What ever happened. I really didn't keep track. I thought at one time there
was some kind of thing going on many years ago, where Hams
were allowed to get by almost doing anything. Some kind of bill or
something. How was that lost ??

I moved to a new location 2.5 years ago, still remodling. I have no antennas
up but I live on kind of an antenna hill. There is still a Ham across the street,
two doors down. There used to be a Ham right across the street. I'm not
sure who owns the two of three towers over there. the property lines
are bizzare. The one guy has transmission lines
going up into the second story window. From my house it looks like about 20.

MI5 Persecution Update: Friday 13 November, 1998

If You Intend To Reply, Please Read This

If you have any questions or observations you would like to share with me, then you are very welcome to reply to my fax number 0171-681-1190. But please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. I do not know if he had anything intelligent to say in his 20-page fax because I applied judicious use of the "Delete" key on my computer. Faxes over a page or two will be deleted without being read.

MI5 Resume Hostilities in Response to these Faxes

When I wrote last weeks "MI5 Persecution Update" I remarked how quiet my life had become. No longer! MI5 have restarted hostilities with a vengeance the past week, in response I believe to the faxes I have been sending to members of the House of Commons.

On Saturday 7 November I went to Clapham Picture House cinema to see the film "Antz" (a very enjoyable film). At the cinema, I was verbally assaulted by a group of teenagers with the words "still crazy", repeated about ten times. There was a film with that name showing at the cinema, but it was clear their abuse was directed at me. I do not look ill, so why would they pick on me? answer, the incident was set-up by the persecutors. One of the teenagers also said to another, "I don't know what we're laughing at".

The following day, Sunday 8/11/98, I was on my way to play squash when I was verbally assaulted by a youth who said "it was so funny", without the slightest trace of humour. What he meant by this phrase was that was funny, and they were trying to humiliate me. I have heard this phrase "it was so funny" used at me before many, many times over the last eight and half years.

Please Encourage Keith Hill MP to Help Me

I live in a bugged house, bugged both for audio and video. My movements are monitored by MI5. The Security Service have followed me to Canada, to Poland and the Continent, to the States. I cannot work anywhere, not in England, not in Canada, because MI5 will destroy whatever employment I am able to obtain. I have asked Keith Hill MP to help me, and he has refused.

The situation is intolerable. It is Mr Hills job to help me out of this mess. So, please, as I said in the last fax a week ago: Do not waste your time returning multiple copies of my faxes to my fax mailbox, as some of you have done. Instead;

Please encourage Keith Hill M.P. to help me.

I am sorry to be using this device to encourage Mr Hill to help, but I think eight and half years are quite enough and it is time something was done to bring this matter to a close.

MI5 Persecution : BBC Newscasters Spying on my Home

This week's topic is the quite extraordinary claim that BBC newscasters such as Martyn Lewis and Michael Buerk have spied on my living room while they read the news. I currently have an advert running for the next six months in Private Eye's "Eye Say" column (at a cost of over #200) which says,"MI5 Persecution - BBC Newscasters Spying on my Home"; the story of my campaign in the Eye is on my Website at; http://www.pair.com/spook/evidence/plaint/priveye.htm

BBCs staff magazine Ariel also ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm

Beginnings

The very first incident in the "MI5/BBC Persecution" occurred in June of 1990, when a newsreader reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

Most of the "TV watching" has occurred on the news, and most of it in summer 1990, although some as late as autumn 1993. My website has a few extracts of what might be politicians "getting at" me, in particular John Major and interviewer Dimbleby sharing a joke about the "Knutsford Guardian" which is almost certainly about me.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

Examples of Media Harassment

Here are a few examples which I can still remember of media harassment;

In early 1992 I was watching the BBC news with Martyn Lewis on a small black-and-white portable television at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

Victor Lewis Smith in his TV (BBC2?) program at the end of 1993, had a taxi-driver saying, "theyre all out to get me", to which VLS replied, "but you're quite intelligent aren't you?" (what a nice chap VLS is, compliments no less!)

Paul Daniels the TV magician, sometime in 1990-92 (sorry I can't be more precise but it was so long ago), made a "crying face" and put his face in his hands, which was his way of expressing that I was frequently crying in 1990-92, and that he and other media people found my crying funny.

Kenny Everett (deceased) on some talk show, compared me to a "huge ape" who "scratches himself"; he made some other remarks about what the "ape" got up to which unfortunately I cant remember. (I remember that Everetts comments were quite sympathetic and human, but were obviously about me.)

Stephen Fry on another talkshow (Wogan I think) talking about "masturbatory fantasies", he then referred to me with the words "you prat"; I wonder if the studio audience knew what he was talking about and to whom his comments were directed?

Griff Rhys Jones on Clive James' TV show, made a "lunatic face" (wide fixed grin) to which I said to the TV that he had a "face like a horse's arse", to which Clive James said to GRJ "did you hear that?"

Crimestoppers summer 1990, remarks by a Midlands police officer on the programme, while Nick Ross was presenter (as far as I can remember). The officer talked about "in car entertainment". Nick Ross said to officer, "why don't you stop doing it?" to which he replied, "we can't while he's like this".

BBC2 Newsnight in autumn 1993 had a piece on football hooliganism. A black interviewee said apparently of the hooligans, but in fact of me; "they're just idiots, carry on with the surveillance".

There was an incident with Jonathan Ross which I remember clearly; he was on both BBC and ITV television at the same time, one (ITV I think) was recorded, the other channel was live. Ross has a speech impediment which causes him to pronounce his "r"s as "w". I sarcastically said something about "Mr Woss" to the recorded channel, then turned over to where he was live, and he repeated "Woss" with heavy emphasis and sarcasm.

On the radio, in spring 1994, Chris Tarrant made a sarcastic remark in his morning show, saying "he says were trying to kill him, we should be done for attempted manslaughter", to which another of the studio staff said, "oh no, dont say that". His comment was in reply to a comparison Id made the previous evening between my persecutors and the Polish secret police who murdered dissidents.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "interactive watching". They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

I can understand that they might think that if they were to make written denials to me, then many other people with my condition might write to them with similar questions. But Ive asked a couple of journalists if theyve been writing about me, theyve made written denials, Ive believed them, and I have not put their denials on my website because, since I believe their denials, it would not be relevant to publish them.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

One of the strangest aspects of "TV watching" is that Buerk and Lewis have convinced themselves that their "interactive spying" is reasonable behaviour. Martyn Lewis thinks of himself as a "gentleman". He expressed in 1992 that he was "on my side". If this matter ever comes out into the open, I wonder what these newscasters will have to say for themselves, and what the British public will make of their behaviour?

Media Persecution Evidence on my Website

You may directly access the Evidence section on my website at URL;

The category currently contains four video segments, a number of audio files and three published articles. The first video of ITN's John Suchet is unfortunately a mistake - after looking at it again it is obviously not about me. The two Ken Clarke excerpts may or may not be about me; it is funny that he should keep on harping about "paranoia" and "madness", but I have given these ratings of only 30% certainty, as it is more likely that they are not about me in particular, and Clarke is simply displaying the normal prejudices against the mentally ill found in much of society.

The piece I find most interesting is the Dimbleby/John Major interview from April 1997. I have assigned this a 90% rating. Dimbleby starts by emphasising a report from the "Knutsford Guardian". Major recognizes what's going on and joins in with a falsely apologetic "heaven forfend". The emphasis is on the first syllable pronounced "nuts" in "Knutsford", which is repeated three times. Of course this is hardly anywhere near convincing evidence; the really clear items were all in 1990-92, and they are basically unobtainable now.

If you're reading the website, have a look at the two files from David Hepworth's programme on GLR radio. The first one from 21/Feb/1997 has him talking about an "embarassment" of prizes and "absolute obscene", in reference I believe to the verbal sexual abuse that was being used against me at the time (and which unfortunately is still current). In the second file dated 9/May/1997 he again talks about "absolute embarrassment" of prizes, followed by laughter. To my mind he knows I am listening to his programme, and deliberately makes these remarks for my benefit, with very little attempt to disguise their purpose.

Bernard Levin - "Fanatic's Fare for the Common Man"

On 21 September 1991 this article by Bernard Levin appeared in The Times. It is reproduced in the Evidence section of the website, or may be accessed directly at URL;

To my mind, Levin's article described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

Levin writes about a "madman running loose about London" who "bursts into tears, and swears it is all true. And it is." I am pleased to agree with his assertion that "it is all true" because the truth is what I presented to my friend in September 1991 and it is what is being presented to the readership of these articles now.

Conclusion

The harassment, in particular media persecution, was at its strongest in 1990-92. Today, I am recording everything I watch, read and listen, and the media have pretty much given up. It is now incidents "in public" which make up what there is of MI5s persecution. But much of the material from 1990-92 still exists in archives, although the organisations which have those archives generally wont make the material available to the public, for copyright and other reasons.

MI5 can no longer employ the media to persecute me, partly because journalists now know who is behind the persecution, and also because I would publish any instances. My mistake during 1990-92 was to not record instances as they happened; Ive learned from that mistake, and know better now.

I got a fixer-upper Hallicrafters SX-140 and its driving me batty. After resolving a number of problems I found that both the IF xfmrs needed some surgery (bad mica sandwiches). I've replaced them, the IFs seem to be peaking ok. BTW, the magic value in these seems to be 325-330pf.

I still can't get the darn thing to regenerate. AVC doesn't work either but right now its the regenning that is my primary problem. I can hear plenty of stations...the broadcasters on 40 sound fine and I can hear the CW contest going on. Anybody know the magic clue that I'm missing? Anybody know what sort of voltage range I should be seeing on the suppressor of the 6BA6? I'm only getting a swing from about zero to two volts and it has zero effect on the signal. My pot was open and has been replaced. The diode is ok as are all the normal components.

I'm a tad low on B+ voltage but only by about 10%. Not sure why...line voltage is around 116-117 at the moment.

I really don't understand how this circuit regenerates. Maybe if someone could explain that I'd be in a better position for troubleshooting.

73 and Tnx,
Bill - W X 4 A

They apparently vary the suppressor grid resistance to ground; it uses the internal capacitance between the plate and control grid to provide the regenerative feedback. Moving the suppressor further from ground deminishes the isolation the suppressor normally provides between the plate and G1.

Folks, I got the Lysco 600 working OK. I was also fortunate in that whomever had it for these intervening years treated it well. But, on the the NC-183D. A previous owner elected to install a product detector in a typical plug-in can and is inserted into the NBFM adaptor socket. The receiver-phone switch was borrowed for the selection of the new detector and the old and new detectors, or so it would appear. Although it works, I'd like to get it back to stock. If it the switch was the only issue, it'd be easy but there are other obvious changes. Does anyone have any info or pointers to where this, or similar, modification(s) may have been written up? I'm going to proceed and trace out as best as possible but I'm always wary of removing some critical wire, someplace, that may cause a loss of operation, in the process. I'll of course document any reverse actions so I can follow the breadcrumbs back, if necessary. But... if someone has the key....

Why would you want to remove a good working product detector ,#1 The
phono switch is never used,#2 the accessory socket was placed there
just for changes and additions #3 someone else may own it at some
time later and would appreciate a good product det. #4 If it can`t be
seen and it works good,why bother? I do seem to remember some
articles on this subject,,,You might go on line to Electric Radio and
follow the directions to the index of past issues,most likely find
it .. GL Harold/ W4PQW

Well, that's something to consider. I can only add that I collect and
restore (or have a try at it, anyway) these oldies to their respective
original condition/configurations. I suppose I could let this
particular unit, as-is. I did find that the ER article, same subject, is
apparently not the mod done, here. But, as I said, point taken.....

Hi,

May 1964 QST had a product detector for the HRO receiver NBFM socket.
(I presume that is similar to to the NC-183D NBFM socket).
The article was by Loren Windom (of "Windom antenna" fame).

73,
Ed Knobloch

ANd realistically, the mod was made at the time the receiver was current,
or shortly after. That's when someone had an AM receiver they wanted to
use on SSB, so it made sense to modify it.

Decades later, people are less likely to modify rigs, since at this

point keeping them "pristine" is more important to them than actually
using the equipment.

Hello and thanks for the read.
There is a very nice, working Millen modulation Monitor Scope on e-Bay.
Listed by an acquaintance of mine.

The sams photofacts all need to be gone from the Nortex Electronics
store in Benbrook TX. (Fort Worth)

Local persons should come get them. all or part. These have not sold and
paper recycle pays $3/100 lbs and that is where they may go soon.

any halfway reasonable offer accepted. all or part. now is the chance..

Approx. 47 filing cabinets full incl. the cabinets!

(that's about 8-10 sets of these great low numbers 'tubes' sams manuals,
folks)

plus all the single drawers, the boxes and the loose books (stereo
facts, cb facts, etc).

conact Jimmy and come look! you won't regret it.

contact:

JIMMY WATERS
817-253-1498
cjwaters222@yahoo.com

no decent offers will be refused.

DO NOT CONTACT ME.

Some how I lost the URL for the site for HP discontinued product
manuals. I just got a dead HP 209A and need to get it going. It appears
that one of diodes near Q2 has shorted and toasted 2 or 3 resistors in
the same row. Any tips or a scan of the ps board or a manual copy
appreciated.
tnx

I don't see it in the 'manuals' section on Agilent's web site, or
BAMA web site.

Sometime in the 1960's or 70's I bought a similar kit at the old
Portland Radio store in Portland Oregon. I installed it in a National
HRO-60. Worked good, as I remember. I don't have a clue as to who put
the kit together. It was a commercial enterprise of some sort. It was
one of several kits in bags on a rack.

I would vote to just leave it in the radio along with any information
you may discover, or a schematic you might draw out.

My $0.02 worth!

Paul, KD7HB

The URL for the HP manual archive is http://www.hparchive.com/hp_equipment.htm,
but the 209A manual isn't there.
You can find it at:
http://www.manualserver.com/signal_generator_manuals.htm
http://www.manualsplus.com/
https://www.ridgeequipment.com/store/manuals/search.php?query=209A

Take your pick

Thanks for the leads but I don't want to spend anymore on this thing as
I will exceed its what it's worth. . The case is very nice and not beat
up, close to new so I believed it was a working unit. WRONG, but I've
been wrong before. I have a working 204C and schematic but the ps is
just enough different that I can't use it for repairs. Something should
show up sooner or later.

I might recommend the 6336B. It will require a high-temp (read: ceramic)
socket and generate a tremendous amount of heat. The regimen for
changing a 6336B is to use asbestos gloves. The tube has a 6.3v filament
which is convenient. Somewhere I have an appropriate schematic.

Just because the load is a tube doesn't mean that one should use a tube
linear regulator to provide the power.

A switcher would be a much better power source.

The problem is the starting surge on the zeners. Set the zeners up with a very high value resistor in series with them, so that you only have a tiny trickle of current generated with the shunt regulator.

THEN, apply the regulated voltage from the shunt regulator to the base of a big NPN pass transistor. You MAY need to use a darlington to get enough gain to get it to regulate properly, but maybe not.

In theory, the transistor only needs to be rated for the voltage drop across it, so you can use an MJE18006 transistor (1KV breakdown) without any problem. In practice I like to have a little more safety margin.

The series regulator is a LOT more efficient than a shunt regulator.

If you do it with a tube in place of the transistor, consider the 6HV5, maybe?

Hi,

Does that tetrode have negative screen current at some
loading/drive conditions?  If so, that will complicate
the screen regulator design.

73,
Ed Knobloch

Thanks to all who offered suggestions on acquiring the 32.1 Crystal that I
needed for my T4XC. I have found one. It is on its way. I do need a 14.6
MHz Crystal for the 80 meter band on the R4C. It is off frequency a
little. Please let me know if you have one.
Thanks, Charlie Hugg, K5MBX

What do you need?  There are only a couple possible power supply
configurations.  If you draw out that section of the circuit, and
what the output voltage is, I'll tell you what the values ought to be.

> is a peak wattmeter, and the peak reading button is pressed in. (2)
> The actual output of a class C modulated final (s) modulated by a
> class B modulator is four times the carrier power.

Just a remark on Bird wattmeters:

- it is true that a peak wattmeter will correctly show the peak power of a 100% amplitude-modulated carrier (4 times the unmodulated carrier power)
- conversely, a normal (i.e. non-peak) wattmeter will NOT correctly measure the average power of a carrier 100% amplitude-modulated by a sinusoidal tone (that is 1.5 times the carrier power).

Reason is that the (non-peak) wattmeter actually measures the average voltage of a rectified RF signal sample and displays the measurement result in terms of RF power by the use of a non-linear (quadratic) meter scale.

The average voltage of the rectified RF signal does not vary when modulation is applied, as the positive peaks are perfectly compensated for by the negative peaks. Such compensation does not instead occur with regard to RF power, as the positive-peak power is, as already said, 4 times the unmodulated carrier power and not just 2 times.

In conclusion the Bird wattmeter (and all other wattmeters working on the same principle) will show the same RF power, independently of whether the carrier is modulated or not. And that is clearly wrong.

Only measurement devices that actually measure RF power (e.g. bolometers) will correctly show the modulated carrier power.

A magnificently built, balanced output antenna tuner for use with
ladder line, open wire line.   This item is for sale on E-bay Auction
ends Sunday 12/2 at 19:00Z

To view listing, copy and past link below:

http://cgi.ebay.com/ws/eBayISAPI.dll?
ViewItem&rd=1&item=290185692713&ssPageName=STRK:MESE:IT&ih=019

Highlights & Features of this tuner:

The twin inductor/current balun design provides a truly balanced output.

(2) 14 uH roller inductors, coupled to a WW II vintage dial with 25 turns, 1/100 turn markings.

High/Low Impedance Switching: Switches the capacitor bank to tuner's input or output. "HI" position is used for impedances above 50 ohms; "LO" is used for impedances below 50 ohms.

Variable and fixed capacitance controls - continuous range is from 25 to 1250pf @ 4500 Vpk.

Variable capacitor dial is the classic 4-inch National Velvet Vernier.

Beautiful, real wood venier over aluminum front panel.

Dimensions: H,W,D = 8 X 19 x 15 inches, approximate weight = 30 lbs

This is plausible only with a pure, single-tone sine wave audio input
signal. I have looked at my own voice on an AM-modulated carrier on a
scope: it is highly asymmetrical. Even the books sometimes mention this.

  Such compensation does not instead occur with regard to RF

There are peculiar circumstances when AM results in upward or downward
plate current deflections upon modulation ... all with their own
symtomology and causes.

> Only measurement devices that actually measure RF power (e.g. bolometers)
> will correctly show the modulated carrier power.

I think a scope looking at RF voltage (with either a digital or
electrostatic waveform "storage" functionality) into a pure resistive
dummy load would be just fine.

Ron,
        In the MLA-2500 manual, the resistor is only listed as the
grid current shunt, without giving the resistance, but other info I
have about the MLA-2500 gives the original grid meter shunt a
resistance of 0.0462  Ohms.. FWIW.. Best Regards, Tony, WB8MLA

Ron,
        Its a little confusing, however, both SH1 and SH2  are listed
at 0.0462 Ohms, according to my MLA-2500B manual.. Off the top of my
head, that would give a full scale reading of one amp, both for grid
and plate current.. Good Luck.. Tony, WB8MLA

MI5 Persecution Update: Friday 13 November, 1998

If You Intend To Reply, Please Read This

If you have any questions or observations you would like to share with me, then you are very welcome to reply to my fax number 0171-681-1190. But please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. I do not know if he had anything intelligent to say in his 20-page fax because I applied judicious use of the "Delete" key on my computer. Faxes over a page or two will be deleted without being read.

MI5 Resume Hostilities in Response to these Faxes

When I wrote last weeks "MI5 Persecution Update" I remarked how quiet my life had become. No longer! MI5 have restarted hostilities with a vengeance the past week, in response I believe to the faxes I have been sending to members of the House of Commons.

On Saturday 7 November I went to Clapham Picture House cinema to see the film "Antz" (a very enjoyable film). At the cinema, I was verbally assaulted by a group of teenagers with the words "still crazy", repeated about ten times. There was a film with that name showing at the cinema, but it was clear their abuse was directed at me. I do not look ill, so why would they pick on me? answer, the incident was set-up by the persecutors. One of the teenagers also said to another, "I don't know what we're laughing at".

The following day, Sunday 8/11/98, I was on my way to play squash when I was verbally assaulted by a youth who said "it was so funny", without the slightest trace of humour. What he meant by this phrase was that was funny, and they were trying to humiliate me. I have heard this phrase "it was so funny" used at me before many, many times over the last eight and half years.

Please Encourage Keith Hill MP to Help Me

I live in a bugged house, bugged both for audio and video. My movements are monitored by MI5. The Security Service have followed me to Canada, to Poland and the Continent, to the States. I cannot work anywhere, not in England, not in Canada, because MI5 will destroy whatever employment I am able to obtain. I have asked Keith Hill MP to help me, and he has refused.

The situation is intolerable. It is Mr Hills job to help me out of this mess. So, please, as I said in the last fax a week ago: Do not waste your time returning multiple copies of my faxes to my fax mailbox, as some of you have done. Instead;

Please encourage Keith Hill M.P. to help me.

I am sorry to be using this device to encourage Mr Hill to help, but I think eight and half years are quite enough and it is time something was done to bring this matter to a close.

MI5 Persecution : BBC Newscasters Spying on my Home

This week's topic is the quite extraordinary claim that BBC newscasters such as Martyn Lewis and Michael Buerk have spied on my living room while they read the news. I currently have an advert running for the next six months in Private Eye's "Eye Say" column (at a cost of over #200) which says,"MI5 Persecution - BBC Newscasters Spying on my Home"; the story of my campaign in the Eye is on my Website at; http://www.pair.com/spook/evidence/plaint/priveye.htm

BBCs staff magazine Ariel also ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm

Beginnings

The very first incident in the "MI5/BBC Persecution" occurred in June of 1990, when a newsreader reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

Most of the "TV watching" has occurred on the news, and most of it in summer 1990, although some as late as autumn 1993. My website has a few extracts of what might be politicians "getting at" me, in particular John Major and interviewer Dimbleby sharing a joke about the "Knutsford Guardian" which is almost certainly about me.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

Examples of Media Harassment

Here are a few examples which I can still remember of media harassment;

In early 1992 I was watching the BBC news with Martyn Lewis on a small black-and-white portable television at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

Victor Lewis Smith in his TV (BBC2?) program at the end of 1993, had a taxi-driver saying, "theyre all out to get me", to which VLS replied, "but you're quite intelligent aren't you?" (what a nice chap VLS is, compliments no less!)

Paul Daniels the TV magician, sometime in 1990-92 (sorry I can't be more precise but it was so long ago), made a "crying face" and put his face in his hands, which was his way of expressing that I was frequently crying in 1990-92, and that he and other media people found my crying funny.

Kenny Everett (deceased) on some talk show, compared me to a "huge ape" who "scratches himself"; he made some other remarks about what the "ape" got up to which unfortunately I cant remember. (I remember that Everetts comments were quite sympathetic and human, but were obviously about me.)

Stephen Fry on another talkshow (Wogan I think) talking about "masturbatory fantasies", he then referred to me with the words "you prat"; I wonder if the studio audience knew what he was talking about and to whom his comments were directed?

Griff Rhys Jones on Clive James' TV show, made a "lunatic face" (wide fixed grin) to which I said to the TV that he had a "face like a horse's arse", to which Clive James said to GRJ "did you hear that?"

Crimestoppers summer 1990, remarks by a Midlands police officer on the programme, while Nick Ross was presenter (as far as I can remember). The officer talked about "in car entertainment". Nick Ross said to officer, "why don't you stop doing it?" to which he replied, "we can't while he's like this".

BBC2 Newsnight in autumn 1993 had a piece on football hooliganism. A black interviewee said apparently of the hooligans, but in fact of me; "they're just idiots, carry on with the surveillance".

There was an incident with Jonathan Ross which I remember clearly; he was on both BBC and ITV television at the same time, one (ITV I think) was recorded, the other channel was live. Ross has a speech impediment which causes him to pronounce his "r"s as "w". I sarcastically said something about "Mr Woss" to the recorded channel, then turned over to where he was live, and he repeated "Woss" with heavy emphasis and sarcasm.

On the radio, in spring 1994, Chris Tarrant made a sarcastic remark in his morning show, saying "he says were trying to kill him, we should be done for attempted manslaughter", to which another of the studio staff said, "oh no, dont say that". His comment was in reply to a comparison Id made the previous evening between my persecutors and the Polish secret police who murdered dissidents.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "interactive watching". They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

I can understand that they might think that if they were to make written denials to me, then many other people with my condition might write to them with similar questions. But Ive asked a couple of journalists if theyve been writing about me, theyve made written denials, Ive believed them, and I have not put their denials on my website because, since I believe their denials, it would not be relevant to publish them.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

One of the strangest aspects of "TV watching" is that Buerk and Lewis have convinced themselves that their "interactive spying" is reasonable behaviour. Martyn Lewis thinks of himself as a "gentleman". He expressed in 1992 that he was "on my side". If this matter ever comes out into the open, I wonder what these newscasters will have to say for themselves, and what the British public will make of their behaviour?

Media Persecution Evidence on my Website

You may directly access the Evidence section on my website at URL;

The category currently contains four video segments, a number of audio files and three published articles. The first video of ITN's John Suchet is unfortunately a mistake - after looking at it again it is obviously not about me. The two Ken Clarke excerpts may or may not be about me; it is funny that he should keep on harping about "paranoia" and "madness", but I have given these ratings of only 30% certainty, as it is more likely that they are not about me in particular, and Clarke is simply displaying the normal prejudices against the mentally ill found in much of society.

The piece I find most interesting is the Dimbleby/John Major interview from April 1997. I have assigned this a 90% rating. Dimbleby starts by emphasising a report from the "Knutsford Guardian". Major recognizes what's going on and joins in with a falsely apologetic "heaven forfend". The emphasis is on the first syllable pronounced "nuts" in "Knutsford", which is repeated three times. Of course this is hardly anywhere near convincing evidence; the really clear items were all in 1990-92, and they are basically unobtainable now.

If you're reading the website, have a look at the two files from David Hepworth's programme on GLR radio. The first one from 21/Feb/1997 has him talking about an "embarassment" of prizes and "absolute obscene", in reference I believe to the verbal sexual abuse that was being used against me at the time (and which unfortunately is still current). In the second file dated 9/May/1997 he again talks about "absolute embarrassment" of prizes, followed by laughter. To my mind he knows I am listening to his programme, and deliberately makes these remarks for my benefit, with very little attempt to disguise their purpose.

Bernard Levin - "Fanatic's Fare for the Common Man"

On 21 September 1991 this article by Bernard Levin appeared in The Times. It is reproduced in the Evidence section of the website, or may be accessed directly at URL;

To my mind, Levin's article described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

Levin writes about a "madman running loose about London" who "bursts into tears, and swears it is all true. And it is." I am pleased to agree with his assertion that "it is all true" because the truth is what I presented to my friend in September 1991 and it is what is being presented to the readership of these articles now.

Conclusion

The harassment, in particular media persecution, was at its strongest in 1990-92. Today, I am recording everything I watch, read and listen, and the media have pretty much given up. It is now incidents "in public" which make up what there is of MI5s persecution. But much of the material from 1990-92 still exists in archives, although the organisations which have those archives generally wont make the material available to the public, for copyright and other reasons.

MI5 can no longer employ the media to persecute me, partly because journalists now know who is behind the persecution, and also because I would publish any instances. My mistake during 1990-92 was to not record instances as they happened; Ive learned from that mistake, and know better now.

BBC newscaster Nicholas Witchell cant stop himself laughing

During 1990-91 there were very many instances of "interactive television" where newscasters and other TV presenters saw on a screen before them what was happening in my home, and reacted, frequently by laughing at me. During this period I unfortunately did not record these programmes. For the last year or two, I have been recording everything I watch, and there has been a drastic decrease in such incidents.

However, on occasion, television presenters do still engage in "interactive watching" and react to what they see. This has been evident with Jon Snow of Channel Four News recently - a particularly interesting case, since it has been established that he cannot be corrupted by money (it is well-documented that MI5 offered him a tax-free salary and he turned them down). I wonder what device MI5 are using to encourage him to do the "interactive watching"?

On Saturday 10 April 1999 at 7pm, Nicholas Witchell on BBC2 News reacted when he saw that I was watching the programme, and I have his reactions stored safely on videotape. I have watched this tape several times and I am entirely confident that my evaluation of his reactions is correct. For several minutes his upper lip quivered in mirth as he attempted to keep a straight face. Then finally his self-control evaporated through the excuse of a weak joke and his face collapsed into a grin.

The strange thing is that I dont know why he was laughing at me, what I had done recently to "deserve" to be laughed at. The MI5 persecutors usually manage to invent some justification as to why people should laugh at and/or abuse me ("hes an X", "it was so funny" etc), so Mr Witchell could have been laughing for any number of reasons. Perhaps he found the views I have been expressing in these articles amusing? I suppose if youre paid enough money and ordered to laugh then even the most innocuous thing becomes funny.

Jon Snow of Channel Four News cant stop himself smirking, either.

On 12 February 1999 I was watching Channel Four News presented by Jon Snow. As usual, I was recording the programme, so that if anything out of the ordinary happened, Id be able to go back and watch it again.

Now, Jon Snow, by his own claim, is uncorruptible. He says he turned down an offer of a substantial tax-free salary from MI5 - they wanted to make him their mouthpiece, and he told them where to get off.

So you will be most surprised to learn that Jon Snow "interactively watched" me that evening, and on many other evenings. Approximately fifteen minutes into the programme, he announced that the US President would be making a live appearance at about 7.30pm; I looked at the clock on the mantelpiece; and Snow saw me looking at the clock, and visibly tried to suppress a smirk.

Uncorruptible, are you, Mister Snow? If not money, then why are you watching me, Mister Snow? Are they forcing you to watch me? Cant you turn the monitor off, Mister Snow?

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

Comparing the MI5 Persecution with German "Final Solution"

It might seem offensive to compare the mass murder of millions of civilians in wartime with the peacetime persecution of merely one person. Yet the comparison has been coursing through my mind for several years now, because the brutality of German intent to "sub-humans" is very much comparable to the brutality of British intent to someone they vituperate and term "not up to British standards". The methods may differ, but the persecutors mindset is the same.

The Germans first targeted the mentally disabled, too

During WW2 millions of ethnic Russians, Poles, Jews, mentally ill, gypsies and other minorities were rounded up and murdered in purpose-built camps by the German regime, in the name of "racial superiority". Fifty years on, the British Secret Police, MI5, instituted a campaign of mass hysteria; but in their cowardice, limited their activities to one single victim.

It is instructive to note that the early German "cleansing" effort was directed primarily not at Jews, but at the mentally ill. The Nazis set up the T4 project in the thirties to "cleanse" away 70,000 mentally disabled people, including schizophrenics and epileptics. After WW2 the Jews with their media influence used the reaction from the holocaust to roll back anti-semitism in the Western countries; however, the mentally ill are today still a persecuted group in the modern Western world as they were under the Nazis (the current Jewish home secretary in the UK intends to bring in laws for incarceration without any criminal charge for some mentally ill people - he protects his own minority, but does nothing for the other minorities in todays society), and this continuing bias forms a central cause for the current acts of persecution in the UK.

Widespread knowledge of what is happening to the "un-British" minority

In both the German persecution of the thirties and early forties, and the current British persecution, many, many people are well aware of whats happening. There is widespread complicity through inaction of populace; and in a substantial proportion of the mainstread population, the persecution had/has widespread enthusiastic support; yet in both the German case in the 1940s and the British today, the existence of persecution is a mass secret which must be never admitted out loud. In the recent Lawrence case this "secret bigotry" has been termed "institutionalised racism", and that is a very good word for what the British are doing today The persecutory attitudes and omerta regarding them are so deeply ingrained in the national psyche that they define the national mood

During WW2 many Germans knew minorities were disappearing, and through inaction quietly condoned their government's mass murder of "un-German" minorities and inferior "foreigners"; and in the 1990s, similarly, many English people know what the MI5 British Secret Police have been doing, and not only condone it, but actively take part, because of xenophobia against the "un-British" unit minority that is the target of "British" actions. This attitude by the British persecutors has been made explicit through the words "he's not up to British standards"; the British seem to have found their very own "untermenschen" to victimise.

Why these obsessive "holy wars" happen

This type of aggression occurs when the majority is threatened or humiliated in some way, economically, militarily or culturally. In pre-WW2

Germany the threat was primarily economic and military, following Germany's humiliating defeat in the first world war and the reparations it was forced to pay. In modern Britain, one might guess that the majority English who are behind the persecution feel pressured by the swiftly diminishing status of Britain in the world, and the rapidly increasing coloured colonisation of their country, which in time will see the ethnic English a minority in their own land, and their more antisocial elements, unable to reply to the obvious threat, instead project their aggression onto another, weaker, unit minority

In both cases there is a whiff of "holy war" or irrational obsession with the persecution. Certainly the German behaviour fifty years ago bordered on the not-quite-sane, and the current British behaviour towards their chosen victim is strongly tinged with a leave-taking of reason. And the choices open to the victims are the same, since MI5 will never allow me to escape them, "if he tries to run away we'll find him", just like the commandant of Auschwitz telling the new arrivals, "the only escape is through the chimney".

The Victim Will Destroy Us if We Dont Destroy Him First

The persecutors propaganda is the same. Fifty years ago the Germans said, "if we don't do it to the Jews then the Jews will do it to us"; and MI5's propaganda in the early nineties concentrated on their victim as a "monster" aesome "untermenschen" minority.

"We are decent fellows" say the Brutal Persecutors

During the course of researching this article I read part of the very interesting book, "Hitler - A Study in Tyranny", by Alan Bullock. This volume contains a quote from Himmler on the "Final Solution";

"Most of you know what it means when a hundred corpses are lying side by side, or five hundred or one thousand. To have stuck it out, and at the same time .... to have remained decent fellows, that is what has made us hard. This is a page of glory in our history which has never been written and is never to be written."

In the MI5 persecution, too, there is a thread of deliberate brutality to the sick and vulnerable, while the persecutors maintain that "we are decent fellows". There is almost a conscious schizophrenia in the self-attitudes of the Security Service operatives and those in the public who they employ against me, which reflects the contradiction evident in the German attitude above. On the one hand, they stoop to the lowest and most base behaviour; yet at the same time, the MI5 operatives tell themselves that since they are civilised British people, then surely they must by definition be "decent fellows". Any indecency is made the fault of the victim; "hes making us persecute him, so we need feel no guilt".

Yet the conduct is atypical of the way these peoples see their normal modes of behaviour. Befslaughter was not typical of normal German behaviour up to that point. Similarly, the current MI5 abuse goes against the grain of British self-image as being "reserved" and "decent", since they are using terms of abuse which are common among blacks and other supposedly less-developed races, but not among the English.

Conclusion

The ultimate aim of both persecutions is the humiliation and physical extinction of the persecuted group. The Germans did this in a very direct way; the British Secret Police MI5 are acting indirectly and relying on self-extinction of their target, because in peacetime and in the current somewhat false climate of "political correctness" more direct methods are impossible. If MI5 undertook more direct action the mass "omerta" would be broken.

I have written this article with sincerity to show how a historically recent persecution in another country parallels what is being done in this country today. In both cases, the evil-doers are of their countries establishments, and rely on widespread tacit support to maintain the persecution and omerta around it. While the holocaust was undoubtedly the greater evil, it is important to be aware of the fact that had the Germans not been defeated fifty years ago, their plans would have gone through to total completion. In Britain today no force threatens the "permanent government" of which the Security Service forms a part; and it looks very unlikely that the wrongs perpetrated by the MI5 secret police will ever be revealed to public view, and the British secret state brought to justice for its evil actions.

MI5 Persecution Update: Friday 30 April, 1999

If You Intend To Reply, Please Read This

Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

Somewhere between 0 and 100%

The last few days there have been no clear recordable instances of abuse. However, while travelling on the Underground, while walking around near my home and going to friends homes, I am constantly troubled by thoughts that those people over there might be about to get at me; that the couple sitting in the opposite seats laughing are in fact laughing at me; et cetera, et cetera.

A comment by a scientist to the BSE inquiry sticks in my mind. He described the possible scale of the epidemic as "between 0% and 100%". It might not be happening, it might not happen at all, to any discernable degree.... or it might be total. Without clear recording, which seems to have become impossible the last couple of weeks, there is no way of knowing whether the harassment really is continuing, whether we have entered a temporary hiatus, or whether perhaps it has perhaps stopped for now.

But for the time being I think there arent any reasons to dicontinue these faxes. I only re-started them six weeks ago in response to a resumption of MI5 harassment; and I think I will need to be more convinced of absence of persecution before I discontinue my complaints.

The Newscasters are still watching

In the last few weeks there have been at least a couple of fairly overt instances of "interactive watching" by newscasters. I reported this in a previous "MI5 Persecution Update".

These instances are really very rare compared to 1990-91, when there were many dozens of such occurrences. Undoubtedly the reduction is due to my practice of videotaping everything I see. Recently I had the opportunity of showing this years "happenings" (Jon Snow/Nicholas Witchell) to my psychiatrist, and he agreed that in both cases the newscasters were expressing merriment without visible cause, and that objectively it might be possible for my claims to be true - although of course other people reported similar thoughts to him, and this thinking is usually a symptom of illness.

Read About the MI5 Persecution on the World Wide Web

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Waste Taxpayer Millions on Pointless Hate-Campaign

Recently I was talking to an independent observer about the nature and purpose of the perceived campaign of persecution against me. The person I spoke to, a highly intelligent man, said he was struck by the utter pointlessness of the perceived campaign against me. He also said that, if my theories were in fact true, many people would have to be involved, in the surveillance itself, and in the technical side of the delivery of information from my home to TV studios for example, if the "interactive watching" were happening as described. He voiced these thoughts without any prompting from me; but both I and other observers had arrived at pretty much the same conclusions, some years ago.

I saw a team of four men at Toronto Airport in 1993

To carry out the surveillance alone, full-time, would employ four or five men, or their equivalent in terms of man-hours. Each man would "work" an eight-hour shift, so you would need at least three men doing the surveillance, plus a connecting link / manager. An indicator that this estimate is correct arrived in 1993, when I was accosted by one of a group of four men at Toronto Airport; he said, laughing, "if he tries to run away well find him". Plainly these were the men who had been involved in the intrusive surveillance of me for the preceding three years.

On other occasions, I have seen the same man on two or three occasions. On one such occasion, at Ottawas Civic Hospital in November 1996; he gave his name to the doctor as "Alan Holdsworth" or some such; my hearing is not very good sometimes and I am not sure of the surname, although I am sure "Alan" was his first name. I saw exactly the same man again in Ottawa, at the airport, in July 1998. Obviously, other people must be "working" with this person; he would not be the sole agent employed in this case.

Usenet readers views on the Cost to MI5 of Running the Campaign

Here's what a couple of other people on internet newsgroups / Usenet (uk.misc) had to say regarding the cost of running such an operation...

PO: >Have some sense, grow up and smell reality. What you are talking about
PO: >would take loads of planning, tens of thousands of pounds and lots of
PO: >people involved in the planning, execution and maintenance of it. You
PO: >must have a very high opinion of yourself to think you are worth it.

and......

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that makes
PM: >it worth the while of the state to spend over one and a quarter million
PM: >on you?

Those are pretty much the sort of calculations that went through my head once I stopped to consider what it must be costing them to run this operation. At the very least, a quarter million a year - and probably much more, given the intrusive and human-resource-intensive methods employed. Times nine years. Equals well over two million pounds - and probably much, much more.

Its wasteful for someone with my skills to be unemployed

The wastefulness of the MI5 campaign against me is not just that of futile expenditure on their side. It is also extremely wasteful for someone with my talents to be unemployed and on a disability pension. I am highly qualified in numerate disciplines, yet am unable to work, specifically because of the MI5 hate-campaign against me. It is a terrible waste of resources for a supposedly efficient economy like that of the UK to be squandering the talents of a skilled and capable worker.

I made every effort to remain in employment for as long as I could, but ultimately I was defeated by MI5s employment of massive resources specifically targeted on my workplaces with the sole aim of seeing me evicted from those workplaces. You might expect this sort of behaviour from the Stasi or some other secret police force in a communist country where labour is cheap, and the governments aim on seeing its citizens confined; but for a supposedly free and efficient economy like Britains, the wastefulness resulting both directly and indirectly from the Security Services activities is simply criminal, and should never be allowed.

The international dimension means the costs are multiplied many times overoer had any sense, then they have surely taken leave of them over the last nine years.

Four years of persecution in Canada

The persecution re-started within less than five minutes of my arrival in Canada, as documented above, and in the "frequently asked questions" article on the website. The words, "if he tries to run away well find him" spoken by one of the harassers at Toronto Airport are now imprinted on my mind.

A year later I emigrated to Canada, intending to find a job and settle there, hoping that MI5s interest in me might dim with time. I did manage to find work there, but my hopes of avoiding Security Service interest were ground into dust. As detailed above, I saw the same man in November 1996 and July 1998, both times in Ottawa. Apart from these encounters, there were numerous incidents between 1994 and 1998 of harassment, of an identical nature and in most cases using identical words to what had occurred in the UK. It became quite clear to me that the permanent surveillance and harassment operation which MI5 had subjected me to in England was being continued.

For a team of four or five men to be employed overseas must cost a lot more than if they operate in their home country. And for MI5 to continue the operation for a period of over four years, continuously, must cost many hundreds of thousands of pounds. This confirms my belief that the state is funding the campaign against mehat the Security Service receives current annual funding of #160M. Divided by 1850 staff, works out at #86,000. But the unit annual cost of each "watcher" must be much higher than this, especially given the frequently mobile and overseas nature of their actions of the last few years. A very conservative figure might be a little over #100,000 pa for each of a team of five people, or half a million pounds per year. For nine years, so far. So the most conservative estimate of the surveillance element alone is perhaps four or five million pounds since 1990.

This guesstimate is of course theoretical - I am not privy to inside details of how MI5 split their funding. But to take some other examples, the cost of a US counter-surveillance specialist per day is USD 5,000. Even if the agents permanently assigned to me are not of this calibre - even if they employ specialists when difficult work planting bugs etc is encountered - their salary and support costs must still be very high. The individual agents are doing well for themselves as they are well-paid to exercise psychopathic instincts which in any sane society would see them in prison; but the taxpayers who must fund this terribly wasteful exercise are being "done" out of hundreds of thousands of pounds each year.

It must be emphasised that the above estimates are highly conservative. Besides the surveillance operation, it must carry a high cost in man-hours to propagate covert slanders through the population; to setup and maintain the "interactive watching" links to TV and radio stations, which these organisations continue desparately to "lie and deny"; and to induce antipathy in co-workers which would not otherwise exist.

Why they are wasting Millions of Pounds on a "Nobody from South London"

As remarked in the prologue to this article, it is really most extraordinary that the Security Service spends a chunk of its budget, every year for nine years so far, on a meaningless campaign against a "nobody from South London". That they are spending such a large amount of money has been confirmed to me on several occasions, usually by oblique references to "its costing this country millions". The supposed "logic" behind the persecution is that MI5 wish to avoid their harassment of me, and the involvement of the UK media, to be made public; yet as the reader will appreciate that is a circular argument, "theyre doing it because they want to keep it secret and avoid humiliation for themselves and their country" begs the question, "why did they start doing it in the first place?", to which in truth I myself do not know the answer.

Plainly MI5 with its rich budget can afford half a million pounds a year to waste on a "nobody from South London". Some time ago I was talking to a British surveillance professional on Compuserve who told me "this work costs a lot of money and is usally because the person I am following has done something (usually criminal) to warrant all this money and time being spent." Yet in this particular case it is plainly not the "victims fault" that the harassment is taking place. The hate-campaign against me is completely the creation of the obsessive psychologies of the MI5 agents who have made themselves my persecutors; it is obviously a "personal" campaign for them, and for years they misuse taxpayer funding to feed their insane, unnatural and fixated fantasies.

You are correct. There was an early one and a late one.
The black one is the later one...with a solid state module for the
modulator...instead of a particularly hard to find tube.

...Dave

Offer to donate them to a local public library. A couple of the libraries in this area have complete sets of Riders, which is very convenient.

Faxes Sent to British Media logs

During the 1998-2000 period my records indicate that I sent at least 6,137 faxes to the British media,
of which 5,775 went via TPC's email-to-fax service and 362 were sent via fax-modem direct from my computer.
The actual figure is obviously higher since, for most of this period, whenever a recipient asked to be deleted
from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may

have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes was to keep more accurate and complete records, but the intention was thwarted by the police complaint.
Also in April 2000, I added some further fax numbers to my media mailing list and records, which is why some of the faxnumbers below have only a single entry, and some indeed have none.

After checking, it's the new tower in this link. I'm hoping the
element lengths are all the same.

I wrote to Hy Gain, as they say they will supply old manuals
for $5.00, but since MFJ took them over they don't even reply,
really pathetic. I also ordered some parts online, no reply
so far. I wonder if they have a death wish?

Funny thing is, I know I have the manual here somewhere but
can't find it in all this junk. I know you fellows never have that
problem.... he he....

Anybody here operate the H-P312*? H-P call it a 'Selective Level Meter', but it's a truly excellent 1 KHz to 18 MHz receiver, with AM, AM/AFC, Beat, USB and LSB modes, digital display to 10 Hz. I've had one for years, never given any trouble until recently when the VFO transistor 2N708 failed. Replaced with a 2N2219, just as good as it always was.

John

For years here as well. And if you take the bandwidth to 50 Hz, you can get well below 1 KHz with the tuning. I have used mine to detect power line frequency components out of three legged regulators. (Some good, some bad and some ugly!) I have a number of spare boards for the B model. If anyone is in need, keep me in mind. Wonderful box, even more so with the 313 tracking generator.

I have a 4 month old Icom IC-7000 with an LDG AT-7000 automatic antenna
tuner that I would like to trade for a Collins KWM-A of equal value.

The 7000 has no issues, has never been mobile, no modifications except the
Bob Nagy mic improvement mod, and it comes from a non-smoking environment.

Please let me know if you have any interest.

Thanks.

A lot TV sets and other equipment with wide band IF's used stagger tuning. This works fine but is a PITA to align. As you say a sweep generator, markers, and a scope are the only way. Actually, I've found sweeep alignment of standard plain vanilla IF's is often helpful especially if you want to get the peak symmetrical.

I've tried to find a schematic or other info on the BC-453 but have not so far been able to. Evidently the IF is different from other command sets. There is plenty of info on the other receivers and transmitters but somehow this one seems to have fallen through the cracks.

     Google found a rather poor schematic, but it doesn't provide
much enlightening info on the 85kc IF cans. I think I got the
schematic successfully posted on ABPR.
     Even when the 453 was a hot item, I could never find much that
explained it's bandwidth adjustment. Just a few articles in 73, QST
and what was that other popular ham rag? They just said pull the
rod out. I, of course did pull one out. By the roots. But, no problem,
there were plenty more available without attempting a repair. Used
ones with a little mud, or having been stepped on were $5 or less.
     Oh, and yes, I guess that "stagger" tune was the common way that
TV set IF's were (are?) broadbanded.
Lynn, W7LTQ

Look at QTH .com,  HF radio / DX-100  he says it delivers 275 watts
out into a 50 ohm load..I think that must be about 300 %
efficient ..Extra class says that.. OHWELL....

He said 235W out, as visible on the Bird. He's got it dipped at 350mA,
and if he solid-stated the HV rectifiers and gets say 1KV on the plates,
it should be possible. (Granted, not for long until the 6146's give
out.) It's a very handsome DX-100.

All BS aside, NO DX-100 ever made would or ever did do 235W out.

Hi,
I don't know what's under that DX-100's hood (perhaps a third 6146,
per the mod appearing in the Yahoo Heathkit group archive,
or a couple of big sweep tubes) I am just
pointing out that the power output shown is consistent
with the plate current shown, assuming the original
HV transformer is used - no laws of physics are violated.

I think a pair of 6146's +might+ be able to make 235W out
using much higher than normal screen voltage,
but only for a matter of minutes before tube failure.
I'd interpret such high output on an unmodified DX-100
as a fault condition.

73,

Ed Knobloch

I found complete military manuals with alignment data at:

http://www.kg7bz.net/

The adjustable coupling is used for alignment. Two receivers have variable coupling. The coupling is set for minimum (greatest selectivity) for adjustment. Then either just the first or all three are set for maximum coupling depending on the particular model.

I knew I had seen these manuals somewhere but had to look at the bookmarks on another computer to find them.

I recently acquired a National NC-125 receiver with no speaker. What is the impedance of the matching speaker that National used to sell for it? Is there a clear downloadable schematic available? I downloaded the operating manual from bama, but the schematic and parts placement diagrams aren't very clear.

73,
Bob AD3K

The NC-125 has a 3.2 ohm output - but you can use 4 ohms, 8 ohms. There is not much difference. The audio quality of the NC-125 is "communications" quality, so the speaker does not matter much.

Basically, any old radio speaker ought to work. I expect 95% are just the right impedance.

Wow, thanks for bringing KG7BZ's web site to the front! The alignment
procedure you found there explains a lot.

275 watts may be correct, under two conditions, (1) The Bird Wattmeter
is a peak wattmeter, and the peak reading button is pressed in. (2)
The actual output of a class C modulated final (s) modulated by a
class B modulator is four times the carrier power. That said, he may
be correct, as long as he is speaking into the microphone and watching
the peak power, which would be in this case, true power. In fact, it
would be a little low.. My DX-100 while tuned to around 120 watts
carrier, and then tone modulated with a 1000/1575 cps dual tone puts
out a little over 448 watts on a Bird 4391 digital wattmeter, peak
mode, into a 1000 watt Bird dummy load.. This is why FCC regs now only
allow AM operation with a 375 watt carrier, 375w carrier X four =
1500w PEP, true power.. I do agree with all else everyone said, there
is no way a pair of 6146s in a DX-100 are going to produce a 275 watt
carrier.. Perhaps, solid stated rectifiers, new tubes, you may see 170
watts, but that would really be pushing it.. Best Regards, FWIW, Tony

I agree with this. I have no idea why people like to "spin" their data but any DX-100 should be discussed in terms of putting out about a 100-110 watt CW carrier and forget the crap about "peak" power that is there for milliseconds, and ignores the likelyhood that there is also zero output for milliseconds, too. A 275 watt carrier is going to mean about 350 watts input and at 70% efficiency we're talking about double the watts converted to heat on the plates that the plates are rated for. Did that guy say what the plate current was and what the plate voltage was on key-down? Start drawing overcurrent out of the HV power supply and that plate voltage is going to drop a fair bit.

When I was a kid, a lot of guys were putting 6293s in their finals and taling about more DC input (BFD), but they never said what their actual plate voltage & current were. Where's the power going to come from for the modulators? Did that extra plate current start saturating the modulation transformer secondary? You'd get some extra heating there, too (not good).

While surfing the net I came across a lot of Hams building and
restoring old transmitters. I'm starting this group to further that
endeavour.

It is indeed Joe, with a little Photoshop work to make the pic look older. I
wanted to see how many people would pick him out.

Plus the original; photo had his Heath gear behind him, so I had to put some
black wrinkle stuff in there

Same kind of playing around with July- It is Don, K!DC with his vintage
station. The original was in color taken about 2 years ago. It was on the
cover of Electric Radio

Just to keep a track for future reference, we have just ascertained
that the RACAL MA161 is a fine tuning unit for the RA117 receiver. It
works as an external (variable) Local Oscillator in substitution of an
internal 1700 KHz crystal for the mixer between the 1600 KHz IF ant
100 KHz IF, thus allowing for fine tuning.
Thanks to all who helped.
Antonio I8IOV

Hi Carl,
Feb is fixed, but the rest of the year is still out of sync.
That is a great picture of Joe. It looks like it was taken 20 years before he was born.

Hello:

I have a Universal M-7000 terminal, and no manual. Is there a manual available on the web ? And also, how can I tell what version of the software is installed ?

Thanks for any help !

Its an Electro-Voice, probably a model V-1, the cheapest of three versions they made. These were made from about the mid 1930's to the late 1940's, perhaps even into the early 1950's, I am not sure of the exact dates.

The 1945 catalogue price was $27.50.

Richard
Thanks for the lead, I Googled the Electrovoice V-1 and mine looks very
much like the ones I found.

I'm sure that is what it is, it looks like the ones in the catalogue illustration. The V-2 and V-3 had lables on the front under the switch. I think these were fairly popular microphones in their day. They had good performance and were relatively cheap. Of course, the most familiar ribbon mic is the RCA 44 series which has an overall resemblance but is much larger.

A number of other companies made ribbon mics where they could get around the RCA patents. One odd one was the Bruno Labs mic which used a ribbon type diaphragm but operating between a pair of electrodes so that it was actually a form of condenser mic. These were made from about the mid 1930's to perhaps 1940. I've never seen one in the flesh. Both the EV and Bruno mics were advertized in QST and in some issues of the ARRL Handbook.

BTW, the RCA 44 mics weighed in at around 9 lbs each so I guess they are on topic in the boatanchors group:-)

Faxes Sent to British Parliament logs

During the 1998-2000 period my records indicate that I sent at least 14,480 faxes to the British Parliament in Westminster, of which 9,138 went via TPC's email-to-fax service and 5,342 were sent via fax-modem direct from my computer. The actual figure is obviously much higher since, for most of this period, whenever a recipient asked to be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

MI5 Persecution: How Could It Be True?

If you have the patience to read these articles you will be struck by how apparently fantastic the claims being put forward are. You may ask yourself why such seemingly nonsensical assertions are made. This matter has been discussed on the Internets UK-local newsgroups for three years now, and the denizens of the uk.misc newsgroup (the so-called "miscreants") have come up with a number of theories to explain these posts; it has been variously suggested that they are a troll (an artificial creation for the amusement of its author), that they are made by MI5 themselves with the purpose of discrediting other conspiracy theories, and that the poster is mentally ill and the articles are symptomatic of the illness (the view held by most miscreants).

Are these claims the product of mental illness, or is that just a cover?

The most obvious explanation, that the claims made result from the admitted mental illness of the author, is the one which the persecutors intend be the one accepted without consideration being given to the possibility of the claims being true. The persecutors have actually been very clever about this, both in selecting as their target someone who was known from school or university as being borderline schizophrenic, and in ensuring the nature of their persecution corresponds to what often features in the delusions of a schizophrenic.

The very first incident of the persecution occurred in June 1990, when I was still a student at university in London. It consisted of a reaction (giggling) from the newsreader, Sue Carpenter of ITN, to what she saw happening in my living-room at my parents home where I was living. Before your imagination gets the better of you I should make clear that what the newsreader was reacting to was not too embarrassing in nature; my mother had brought an apple for me into the the room, and Sue Carpenter found this amusing.

I recognized that Carpenter had reacted to what she had seen in my living-room, yet this idea still seemed completely fantastic to me. My reaction was to continue watching television, particularly the news, to see if this incident would be repeated. It was, many times, both on BBC and ITV. An intelligent person would have thought to obtain a video recorder and capture some of these incidents in order to try to explain to an observer what he saw in these broadcasts. Unfortunately, I failed this test of intelligence, since I did not record these programmes. I have recently attempted to obtain from ITN tapes of their news programmes dating back to summer 1990, but, unhappily, they have advised me that they do not have complete programmes including newsreaders comments dating back to that period.

From the outset, the persecutors structured their actions to ensure that any complaint would be met with disbelief, and dismissed as delusional. This is why they chose as their target someone who was known at school and university to be borderline mentally ill; and it is why they fired the first shots of their campaign through the broadcast media. Schizophrenics commonly believe the media harass them; it would be exceptional for "full-duplex television" to exist in reality. Those with schizophrenia also commonly believe people are talking about them; again, the persecutors have shown themselves very rarely, but act through intermediaries, both in the workplace, and in public and during travel.

Mental illness is not the cause of these claims, but the simulation of its symptoms is a cover used by the persecutors to deny their victim the ability to have his compaints believed.

What evidence exists to support these claims of "interactive television/radio";?

Quite frankly, I have very little evidence to support my claims. You may examine the "Evidence" area of my website to see such evidence as I have been able to gather. None of it is remotely conclusive. The "smoking guns" all date back to 1990/91, and it is really rather late now to start trying to look for material dating back seven or eight years. In 1997 I started tape-recording every programme I watched or listened to. I also started carrying with me a high-fidelity minidisc-recorder with good quality microphone to catch incidents of public harassment, but this also has not been as successful or conclusive as I had hoped.

Perhaps the best item in the "Evidence" section is the audio file "Life is so hard" (it is labelled with Garfield the cartoon character on the site), which I have given a certainty level of 100%. This item relates to harassment at my workplace in Canada in 1996. A co-worker called Mark was coming up with phrases and expressions which were repeating things being said at my Canadian residence, consequently leading me to believe that my apartment and home phone were bugged, and that the persecutors were passing their gathered information on to Mark. On one particular evening I said in my apartment, "life is so hard, and then you die". The following day I was able to record Mark saying exactly the same phrase at work.

Unfortunately when "they" know you are recording them, they simply dont say things which would unambiguously show harassment. When Mark the co-worker knew he was being recorded, he only made his remarks out of range of the recorder, for example outside the building. When the TV newscasters or radio disc jockeys know they are being taped, they limit themselves to saying things which are ambiguous, which even in my mind may or may not be personally directed against me.

Who knows about this persecution?

Surprisingly many people know. People in the media, such as BBC and ITN newscasters including Martyn Lewis and Michael Buerk, and radio disc jockeys such as Chris Tarrant of Capital Radio, know what is going on, and take part in it. Some co-workers at my former workplaces in England and Canada have known about the harassment. Quite a few people in the general public are also included. I believe the police are aware of the persecution, but, unfortunately, have chosen not to take any action to stop it. I have complained at my local police station in London several years ago, and I have stated on the internet newsgroups that I have done so, hence the police will be well aware of my wish to see the matter resolved. I believe their inaction denotes a dereliction of duty, but without good evidence, I am powerless to compel them to take steps to prevent further harassment, or deal with what has already taken place.

What is the purpose of sending these faxes?

These faxes are being sent to three distinct groups of people, namely Members of Parliament, the media, and diplomats & legal people. As you will have observed I am making use of the email-to-fax gateway at Demon Internet to send these faxes. I am forced to use this gateway since I currently live in North America, and cannot afford the high cost of direct phone calls to the UK.

My purpose in publicising my claims is firstly to discourage the persecutors from continuing their campaign, and also to attempt to bring their campaign out into the open, and thus perhaps identify the persecutors. Neither aim has been achieved yet, but I hope that with sufficient stimulation these aims may yet be accomplished.

The problem with the second aim is that those who read this article will fall into two groups, those who dont know anything about the persecution and consequently will disbelieve my claims as delusional, and those who do know about the harassment and may have some idea of who is behind it, but realise that if the harassers are exposed and the truth brought out into the open, then powerful British institutions will substantially lose prestige, and be exposed to ridicule.

It would give me hope to believe that these faxes will create a third group of people, those who find out that I am telling the truth, and who follow their consciences in standing up and seeing justice done. Only time will tell if this hope will be realized.

dk.marked.privat.foto:18149

Why do you think MI5 are responsible?

The question of who is ultimately responsible for this eight-year harassment is one which is very difficult to answer, as the persecutors have never clearly made their identities known to the persecutee. However, I believe I am correct in attributing the continuing victimisation to elements of the British Security Service MI5, and in this article, I will try to explain the reasons for this belief.

The British internet magazine ".net" featured my website on page 17 of their March 1998 issue (number 42). Their review kindly describes it as an "excellent site" and gives some details of what the net surfer will find there. Should you wish to reply to this article you can do so;

"When did you first suspect MI5 were responsible?"

Over Easter 1995 I went to see a local solicitor in London with a view to talking to the police about the harassment. Soon afterwards I did go to my local police station in Clapham and spoke to an officer there. The solicitor made a comment which suggested to me that the persecution I had been experiencing may have been organised by an intelligence service.

Up to this point, I did not have any clear idea as to who was behind the harassment. Only their agents were visible, in the media, on television news programmes, and on the radio; in the workplace, where things said at my home were repeated verbatim; and in some cases abuse in public and during travel, for example on the trip to Poland in June 1992 which I have already described.

Both from the fact that widely disparate individuals and organisations were employed as agents in the campaign against me, and from the fact that an entity would be required to marshal their resources in the areas of spying on my home and giving gathered information to their agents, it was clear to me that a single entity was responsible for carrying out the campaign. Yet from June 1990 until Easter 1995 I did not have a clear idea of who might be responsible. I guessed that perhaps some private individual or group of persons who saw themselves as my enemies had perhaps paid private detectives to organise the harassment. Alternatively, since the campaign had started in the media, I made a far-fetched supposition that perhaps it was an ad-hoc group of media people who had set themselves up in opposition to me. After Easter 1995 I saw that these guesses were wrong, and I made an I believe much more accurate estimate as to who my enemies really are.

"Why couldn't a private group be behind the persecution?"

There are several reasons why a private individual or group would not be behind this campaign.

Quantity of resources / Money. Here is what one Usenet (internet newsgroup) participant had to say (several years ago) on the topic of how much money it would cost just to keep the surveillance going.

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that makes
PM: >it worth the while of the state to spend over one and a quarter million
PM: >on you?

A private individual or group would not spend over a million pounds to verbally torture a victim without some financial motive or gain. Private industry is driven by the profit motive, and there is no financial profit to be had from carrying out a campaign in this way. If a private enterprise were behind it then they would have taken direct physical action a long time ago.

State enterprises, on the other hand, can afford to be wasteful, since they are funded by the taxpayer. They do not have to show a money profit. The employees or contractors employed by a state organisation such as MI5 are driven by their own personal profit motives, to make the most money out of their employers for the longest period of time. MI5 is funded to the tune of #150M p.a.; even a few hundred thousand a year would to them be affordable if their managers could convince themselves of the necessity of what they were doing.

Quality of resources / Technical resources - electronic and other surveillance. In summer 1994 a reputable and competent private detective agency was employed to conduct a counter-surveillance sweep of my home in London. They charged us over #400 for this, conducted a thorough search for radio transmitting devices, hard-wired "probe" microphones and also tested the telephone line. They found nothing. This was not altogether surprising, since it had been made very clear to me that there were bugs in my home; the "buggers" would not have made this clear unless they had felt their bugs were of sufficient sophistication as to be safe from detection.

But there is another lesson to be gained from the failure of the private detectives to find anything. The agency employed was one of the most reputable in London. They were employed on the principle of "setting a thief to catch a thief", for if the harassment were being carried out by private detectives, as I then believed, then surely another set of private detectives would be able to find the bugs that they had planted. That these "private eyes" were unable to find anything, and that the harassers were confident that they would not be able to find any bugs, points to the harassers being an order of sophistication above a private agency, and leads me again to believe that a state intelligence service is responsible for the surveillance and harassment.

Quality of resources / Technical resources - Interception of Postal service. In summer 1994 when I emigrated to Canada to try to escape the harassment, I wrote letters home to my family and friends in London. Quite soon after my arrival in Canada, the harassers were able to find precisely where I was staying. The only way I can see of "their" being able to find out my new address was by interception of my letters to the UK.

Later in 1994, I conducted an experiment to see if my letters home were indeed being read. In a letter home I wrote of being depressed and talked in vague terms of suicide. I deliberately chose this topic, since I believed it was the outcome my harassers were trying to achieve, and that if they read the letter, they would "echo" its contents. Sure enough, soon afterwards there were two incidents of people shouting "suicide" at me in public places in Canada.

It is inconceivable for a private agency to have the ability to intercept postal mail. The state security service on the other hand is well known to engage in these activities.

Quality of resources / Access to Media. One of the strangest aspects of this case is the access "they" have to the broadcast and print media. I still do not understand what could persuade newscasters such as Martyn Lewis and Michael Buerk, who consider themselves "gentlemen", to behave in an almost voyeuristic way by "peeking" into the living room of one of their viewers. A year ago I wrote to the BBC asking if these newscasters would confirm or deny the accusations made against them. The BBC replied that their newscasters had denied the accusations, but refused to do so in writing.

It is well known that MI5 have the ability to plant stories in certain newspapers, but convincing television newscasters to "watch" a viewer while they read the news would surely be very difficult for them to accomplish, unless they presented themselves to these journalists as being, for example, a group in the media who were seeing to it that I got my "deserved" treatment. MI5 has a history of manipulating the media, so it might not be too difficult for them to accomplish such a trick, whereas a private group would not have this ability.

"Have they ever denied that they are the Security Service?"

No. Never. This is in fact the main reason why I believe "they" are MI5 and not a privately funded group. If my guess had been wrong then I am sure that "they" would have crowed over my mistake, but they have never admitted nor denied that they are employees of MI5.

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly.

"If MI5 were behind it, why would they wish to mask their involvement?"

I have heard a number of times a belief from people in the media that it is they, the media people, who are behind the abuse. In spring 1994 Chris Tarrant the Capital Radio D.J. said sarcastically on his breakfast show, "You know this bloke? he says were trying to kill him. We should be done for attempted manslaughter". We, we, we. Tarrant thought it was a media conspiracy.

Returning to the question of "interactive watching" by television newscasters, it would again be much easier for them to take part in that sort of activity if they convinced themselves that the surveillance and abuse were organised by "their own", by media people. It must be second nature to MI5 to mask their involvement in the matters they deal with; in this case, they pretend the campaign is organised by a group in the media, and any journalists who suspect otherwise keep their silence.

Conclusion

Over the last three years I have stated with some force my belief that MI5 are responsible for my misfortunes. I have done so on Internet newsgroups, in letters and faxes to people in politics and the media in the UK, and in 1997 I made a formal complaint to MI5 regarding their activities; the Security Service Tribunal replied in June 1997 that "no determination in your favour has been made on your complaint". (I believe the statement by the Security Service Tribunal can be disregarded, as they have never, ever made a ruling in favour of a complainant.) In three years of naming MI5 as my oppressor "they" have never denied the charge. To me, their silence on this point indicates that my guess was accurate. I believe my persecutors stand identified. The question of why they should carry out this campaign is one I will try to answer in a future article.

MI5 Persecution Update: Friday 15 May, 1998

The persecution has been quite severe for the last week. It appears that my enemies are reacting to the steady stream of faxes making their way over the Atlantic to the fax machines of Westminster politicians and the media. Here is whats happened in the last few days;

The week started off with an incident in the cafeteria at a local shopping centre where I habitually drink my morning coffee. My enemies have concentrated since winter 1995/96 on throwing a particularly horrible sexual slander against me. They "put people up" to repeat this slander against me, and this is what happened again here.

On Thursday morning (yesterday), instead of going to the usual cafeteria I went to a nearby convenience store for coffee. The same horrible sexual slander was shouted at me very loudly by a member of staff as I walked into the store. This was the first time I had ever bought morning coffee in that shop. The other staff obviously knew what was going on, one of them said, "they screwed up my life".

The fax gateway I use to send these faxes to the UK has been working hard these last few days to shut down my access by barring the accounts I use to send these faxes.

I have received an anonymous threat from fax number 0171-219-6101 (the machine gave its name as "ETRA-HoC") which said, "Stop sending to this fax no 0171-219-6101 or else" (the consequences of continued transmission were unspecified). I invited the sender to apologise for his threat, but received no response.

This all adds up to quite a severe reaction to my faxes of the last few weeks. I actually find this quite heartening since it shows that my faxes are finding the mark and there may yet be a breakthrough in my efforts to expose the Security Service conpiracy of abuse against me which has now been going on for eight years.

MI5 Persecution: "Why would they be doing this to you, sir?"

This article will concentrate on the difficult question of "Why". The question which forms the title of this piece was asked of me by the police officer I spoke to in Easter 1995, when I went to make my complaint.

There are really two sides to this question. Firstly, why should MI5 be harassing anybody in this fashion? Secondly, if they choose to behave in this way, why should they have selected me in particular, and not somebody else? Alternatively, why did the persecution start, and why is it continuing?

I do not have definite answers to either side of this question, since my persecutors have usually kept themselves hidden and only acted through other parties. To know "why", one would have to know who the persecutors are, and something of their personalities, since their abuse is almost certainly symptomatic of a personality disorder of the abusers. Certain things however can be deduced about the abusers from the nature of their behaviour, and I will talk about this later in the article.

Why did it start?

It is clear that the persecution must have been initiated by someone who knew me personally, either at school, or at university, or socially, and knew that I was borderline mentally ill, since this is what makes me a target for the persecutors. Unfortunately, the originators have never been identified, and there are several possible candidates. Neither has the link from the originators of the persecution, to the persecutors themselves, ever been made clear. So who are the originators?

University Staff

The identity of the originators may lie in the timing of the persecution. It started in June 1990, while I was finishing a course at Imperial College in London, and a year after I graduated from Cambridge, where I received a degree in computer science. At Cambridge I had achieved some notoriety in the computer lab from various nefarious exploits. Roger Needham attacked me by saying that "there were great hopes for it, but it failed terribly". When I started at Imperial I found that my reputation had preceded me; Cambridge computer lab had spoken to I.C. lecturers about me. I.C. lecturer Frank McCabe summed up commenting about "setting up a straw man so you can tear him down". (Despite being "torn down" by the Cambridge computer labs lecturers, I still achieved a good first degree and a Masters degree at Imperial.)

Other students at university

So, the originators may have been university staff who knew me from my student days. But there are other possibilities. I had other enemies at university, including some fellow students. At my Cambridge college it was common knowledge that my mental health was dubious, and it was known that I talked to myself in my sleep - the floor and walls were quite permeable to noise, so other students heard. I was given the nickname "gibber" because of this habit. Sometime later, I managed to catch myself talking in my sleep when I woke up in the middle of the night.

Here is a quote from a participant in the internet newsgroup where I have been posting for the last three years;

>One thing which has been missing from this discussion is this simple
>prognosis: that maybe he is right and that, despite his admitted
>mental condition, there really is a campaign against him organised by
>now-influential ex-students of his university.

People I knew socially

I had yet other enemies in 1990 (I am a man of many enemies!). In January 1990 I broke up with some people I had been going out with socially. One of them, by the name of Andy Turner, wrote a letter to Alan Freeman, who at the time was a Radio 1 DJ. Freeman read part of the letter out on his Rock Show, about the "one who wore out his welcome with random precision", saying "thats a hell of a letter you wrote there Andy", and "with a schizophrenic youre never alone".

It is my belief that Andy Turner and his friends were trying to make trouble for me, and Turner wrote to Freeman with this in mind. Freeman may have discussed the letter with others, and things may have snowballed from there. This is, of course, pure supposition. The fact is that I do not know who the originators are, and can only guess.

Once it started, why is it continuing?

The answer to this question is obvious. It is unacceptable to the "powers that be" in the UK to have somebody running around who knows he has been targeted by the Security Service and media organizations, and who is in a position to embarrass British institutions. This has become particularly evident in the last week; as I send more faxes to UK politicians and media, so the pressure on me grows, and the volume of abuse increases.

Part of the reason the persecution continues is in the personalities of the abusers, and it is this subject to which I will turn to next, since the key to understanding the persecution lies in understanding those who carry it out, as much as we can.

The Security Service operatives, the persecutors, are they psychopaths?

Let us first examine the definition of the term "psychopath". DSM-IV defines "anti-social personality disorder" as a "pattern of disregard for and violation of the rights of others ... deceitfulness, irritability and aggressiveness ... consistent irresponsibility and lack of remorse". The Harvard Mental Health Letter of Sept 1995 describes these people as using "charm, manipulation, intimidation and violence to control others and satisfy their own needs. Lacking in conscience and in feelings for others, they cold-bloodedly take what they want and do as they please", having "no guilt or regret".

I must say, reading this description of the condition, that it fits the persecutors perfectly. The persecutors have never shown the slightest remorse or guilt. Even when I was severely ill, they continued to abuse me. They have repeatedly blamed their actions on me, which is another trait common amongst psychopaths. They have no respect for my legal or personal rights, and they use intimidation and verbal violence.

If the MI5 operatives are psychopaths then it would explain both why the persecution started, and the degree of verbal violence. Psychopaths by definition damage other people; here, the MI5 operatives find an outlet for their personality disorder, through "cripple-kicking".

Xenophobia on the basis of mental illness, and race

My enemies have made clear many times that one of the reasons they are persecuting me is because of my admitted mental illness. However, it is my belief that they are also persecuting me because I am not of ethnic English origin, and the fact that there have been several incidents of an overtly racist nature reinforces this view.

In one case, two youths on a tube train in London made openly racist references to me as a "soft toy, not up to British Standards". Another person near my home made remarks about "Polish people". In yet another incident in Croydon, a youth made comments about "foreigners".

But the main thrust of their xenophobia is because of my mental illness. I should make clear that I do not look ill; if you met me, you would not know that I had the illness. I take a relatively low dose of medication, and feel quite well. But the persecutors have repeatedly harped on about my supposed serious mental illness; they have called me a "nutter", a "schizophrenic", etc. They have also persuaded other people to use these terms of abuse. They are able to get away with this because abusing the mentally ill is still something which is mostly acceptable in Britain; the media do it, "nutter" is not taboo in the way that "nigger" is.

Conclusion

There are several groups of people who might have wished to cause me trouble, and I still do not know who originated the persecution. Nor do I know how the originators came to be in contact with the (presumed) Security Service operatives who have been carrying out the campaign. To know conclusively why it started, we would have to know who started it, and this information is not available.

However, we can infer some things about the personalities of the persecutors from their methods, and from the degree of verbal violence they employ. It is clear that a main reason for the continuing harassment is the psychopathic disorder of the MI5 agents who carry it out. That they have never been "brought to book" for their misdeeds reinforces their belief that they do no wrong; and, unhappily, until they are brought to book, their persecution campaign looks set to continue.

MI5 Persecution: .net Magazine Applauds my Website

The March 1998 issue (number 42) of .net Magazine reviews the MI5 Persecution website describing it as an "excellent site". The webpages describe in detail the nature of my persecution since 1990 by what are believed to be elements of the UK security service.

(snip image)

You are encouraged to read the web pages which include

- a FAQ section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public
- an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me
- factual descriptions of the state security agencies involved
- scanned texts of the complaints I have made to media and state security agencies involved
- posts which have been made to netnews over the last three years on this topic

Yes, rod pulled out for maximim selectivity (highest "Q")............  the
reciever's front end needs a pretty stable local oscillator to keep a signal
inside the new, 85kc IF bandpass.

It isn't the Q but rather the mutual coupling between primary and secondary windings. Hammarlund had a patent on this kind of transformer which it used in the Super-Pro series of receivers. In the Super-Pro two of the IF transformers have movable coils which are controlled via cams operated by the selectivity knob on the front.

Hi all,
I own a tube type racal unit whose nameplate says : RECEIVER FINE
TUNING UNIT -
MODEL MA161. It has the usual look as other vintage Racal equipment,
is for rack-mount and is two rack units high.
I' ve found no reference anywhere. Does anybody out there know what is
it?
Thanks,
Antonio I8IOV

As an intending come-back ham, from teenage 60's to now, and having acquired a
NCX-3 transceiver;- a dream machine of the original era, for which I need to
build a PSU, <and a Yaesu ftdx400 waiting complete!> - can anybody with
knowledge compare the receiver section of the NCX-3 with their receivers?

(Or comment otherwise;-?) (mods?) [I do need to relube the planetary drive!]
(I've looked at the relevant mentioned at rigpix.com, but am no wiser ...)

Thanks!

If it is what I think it is, it's an antenna distribution device with a
calibration oscillator that creates markers every 100KC.

Which brings to mind... anybody have schematics or docs for the Racal
MA937 or MA926 power supplies?

Thanks Scott, but I think it isn't what you think it is. I guess it
should belong to the family of external local oscillators that were
used in substitution of internal LO. It is tunable within +/- 500 Hz
with marks every 10 Hz. It has only one output connector and no input
whatsoever. Basicly what I would like to know is what receiver it was
meant for, what of the local oscillators it would substitute, and
whether anybody have any reference to point me to.
Regards,
Antonio

Ah. In that case it's an add-on feature to make a 1kHz resolution
synthesized receiver into a free-tuning one.

> Basicly what I would like to know is what receiver it was
>meant for

No idea, except that it will *not* have been anything cheap, and
possibly not a commercial item. Maybe Naval or long-haul short wave
communication links? COMCAN? Expect something huge and rackmounted.

> what of the local oscillators it would substitute, and
>whether anybody have any reference to point me to.

Google fails to find anything, unfortunately.

Chris.

Some Silvertone 1930s vintage consumer radios have the same
arrangement.

Hammarlund used to offer adjustable IF cans as stock items. I have somewhere a circuit for a high fidelity AM receiver using a couple of them. I didn't know any home type sets were made with them. The advantage of the Hammarlund arrangment over the tapped terciary coil system used by Hallicrafter's and some others is that the pass band stays symmetrical about the center frequency. In some other arrangements the bandwidth expands in only one direction. The SP-600 uses a tapped coil arrangement which does not have this problem and also expands symmetrically.

Not so huge, rack mounted but only two rack units, four valves, a
small crystal oven with two crystals, a tuning knob with dial, a
rotary switch which says: NORMAL, NORMAL +/- dF, FSK, FSK +/- dF.
My unit has serial number N00016. Probably only very few units were
ever made. No track anywhere. Probably this unit of mine is the sole
survivor today.

Antonio

The 10 uses a single 6AG7 in the output. I recall tht the 6AG7 has 11 watts
plate dissipation and the stage runs class A. Class A runs about 33%
efficiency - and the circuit is poorly laid out and resistors are across the
coils to prevent parasitics. I measured 3 watts output with my 10A.

Although the power output ought to be able to drive a pair of 6146 tubes, I
do not think that was the way they did it.

Hopefully the manual for the adapter will answer the question.

73, Colin K7FM

Well, to be sure, the scheme (old as you and others remember) sure
does change the mutual coupling between the primary and
secondary windings, but mutual coupling as a factor by itself does not
affect
bandpass. The mutual coupling adjustment, in this instance, by moving one
coil
into or out of another's magnetic field does affect the "Q" or "quality"

factor of
the tuned circuit's inductor. This, of course affects the resonant bandpass
shape,
     Changing the coil's mutual coupling mechanically (pulling the rod) also
affects the tuning of each coil slightly, and it was sometimes recommended
to
"repeak" the tuning of the '453's cans after changing the coupling. I found
that
I could not tell any difference by "ear", and in those days (late 1940's) I
had no sweep generator
or oscilloscope to "see" what was happening.
Old Chief Lynn, W7LTQ

BA984 LHR->TXL 13/June/1998

Certainty level: 100%

In June 1998 I travelled on the above British Airways flight to Berlin with my mother, to visit her family. There were two women in seats 30D/E, about 4/5 rows behind us. It was quite obvious from the torrent of abuse during these flight that these women had been instructed to harass me and attempt to obtain a reaction.

I did manage to record much of the flight, but unfortunately much of the recording is unclear because of high background noise on the aircraft. The following three excerpts from the recording are the best I can do.

The segment at position 11:34 minutes on my recording contains a fairly quiet word "paranoid", followed immediately by a much louder "yeah, he's paranoid, yeah". During the flight the abuse was not sexual, as it so often is elsewhere, but attacking my mental health.

One of the women in seats 30D/E said "paranoid" very clearly towards the end of the flight, but unfortunately I had run out of minidisc space and stopped recording by then. There is absolutely no doubt in my mind that these women were directed to harass me. This harassment happens without fail on British Airways flights; I've been on something like three or four BA flights in the last 5 years and it's happened each time. Presumably this is because of international law which says incidents on aircraft during flight are actionable in the airline's country of origin - so my persecutors want a reaction from me, and they want to see me "done" in the UK where they can influence the justice system.

These incidents never happen on foreign-domiciled carriers.

Evil old bat in BHS 18/12/98

Certainty level: 40%

Not quite sure how sure I am about this one. I went down to Croydon (Surrey) with my mother to buy her a beret. After doing the shopping, we went to the BHS store restaurant to lunch on fish and chips.

You can guess the rest. Auditory hallucinations my shrink calls them, faithfully recorded on Sony minidisc. Some old cow going on about "see that chap, the one over there, something's wrong with him".

It is quite tiring being attacked by random idiots in the street, or as in this case, by some random, evil old bat in a restaurant. Fortunately it is only a sporadic occurrence. My enemies seem of late reluctant to waste resources in my direction. Should I take this as an insult? Am I not worth the millions of taxpayers money which has been wasted on me? Are the obsessives of MI5 themselves the "nutters" and "really mad" which they accuse me of being? Interestingly this suggestion as to the psychological profiles of Security Service personnel has been made by others... it does lead one to wonder, doesn't it?

Ravenscourt Park 20/3/99

Certainty level: 70%

On Saturday I went to Hammersmith, specifically Ravenscourt Park. There had recently been a resurgence of persecution activity, following the Capital spams. I went to the cafe in the park and had a cup of coffee outside, with my mother. As I went inside the cafe to return the cups, a woman shouted a sexual obscenity (not present on this audio file - don't ask), and she said loudly "something's wrong with him". You can just about hear it in the audio file; listen very carefully, several times; it is distinguishable.

Much less subtle is the male voice shouting "take care he's a nutter" immediately after the woman's voice. As on the other recordings there's a lot of noise, but what the people say can be clearly heard.

Given that I take medication and look and behave quite sanely, and that there had been increased abuse over the last couple of weeks, it seems pretty unlikely that this incident was just spontaneous.... of course, you couldn't prove otherwise, but then that's the way MI5 mean their abuse to look.

I tried to find an illustration of the effect I am talking about on the web but could not. It would make things simpler.

Q is a measure of the ratio of inductive reactance of an inductor to resistance. the higher the value of Q the better the inductor but there are circumstances where the Q may be deliberately limited. The bandwidth of a resonant circuit at resonance is affected by Q, in fact, the definition of Q is the ratio of the half-power bandwidth to the resonant frequency. Varying the Q of a resonant circuit also varies the amplitude, the lower the Q the greater the losses and the lowe the amplitude.

Varying bandwidth by varying the mutual inductance of a transformer behaves in a different way. Up to a value of coupling known and critical coupling the bandwidth of the transmission curve does not change significantly but does increase in amplitude. If coupling is increased beyond critical the transmission curve becomes double peaked. Where there is no other coupling than magnetic the two peaks are symmetrical around the center frequency. Their deviation from the center frequency increases as coupling is increased but the amplitude does not decrease until very large values of mutual inductance are reached. The Q of neither side of the transformer is affected.

There are many variations on the idea of providing for variation of mutual inductance. The Hammarlund method, using a physically moving coupling coil, allows the coupling to be varied without introducing variations in capacitance. Other methods, such as the one used in the well known Hallicrafters SX-28, vary both mutual inductance and capacitive coupling so that the two peaks gotten with more than critical coupling are not symmetrical about the center frequency. In fact, one tends to stay about at the center frequency while the other moves.

It is possible to get symmetrical variation without using a moving element and this is done in some later variable coupling IF tranformers. Again, there is no effect on the Q of either circuit.

Now, the bandwidth of an IF or RF transformer at critical coupling _is_ affected by the Q of the component

coils which also affect the efficiency of the transformer.
However, the variation of this Q is not generally used to
vary the bandwidth of the transformer.
All of this stuff is covered in many books on receiver
design and basic circuit theory. The trick is finding one
which is not overly mathematical.

Rinus Jansen's book lists the MA161, but merely describes it as
a Fine Tuning Unit but no further details alas. Other units in
the MA1xx range are for the RA-17 or RA-117.

Battersea Library 29/3/99

Certainty level: 60%

This one is quite dull. During the month of March 1999, MI5 made another determined attempt to "get" me, substantially through radio programmes, through Jon Snow on Channel Four News, and through abuse in public, of which this is one example.

Recorded on my minidisc-walkman on Monday 29 March 1999, this audio file consists of two girls talking. One says to the other, "he's got something wrong with him." The usual words. How many millions a year do the Security Service waste on this? But they've denied it - how silly of me to forget. And they're not liars either, are they?

The complete installation *will* have been huge - probably a rack full -
as that's almost certainly off something like the COMCAN long-haul
teleprinter network.

Unfortunately, it's too recent to appear in Wireless for the Warrior,
but I'd expect the complete installatiopn to consist of two receivers
with diversity switching, "Racalator" or similar synthesized tuning
to 1 kHz resolution followed by the MA161 to take it down to 10 Hz,
ISB and FSK adaptors, and possibly the "front end protection unit"
if there were high powered transmitters at the same site.

Another possibility is that it's part of something like the RTA-191
which was a modular receiver that filled a 6-foot rack...

You need someone with experience of COMCAN or the Defence Teleprinter
Network, I suspect.

Best,

Chris.
Chris.

Guys.... Thanks for the replies. Colin's reply falls in with what I thought of. The modification sheets tell you what to do, a la Heathkit, but make no explanation of the results of same nor an updated schematic. I may have to re-draw the beast...maybe. I came close to buttoning the thing up and "dealing" with the buffer idle current (apparently benign) but decided to plug in a mic and have a look-see. No modulation. I discovered two, absolutely new-looking 47K resistors in the audio chain were dead open. No heat damage, nothing! They looked like NIB AB's out of the package (as does everything in this unit). Bottom line, I changed out the four green plastic Sangamo .1uf caps, two of which were associated with the bad resistors. I've not have bad experiences with these type of Sangamo's, up to now. So, it ain't just the BB's and the paper/wax jobs that go bad. Now we're good to go. 150 watts and 100% modulation. Doesn't look bad on the scope, too! Again, tnx for the comments.

Next projects: another NC-183D and a Lysco 5-bander. Urrah!

Royal Festival Hall 15/4/99

Certainty level: 100%

Another "day in the life of", this one. January and February were quiet; in March it all started again; by the middle of April the resurgence of abuse had been going on for over a month. And this, with 100% certainty, is one manifestation of the abuse.

On Thursday 15 April 1999, 1pm lunchtime, I was at the booking office at the Royal Festival Hall near Waterloo Station in London, buying a ticket for a friend. A woman was at the counter next to me. She said;

"it would kill it, you know, it would just be overkill...
.. they can't stop can they"

It was obvious to everyone, the ticket agents included, that her comments were directed at me, and that "they" (ie. MI5) were "killing" me.

I've heard similar things said at various other times, but rarely have their intentions been expressed as clearly as this. The woman also expressed the obsessive nature of MI5's preoccupation with me, by saying, "they can't stop can they".

Balham - LT bus (8/July/1999)

Certainty level: 90%

I am very sure about this one. I got back from holidays on Wednesday. There were two incidents, both on the tube, on the way back from the airport. There was a further incident the following day, Thursday, on the bus (the 155 I think) in Balham, where two girls started spouting abuse about "crazy", etc. Naturally I had my minidisc with me and was able to record their words.

The cynical reader might think my demeanour or behaviour had given rise to the taunts of "crazy" recorded above. But I assure you my behaviour on the bus would not have made anyone think I was ill; and the taunts the previous day were the same sexual words as previously; so I'm quite sure that these incidents are either deliberately staged, or indicative of an overall high level of awareness among the London public, particularly in the part of London where I live.

The MA-161 belonges as far as I know to the range of RA-17 and/or RA-117
receivers. I own one myself (serial number N1) but also do not know much
about the unit. Unfortunately also no documentation available....

Cheers,
Johan (PE1RHC)

Clapham South (17/Feb/2000)

Certainty level: 100%

In February 2000, MI5's hate campaign against me was in full swing. They sent people into the road where I live in south London, to swear at me and abuse me as I was leaving or returning home. One such instance is recorded on the above audio file.

On Thursday 17 February 2000, I had just left my home, en route for Croydon, when two youths approached, going in the other direction. One of them said with a smile on his face something which I didn't recognize, and still don't understand despite it being on this audio clip. His demeanour made it clear his statement was directed at me. I coughed, and in response to that, he continued his insult, calling me a "wanker", which is very clearly recorded on this audio clip.

Two days later, in the very early morning of Sunday 20 February 2000, MI5 inflicted another insult against me just outside my house, when, returning from Croydon, two youths approached (MI5 agents always go in packs of at least two - they're too cowardly to go anywhere on their own) and one of them said quietly and bitterly to the other that "he's shitty, very shitty".

It is still comparatively rare for MI5 to send people to my house, or to my road, to harass me. Usually they know where I'm going to, since they have bugs on my phone and in each room of my house; and they send people to that location, or on the train or tube getting there.

Thanks to all. Meantime I've uploaded some pictures at

http://fotoalbum.alice.it/iovane

The unit has been cleaned just enough to take pictures, and needs more
accurate cleaning. Anyway I've powered it up for a couple of hours and
it seems to work, as it delivers a tunable RF signal around 1700 KHz.
All the best,
Antonio

Indeed I purchased three of these units along with two huge Racal KHz
synthesizers, in the 70's.
I dismantled the synths and one MA161 at that time. Probably they were
parts of the same setup.

Clapham Junction (6/May/2000)

Certainty level: 60%

On Saturday 6 May 2000, I was in Clapham Junction, shopping and visiting the library. At precisely 12:29pm, the above audio clip was recorded, in front of Arding and Hobbs department store. One girl was saying to her friend,

"He's a homosexual, they can say whatever they want."

There are several reasons why I think this comment might be about me. Firstly, temporal proximity to other such incidents. The persecution had restarted about two to three days before this clip was recorded. Cause of restart unknown. Personally I think it's because I was going on holiday to France the following Monday - MI5 do like to take holidays abroad at the taxpayer's expense, and inventing reasons to resurrect their hate campaign just before I go on holiday is something they've done before.

Secondly, although I am not gay, they have used such references against me before. At Oxford Computer Group in 1994, manager Steve Mitchell simultaneously abused me and another employee but saying we were "of a similar bent". Such insults show latent or quite overt homosexuality on the part of the abuser.

Thirdly, the sort of people who abuse on the basis of mental illness are the same people who abuse others on the basis of sexuality, race, religion, etc. If they can abuse a disabled man, then they will surely do so based on the other criteria mentioned.

There is still some room for doubt, though, which is why I have assigned this recording a certainty level of only slightly above evens. But "they can say whatever they want" is what gives the game away; they just choose a differentiating feature on which to base their abuse; and if one such feature gets too boring ("we've called him a nutter for the last ten years so now we'll call him something else") then they invent a different lie to throw at me.

Balham High Road (3/Nov/2000)

Certainty level: 60%

On 3 November 2000, I had just got off the bus in Balham High Road, when I heard a group of schoolgirls shouting and laughing. One of them yelled;

"He's an idiot you know."

You can hear this on the above clip; it is followed by laughter. I am not quite sure this is about me, which is why I have only given it a two in three probability. I have been attacked many times with the word "idiot", which seems to be a favourite with intellectual lightweights who want to bring down bigger game. (Back in 1992 I was so worried by the attacks on my intelligence that I took the test and joined Mensa...... does that make me a *clever* idiot? Never mind.)

Crescent Grove, Clapham Common (2/Dec/2000)

Certainty level: 100%

This is one of those clips where I am absolutely, 100% certain it's inflicted by MI5 on me, because of background, context. On Saturday 2 December 2000, I was walking from my home to a pub on Clapham Common, and on the way was in proximity to a group of three English youths who were walking the other way. They turned from the main road into a private estate called Crescent Grove. Here is what they said;

(first youth) "He masturbates!"
(his mate responds) "Yeah, he masturbates!"
(and again) "Thief!"

There is a lot of context associated with this incident, which I will now relate.

Firstly, the verbal sexual abuse is a popular one with MI5, and as a statement about me is currently mostly in their imaginations. The accusation has to be seen relative to MI5's persecutory actions in late November and early December 2000, and in fact for some months leading up to this. Their relevant activities in June 2000 are documented in a message in this evidence item; following from that, they sent someone to simulate an act in front of my window, which was captured on film.

It is the publication of the video of their agent performing the act on himself which caused MI5 to restart this thread of harassment in the first few days of December 2000. But there are some subtleties; I uploaded the digitised video to this website on 26/November/2000; but I did not announce its existence on the newsgroups until Sunday 3/December/2000. These youths' slur was made the previous day, on Saturday 2/Dec. That tells us quite a lot. According to my website logs, there were no accesses to the video file before Sunday 3/Dec. So why did MI5 restart this particular thread of abuse, before their agent's activities were published on the newsgroup? The conclusion we reach is that they were watching my internet connection, either decoding the telephone line, or at the ISP; and/or they may be able to physically see what is on my notebook computer's screen, from RF transmissions from its VGA circuitry. I do not know whether the latter is technically feasible, but the former certainly is, and I have known for years that MI5 bugs my internet activities and phone calls. It is from their observation of my internet connection that they were able to tell, without accessing the video file over the net, that it was of their agent in a compromising position; and it was from that observation that their shouted slur on 2/Dec emanates.

The second accusation, "Thief!", is even more interesting. It relates to occurrences from June of 2000, some six months before these youths threw the word at me. It shows just how wide in reach geographically and temporally the MI5 persecution is; they react to something which happened half a year previously.

In the first half of 2000, MI5 made a determined assault on my friendships. In one particular case, that of A. whom I had known for virtually all my life, they partly succeeded. This person made pointed references to me which made it clear he knew what was happening; at one point he started asking "do you know anything about the FBI and the CIA". In June 2000, we went to see a film in the West End. I paid for both of us, and then asked him to return what I had paid for his ticket, some �7.50. He was reluctant to do so. Eventually he returned �5, settling for the lesser gain of �2.50.

I did not call him a thief to his face, but I may have spoken the word while I was at home, either conscious or in my sleep. MI5 have very tight control over everything I do and say in my home through their bugs; if I say anything against someone in "their" camp, they turn round the accusation against me. So, from the fact that A. tried to garner a few pounds at my expense, MI5 create the accusation, six months later..... "thief!".

Virgin Radio-Jon Holmes (4-5/Jan/2002)

Here are two segments from Virgin FM, one on Friday, the other on Saturday, both from the Jon Holmes evening show.

Certainty level: 80%

In early January 2002 I listened for the first time in some months to Virgin Radio, specifically to the Jon Holmes evening show on Friday 4 January 2002. They promptly attacked me verbally. Again, context is relevant. There are three instances in the space of two minutes on this extract;

00:18 "are you lying?"
00:22 "it's not fair"
01:24 "everyone at the amateur c+ turbo programmers club found it hilarious"

The first phrase is a straight slander. MI5 were trying to portray me as a liar at around this time; I have other audio with the same accusation. "are you lying?"; unsophisticated.

It's closely followed by the words "it's not fair". Note carefully the way he says it, quickly, as if to deny what he says. The phrase "not fair" was first created by OCTS MD H S.-W. in Nov/1992, and picked up on my first visit to hospital soon after "they should have paid your fare").
Again, unsophisticated parrotting of a key phrase.

The third phrase is explicable through contemporaneous context. That morning I had phoned about a C++ course. "c+ turbo programmers club"... again, somewhat brazen we're-listening-to-what-he-says-on-the-phone, and he-can't-prove-it. Something got lost in translation from MI5's watchers to Virgin, because "c+ turbo" means nothing.... there is no C+ turbo language, only C++, of which Turbo C++ is one implementation.

Certainty level: 80%

I wasn't entirely convinced from Friday's programme, but the following evening's show confirmed it. It contained a number of references to my condition, of which the following excerpt is one such;

00:09 "I'm not well, and no-one cares"
00:24 "my voice sounds all funny"
01:01 "do you mean people that aren't mad"
01:05 "medical problem is it"

"I'm not well" doesn't mean he has a cold; it means he is being sarcastic about my mental illness. "my voice sounds all funny" refers to the change in nature of my voice when acute illness hits. "do you mean people that aren't mad" is obvious. "medical problem is it"..... rubbing salt into the wound.

Hello & thanks for the read.
I need 2 of the small skirted knobs with a white pointer on the skirt. These
knobs also have the round aluminum cap at the top of the knob.
In fact, I have the knobs so I just need the aluminum caps to finish this
nice Hammarlund HQ-215 receiver.
I believe these knobs are unique to this receiver only, may be others but
don't know for sure.
If you can help with thw knobs or just the aluminum caps, let me know $
amount, etc.
Larry McGee

Balham Hill Post Office (14/Nov/2002)

Certainty level: 80%

By mid-November 2002 the persecution had again dwindled, as happens sometimes, when along came this item.
I spent most of my time at home, going occasionally to the shops in Clapham South, or into town to meet people. On this particular
Thursday I only left the house once, for less than fifteen minutes to post a letter (special delivery, because my ordinary and
recorded delivery letters had been disappearing en route for some time - not that anyone would accuse MI5 of such petty harassment).
At the post office counter there was an Asian guy talking into his mobile phone and grinning away. There is a probability that
his comments were directed at me, as I will explain further. The second segment of audio closely follows the first segment.

"you'll do it today? let's meet about 3 o'clock and have some lunch. I got stuff to do and I'll go to the bank,
get this sh.. fucking moving yeah. Even just a little bit do something. He doesn't understand, you know what it is,
I don't want to tell him again cause then he might, he thinks we're having a go at him, I'm not having a go at him,
I'm explain to him"

Explanation: The guy is talking about some bloke who is unnamed, however it might be interpreted as being in code about me.
"I'll go to the bank"... variously interpretable, either literally, or as sounds-like "wank" which has been a consistent
theme in MI5's abuse. "get this shit fucking moving"... abuse... could be interpreted as MI5's criticism of my inertness.
The state spends hundreds of thousands of pounds a year - they want to see some result, not just neutrality and ordinariness.
"he doesn't understand"... MI5 claim I'm stupid... but the numbers and bits of paper prove otherwise, so perhaps what that
is really about is their agents' subconscious perception of themselves.

"having a go at him"... sounds like they're having a go at me, doesn't it? You might take the audio at face value and assume
it's about some other guy, but it's normal MI5 procedure to pretend to be talking about someone else, and make the content of
the message very relevant to me, or their perception of me.

"for some reason it doesn't get into his head, I don't know why... he's lost it completely, hasn't he"

What reason is there for it not getting into his (my) head? Stupidity is implied. Also implied is that it does get into his head;

we're intentionally causing him damage. He's lost it completely... for some time I have suffered from OCD... lost it completely
is the persecutors' observation of my illness, which they see through the surveillance on my home, which they caused.

Eclipse pub in Balham (20/Dec/2002)

Certainty level: 70%

On Friday 20/December/2002 I went to Balham to do some shopping and eating. When I went into the Eclipse pub for a meal
there were two girls already at the bar being server, I ordered and sat down near the window. They sat down at the opposite

window seat, out of sight. After a few minutes they started screaming repetitively "section, section". They were reading something and were trying to pretend that they were just repeating from what they were reading, but in reality it was quite obvious they were talking about me, specifically to confinement under mental health.

As you can guess the behaviour of these unwise young things shows them to be from the underprivileged category which due to the natural laws of society is seldom seen in the better classes of restaurant - the McDonald's next door is their more usual habitat. My guess is that these two females were deliberately placed in the Eclipse with orders to be offensive to me personally. The alternative would be that no-one had ordered them and they were just being rude on their own account, but that is improbable, for two reasons; first, I was out of sight of them and one does not usually "pick on" a person one cannot see; secondly, there had that afternoon in Balham been other, less distinct incidents immediately preceding this, and it is inferable that MI5 were making quite a serious effort to create a physical incident, as they have done on numerous occasions previously. I give my interpretation a two in three chance of validity.

>> Old Chief Lynn, W7LTQ
>>
>>
>   I tried to find an illustration of the effect I am talking about on
> the web but could not. It would make things simpler.
>   Q is a measure of the ratio of inductive reactance of an inductor to
> resistance. the higher the value of Q the better the inductor but there
> are circumstances where the Q may be deliberately limited. The bandwidth of
> a resonant circuit at resonance is affected by Q, in fact, the definition
> of Q is the ratio of the half-power bandwidth to the resonant frequency.

> Varying the Q of a resonant circuit also varies the amplitude, the lower the Q the greater the losses and the lowe the amplitude.
>
> Varying bandwidth by varying the mutual inductance of a transformer behaves in a different way. Up to a value of coupling known and critical coupling the bandwidth of the transmission curve does not change significantly but does increase in amplitude. If coupling is increased beyond critical the transmission curve becomes double peaked. Where there is no other coupling than magnetic the two peaks are symmetrical around the center frequency. Their deviation from the center frequency increases as coupling is increased but the amplitude does not decrease until very large values of mutual inductance are reached. The Q of neither side of the transformer is affected.
>
> There are many variations on the idea of providing for variation of mutual inductance. The Hammarlund method, using a physically moving coupling coil, allows the coupling to be varied without introducing variations in capacitance. Other methods, such as the one used in the well known Hallicrafters SX-28, vary both mutual inductance and capacitive coupling so that the two peaks gotten with more than critical coupling are not symmetrical about the center frequency. In fact, one tends to stay about at the center frequency while the other moves.
>
> It is possible to get symmetrical variation without using a moving element and this is done in some later variable coupling IF tranformers. Again, there is no effect on the Q of either circuit.
>
> Now, the bandwidth of an IF or RF transformer at critical coupling _is_ affected by the Q of the component coils which also affect the efficiency of the transformer. However, the variation of this Q is not generally used to vary the bandwidth of the transformer.
>
> All of this stuff is covered in many books on receiver design and basic circuit theory. The trick is finding one which is not overly mathematical.
>
> Richard Knoppow

Yes, I must agree with Richard's well written explanation of the effects of overcoupling (more than critical coupling). However I do not believe that in the instance of the 453's 85kc IF cans that with the rods pushed all the way in that they became overcoupled.
With resultant double peaked bandpass.
This is of course is just my observation with a bit of practical measurment using relatively crude methods. It would seem then,to me, that the double peaked curve encountered with overcoupling (more than critical coupling) is, in this instance, not the condition that results in a narrower bandpass when the coils are moved further apart.

During the glory days of TV service, IF alignment with sweep generators and oscilloscopes, it was quite fascinating to see theoretical bandpass tuning in the real world. Overcoupling was often (always?) used to achieve the necessary wide bandwith for a TV channel. While transformer coupling was not normally adjustable, the peaks and skirts of the quite wide bandpass could be moved around with the adjustments available, and measured with fairly simple equipment.

But I digress (a lot, sorry)
Old Chief Lynn

Barbican Library - 6/Feb/2003

Certainty level: 100%

Here's an item from early February 2003, at which time Security Service were re-igniting hostilities against me, a direct result of my appeal for a legal hearing against their organisation. On Thursday 6/Feb/2003 I went to the Barbican in central London with my mother to visit the library and have a meal. Security Service naturally knew about it because it had been mentioned the previous day in our house which is under constant surveillance on grounds of "National Security", so they may have been able to inform staff there to say something to me, as has been done elsewhere. Two of the people at the Enquiries desk in the library obviously knew of my circumstances, I spoke to one of them who was very polite, and while I was waiting I heard the other speaking with a little less politeness, as recorded on this audio file. He said, "I spy", to start a game of guess what "I spy"; unsubtle, MI5 Spy. Then, at the 34 second mark on this clip he said;

"So obvious you couldn't even get that. I shall have to kill you. ha, ha, ha"

The words "I shall have to kill you" are interesting because such overt expression
is rarely heard. Security Service wish me extinct.
Some years ago they were openly shouting "suicide" at me, so that is established.
But there is an element of doublethink in their attitude;
they use people's natural prejudice against mentally ill, who are popularly
painted by media as being aggressive, to try to tinge the group's
view of me and MI5's actions against me. The Security Service religion is that the
country's enemies are deadly, and must therefore be
extinguished. Hence, we must seize eagerly upon the disabled schizophrenic from
Clapham, and throttle him, because who knows what'll happen if we don't.

There may be a subtle agenda of population control in what the Security Service
have been doing in this country since 1990. In the current issue
of 2600 Magazine (the Hacker quarterly, which I read from time to time) there is a
quote from Hermann Goering on page 2; "the people can always
be brought to the bidding of the leaders. All you have to do is tell them they are
being attacked. It works the same in any country".
2600 printed the quote as a comment on the projected war against Iraq, which does
not appear to pose any threat to the territory of
those countries which wish to invade it. However the quote is somewhat relevant to
my case, which is widely known about within Britain;
the security service instructs all right thinking citizens to do MI5's bidding and
band together against a common enemy, while at the same time
there is a suggestion of "look what'll happen to you if you don't obey us".

Fanatic's Fare for the Common Man

Certainty level: 90%

The article reproduced below was penned by Bernard Levin for the Features section of the Times on 21 September 1991. To my mind, it described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

There is a madman running loose about London, called David Campbell; I have no reason to believe that he is violent, but he should certainly be approached with caution. You may know him by the curious glitter in his eyes and a persistent trembling of his hands; if that does not suffice, you will find him attempting to thrust no fewer than 48 books into your arms, all hardbacks, with a promise that, if you should return to the same meeting-place next year, he will heave another 80 at you.

If, by now, the police have arrived and are keeping a close watch on him, you may feel sufficiently emboldened to examine the books. The jackets are a model of uncluttered typography, elegantly and simply laid out; there is an unobtrusive colophon of a rising sun, probably not picked at random. Gaining confidence - the lunatic is smiling by now, and the policemen, who know about such things, have significantly removed their helmets - you could do worse than take the jacket off the first book in the pile. The only word possible to describe the binding is sumptuous; real cloth in a glorious shade of dark green, with the title and author in black and gold on the spine.

Look at it more closely; your eyes do not deceive you - it truly does have real top-bands and tail-bands, in yellow, and, for good measure, a silk marker ribbon in a lighter green. The paper is cream-wove and acid-free, and the book is sewn, not glued.

Throughout the encounter, I should have mentioned, our loony has been chattering away, although what he is trying to say is almost impossible to understand; after a time, however, he becomes sufficiently coherent to make clear that he is trying to sell the books to you. Well, now, such quality in bookmaking today can only be for collectors' limited editions at a fearsome price - �30, �40, �50?

No, no, he says, the glitter more powerful than ever and the trembling of his hands rapidly spreading throughout his entire body; no, no - the books are priced variously at �7, �8 or �9, with the top price �12.

At this, the policemen understandably put their helmets back on; one of them draws his truncheon and the other can be heard summoning reinforcements on his walkie-talkie. The madman bursts into tears, and swears it is all true.

And it is.

David Campbell has acquired the entire rights to the whole of the Everyman's Library, which died a lingering and shameful death a decade or so ago, and he proposes to start it all over again - 48 volumes this September and 80 more next year, in editions I have described, at the prices specified. He proposes to launch his amazing venture simultaneously in Britain and the United States, with the massive firepower of Random Century at his back in this country, and the dashing cavalry of Knopf across the water, and no one who loves literature and courage will forbear to cheer.

At the time this article was written I had believed for some time that columnists in the Times and other journalists had been making references to my situation. Nothing unusual about this you may think, plenty of people have the same sort of ideas and obviously the papers aren't writing about them, so why should my beliefs not be as false as those of others?

What makes this article so extraordinary is that three or four days immediately preceding its publication, I had a meeting with a friend, during the course of which we discussed the media persecution, and in particular that by Times columnists. It seemed to me, reading the article by Levin in Saturday�s paper, that he was describing in some detail his "artist�s impression" of that meeting. Most telling are the final sentences, when he writes, "The madman bursts into tears, and swears it is all true. And it is." Although I did not "burst into tears" (he seems to be using a bit of poetic licence and exaggerating) I did try hard to convince my friend that it was all true; and I am able to concur with Mr Levin, because, of course, it is.

At the beginning of the piece Levin reveals a fear of being attacked by the "irrational" subject of his story, saying "I have no reason to believe that he is violent, but he should certainly be approached with caution". This goes back to the xenophobic propaganda of "defence" against a "threat" which was seen at the very beginning of the harassment. The impression of a "madman running loose" who needs to be controlled through an agency which assigns to itself the mantle of the "police" is also one which had been expressed elsewhere.

In the final paragraph of this extract, his reference to Everyman�s Library as having "died a lingering and shameful death a decade or so ago" shows clearly what sort of conclusion they wish to their campaign. They want a permanent solution, and as they are prevented from achieving that solution directly, they waste significant resources on methods which have been repeatedly shown to be ineffective for such a purpose.

Private Eye, 23 Oct 1992

Certainty level: 25%

I'm not really sure whether this cover was intended to get at me,
or whether it was re-interpreted after publication to be about me.
This issue of Private Eye came out in October 1992, by which time I had

been under severe continuous pressure at work and from the general population in Oxford for many months. It had John Major saying to his wife, "Come back, Norma!" under the title "Major's support lowest ever".

There's a story behind this. In late October I was in the local pub (the Rose and Crown, nice traditional name eh) with two people from work, Simon and Phil. Phil had with him a copy of the current Private Eye. These are both "nice people" and on my side, I hasten to add. Simon pointed out the message on the magazine's cover to Phil, and asked "what do you think about that". Phil answered, "Well usually they [Private Eye] get it right". This exchange happened in front of me. Although I was ill at the time (this was before I'd started taking medicines) I hadn't read anything into the Eye cover until these guys pointed it out to me.

Sometime later, again in the same road, a student shouted to one of his friends, "so when are you COMING BACK?", again in front of me.

What I realised Phil thought it meant was a double-entendre, the "coming" referring to the act of ejaculation, the "back" referring to the human back-side. So in a play on words you get a person who is referred to as a back-side ejaculating. Charming.

Of course, Phil could have been wrong. Perhaps there was no such meaning intended by Private Eye. Perhaps he saw meaning which wasn't there. Perhaps the moon is made from green cheese. Who knows?

Victor Lewis-Smith

Certainty level: 10%

Victor Lewis-Smith has issued a denial through his webmaster John Hayward-Warburton regarding this article; he says quite categorically it's not written about me. I kind-of sort-of believe him, but I think the conspiracy is so wide that the phrase "Eventually, I had to leave because they were all trying to kill me" could have been intended to be as if from any paranoid person, but could have been influenced by my case in the particular. So the influence could have been sort-of subconscious.

This article is from the Evening Standard of Thursday May 8, 1997.
It is titled "Goon, and best forgotten" and may be found on page 31.

I think VLS has written/produced stuff specifically about me in the past, both in his Evening Standard column, one of which is reproduced below (in another case, he was talking about computer hacking, and I think that was directed at me), and a television programme in around late 1993 when he has a taxi driver who says "they're all trying to kill me guv" and VLS responds "you're supposed to be quite intelligent aren't you".

However, his webmaster has issued a formal denial on his behalf, so it is not for me to oppose what he has stated categorically.

I have seen pictures of several SX-28 or SX-28A receivers that have
what appears to be an additional IF stage modification. This mod is
right in front of the power transformer, and has a miniature tube
(6BA6 ?) and an IF can mounted on a small sub-chassis.

I would appreciate any information regarding this modification. A
pointer to anything published would be ideal.

Thank you.

73,
Jeff

Although I am not familiar with an additional if stage, it seems there would not be much advantage in adding such a stage. Any additional gain would be at a cost of reduced dynamic range.

I would be more inclined to think it was a product detector circuit, using a 6BE6.

A product detector was also my first thought, but why the IF can?

Introduction to the Sent Faxes webpages

Between 1998 and April/2000 I sent some thirty articles on the subject of the MI5 Persecution to British politicians, media, legal and diplomatic entities in the UK. Of those articles 24 are reproduced on this part of the website. They were originally composed as Microsoft Word documents, and saved to HTML form for publication here. A few of them were slightly edited in format for readability.

You will see that these articles cover quite comprehensively what has been going on since 1990, there being quite a lot of material to cover, since it is a rare week that goes by without MI5 making some harassing or threatening action against me. "How could it be True?"... they use the mental illness which they induced in me as a ready explanation for my complaints. Who started it, why did it start, why it continues... these faxed articles provide examination in more depth of the treatment in the Frequently Asked Questions webpages. The sheer meaninglessness of the Secret Police actions is highlighted; their operatives make their livelihoods by cynically exploiting the taxpayers, when in a more responsible country they would be looking at the inside of prison cells.

The validity of this observation is proven by their reaction to my several suggestions in the articles that I would cease sending faxes if MI5's agents (and it's always the same people doing the persecution) desisted from continually harassing me. A number of times, you will see in the faxed articles, I have suggested that we come to a "peace of mind agreement" where I cease complaining and they cease harassing. On one occasion, I wrote to Hugh S.-W., the director of OCTS where I was employed in 1992-94 and who is aware of the circumstances, asking that he intercede to bring this matter to a close, by initiating a meeting between myself and the persecutors to mutually settle our differences; he didn't reply, but MI5 did soon after - they said "This is what you wanted, wasn't it?, some sort of confrontation?".

The reality is the people stalking me are not interested in any settlement; for them crime pays, and pays handsomely; moreover it is State-approved crime; the Police will never investigate or take action; it is corruption on an incredible level and scale, and it has gone on for over a decade.

You will see that the articles contain three elements; firstly, there are original written articles, many in the first half of 1999 when I was writing new articles every week and sending them by email and fax during the weekend; then there are "MI5 Persecution Update" articles, which list happenings recent to a particular transmission; and finally there is the "old faithful" Frequently Asked Questions article which was sent on a few occasions during the three year period. These articles generated a number of interesting responses from politicians and other recipients, many of which are documented in the "received faxes" area of these webpages.

I hope you enjoy reading these articles. I'm not as angry as these articles necessarily make out, only sometimes, usually soon after the persecutors have said something unpleasant at me; the purpose of putting lots of fire and ire into the mix is to try to chuck it into the public domain which might lead to MI5 being forced to curb their actions. Unfortunately that aim was not achieved, despite many, many thousands of faxes being sent. Also, if any policemen are reading this, then I'm (a bit) sorry about the rude things I said about "the Bill" in one or two of the articles; the police have never done me any harm (yet) by commission, only by omission of doing anything to investigate my complaints or treat them seriously.

Because a product detector works at IF/BFO frequencies and puts out audio. Most of the high performance product detectors of that time frame used a scheme that required at least one center tapped transformer that works at IF frequencies. Look up some circuits for diode ring demodulators.

Plus, the passive balanced demodulators are usually a bit lossy, so there might be a need to pump up the IF gain a bit to compensate for the demodulator loss.

Faxes Sent to British Diplomatic/Legal logs

During the 1998-2000 period my records indicate that I sent at least 3,642 faxes to diplomatic and legal offices
located in the British isles, of which 3,345 went via TPC's email-to-fax service and 297 were sent via fax-modem
direct from my computer. The actual figure is somewhat higher since, for most of this period, whenever a recipient
asked to be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

Good luck.

Look in the magazines from the fifties, and there were various ads for things for sale that had to have sold in limited quantities since they were not a major company and you don't see any real reference to the rigs other than those ads. A step above someone building for themselves.

But, I think a better explanation for your rig would be a club project. There was a wave when that seemed a popular concept, the members get together and either choose an existing project from the magazines or design something, and then they'd buy the parts in bulk and every member signed up would get a kit. They might even build them up together.

WHich doesn't really help. If it was a club project, that still doesn't tell you whether the club threw the design together, or picked some existing project.

FS: Alpha 77D Mint Condition INSIDE and OUTSIDE!!!!!!!!!!!!
Has 160 Meters!!

This Alpha has new front and side panels. New front panel says 77SX,
But its the 77D, This is a later model 77D and the later Peter Dahl
power transformer. So if you buy the kit they sell online, you can add
and have two 3cx1500a7 tubes inline.
I have a spare tube 3cx1500a7 full output which will go with this
sale. Not only is this a BEAUTY!!! But also works like NEW!!!!!!!!!
Nothing wrong with it at all. 4500.00 Pick up NJ

Which is the best of the old boat anchor National receivers of the NC-xxx
(188, etc.) vintage, for SSB, AM, and CW? Would like something with a
product detector for best results on SSB.

Thanks...

A friend of mine just bought a NC-303, it works great
receiving SSB.

A product detector rules out a lot of the older classics, unfortunately :(
But, like Ron mentioned, the NC300 series were very nice receivers, although
a bit big (they used a much larger cabinet than needed for what is inside.)

Pete

The NC-300 and NC-303 are pretty good receiveirs, and have product detectors. They are ham band only, though. A plus is that they cover 160 - which the Collins do not.

I had an NC-109, which is a NC-188 with a product detector. I like mediocre receivers if they have redeeming value (such as ugly, simple or cheap. Unfortunatley, the NC-109 is mediocre with no redeeming value. It was so ordinary I could not stand to have it sitting on the shelf, and sold it at a swap meet.

The NC-400 is a very nice unit. There are many older HRO units around. They are marvelous - and you can add a product detector to them.

Colin K7FM

But there were all those mods to fix up the NC-300, which is interesting
because wasn't that the receiver National ran a campaign to collect ideas
on what "your best receiver would have..."?

I recall one article by Hank Cross, W1OOP, who said the receiver was
almost great for SSB but not quite, and then proceeded to show modifications
that would fix it.

Most of the National receivers were old school, ie not set up specifically
for SSB.

Foxy's Showtime on Capital FM 25/11/98 7.35pm

Certainty level: 100%

This one, I can say with absolute certainty, is about me. It was recorded on my Sony Recording Walkman on the evening of Wednesday 25 November 1998. It doesn't mention me by name, so the objective observer might have trouble understanding why I'm so sure it's about me. I'm sure, because the harassment had restarted over the period when this piece was broadcast, and what Capital transmitted would have been in context with events at the time. (Sorry if that explanation is somewhat opaque, but I don't really want to embarrass myself by giving an explanation in detail, and an intelligent reader should be able to work it out for him/her self.)

This isn't the first time Capital have "got at" me; they were doing so right at the very beginning in summer 1990, when they said, "if he listens to Capital then he can't be all bad"; and Tarrant made remarks about me in his breakfast show in spring 1994, when he said, "you know this bloke? he says we're trying to kill him. We should be done for attempted manslaughter."

Unfortunately I didn't record those previous, much more conclusive instances of harassment by Capital DJs, and Capital Radio tells me they only keep recordings for three months. But lately I've been recording everything, and here is one product of that recording.

Neil Fox was introducing some petite Swedish songstress, sounded like Amelia, when he said something about her petite-ness ;

"she's a big big girl, actually she's really about tiny, she's this big, would you say what less than....."

then one of his studio staff shouted, "six inches"

then Fox laughed and said, "less than a meter tall, definitely"

What I think the "six inches" referred to should be obvious. I think it's sexual abuse directed at me.

Also there were a lot of words like "crazy", "mad" etc on this programme, which reinforced my belief that this was on purpose directed at myself.

I think Fox may be something of an unwilling participant in this abuse, he doesn't want to be an abuser but the persecutors are using his show and his staff to get at me. This is not the first time this sort of thing has happened from his show; and my guess is that it won't be the last
